

## Airbus integrates Mobilicom's solution

- **Global aerospace leader Airbus has chosen Mobilicom's SkyHopper solution to be integrated into its drone innovation platform**
- **Sale to Airbus, one of the world's top aeronautics and space companies is a testament to the quality of Mobilicom's technology and capabilities**
- **Sale broadens SkyHopper's worldwide presence and validates the SkyHopper solution**
- **Airbus to present the world-first solution at upcoming UAV show in France**

**3 October 2018** – Mobilicom Limited (Mobilicom) is pleased to announce that it has received an order from world-renowned global aerospace pioneer Airbus.

Airbus has integrated Mobilicom's SkyHopper Pro into its innovation DJI drone commercial platform solution. The platform is used to broaden Airbus' vision and demonstrate its mission operation algorithm and software in the commercial and homeland security drone space.

Airbus is a global leader in aerospace and develops cutting-edge technologies to shape the future of flight. Airbus delivers aerospace products, services and solutions to customers on a global scale and is one of the top aeronautics and space company worldwide with over 67 Billion Euro in revenues and over 129,000 employees worldwide (2015).

SkyHopper by Mobilicom is used as a communication solution for control, telemetry and video or payload sharing to and from the drone platform to the ground control systems and users. Airbus is exploring the use of SkyHopper's holistic solution and end-to-end product offering as part of the system.

Mobilicom's CEO, Oren Elkayam commented:

"We are proud that Airbus, one of the world's leading aeronautical corporations, has taken an interest in Mobilicom's products. Our performance is a perfect fit for Airbus and this sale is a key step towards expanding SkyHopper's global presence.

"The growing interest in our cutting-edge products validates our world-leading technology and demonstrates the need for our unique solutions. Winning a partner like Airbus will greatly accelerate the company's development and we expect will lead to further significant opportunities in the near future."

Airbus exhibited their innovation drone platform, integrated with SkyHopper by Mobilicom in France at Drones Paris Region Expo 2018. The exhibition provides an opportunity for leading solution providers to showcase the full range of innovations and new drone technology.

**About Mobilicom**

Mobilicom Limited (ASX: MOB) designs, develops and delivers communication solutions for mission-critical and remote mobile private networks that can operate without the need for existing infrastructure. Mobilicom products and technologies are based on an innovation approach that merges 4G and Mobile MESH technologies. With versatile network topologies and a large product portfolio, Mobilicom offers several product families that have been commercially deployed. Mobilicom has developed proprietary technology for a product portfolio that is fully designed and developed in-house with the utmost flexibility and scalability to optimise to customer needs.

Mobilicom has two entities. The first is Mobilicom's core business entity, with solutions that cater to mission-critical communication in the Government and Enterprise sector with applications of Offshore Oil, Gas and Energy; Homeland Security and Public Safety and Unmanned Vehicles. The second is its SkyHopper entity, a provider of end-to-end hardware and software solutions which targets the Commercial and Industrial Drones and robotics sector. SkyHopper's holistic approach enables drone manufacturers and service providers to focus on their own business objectives by reducing time-to-market, minimising resource expenditures and increasing their chances for success.
