## Syntonic September 2018 Quarterly Review and Appendix 4C

### Highlights:

- Record quarterly revenue advancing to A\$988,861 (unaudited), up 105% on last year's corresponding period and 147% over last quarter
- Quarterly cash receipts of A\$.6m were due to payment terms related to new carrier deployments and activations, along with initial partial contribution from the Company's recently established Brazilian subsidiary
- Mobile billing services, acquired from Zenvia Mobile Servicos Digitais S.A, to complement Freeway's acquisition and engagement platform, providing a complete mobile advertising solution for carriers
- New license agreement with Vodacom Group Limited ("Vodacom") to enhance Vodacom's mobile advertising business with Freeway's sponsored data and data rewards services
- Syntonic's Quarterly Active Users (QAU), a leading indicator of revenue growth, reached 4,149,269 active users during the quarter, up 104% from previous quarter
- Cash balance of A\$2.88 million following one-time acquisition and investment costs of A\$1.22m

**Seattle, Washington – Syntonic Limited** ("Syntonic" or "Company") (ASX:SYT), a leading US-based mobile platform and services provider, is pleased to provide its Appendix 4C – Quarterly Cash Flow report for the three months ending 30 September 2018, along with a summary of its business progress during the quarter.

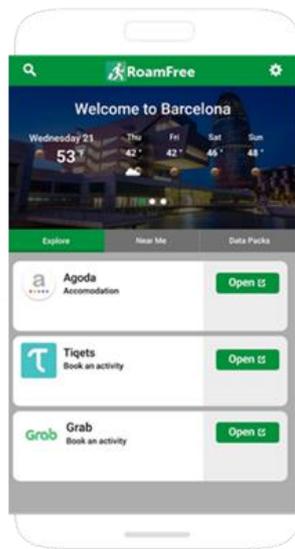

### **Syntonic CEO and Managing Director, Gary Greenbaum said:**

"Syntonic continues to build its global commercial reach and is pleased with the progress reported in the first quarter of FY19. Our new agreement with the Vodacom Group, one of the world's largest telecommunications companies, will enable Vodacom to enhance its mobile advertising business with sponsored data and data rewards for apps and web sites.

“Building diversity in our revenue sources has been a key focus for the management team. During the quarter we expanded our revenue streams with new carrier deployments and were able to recognise early Freeway revenue from our recently acquired, Brazilian mobile commerce business. With the acceleration of tier-1 carrier deployments and the full operationalisation of Syntonic Brazil, we remain confident about the Company’s short-term and long-term outlook.”

## Operational Results

### Carrier Deployments

In August 2018 Syntonic signed a service agreement with Vodacom Group Limited (JSE: VOD), granting the company a license to deploy a white-labelled version of the Syntonic Connected Services Platform (“CSP”) to enhance Vodacom’s mobile advertising business with Freeway’s sponsored data and data rewards services. Syntonic will generate revenue based on data usage generated by advertisers and brands, commissions for data-free downloads of apps, and fees for accessing platform services.

With a staged launch expected to commence during the December 2018 quarter, the technology will initially be deployed to Vodacom subscribers in South Africa, where Vodacom has a 40% market share and supports 20.3 million mobile data subscribers<sup>1</sup>. Proposed future expansion plans include all of Vodacom’s sub-saharan carrier network that services 103 million customers.

Subsequent to the quarter end, Smart Communications’ (“Smart”) released an updated version of the *RoamFree* traveler app, powered by a white-labelled version of Syntonic’s Freeway

<sup>1</sup> Vodacom’s “Annual Results for year ended 31 March 2018” presentation

For personal use only

Roaming Service™. *RoamFree* is available to all Smart's 57.7m mobile subscribers<sup>2</sup> to provide sponsored data when travelling internationally. Syntonic generates revenue from travel service providers who pay Syntonic an affiliation fee, often a percentage of the transacted travel service, and from commissions paid by Smart for all international data plans purchased with the *RoamFree* app.

Tata Communications ("Tata"), a global telecommunications provider (NSE: TATACOMM) and the flagship telecom arm of the Tata Group, launched, subsequent to the quarter end, its digital commerce platform, *opari*, and powered by the Syntonic CSP for its sponsored data and data rewards services. The service has been initially launched on the Safaricom network, the leading mobile operator in Kenya with 70% market share and 28 million mobile customers<sup>3</sup>. Syntonic generates revenue based on sponsored data sales to *opari's* customers, which include content providers, app publishers and brands.

Syntonic's announced mobile operator engagements

### Active Users

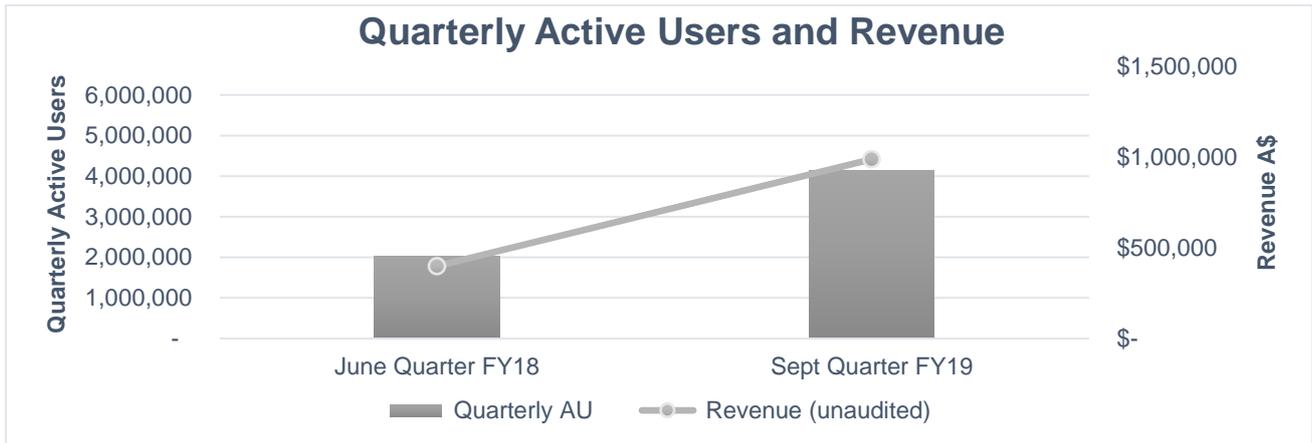

Syntonic is pleased to advise shareholders that it will regularly track and report on Quarterly Active Users, ("QAU"). The QAU measures the revenue bearing potential from active and/or activated Freeway products, i.e. actively used applications, activated SDK's, and deployed white-labelled applications, as well as consumers using Freeway' mobile monetisation services for mobile purchase. The QAU replaces the previously reported Freeway Global Installed Base metric, to provide a measure more directly correlated to quarterly revenue and a single metric

for evaluating business growth across the entirety of the Company's multiple products, services, and revenue models.

The Company reports that the QAU grew steadily throughout the quarter, led by new carrier deployments and the commencement of Syntonic Brazil operations. The QAU during the Q1 FY19 was 4,149,269, representing an increase of 104% over the previous quarter of 2,032,157.

## Financial Highlights

Syntonic's quarterly (unaudited) revenue grew significantly to reach A\$988,861. This was a 105% increase on last year's corresponding period and a 147% increase on the previous quarterly period. The Company's cash receipts in Q1 FY19 were A\$0.6m, a 90% increase on last year's corresponding period.

The advancing quarterly revenue resulted from Syntonic management's commitment to capture new and diversified revenue streams beyond the Company's largest customer Verizon Wireless, whose interests in Freeway's services wane due to a CEO led strategic shift from content services to 5G services to compete in the US market.

With the on-boarding of new carrier deployments, standard and customary carrier payment terms extend payment out several months after services are rendered. This delay in payments received account for the difference between the quarterly cash receipts and the recognized revenue.

Tracking with the QAU metric, the (unaudited) revenue growth is a result of new carrier deployments and the approximate one-month contribution from the Company's limited operational subsidiary, Syntonic Brazil, in the September 2018 quarter.

Total net cash outflows of A\$2.14 million for the quarter includes A\$0.26 million deemed one-time acquisition costs such as closing costs, legal representation, financial and tax advisory

For personal use only

services, and a US\$700,000 (A\$962,464) cash consideration payment for the acquisition of the assets of the mobile commerce business unit of Zenvia Mobile Servicos Digitais (“Zenvia”).

Excluding these one-time acquisition costs, the Company's operating expenses during the September 2018 quarter were A\$1.51m, 15% lower than the June 2018 quarter.

Syntonic entered Q2 of FY19 with a cash balance of A\$2.88 million.

## Corporate Highlights

### Syntonic Brazil

Syntonic completed the asset acquisition of Zenvia's mobile commerce business on 17 August 2018. The assets were acquired for a cash consideration of US\$700,000 (A\$962,464) with a vendor earn-out of 20% of the first US\$21.5 million (A\$28.9 million) of the contribution margin generated by the acquired assets over 3.5 years.

The Company incorporated a new subsidiary, SYNTONIC BRASIL TECNOLOGIA LTDA, (“Syntonic Brazil”), to own and operate the acquired assets. Syntonic Brazil plans to transfer eleven operations and business support staff from Zenvia to company offices in São Paulo and Porto Alegre, Brazil during November 2018.

The Company is working with Zenvia to reassign the four main Brazilian carriers – Vivo, Oi, TIM, and Claro, and all active content provider contracts including the Abril Group, one of the biggest and most influential media and distribution groups in Latin America, to Syntonic Brazil. During this transition period when the agreements are in process of transfer, Zenvia will continue to support the existing business operations and account to Syntonic the revenues and cash receipts generated from the operational assets. The transition period is expected to be completed during H2 FY19.

Mr. Ricardo Cidale will be responsible for managing and leading Syntonic Brazil's business and operations and will report directly to Syntonic's CEO. Mr. Cidale is a veteran serial entrepreneur with a track-record of building and operating businesses in the Americas with focus on telecom, media, enterprise, and government. Additionally, Mr. Cidale was a highly successful executive at RealNetworks (NASDAQ: RNWK) where he led the international Media Systems sales team.

### Outlook

With a strong focus on diversifying Syntonic's revenue streams, the management team is positive about the Company's outlook for Q2 FY19 and beyond.

The Company anticipates growth in active users and revenue during the last quarter of the calendar year from Smart Communications' *RoamFree* traveler app, powered by Freeway;

Vodacom's Freeway-based mobile advertising business; and Tata Communications' digital commerce platform, *opari*, powered by Syntonic sponsored data and data rewards services.

The Company also anticipates complete transfer of the mobile commerce operations to Syntonic Brazil during H2 FY19. This will enable the Company to begin full operations of the new company subsidiary and to capture the full potential of its investment.

### **About Syntonic**

Syntonic Limited (SYT.ASX) is a Seattle based software company which has developed two technology services: Freeway by Syntonic®, which allows consumers sponsored and subscription mobile access to content and applications; and Syntonic DataFlex®, which enables businesses to manage split billing expenses for employees when using their personal mobile phones for work. Founded in 2013, Syntonic has developed worldwide strategic partnerships with leaders in the mobile ecosystem.

### Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standard applies to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
