ANDROID LAUNCH OF FAMILY INSIGHTS COMPLETES CYBER SAFETY SOFTWARE RE-LAUNCH

Wangle Technologies Limited (Wangle or the Company) (ASX:WGL) is pleased to confirm the launch of the Android version of cyber safety software platform **Family Insights**, completing its planned re-launch with both iOS and Android versions now available for parents.

Release Highlights

- **The re-launch of Family Insights has been finalised** with a successful launch to the both the Apple and Google Play App Stores.
- A major user experience review and **redesign has reduced the user setup process** by over 85%.
- **Additional features in the re-branded Family Insights** include more relevant dashboard statistics, access for children to their own usage statistics, optional parent tracking for children and the inclusion of merchandising space in the mobile App for news, updates, In-App messages and commercial opportunities.
- **Marketing activity to recommence** shortly following the release

Family Insights relaunched successfully to both the Apple and Android App Stores

The Company is pleased to announce it has successfully launched a major update to its Family Insights cyber safety platform on both the Apple and Android App Stores, following a major usability review and redesign project.

FAMILY INSIGHTS
Keeping Your Family Safe Online

Summary of User Experience Improvements and Additional Features

The Company has completed the following improvements and new features for the release:

- 1. Configuration Review & UX Improvements:** The length and complexity of app configuration, as identified by customers and app analytics as the major usability issue, was the key focus for the upcoming release.
- 2. Refreshed Dashboard Information:** The new dashboard reflects Household usage statistics within key areas important to parents:
- 3. New Merchandising & In-App Message Feature:** a new merchandising zone has been added which can be used for In-App messaging, important news or updates, feature stories, cross-marketing and commercial placements.
- 4. New Child-state Dashboard:** a restricted version of the dashboard will be made available to children, so they can view their own usage statistics and behaviours. Whilst alerts and the settings areas will be locked and accessible only to parents, all statistics and mapping functionality will be available.
- 5. Optional Parent Tracking for Children:** Parents may now choose to 'opt-in' to allow their own GPS location to be made viewable to children from within the Child-State dashboard.

Additional Features scheduled for Future Releases

Further features to be added in fast-follow releases following the App re-launch include:

- 1. Dashboard drill downs by family member:** In parent mode, individual family members can be selected for specific review.
- 2. Simplified Settings:** A complete refresh of the advanced settings area for users.
- 3. Child Alerts:** An easier to read alerts inbox and clearer alert structure for parents.
- 4. Educational Alert Content:** Education resources are being reviewed and rewritten as new educational material becomes available.

Re-commencement of Marketing and Commercialisation activities

Following re-launch of the Family Insights App to both Apple and Android App Stores, the Company will recommence marketing activity to drive acquisition and usage of the platform in readiness for domestic and international scaling activity.

ABOUT FAMILY INSIGHTS

Family Insights offers parents a unique approach to ensuring the safe use of the internet by children and teenagers. By utilising Wangle's world class VPN network, backed by the research insights of childhood development research organization Telethon Kids Institute, FI monitors mobile network patterns in real time and advises parents of potential threats as well as providing greater details and resources to parents on the threats identified.

ABOUT WANGLE TECHNOLOGIES

Wangle Technologies has developed algorithms that not only optimise, compress and secure the data flow to mobile devices, but facilitate real time analysis of network patterns and usage behaviours. Wangle's technology provides compelling value to consumers, service providers and enterprises looking for innovative low-cost solutions for managing network capacity and use.
