Artemis Resources Limited (“Artemis” or “the Company”) (ASX: ARV, U.S. OTCQB: ARTTF, Frankfurt: ATY) is pleased to announce it has officially commenced trading in the United States on the OTCQB Venture Market.

The U.S. OTCQB Venture Market is for early stage and developing international and U.S. companies and offers the benefits of being publicly traded in the U.S. with lower cost and complexity than a U.S. exchange listing. To be eligible, international companies must be current in their local market and undergo an annual verification and management certification process.

#### Artemis’ CEO, Wayne Bramwell, commented:

*“Trading on the full OTCQB Venture Market allows Artemis to engage a far broader network of U.S. investors, data distributors and media partners, ensuring U.S. investors have greater access to the same high-quality information that is available to our Australian and European investors.*

*This will assist in greatly raising the Company’s profile in the US, as we advance our new and expanding cobalt, gold and copper assets in the Pilbara. We have traded actively on the OTC Pinks for some time and this move to the OTCQB will allow all brokers in the US to trade Artemis.”*

Investors can find real-time quotes and market information for the company on [www.otcmarts.com](http://www.otcmarts.com) or for further information on the Company generally, please visit our website at [www.artemisresources.com.au](http://www.artemisresources.com.au).
