KORAB EXPANDS AGREEMENT WITH DARWIN PORT TO 800,000 TONNES OF MAGNESITE ROCK PER YEAR – AMPLIFICATION

Korab Resources Ltd (“Korab”, or “Company”) (ASX: KOR) and its subsidiaries (“Korab Group”) are pleased to report that Korab has executed non-binding Heads of Agreement (HoA) with the operator and manager of Darwin Port expanding the annual volume to be shipped through the port.

The HoA envisages exporting of up to 800,000 tonnes per year of magnesium carbonate rock through Darwin Port East Arm Wharf and includes sub-leasing of the land, access to various port facilities, use of loaders, and other equipment. HoA provides the basis for the of the final port agreement which will allow for shipping of the magnesium carbonate rock through Darwin port. The costs of, and the fees for the sub-leasing of the land, access to various port facilities, use of loaders, and other equipment have not yet been agreed between the Company and Darwin Port. They will be determined in the final port agreement.

East Arm Wharf is a multi-user facility with 4 berths spaced along 865 metres of quay line. Berth 2 is used for bulk ore exports and has a rail mounted dry bulk ship loader. The continuous length of wharf facilitates flexibility in berth allocations to visiting ships. East Arm Wharf can accommodate PANAMAX class bulk carriers up to 75,000 tonnes.

East Arm Wharf has a rail mounted bulk minerals ship loader with a maximum capacity of 2,000 tonnes per hour (see Figure 2). Bulk minerals, such as iron ore, magnesium carbonate, or manganese, can be delivered to stockpile areas by haulage trucks, or transferred from rail wagons to the stockpile areas using a dedicated rail dump and conveyor systems (see Figure 3). The minerals are transported by truck from the stockpiles to the ship loader truck dump for loading onto bulk carriers.

“This expansion will allow for significant increase in annual volumes of magnesium carbonate rock shipments to cover both DSO sales and DBM production and it is one of key milestones in the process of commercialisation of the Winchester magnesium carbonate deposit”, commented Korab’s Chairman Mr. Andrej Karpinski.

On 12 September 2018, Korab reported results from updated feasibility study focusing on the potential revenue from additional products: Dead Burned Magnesia (DBM), and Caustic calcined magnesia (CCM). This report titled “*ADDITIONAL INFORMATION - WINCHESTER MAGNESITE FEASIBILITY STUDY UPDATE*” is available by copying and pasting the link shown below into your browser:

<https://www.asx.com.au/asx/statistics/displayAnnouncement.do?display=pdf&idsId=02021411>

The Company confirms that all material assumptions underpinning the production target, or the forecast financial information derived from a production target, in the initial public report titled “*ADDITIONAL INFORMATION - WINCHESTER MAGNESITE FEASIBILITY STUDY UPDATE*” released to the market on 12 September 2018 continue to apply and have not materially changed.

The proposed magnesium carbonate quarry at Winchester is located 2 km from the regional centre of Batchelor some 70km south of Darwin along Stuart Highway. Please refer to Figure 1 for details of the location of the proposed Winchester magnesium carbonate quarry, and Korab Group’s various mineral tenements in the area. Exploration licences are outlined in white, and mining leases are

ABOUT KORAB RESOURCES

Korab Resources Ltd is an international mining and exploration company with operations in Australia and Europe. Korab's projects include Winchester magnesium carbonate deposit at Batchelor in the Northern Territory of Australia, Geolsec phosphate rock deposit also at Batchelor, and other gold, silver, copper, cobalt, nickel, and polymetallic projects in Australia and overseas. DISCLAIMER AND CAUTIONARY STATEMENT

Forward-looking statements are statements that are not historical facts. Words such as "expect(s)", "expected", "feel(s)", "believe(s)", "will", "may", "anticipate(s)", "should", "envisage(s)" and similar expressions are intended to identify such forward-looking information. This information includes, but is not limited to statements regarding future exploration results, resources, or reserves, and production. Anyone reading this report is cautioned not to place undue reliance on these forward-looking statements. All of such statements are subject to risks and uncertainties (many of which are difficult to predict and which generally are beyond the control of the Company) that could cause actual results to differ materially from those expressed in, or implied or projected by, the forward-looking information and statements. These risks and uncertainties include, but are not limited to: those relating to the interpretation of exploration results (including drill results), the geology, grade and continuity of mineral deposits and conclusions of economic evaluations; risks relating to possible variations in reserves, grade, mining dilution, ore loss, and recovery rates; risks relating to changes in project financial and technical parameters; risks relating to the potential for delays in exploration programs, project evaluation/review, completion of feasibility studies and project development; risks related to commodity prices and foreign exchange rate fluctuations; risks related to failure to secure adequate financing on a timely basis and on acceptable terms; risks related to delays in obtaining governmental, or other permits and approvals; risks related to security of tenure; and other risks and uncertainties related to the Company's prospects, properties and business strategy. Any forward-looking information contained in this report is provided as of the date of this report. Except as required under applicable listing rules and securities laws, the Company does not intend, and does not assume any obligation, to update this forward-looking information.
