

ADVICE ON BURKINA FASO INCIDENT

Predictive Discovery Limited ("**Predictive**" or "**Company**") advises of a security incident at its Progress Minerals Joint Venture in Burkina Faso, which has resulted in the death of a senior employee of its Canadian joint venture partner Progress Minerals Inc.

The Company extends its deepest sympathies to the family and colleagues of Kirk Woodman – a respected geologist with 20 years of experience in working on the ground in West Africa.

"Kirk's expertise, professionalism and love of his work and passion for West Africa was obvious to all who knew him. We support Burkinabe and Canadian government efforts to bring those responsible for this terrible act to justice," said Paul Roberts, Managing Director.

On 15 January, Mr Woodman was kidnapped from an exploration camp at Tiabongou, Burkina Faso, near the town of Mansila. His body was found on 17 January.

The ongoing safety and security of every individual involved in the joint venture managed by Progress Minerals is of paramount importance to both companies.

All local employees of the joint venture company Predictive Discovery SARL are safe and secure after the incident.

Predictive is monitoring the ongoing security situation in various regions of Burkina Faso and will work with Progress Minerals Inc to assess the implications for its local project activities.

The incident does not affect any other Predictive operations or interests.

The Company has not previously acknowledged the security incident at the request and advice of various Governments involved.

For background:

Predictive retains a 49% interest in the Progress Joint Venture, which covers 11 exploration permits in Eastern Burkina Faso.
