

## AEERIS LIMITED

### EWN Signs Data Distribution Agreement with MapData Services

Aeeris Limited (ASX:AER) is pleased to announce that its fully owned subsidiary, Early Warning Network Pty Ltd (EWN), has signed a data distribution agreement with MapData Services Pty Ltd, a wholly owned subsidiary of Esri Australia Pty Ltd. This is the first of several such agreements which provide MapData Services access to a variety of EWN's geo-spatial risk data sets.

MapData Services is the region's leading end-to-end data solutions company. The company provides easy access to the world's best datasets, content and data technologies and uses these tools to create smart solutions that deliver valuable insights to the customer.

MapData Services provides EWN with a digital pipeline to customers within the Geographic Information System (GIS) technology sector, and specifically the Australian Esri user community. Esri's ArcGIS platform is the world's most advanced and widely used GIS technology.

"Through our partnership with MapData Services, we are exposed to a massive user community who can stream our data at the flick of a switch. The sale of our data to an end user is almost friction free. Customers are already signed to an existing MapData Services or Esri service. EWN data streamed to them is calculated and billed monthly with subsequent usage payments made to EWN under this agreement," explains Kerry Plowright, CEO and Chairman of Aeeris Limited.

"The agreement involves real-time lightning and observations data which is delivered through EWN's risk API service into the MapData Services data environment. From there it is immediately available to MapData Services clientele, for a fee. We will soon be rolling EWN's full risk data set into the MapData Services environment, making it also available to MapData Services customers.

"Our twenty-four-by-seven monitoring, unique IP and proprietary technology is combined with our expert real-time analysis to produce a spatial risk data-set without comparison. Now, with the wave of a digital finger, this is immediately accessible to a massive GIS user community which includes the ArcGIS community."

## About MapData Services

MapData Services is one of the longest serving and most respected authorities in mapping and data for the Australian Pacific region. Commencing business in 1998, MapData Services has developed a reputation in Australia and New Zealand as the leading provider of authoritative data and intelligent mapping solutions.

In 2010, MapData Services was acquired by the nation's leading Geographic Information System (GIS) specialist, Esri Australia, enabling the company to extend their business offering and deliver an unrivalled depth of expertise in intelligent mapping solutions to clients.

MapData Services' customers include 20 of the 'top 100' ASX-listed companies; three of the Big Four banks; and a number of major petroleum companies among our clientele. Our maps, data and services are employed by some of Australasia's largest blue chip companies, dynamic SMEs, community groups and government departments.

Along with EWN, MapData Services partners with the world's leading digital mapping and data suppliers to provide their clients with the strongest, most authoritative data sets and 'best of breed' technology solutions.

## About Aeeris

Aeeris Limited is a leading geospatial data business. The Company's **Early Warning Network** system and proprietary **GNIS** technology platform ingests and maps vast amounts of live data from multiple sources regarding severe weather, fire, traffic, and other geospatial hazards.

The technology allows us to track and monitor very large numbers of users, and communicate instantly with these users, especially about events which impact their safety. Our technology enables Aeeris to provide critical services to our enterprise and government customers:

- Live data, content, alerts and notifications on natural and man-made hazards affecting our clients, including severe weather, fire and traffic conditions, with our products **All Alerts™** and **Situation Room™**
- Pioneering innovative systems and apps to digitally track, monitor, map and protect workers and assets on the move with our products **Safe@Work™** and **SecureAMS™**

Our technology solutions provide many benefits to our clients including the ability to:

- Monitor, map and track staff, contractors, assets and operations
- Communicate with multiple staff regarding live safety hazards in real time
- Improve Workplace Health & Safety, and reduce risk and liability
- Manage personnel with regard to security, facility access, time-billing and fraud
- Improve operational efficiencies, labour scheduling and asset management

Our product offerings solve natural disaster awareness problems and promote personal and employee safety, asset protection, risk management, as well as helping to mitigate the financial impact of adverse events, geospatial hazards, personal injury, workplace safety, security breaches, fraud and inconvenience.

Aeeris is listed on ASX with the ticker code AER.
