1. Details of the Offers

1.1 Background

On 3 April 2019, the Company announced that it had:

- (a) received firm commitments for a placement of 233,336,450 Shares at an issue price of \$0.0079 per Share (**Placement Shares**) to existing shareholders and new sophisticated and professional investors to raise A\$1.84 million (before costs) (**Placement**); and
- (b) entered into a convertible securities agreement (**Convertible Securities Agreement**) pursuant to which it has agreed to issue to Obsidian Global Partners LLC (**Obsidian**) an initial tranche of 1,000,000 Convertible Notes to raise US\$1,000,000 (before costs) (**Obsidian Notes**).

Refer to the ASX announcement dated 3 April 2019 for further details.

On 9 April 2019, the Company issued:

- (a) the Placement Shares; and
- (b) 3,737,500 Shares at a price of A\$0.0079 per Share (**Commitment Shares**) to Obsidian as part payment for a commitment fee in respect of the Obsidian Notes (refer to Section 4.1(e) for further details).

1.2 The Share Offer

The Company is offering, pursuant to this Prospectus, 1,000 New Shares each at an issue price of \$0.009 (**Share Offer**).

All New Shares offered under this Prospectus will rank equally with Shares on issue at the date of this Prospectus. Refer to Section 5.1 for a summary of the rights attaching to the New Shares.

1.3 Purpose of the Share Offer

Generally, section 707(3) of the Corporations Act requires that a prospectus is issued in order for a person to whom securities were issued without disclosure under Part 6D of the Corporations Act to on-sell those securities within 12 months of the date of their issue.

Section 708A(5) of the Corporations Act provides an exception to section 707(3) where an entity issues a 'cleansing' notice under section 708A(5). The Company has been suspended from trading on the ASX for more than 5 days in the last 12 months and as a result is precluded from issuing a 'cleansing' notice in accordance with section 708A(5) of the Corporations Act.

Section 708A(11) of the Corporations Act provides an exemption from this general requirement where:

- (a) the relevant securities are in a class of securities of the company that are already quoted on ASX;
- (b) a prospectus is lodged with ASIC either:
 - (i) on or after the day on which the relevant securities were issued but before the day on which the sale offer is made; or
 - (ii) before the day on which the relevant securities are issued and offers of securities that have been made under the prospectus are still open for acceptance on the day on which the relevant securities were issued; and

- (c) the prospectus is for an offer of securities issued by the company that are in the same class of securities as the relevant securities.

The primary purpose of this Prospectus is to comply with section 708A(11) of the Corporations Act to remove any trading restrictions that may have attached to the Placement Shares and Commitment Shares issued by the Company so that the holders of the Placement Shares and Commitment Shares (as applicable), if they choose to, may sell those Placement Shares and Commitment Shares (as applicable) within the twelve months following their issue, without the issue of a prospectus. The Company did not issue the Placement Shares and Commitment Shares with the purpose of the persons to whom they were issued selling or transferring the Placement Shares and Commitment Shares, or granting, issuing or transferring interests in the Placement Shares and Commitment Shares within 12 months of the issue, however this Prospectus provides them with the ability to do so should they wish.

1.4 The Convertible Notes Offer

The Company is offering, pursuant to this Prospectus, 1,000,000 Convertible Notes each at an issue price of US\$1.00 and face value of US\$1.15 per Convertible Note to Obsidian (and/or its nominees) (**Convertible Notes Offer**). The Convertible Notes Offer under this Prospectus is made only to Obsidian (and/or its nominees).

The Obsidian Notes offered under this Prospectus will have the terms and conditions detailed in Section 4.1.

The Convertible Notes Offer is being made with disclosure under this Prospectus to facilitate secondary trading of the Shares to be issued upon conversion of the Obsidian Notes. Issuing the Obsidian Notes under this Prospectus will enable persons who are issued the Obsidian Notes to on-sell the Shares issued on conversion of the Obsidian Notes pursuant to ASIC Corporations Instrument 2016/80.

Obsidian should refer to Section 1.9(b) for details of how to accept the Obsidian Notes.

1.5 Purpose of the Prospectus

Accordingly, the purpose of this Prospectus is to:

- (a) make the Share Offer and Convertible Notes Offer (**Offers**); and
- (b) ensure that the on-sale of the underlying Shares to be issued upon the conversion of the Obsidian Notes is in accordance with ASIC Corporations Instrument 2016/80; and
- (c) ensure that the on-sale of the Placement Shares and Commitment Shares does not breach section 707(3) of the Corporations Act by relying on the exemption to the secondary trading provisions in section 708A(11) of the Corporations Act.

1.6 Opening and Closing Dates

The Company will accept Application Forms for the Share Offer until 5.00pm (WST) on 10 April 2019 or such other date as the Directors in their absolute discretion shall determine, subject to the requirements of the Listing Rules

The closing date for the Convertible Notes Offer is 10 April 2019 (**Convertible Notes Offer Closing Date**). The Company will accept the Convertible Notes Offer Application Forms from 9 April 2019 until 5.00pm (WST) on 10 April 2019 or such other date as the Directors in their absolute discretion shall determine, subject to the requirements of the Listing Rules.

The Company reserves the right, subject to the Corporations Act and the Listing Rules, to extend the closing dates of the Offers without prior notice. If a closing date is varied, subsequent dates may also be varied accordingly.

1.7 No Minimum Subscription

There is no minimum amount sought to be raised under the Offers.

1.8 Effect on control

The Offers will have no impact on the control of the Company as no person as a result of the Offers will increase their voting power in the Company:

- (a) from 20% or below to more than 20% of issued capital of the Company; or
- (b) from a starting point that is above 20% and below 90% of issued capital of the Company.

1.9 Application Forms

(a) Share Offer

The Company will send this Prospectus, together with a Share Offer Application Form, to selected persons whom the Directors determine are eligible to participate in the Share Offer.

If you wish to subscribe for New Shares, you should complete and return the Share Offer Application Form, which will be provided with a copy of this Prospectus by the Company at the Company's discretion, in accordance with the instructions in the Share Offer Application Form.

(b) Convertible Notes Offer

The Convertible Notes Offer is an offer to Obsidian (and/or its nominees) only.

Only Obsidian (and/or its nominees) can accept the Obsidian Notes under the Convertible Notes Offer. A personalised Convertible Notes Offer Application Form will be issued to Obsidian (and/or its nominees) together with a copy of this Prospectus. The Company will only provide a Convertible Notes Offer Application Form to the Obsidian (and/or its nominee).

If you are in doubt as to the course of action, you should consult your professional advisor.

Acceptance of a completed Application Form by the Company creates a legally binding contract between the Applicant and the Company for the number of Securities accepted by the Company. The Application Form does not need to be signed to be a binding acceptance of Securities.

If the Application Form is not completed correctly it may still be treated as valid. The Directors' decision as to whether to treat the acceptance as valid and how to construe, amend or complete the Application Form is final.

1.10 Issue and dispatch

All Securities under the Offers are expected to be issued on or before the dates specified in the Indicative Timetable.

It is the responsibility of Applicants to determine their allocation prior to trading in Securities. Applicants who sell Securities before they receive their holding statements will do so at their own risk.

1.11 Application Monies held on trust

All Application Monies received for the Securities will be held on trust in a bank account maintained solely for the purpose of depositing Application Monies received pursuant to this Prospectus until the Securities are issued. All Application Monies will be returned (without interest) if the Securities are not issued.

1.12 ASX quotation

Application will be made to ASX no later than seven days after the date of this Prospectus for the official quotation of the New Shares. If permission is not granted by ASX for the official quotation of the Shares offered by this Prospectus within three months after the date of this Prospectus (or such period as ASX allows), Application Monies will be refunded (without interest) in accordance with the Corporations Act.

1.13 CHESS

The Company participates in the Clearing House Electronic Subregister System, known as CHESS. ASX Settlement, a wholly owned subsidiary of ASX, operates CHESS in accordance with the Listing Rules and the ASX Settlement Operating Rules.

Under CHESS, Applicants will not receive a certificate but will receive a statement of their holding of New Convertible Notes.

If you are broker sponsored, ASX Settlement will send you a CHESS statement.

The CHESS statement will set out the number of New Convertible Notes issued under this Prospectus, provide details of your holder identification number, the participant identification number of the sponsor and the terms and conditions applicable to the New Convertible Notes.

If you are registered on the Issuer Sponsored subregister, your statement will be dispatched by Computershare Investor Services Pty Ltd and will contain the number of New Convertible Notes issued to you under this Prospectus and your security holder reference number.

A CHESS statement or Issuer Sponsored statement will routinely be sent to Shareholders at the end of any calendar month during which the balance of their Shareholding changes. Shareholders may request a statement at any other time, however, a charge may be made for additional statements.

1.14 Residents outside Australia

This Prospectus and any accompanying Application Form do not, and are not intended to, constitute an offer of Securities in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus or the Securities. The distribution of this Prospectus in jurisdictions outside Australia may be restricted by law and persons who come into possession of this Prospectus should seek advice on and observe any such restrictions. Any failure to comply with such restrictions may constitute a violation of applicable securities laws.

1.15 Risk factors

An investment in Securities should be regarded as speculative. In addition to the general risks applicable to all investments in listed securities, there are specific risks associated with an investment in the Company which are detailed in Section 3.

1.16 Taxation implications

The Directors do not consider it appropriate to give Applicants advice regarding the taxation consequences of subscribing for Securities under this Prospectus.

The Company, its advisers and its officers do not accept any responsibility or liability for any such taxation consequences to Applicants. As a result, Applicants should consult their professional tax adviser in connection with subscribing for Securities under this Prospectus.

1.17 Privacy

The Company collects information about each Applicant provided on an Application Form for the purposes of processing the Acceptance and, if the Acceptance is successful, to administer the Applicant's security holding in the Company.

By submitting an Application Form, each Applicant agrees that the Company may use the information provided by an Applicant on the Application Form for the purposes set out in this privacy disclosure statement and may disclose it for those purposes to the Share Registry, the Company's related bodies corporate, agents, contractors and third party service providers, including mailing houses and professional advisers, and to ASX and regulatory authorities.

If you do not provide the information required on the Application Form, the Company may not be able to accept or process your Acceptance.

The pro forma statement of financial position is based on the reviewed condensed statement of financial position as at 31 December 2018 and has then been adjusted to reflect the following material transactions. The reviewed condensed statement of financial position forms part of the Half Year Financial Report for the six months ended 31 December 2018 that was lodged with the ASX on 28 February 2019. These accounts were reviewed by the auditors and determined to be in compliance with AASB 134 Interim Financial Reporting and the Corporations Regulations 2001. The Review Report on the Half-Year Financial Report was unmodified with a material uncertainty paragraph relating to the consolidated entity's ability to continue as a going concern.

Lowest:	\$0.006 (16 January 2019)
Latest	\$0.009 (8 April 2019)

2.5 Dividend policy

The Directors are not able to say when and if dividends will be paid in the future, as the payment of any dividends will depend on the future profitability, financial position and cash requirements of the Company.

3. Risk Factors

New Shares are considered highly speculative. An investment in the Company is not risk free. The proposed future activities of the Company are subject to a number of risks and other factors that may affect its future performance. Some of these risks can be mitigated by the use of safeguards and appropriate controls. However, many of the risks are outside the control of the Directors and management of the Company and cannot be mitigated.

The risks described in this Section 3.1 are not an exhaustive list of the risks faced by the Company or by investors in the Company. It should be considered in conjunction with other information in this Prospectus. The risks described in, and others not specifically referred to, in this Section 3.1 may in the future materially affect the financial performance and position of the Company and the value of New Shares offered under this Prospectus. The New Shares to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, return of capital or the market value of those securities. The risks described in this Section 3.1 also necessarily include forward looking statements. Actual events may be materially different to those described and may therefore affect the Company in a different way.

Investors should be aware that the performance of the Company may be affected and the value of its Shares may rise or fall over any given period. None of the Directors or any person associated with the Company guarantees the Company's performance, the performance of the Shares or the market price at which the Shares will trade. The Directors strongly recommend that potential investors consider the risks detailed in this Section 3.1, together with information contained elsewhere in this Prospectus, and consult their professional advisers, before they decide whether to apply for New Shares.

3.1 Risks Specific to the Company

(a) **Competition and New Technologies**

The industry in which the Company is involved is subject to increasing domestic and global competition which is fast-paced and fast-changing. While the Company undertakes all reasonable due diligence in its business decisions and operations, the Company has no influence or control over the activities or actions of its competitors, whose activities or actions may positively or negatively affect the operating and financial performance of the Company's projects and business. For instance, new technologies could result in the Company not being differentiated to other similar offerings.

The size and financial strength of some of the Company's competitors may make it difficult for it to maintain a competitive position in the technology market. In particular, the Company's ability to acquire additional technology interests could be adversely affected if it is unable to respond effectively and/or in a timely manner to the strategies and actions of competitors and potential competitors or the entry of new competitors into the market. This may in turn impede the financial condition and rate of growth of the Company.

The key competition risk is in achieving appreciable market share and differentiation from its key competitors.

(b) **Future Capital Needs and Additional Funding**

The future capital requirements of the Company will depend on many factors including its business development activities. Although the Company's available cash is adequate to fund its business development activities, business plan and other Company objectives in the near term, changes to operational requirements, market conditions and business opportunities may mean further funding is required by the Company at an earlier stage than is currently anticipated.

Should the Company require additional funding there can be no assurance that additional financing will be available on acceptable terms, or at all. Any inability to obtain additional funding, if required, would have a material adverse effect on the Company's business and

its financial condition and performance and the Company's ability to continue as a going concern.

(c) **Sales and Marketing Success**

The Company is focused on developing and marketing its sponsored data services and cost effective mobile split billing solutions (**Syntonic Technology**). By its nature, there is no guarantee that the Syntonic Technology's development and marketing campaign will be successful. In the event that it is not, the Company may encounter difficulty creating market awareness of the Syntonic Technology. This would likely have an adverse impact on the Company's potential profitability.

Even if the Company does successfully commercialise the Syntonic Technology, there is a risk the Company will not achieve a commercial return. For example, new technology may overtake the Company's technology.

(d) **Attracting Customers to the Platform**

The Company's revenue is affected by its ability to attract customers to the Syntonic Technology. Various factors can affect the level of customers using the Syntonic Technology, including:

- (i) Marketing and promotions: If the Company's marketing and promotion efforts are not effective this may result in fewer customers using the Syntonic Technology;
- (ii) Brand damage: If the Company suffers from reputational damage, customer numbers could be affected; and
- (iii) Pricing: Targeted customers may not be prepared to incur the costs for their business implicit in the adoption of the Syntonic Technology or to abandon their investments in existing technologies.

Accordingly, there is no guarantee that the Company's marketing and pricing strategies will be successful to achieve a sizeable take up rate of its products from customers.

(e) **Hacker Attacks**

The Company will rely upon the availability of its Syntonic Technology to provide services to customers and attract new customers. Hackers could render the Syntonic Technology unavailable or cause customers' personal information to be compromised.

Although the Company has strategies in place to minimise such attacks, these strategies may not be successful. Unavailability of the Syntonic Technology could lead to a loss of revenue for the Company while compromising customers' information could hinder the Company's abilities to retain existing customers or attract new customers, which would have a material adverse impact on the Company's growth.

(f) **Risks Associated with Overseas Expansion**

The Syntonic Technology has been constructed so as to be capable of being utilised in, and marketed to, multiple overseas jurisdictions. As the Company seeks to expand into overseas markets, including Southeast Asia, Europe and Latin America, it may require a physical presence in those countries and an associated increase in overheads and development and marketing costs.

There is the risk that any overseas expansion will be unsuccessful, or that even if there is demand for the Company's products in that market, that the costs of doing business in that market, including the costs of establishing a new base in country, overseas regulatory compliance and the potential duplication of running costs for the business, are such that the Company's profitability and available working capital will be adversely impacted.

(g) **Customer Concentration Risk**

Over-reliance upon key customers may, in the event of termination or non-renewal of such arrangements, create revenue volatility. The Company is conscious of customer concentration risk and the need to diversify its customer base. However, large contract wins could skew the concentration of revenues, increasing the risk that non-renewal will have a larger impact on future earnings.

(h) **Contractual Third Party Risk**

The Company relies on third parties for key deliverables in its business model. This includes payment gateway providers, sales staff and integration of the Syntonic Technology to the market dispensing software packages. A failure of any one of these parties without an appropriate countermeasure could cause a disruption to operations. The company is continually assessing the risk and opportunities associated with its business model and other than disruptions for short periods of time due to service delivery failure is not solely reliant on any one party for delivery.

(i) **Staff Risk**

There is a risk that, where there is a turnover of development staff who have knowledge of the technology and business, that knowledge will be lost in the event that those staff resign or retire. This involves the risk that those staff will have information in respect of the Company's intellectual property which has a commercial value to the Company as well as an opportunity cost for replacement of those staff and subsequent training.

This risk is mitigated as the Company has historically had low levels of staff turnover in the development teams. In addition, all staff contracts contain express provisions with respect to ownership of intellectual property and restraints of trade to limit any potential loss suffered by the Company to the maximum extent possible.

(j) **Protection of Intellectual Property Rights**

The Company has pursued IP protection in the form of patent applications however legal standards relating to the validity, enforceability and scope of protection of intellectual property rights are uncertain. Effective patent, trademark, copyright and trade secret protection may not be available to the Company in every country in which the Syntonic Technology may eventually be launched. Accordingly, despite its efforts, the Company may not be able to prevent third parties from infringing upon or misappropriating its intellectual property.

Market conditions depending, the Company may be required to incur significant expenses in monitoring and protecting its intellectual property rights. It may initiate or otherwise be involved in litigation against third parties for infringement, or to establish the validity, of its rights. Any litigation, whether or not it is successful, could result in significant expense to the Company and cause a distraction to management.

(k) **Failure to Deal with Growth**

The Company's business has the potential to grow rapidly. If that occurs and the Company fails to properly manage that growth, then that failure could harm its business. Any failure to meet customer demand properly could adversely affect the Company's business, including demand for the Company's products/services, revenue collection, customer satisfaction and public perception.

(l) **Currency Risk**

The Company expects to derive a majority of its revenue from the United States, in US dollars. Accordingly, changes in the exchange rate between the United States dollar and the Australian dollar would be expected to have a direct effect on the performance of the Company.

3.2 General Risks

(a) Reliance on Key Management

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and Directors. There can be no assurance that there will be no detrimental impact on the performance of the Company or its growth potential if one or more of these employees cease their employment and suitable replacements are not identified and engaged in a timely manner.

(b) Trading Price of Shares

The Company's operating results, economic and financial prospects and other factors will affect the trading price of the Shares. In addition, the price of Shares is subject to varied and often unpredictable influences on the market for equities, including, but not limited to, general economic conditions including the performance of the Australian dollar on world markets, inflation rates, foreign exchange rates and interest rates, variations in the general market for listed stocks in general, changes to government policy, legislation or regulation, industrial disputes, general operational and business risks, and hedging or arbitrage trading activity that may develop involving the Shares.

In particular, the share prices for many companies have been and may in the future be highly volatile, which in many cases may reflect a diverse range of non-company specific influences such as global hostilities and tensions relating to certain unstable regions of the world, acts of terrorism and the general state of the global economy. No assurances can be made that the Company's market performance will not be adversely affected by any such market fluctuations or factors.

(c) Additional Requirements for Capital

The capital requirements of the Company depend on numerous factors. Depending on the ability of the Company to generate income from its operations, the Company may require further financing in the future. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations.

(d) Litigation Risks

The Company is exposed to possible litigation risks including intellectual property claims, contractual disputes, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position. The Company is not currently engaged in any litigation.

(e) Economic Risks

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's activities, as well as on its ability to fund those activities.

Further, share market conditions may affect the value of the Company's securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (i) general economic outlook;
- (ii) interest rates and inflation rates;
- (iii) currency fluctuations;

- (iv) changes in investor sentiment toward particular market sectors;
- (v) the demand for, and supply of, capital; and
- (vi) terrorism or other hostilities.

(f) **Technology Sector Risks**

The technology sector is characterised by rapid change. New and disruptive technologies can place competitive pressures on existing companies and business models, and technology stocks may experience greater price volatility than securities in some slower changing market sectors.

The value of the Company's securities may be adversely affected by any general decline in the valuation of listed securities and/or adverse market sentiment towards the technology sector in particular, regardless of the Company's operating performance.

(g) **Force Majeure**

The Company, now or in the future, may be adversely affected by risks outside the control of the Company including labour unrest, civil disorder, war, subversive activities or sabotage, extreme weather conditions, fires, floods, explosions or other catastrophes, epidemics or quarantine restrictions.

(h) **Acquisitions**

As part of its business strategy, the Company may make acquisitions of, or significant investments in, companies, products, technologies and/or products that are complementary to the Company's business. Any such future transactions are accompanied by the risks commonly encountered in making acquisitions of companies, products and technologies, such as integrating cultures and systems of operation, relocation of operations, short term strain on working capital requirements, achieving the sales and margins anticipated and retaining key staff and customer and supplier relationships.

3.3 Investment Speculative

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above may, in the future, materially affect the financial performance of the Company and the value of its Securities.

The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Securities offered under this Prospectus. Therefore, the Securities to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Securities. Potential investors should consider that the investment in the Company is speculative and should consult their professional adviser before deciding whether to apply for Securities pursuant to this Prospectus.

4. Material Contracts

(a) **Term**

The Obsidian Notes will mature on the date that is 90 days after the date of issue (**Maturity Date**).

(b) **Purchase Price and Face Value**

Each Convertible Note has a purchase price of US\$1.00 (**Purchase Price**) and a face value of US\$1.15 (**Face Value**).

(c) **Tranches and Issue Dates**

The Convertible Notes to be issued under the Convertible Note Agreement will be issued as follows:

- (i) 1,000,000 Convertible Notes, being the Obsidian Notes, to be issued pursuant to the Convertible Notes Offer;
- (ii) subject to the Company obtaining the requisite Shareholder approval within 60 days from the issue of the Obsidian Notes, the Company will cancel the Obsidian Notes and issue to Obsidian (and/or its nominees) replacement Convertible Notes that will not be limited to the Maximum Cap (defined below); and
- (iii) at the Company's election and subject to the Company obtaining the requisite Shareholder approval, the Company may issue up to an additional 1,500,000 Convertible Notes.

(d) **Conditions to Issue of Convertible Notes**

Prior to the issue of the Obsidian Notes under the Convertible Securities Agreement, the Company must:

- (i) deliver to Obsidian:
 - (A) a Board resolution approving the issue;
 - (B) a signed certificate of compliance; and
 - (C) a signed purchase statement setting out the net Purchase Price; and
- (ii) pay the commitment fee (detailed in paragraph (e) below); and

- (iii) execute the General Security Agreement.

The Company has entered into a general security agreement (**General Security Agreement**) pursuant to which the Company has agreed to grant a charge and a security interest to Obsidian in respect to the whole of the undertaking, property and assets of the Company.

(e) **Commitment Fee**

The Company must pay to Obsidian a commitment fee of 2.5% of the Purchase Price. The commitment fee for the Obsidian Notes is US\$25,000. The Company has elected to pay the Commitment Fee through:

- (i) the issue of the Commitment Shares at a price of A\$0.0079 per Share, being an amount of A\$29,526.25; and
- (ii) the remaining outstanding amount will be deducted from the Purchase Price of the Obsidian Notes.

(f) **Interest**

No interest is payable on the Convertible Notes, other than if an Event of Default (detailed below) occurs or if the Company fails to pay Obsidian when due an amount payable under the Convertible Securities Agreement, in which case interest shall be payable at a rate of 10% per annum accruing daily and compounded monthly from the date of the Event of Default or the date upon which the amount was required to be paid until the Company discharges the amount outstanding in full.

(g) **Security**

The Convertible Notes are secured by the General Security Agreement.

(h) **Conversion**

Prior to the Maturity Date, the noteholders may elect to convert some or all of the issued Convertible Notes provided the Face Value of the Convertible Notes being converted is A\$30,000 or more. Following such an election, the Face Value of the Convertible Notes being converted will convert into Shares at price that is the lesser of:

- (i) 90% lowest trading VWAP during the 5 trading days prior to the conversion notice date; and
- (ii) a fixed conversion price of A\$0.015 (**Fixed Conversion Price**).

The maximum number of Shares that the Obsidian Notes can convert into is 152,640,050 Shares (**Maximum Cap**).

Subsequent Convertible Notes to be issued following the Company obtaining the requisite Shareholder approval (including the Convertible Notes to be issued to replace the Obsidian Notes) will not be subject to the Maximum Cap.

(i) **Early Redemption by the Company**

Prior to the Maturity Date, the Company may elect to redeem all of the Obsidian Notes by paying to the noteholders the redemption amount of 110% of the Face Value (**Redemption Amount**).

(j) **Protective Provisions**

- (i) Upon the occurrence of a consolidation, subdivision or pro-rata cancellation of the Company's issued capital, the Fixed Conversion Price will be reduced or, as

the case may be, increased, in the same proportion as the issued capital of the Company is, as the case may be, consolidated, subdivided or cancelled.

- (ii) If the Company:
- (A) issues or agrees to issue Shares to any person at a per Share price which is less than the Fixed Conversion Price;
 - (B) issues options to acquire Shares to any person with an exercise price which is less than the Fixed Conversion Price; or
 - (C) issues any debt, equity or equity-linked securities to any person which are convertible into, exchangeable or exercisable for, or include the right to receive Shares or other securities at a fixed price which is less than the Fixed Conversion Price,

(all of which prices will be a **Lesser Price**) then the Fixed Conversion Price for subsequent Convertible Notes (save for the Obsidian Notes) to be issued will be reduced to the Lesser Price

(k) **Transferability**

The Convertible Notes may be assigned or transferred by Obsidian provided that the assignee executes a deed of covenant in favour of the Company agreeing to be bound by the terms of the Convertible Securities Agreement and is a sophisticated or professional investor as defined under the Corporations Act.

(l) **Events of Default**

The Events of Default are detailed below.

If an Event of Default occurs and either:

- (i) it is not capable of being remedied;
- (ii) it continues unremedied for a period of 10 business days; or
- (iii) there has been two or more previous Events of Default,

and the Event of Default has not been expressly waived by Obsidian in writing then Obsidian may:

- (i) declare at any time by notice the Company that the amount outstanding and all other amounts payable by the Company to Obsidian are immediately due and payable;
- (ii) terminate the Convertible Securities Agreement; and/or
