

ASX ANNOUNCEMENT

26 April 2019

HeraMED sets strong foundation for growth during Q1 2019

- **Exclusive distribution agreement secured in Australia with Dale Group International for a minimum of 9,000 HeraBEAT units in the next 3 years - first order received**
- **Agreement with Hapvida, one of Brazil's major healthcare providers, marks the first deployment of HMD's pregnancy monitoring service, HeraCARE**
- **Manufacturing agreement with Quasar secured to increase HeraBEAT device production at an improved cost**
- **HeraMED to continue international expansion initiatives during the current period and beyond**

Medical technology company, **HeraMED Limited (ASX:HMD)** ("HeraMED" or the "Company") is pleased to provide an update on its progress for the three month period ended 31 March 2019 (Q1 FY2019).

Exclusive Australian distribution agreement secured:

HeraMED secured a binding and exclusive distribution agreement with Australia's leading baby and toddler product supplier, Dale Group International. Under the agreement, Dale Group International became the exclusive Australian distributor of HeraMED's medical grade, pregnancy foetal monitoring device, HeraBEAT. As part of the deal, it was stipulated that Dale Group must satisfy a commitment to order a minimum of 9,000 HeraBEAT units over a three year period.

Dale Group International is a privately held baby and toddler product distributor that has an extensive network of major retailers including Baby Bunting, BigW and an additional 300 independent baby product retailers nationwide.

HeraMED has received its first purchase order of 250 units from the Dale Group International, marking the Company's inaugural sales in Australia.

Agreement with major Brazilian healthcare group:

In a milestone, HeraMED received its first order for its cloud based, software as a service (SaaS) pregnancy monitoring service HeraCARE, from Hapvida Saude. Hapvida is one of Brazil's largest healthcare providers, medical insurance companies and hospital owners.

This was the maiden order for HeraMED's SaaS and cloud based platform, which will be utilised in a pilot trial valued at US\$60,000. This cost encompasses 100 HeraBEAT foetal heart rate monitors, software set up fees, a software development licencing kit and 24 months' worth of monthly subscription fees for cloud based data monitoring services.

Establishing this feature is the first instance that HeraMED will generate additional revenues through its SaaS based business model, HeraCARE. The Company will continue to provide updates around the trial as it progresses.

Manufacturing agreement to increase production and improve cost efficiencies:

To allow HeraMED to immediately increase HeraBEAT device production and improve manufacturing costs, the Company signed a manufacturing agreement with globally respected medical device manufacturer, Quasar.

Quasar is a leading original equipment manufacturer for companies including Johnson & Johnson, Medtronic, Biosense, and Unilever. Quasar will provide HeraMED with a high-quality manufacturing partner and will ensure the Company's HeraBEAT device is built to the highest standards.

T: +61 8 6189 1155 | **A:** Level 2, 46-50 Kings Park Road, West Perth WA 6005

For personal use only

The development leaves HeraMED well placed to immediately increase device production and allows for cost effectiveness in the manufacturing process. This cost effectiveness has the potential to improve HeraMED's gross margins, providing the Company the ability to leverage this, as international expansion continues.

Appointment of Dr Arturo Weschler MD to lead Orion Artificial Intelligence operations:

HeraMED considerably strengthened its management team during the quarter, following the appointment of leading digital healthcare executive Dr Arturo Weschler MD, as VP of Innovation to lead HeraMED's OrionAI project.

OrionAI is HeraMED's cloud based, machine learning Software-as-a-Service (SaaS) platform, being developed with the Mayo Clinic. The technology harnesses and utilises big data to analyse and evaluate thousands of records in real time, enabling unprecedented analysis accuracy and potentially detecting pregnancy complications before they become a problem, thus having a dramatic impact on the lives of both expecting mothers and unborn children.

Dr Weschler has unparalleled experience in the healthcare sector, most notably in his role as Chief Information Officer at the Tel Aviv Sourasky Medical Centre one of Israel's largest healthcare organisations. As VP of Innovation, he will actively promote OrionAI to medical institutions and hospitals globally. HeraMED is progressing discussions with medical institutions and hospitals regarding OrionAI and has received positive feedback.

Financial overview:

HeraMED notes that receipts from customers were US\$88K. Expenditure for the quarter was \$US776K, with forecast expenditure of US\$1,341K for the next quarter.

HeraMED advises that the expected increase in expenditure during the next quarter is primarily due to the scheduling of manufacturing costs and associated payments. Initially, these costs were expected to be split during the previous and current quarters. The Company advises that current estimations include partial advance payments for the manufacture of 5,000 HeraBEAT units.

Following discussions with Quasar, HeraMED believes that it has also optimised payment terms so that they will be spread across several months.

HeraMED has US\$3,334m (A\$4.75m) cash at bank as at 31 March 2019.

Management commentary:

HeraMED CEO and Co-founder Mr David Groberman said: "HeraMED has achieved a number of milestones during the quarter, leaving the Company well placed to continue its growth objectives.

"HeraMED has progressed operations on all business fronts, securing a manufacturing agreement and an Australian distribution agreement for its HeraBEAT device, as well as receiving the first order for its SaaS based HeraCARE model. Further to this, the Company strengthened its professional team with the appointment of Dr Weschler to lead its Orion Artificial Intelligence operations.

"Subsequent to the end of the quarter, HeraMED has also progressed its market entries into both Australia and the United Kingdom. The Company remains in advanced discussions with hospitals, medical organisations and distribution partners to drive product uptake from a top down and bottom up approach and looks forward to updating shareholders on these developments as they progress."

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standard applies to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
