Western Sussex Hospitals NHS Trust renews Patientrack contract

Adelaide, South Australia – Alcidion Group Ltd (ASX:ALC) today announces it has signed a 5-year product licence renewal agreement with Western Sussex Hospitals NHS Trust for Patientrack licensing and support for an additional five years, to 2024. The total value of the renewal is \$970K.

Western Sussex Hospitals NHS Trust first implemented Patientrack in 2012, making it one of the longest-serving users of the software. This is the second time it has renewed its contract.

The platform was initially deployed following a successful competitive tender in 2011, and the system is live in 68 wards across the trust's three hospitals.

Alcidion Group Managing Director Kate Quirke said, "We are delighted to continue our close partnership with Western Sussex Hospitals NHS Trust – one of our foundation customers in the UK - for the continued use of Patientrack for another five years. This demonstrates the longevity of our relationships with customers who have embedded Patientrack into their clinical care."

Alcidion's UK General Manager Donald Kennedy said, "Our long-standing partnership with Western Sussex NHS Trust has seen several innovations made to Patientrack, and its use has expanded within the trust since it was implemented. These include the implementation of world-leading predictive analytics for Acute Kidney injury as well as a broad range of clinical assessments and workflow for conditions such as Sepsis. This renewal demonstrates the benefits our solutions can bring to patients and health professionals, and the value our solutions can add to wards, hospitals and healthcare systems."

Alcidion's Patientrack platform is a mobile and digital bedside solution that helps hospitals improve patient safety, quality of care and clinical staff efficiency. Patientrack helps hospital workflow by planning and performing patient observations and assessments and providing clinical documentation at the bedside in real-time. These functions of the Patientrack solution ensure the early detection and timely clinical response to deteriorating patients at all times, in a range of different ward environments.

About Western Sussex Hospitals NHS Trust

Western Sussex Hospitals NHS Trust serves a population of around 450,000 people who live in a catchment area covering most of West Sussex. The Trust runs three hospitals: St Richard's Hospital in Chichester; Southlands Hospital in Shoreham-by-Sea and Worthing Hospital in the centre of Worthing. The Trust was created on 1 April 2009 by a merger of Royal West Sussex NHS Trust, which managed St Richard's Hospital, and Worthing and Southlands Hospitals NHS Trust. Every year, the Trust's 6,000 staff: treat 118,000 inpatients and day cases; make 476,000 outpatient appointments; see 126,000 people in the two Accident and Emergency departments; deliver 5,500 babies; dispense around 740,000 medicines and take more than 310,000 imaging exams (x-rays/scans).
