

AMANI GOLD LIMITED

ASX ANNOUNCEMENT

29 July 2019

JUNE 2019 QUARTERLY ACTIVITIES REPORT

Amani Gold Limited (ASX: ANL) ("Amani" or "the Company") is pleased to provide shareholders with the following Quarterly Report for the three-month period ended 30 June 2019.

Acquisition of Gada Gold Project

During the quarter, Amani announced it had signed a Memorandum of Understanding with Bon Génie N. Mining (BN Mining) Sarl ("BN Mining"), to acquire 10 highly prospective gold Exploration Permits in the DRC through an 85.7% interest in BN Mining. The Exploration Permits are collectively known as the Gada Gold Project and are located approximately 80km west of Amani's Giro Gold Project (Figure 1).

BN Mining advised it has an option agreement with LA SOCIÉTÉ MINIÈRE DE KILO-MOTO SA ("SOKIMO"), over Exploration Permits, 11796, 11797, 11798, 11800, 11801, 11804, 11816, 11817, 11820 and 11832, located in north-east DRC within the Niangara, Dungu and Rungu Territories of the Haut Uele Province.

Amani's board and management view the Gada Gold Project as offering a significant material opportunity for value enhancement to the Company. Given the location, geology and scale of the tenement package, as well as the early stage scouting completed to date, Amani believes the package is highly prospective for large gold mineralisation. Local artisanal gold mining has been undertaken for many years within shallow pits of depth to generally less than 10m.

Amani is continuing to conduct its legal and technical due diligence on the opportunity and also its discussions with the respective parties.

Technical due diligence includes desk top studies, site visits and rock chip sampling of known gold occurrences, pits and mineralised outcrops.

If Amani adds the Gada Gold Project to its portfolio, the Company expects to carry out an initial 1,500m exploration drilling program commencing in August to September.

Giro Gold Project

The Giro Gold Project comprises two exploration permits covering a surface area of 497km² and lies within the Kilo-Moto Belt of the DRC, a significant under-explored greenstone belt which hosts Randgold Resources' 16 million-ounce Kibali group of deposits within 35km of Giro (Figure 1).

The Giro Gold Project area is underlain by highly prospective volcano-sedimentary lithologies in a similar structural and lithological setting as the Kibali gold deposits. Both primary and alluvial gold was mined from two main areas, the Giro and Tora areas, during Belgian rule and today these areas are mined extensively by artisanal miners.

Amani has outlined a gold resource at Kebigada within the Giro Gold Project of 45.62Mt @ 1.46g/t Au for 2.14Moz gold at a cut-off grade of 0.9g/t Au (see ASX Announcement 23 August 2017, Figure 1 and Table 1).

Amani has also outlined a gold resource at Douze Match within the Giro Gold Project of 8.1Mt @ 1.2g/t Au, for 320Koz gold at a cut-off grade of 0.5g/t Au (see ASX announcement 10 December 2018, Figure 1 Table 1).

The Giro Gold Project global resource now exceeds 3Moz gold; with the combined Indicated and Inferred Mineral Resource estimates for the Kebigada and Douze Match deposits at 81.77Mt @ 1.2g/t Au, for 3.14Moz Au. The combined resource is based on a 0.6g/t Au cut-off grade (Table 1).

During the next Quarter, Amani is planning to test for deeper high-grade mineralisation at Kebigada via infill drilling.
