THC Global Group Limited
Notes to the Financial Statements
For the half-year ended 30 June 2019

1 Summary of significant accounting policies

These consolidated financial statements and notes represent those of the consolidated entity (referred to hereafter as the 'Group') consisting of THC Global Group Limited (referred to hereafter as the 'Company') and the entities it controlled at the end of, or during, the half-year ended 30 June 2019.

Basis of preparation

These general purpose interim financial statements have been prepared in accordance with Australian Accounting Standard AASB 134 'Interim Financial Reporting' and the Corporations Act 2001, as appropriate for for-profit oriented entities. Compliance with AASB 134 ensures compliance with International Financial Reporting Standard IAS 34 'Interim Financial Reporting'.

These general purpose financial statements do not include all the notes of the type normally included in annual financial statements. Accordingly, these financial statements are to be read in conjunction any public announcements made by the Group during the interim reporting period in accordance with the continuous disclosure requirements of the Corporations Act 2001.

The financial statements have been prepared on an accruals basis and are based on historical costs unless otherwise stated in the notes. The accounting policies that have been adopted in the preparation of the statements are as follows:

Accounting policies

The accounting policies and methods of computation adopted in the preparation of the half-year financial report are consistent with those adopted in the Group's 2018 annual financial report for the financial year ended 31 December 2018.

Going Concern

The financial statements have been prepared on the going concern basis, which contemplates continuity of normal business activities and the realisation of assets and the discharge of liabilities in the normal course of business.

The Group incurred a loss after tax of \$5,765,724 (2018: loss after tax of \$3,196,156) and had net cash outflows from operating activities of \$3,760,873 for the half year ended 30 June 2019. As at that date the Group had net current assets of \$7,695,040, total assets of \$31,409,840 as well as cash and cash equivalents of \$5,689,612 as at 30 June 2019.

The Directors believe that there are reasonable grounds to believe that the Group will be able to continue as a going concern, after consideration of the following factors:

- The Group has cash and cash equivalents of \$5,689,612 as at 30 June 2019. As at that date the Group had net current assets of \$7,695,040 and total assets of \$31,409,840;
- If required, the Group has the ability to continue to raise additional funds on a timely basis; and
- The Group has the ability to scale back a significant portion of its development activities if required.

Accordingly, the Directors believe that the Group will be able to continue as a going concern and that it is appropriate to adopt the going concern basis in the preparation of the financial report.

THC Global Group Limited
Notes to the Financial Statements
For the half-year ended 30 June 2019

2 Critical accounting judgements, estimates and assumptions

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgements and estimates in relation to assets, liabilities, contingent liabilities, revenue and expenses. Management bases its judgements, estimates and assumptions on historical experience and on other various factors, including expectations of future events, management believes to be reasonable under the circumstances. The resulting accounting judgements and estimates will seldom equal the related actual results. The judgements, estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities (refer to the respective notes) within the next financial year are discussed below.

Provision for impairment of receivables

The provision for impairment of receivables assessment requires a degree of estimation and judgement. The level of provision is assessed by taking into account the recent sales experience, the ageing of receivables, historical collection rates and specific knowledge of the individual debtor's financial position.

Recovery of deferred tax assets

Deferred tax assets are recognised for deductible temporary differences only if the Group considers it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

The Group remained in a development phase during the period and consequently there is some uncertainty surrounding the availability of future taxable amounts to utilise tax losses. Management considers it prudent not to raise any deferred tax assets at this point in time.

Share based payments

The Group measures the cost of equity-settled transactions by reference to the fair value of the equity instruments at the date at which they are granted. The accounting estimates and assumptions relating to equity-settled share-based payments would have no impact on the carrying amounts of assets and liabilities within the next annual reporting period but may impact profit or loss and equity.

Property, plant and equipment

Property, plant and equipment is stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Cost may also include transfers from equity of any gains or losses on qualifying cash flow hedges of foreign currency purchases of property, plant and equipment.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

Increases in the carrying amounts arising on revaluation of property, plant and equipment and land and buildings are recognised, net of tax, in other comprehensive income and accumulated in reserves in shareholders' equity.

To the extent that the increase reverses a decrease previously recognised in profit or loss, the increase is first recognised in profit or loss. Decreases that reverse previous increases of the same asset are first recognised in other comprehensive income to the extent of the remaining surplus attributable to the asset; all other decreases are charged to profit or loss. Each year, the difference between depreciation based on the revalued carrying amount of the asset charged to profit or loss and depreciation based on the asset's original cost, net of tax, is reclassified from the property, plant and equipment revaluation surplus to retained earnings.
