  - GK AMG, immediately west of Ancuabe, is owned by Germany's largest graphite producer
- Ancuabe is closest to port of all East African graphite projects
- Ancuabe is the only large scale, large flake graphite project in the region
- Ancuabe's high purity, large flake graphite commands a market price premium over smaller flake products
- Ancuabe aims to be the next East African graphite producer, expected to produce up to 60,000 tonnes of high purity, large flake, graphite concentrate per annum<sup>1</sup>

# Ancuabe Graphite Project

# Declining China large flake supply dominance

For personal use only

- China has been world's major source of global graphite supply
- **Chinese** production of **large flake** graphite **threatened** by lower grades, higher costs, diminishing flake size and environmental concerns
- Mozambique is supportive of China's One Belt, One Road initiative
- China's suppliers increasingly looking to import high purity, large flake graphite – **Ancuabe's target market**

## China's supply issues present a significant opportunity for Ancuabe's large flake, high purity graphite

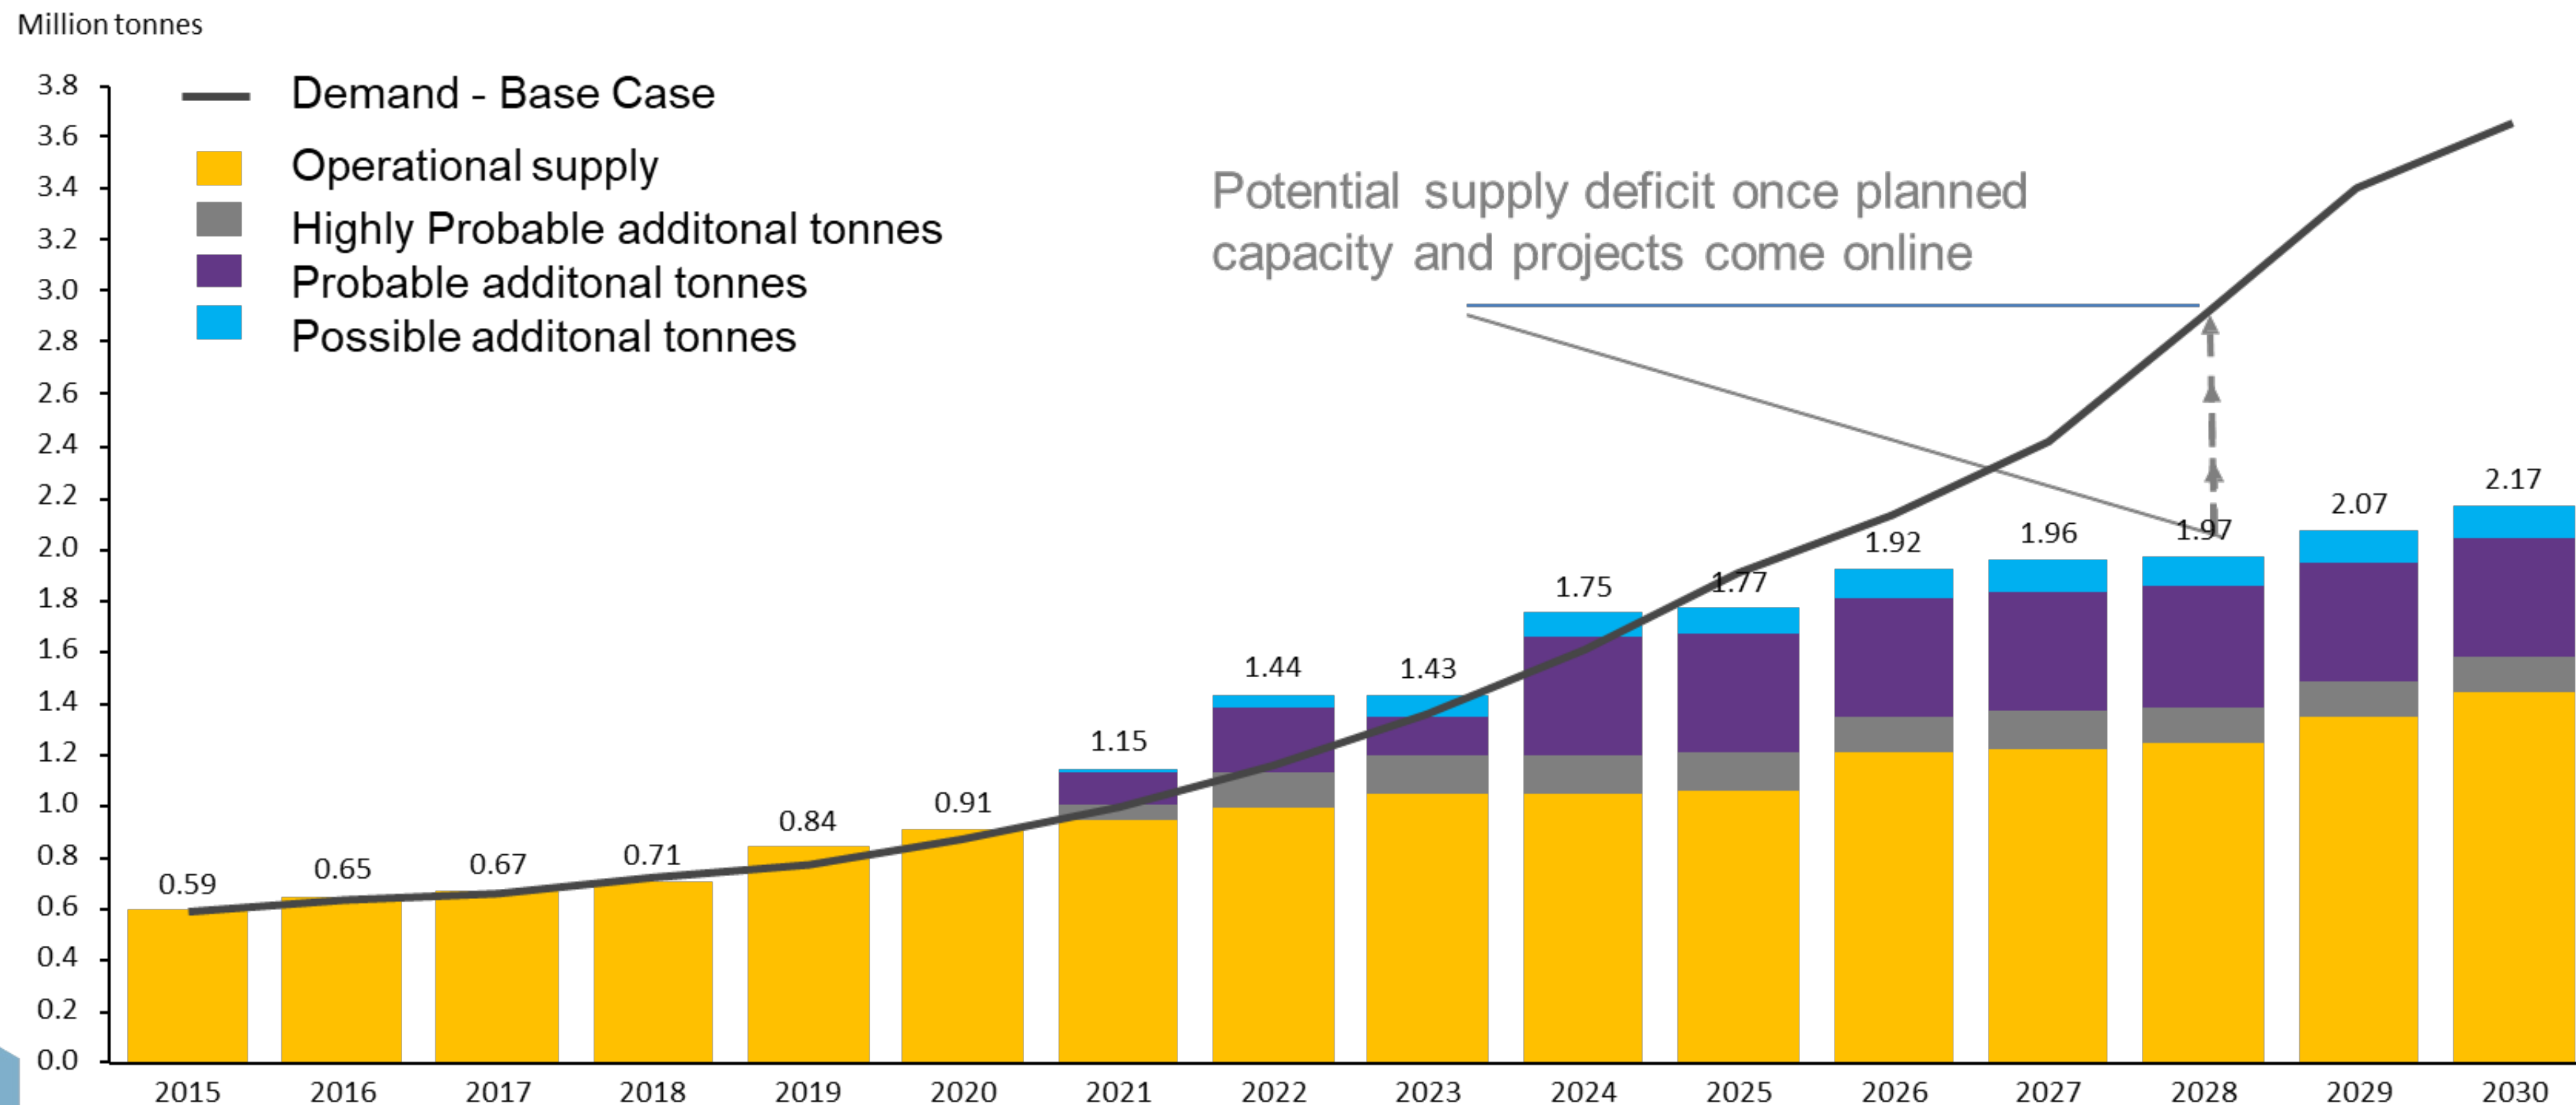

Typical Chinese graphite plants and poor environmental management

# Structural shortage looming: Demand and Supply

New markets for EV and FRBM driving forecast demand above existing and new sources of supply

Planned capacity and projects in development will not be sufficient to meet forecast demand

# Value Proposition

## World-class assets

- ✓ High quality graphite from a proven graphite region with excellent infrastructure and stable mining jurisdiction

## Near-term production and robust economics

- ✓ Ancuabe DFS<sup>1</sup> delivers highly attractive project. Nicanda Hill provides JV opportunity for the battery market and exposure to vanadium market.
