

## STRATEGY BRIEFING DAY – PERTH

Galaxy Resources Limited (“Galaxy” or the “Company”) (ASX: GXY) will hold a Strategy Briefing Day in Perth on Thursday, 21 November 2019.

The purpose is to provide further information regarding Galaxy’s strategic direction and plans for the development of its lithium project portfolio.

The briefing will commence at 9:00am AWST / 12:00pm AEDT in Meeting Room 6 at the Perth Convention and Exhibition Centre, located at 21 Mounts Bay Road, Perth.

The presentation will be available on the Company’s website, [www.gxy.com](http://www.gxy.com), and the briefing will also be accessible via a webcast available at <https://webcast.openbriefing.com/5636/>.

**About Galaxy (ASX: GXY)**

Galaxy Resources Limited is an international S&P / ASX 200 Index company with lithium production facilities, hard rock mines and brine assets in Australia, Canada and Argentina. It wholly owns and operates the Mt Cattlin mine in Ravensthorpe Western Australia, which is currently producing spodumene and tantalum concentrate.

Galaxy is advancing plans to develop the Sal de Vida lithium and potash brine project in Argentina situated in the lithium triangle (where Chile, Argentina and Bolivia meet), which is currently the source of more than 40% of global lithium production. Sal de Vida has excellent potential as a low-cost brine-based lithium carbonate production facility.

Galaxy's diversified project portfolio also consists of the wholly owned James Bay lithium pegmatite project in Quebec, Canada. James Bay will provide additional expansion capacity to capitalise on future lithium demand growth.

Lithium compounds are used in the manufacture of ceramics, glass, pharmaceuticals and are an essential cathode material for long life lithium-ion batteries used in hybrid and electric vehicles, as well as mass energy storage systems and consumer electronics. Galaxy is bullish about the global lithium demand outlook and is aiming to become a major producer of lithium products.
