

Highlights

- Over \$35m of projects won across the SCEE group
- Awards in the resources, commercial, health and telecommunications and data centre sectors

Southern Cross Electrical Engineering Limited ("SCEE") is pleased to announce that it has secured a number of new contracts with a total value of over \$35m across the commercial, resources, health infrastructure and telecommunications sectors.

Resources

SCEE has been awarded the following resources projects:

- Talison Lithium Australia Pty Ltd has awarded SCEE a contract to install, erect, test and commission the primary and secondary equipment for an electrical infrastructure upgrade at the Greenbushes lithium mine in southern Western Australia. The works involve an electrical load increase from 25MVA to 60MVA installed capacity and are expected to be completed over the first half of 2020.
- Energy Resources of Australia Pty Ltd ("ERA") has awarded SCEE a Master Services Agreement to provide electrical and instrumentation services at the Ranger Mine in Jabiru, Northern Territory. SCEE will provide ongoing support to ERA's operations and assist with mine closure works for an initial term of two years and ERA has the option for a further two 12-month extensions.

Commercial

SCEE's East Coast-based subsidiary Heyday has been awarded the following commercial projects:

- Shape Australia Pty Ltd has awarded Heyday the electrical fit-out of 14 floors of government office accommodation at 231 Elizabeth Street, Sydney. The new office accommodation will provide 21,600m² of floor space for use by employees of Transport for NSW, and the Departments of Premier & Cabinet, of Finance, Services & Innovation and of Justice. The building fit-out is being managed by Property New South Wales on behalf of the government agencies. Heyday's scope of work includes the distribution switchboards, cable support systems, specialist lighting and small power, communication services, security and access control systems and is expected to be completed over the first half of 2020.
- In Canberra, Heyday has been awarded a contract by Geocon Constructors (ACT) Pty Ltd on the City – 7 Development Project. The development comprises three buildings encompassing 544 apartments and 10 retail tenancies. The scope of works is for the design and construction of lighting, communication services, security and access control systems and is expected to be completed in early 2021.

- Also in the ACT, Heyday has secured a contract from Icon for work on the Parade Project which is part of Icon and JW Land's mixed-use C5 Development in Barton. The development comprises 242 apartments, a 65-room hotel and eight retail tenancies. Heyday's scope of work includes lighting, communication services, security and access control systems and is expected to be completed by the end of 2020.

Health infrastructure

SCEE's subsidiary Datatel has entered into an agreement with Health Support Services in Western Australia for the provision of breakdown repair, planned maintenance and minor works activities and projects as required to the East Metropolitan, North Metropolitan and South Metropolitan Health Services. The agreement is a panel arrangement for an initial period of three years with options to extend the term for up to a further eight years.

Telecommunications and data centres

Heyday has been awarded a further stage of works by J. Hutchinson Pty Ltd at the RUData SYD53 data centre at Eastern Creek in Sydney's western suburbs. This scope includes the full fit-out of an additional 1,000m² of data hall space with Heyday's scope including HV and LV reticulation, switchboards, UPS and generator systems and lighting and small power. The work is expected to be completed in the first half of 2020.

Datatel has secured new and extensions to existing term contracts to perform customer connection works on the NBN, Optus and Telstra networks.

Comment

Commenting on the awards, SCEE Managing Director Graeme Dunn said "I am pleased to be able to announce these new awards which demonstrate SCEE's capabilities across a broad range of sectors and geographies."
