

Titomic December 2019 Company Update

- **Titomic Additive Manufactured metal parts showcased at USA Defence Manufacturing Tradeshow highlights capability of TKF technology to US Army, Department of Defence and Defence Primes.**
- **Titomic currently negotiating 5 new Defence projects in USA for supply of parts to major Defence Primes.**
- **Titomic showcases TKF technology at USA Space Industry Conference further validating the affordability TKF process for lightweight, high strength titanium parts.**
- **Titomic currently negotiating 4 new Space Rocket and Satellite projects for supply of parts to global Space Industry Primes.**
- **Titomic finalises distribution agreement for TKF machines and consumables in Turkey with BTech.**
- **TKF Machines sales on track for AUD \$3M - \$5M in sales orders.**

Melbourne, Australia, Monday 23rd December 2019: Australian digital manufacturing solutions company Titomic (ASX: TTT) is pleased to provide its December 2019 in depth company update video. The video can be viewed on the Titomic website at: <http://Titomic.com/december-update>

Mr. Jeff Lang, Titomic Managing Director, commented:

"The team at Titomic has worked diligently throughout 2019 to validate Titomic Kinetic Fusion as a commercially viable Additive Manufacturing technology. Titomic's TKF process provides the unique capabilities of affordable, efficient and sustainable manufacturing to industries that are still dependent on, and restricted by, traditional manufacturing methods.

Titomic has entered a new chapter of its strategic growth by evolving our commercial opportunities coming from the massive US market across the three large industries of Space, Aerospace and Defence.

The Titomic sales team is finalising several commercial deals for both TKF machine sales, and high-volume OEM production from our TKF Bureau, and are looking forward to expanding our commercial growth in 2020 as the major pioneer of a truly affordable and efficient digital metal additive manufacturing technology for industry.

About Titomic Limited:

Titomic Limited (ASX:TTT) is an Australian public company specialising in digital manufacturing solutions for industrial scale metal additive manufacturing using its patented Titomic Kinetic Fusion® (TKF) technology. The TKF technology provides unique capabilities for producing commercially viable additively manufactured metal products competing directly with traditional manufacturing methods. Titomic provides OEM production and R&D services from their TKF Smart Production Bureaus to the global Aerospace, Defence, Shipbuilding, Oil & Gas, Mining and Automotive industries. Titomic also provides an extensive range of metal powders for 3D Printing especially Titanium and super alloys whilst providing sales and support services for their TKF production systems.
