Disclaimer

The information contained in this presentation has been prepared by Vulcan Energy Resources Ltd. This presentation is not an offer, invitation, solicitation or other recommendation with respect to the subscription for, purchase or sale of any securities in VUL. This presentation has been made available for information purposes only and does not constitute a prospectus, short form prospectus, profile statement or offer information statement. This presentation is not subject to the disclosure requirements affecting disclosure documents under Chapter 6D of the Corporations Act.

This presentation may contain certain forward-looking statements and projections regarding estimated, resources and reserves; planned production and operating costs profiles; planned capital requirements; and planned strategies and corporate objectives. Such forward looking statements/projections are estimates for discussion purposes only and should not be relied upon. They are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors many of which are beyond the control of VUL. The forward-looking statements/projections are inherently uncertain and may therefore differ materially from results ultimately achieved.

VUL does not make any representations and provides no warranties concerning the accuracy of the projections, and disclaims any obligation to update or revise any forward looking statements/projects based on new information, future events or otherwise except to the extent required by applicable laws. While the information contained in this presentation has been prepared in good faith, neither VUL or any of its directors, officers, agents, employees or advisors give any representation or warranty, express or implied, as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. Accordingly, to the maximum extent permitted by law, none of VUL, its directors, employees or agents, advisers, nor any other person accepts any liability whether direct or indirect, express or limited, contractual, tortious, statutory or otherwise, in respect of, the accuracy or completeness of the information or for any of the opinions contained in this presentation or for any errors, omissions or misstatements or for any loss, howsoever arising, from the use of this presentation.

Competent Person Statement

The information in this report that relates to Mineral Resources is extracted from the ASX announcement made by Vulcan on the 20th of January 2020, which is available on www.v-er.com. The information in this presentation that relates to the Scoping Study for the Vulcan Lithium Project is extracted from the ASX announcement “Positive Scoping Study – Vulcan Zero Carbon Lithium Project”, released on the 21st of February 2020 which is available on www.v-er.com. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and that all material assumptions and technical parameters underpinning the estimates in the relevant market announcements continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person’s findings are presented have not been materially modified from the original market announcements.

Mission Statement & Summary

Vulcan Energy Resources seeks to decarbonize the currently high carbon footprint of lithium-ion batteries used in electric vehicles, by producing a unique, world-first Zero Carbon Lithium™ product from its Vulcan Project, which is the largest lithium project in Europe, and located in the heart of the EU's rapidly growing battery "Mega-Factories".

Vulcan will disrupt and lead the resource industry towards a Zero Carbon future.

Vulcan Summary: Best-in-Class for the 2020s

 <p>1. ZERO CARBON FOOTPRINT</p>	 <p>2.</p>	 <p>3.</p>	 <p>4.</p>	 <p>5.</p>	 <p>6.</p>	 <p>7.</p>	 <p>8.</p>
<p>World's 1st & Only Zero-Carbon Lithium™ Process</p> <ul style="list-style-type: none"> ❑ Purpose-built process to be uniquely Zero Carbon ❑ Co-generation of geothermal energy from production wells will power lithium extraction ❑ Negative CO₂/t LiOH H₂O, decarbonising the grid while producing lithium, compared with ~15 tonnes CO₂ for hard-rock 	<p>Positive Scoping Study</p> <ul style="list-style-type: none"> ❑ World-leading industry experts in lithium extraction and geothermal behind first of its kind study ❑ Provides solid basis for feasibility studies to commence shortly 	<p>Dual Revenue Potential</p> <ul style="list-style-type: none"> ❑ Dual Lithium Hydroxide & Renewables Project ❑ Principal revenue potential from selling battery-quality LiOH H₂O chemicals into the European market ❑ Secondary revenue potential from planned renewable geothermal power generation, which benefits from Feed-in-Tariff. 	<p>Size & Quality: Europe's Largest Lithium Resource</p> <ul style="list-style-type: none"> ❑ JORC Mineral Resource Estimate¹ 13.95 Million Tonnes LCE Indicated & Inferred ❑ One of the largest lithium resources in the world ❑ High Li grades for geothermal brine which has readily available heat & power ❑ Large enough to be Europe's primary source of battery-quality lithium hydroxide 	<p>Location: Centre of Fastest Growing Market</p> <ul style="list-style-type: none"> ❑ EU fastest growing lithium market in the world. Unprecedented demand forecast from growth in EVs ❑ Located in Germany, in the centre of the industry ❑ Zero local supply of battery quality lithium hydroxide ❑ Removes dependence on China for this designated Critical Raw Material 	<p>Local Partners & Infrastructure Access</p> <ul style="list-style-type: none"> ❑ MoU with German geothermal operator Pfalzwerke geofuture, part of large Pfalzwerke Group ❑ Allows for access to producing wells to advance pilot processing ❑ Potential for fast-track to production from existing infrastructure 	<p>The Right Team For The Job</p> <ul style="list-style-type: none"> ❑ Expert multi-disciplinary team local to project area in Germany ❑ Decades of experience in developing & permitting geothermal brine projects ❑ International project finance, lithium market & direct lithium extraction processing expertise 	<p>World's Most Rapidly Advancing Lithium Project</p> <ul style="list-style-type: none"> ❑ Maiden Resource & Scoping Study completed in just five months ❑ Targeting short-term production start, in line with lithium supply-demand inflection point

1. Zero Carbon Lithium™ Products: Unprecedented Demand

EV raw material supply chains have a carbon footprint problem.

Volkswagen is placing **great importance on having a CO₂-neutral production supply chain** for its new EV line-up, with sustainability metric for suppliers on par with price.

Other European OEMs following suit.

The European Commission has flagged “**CO₂ Passports**” for electric vehicles, which will detail their full CO₂ impacts.

EU has declared a climate emergency and aims to **cut 55% of emissions by 2030, net zero by 2050.**

The world’s conventional lithium supply chains are not geared towards low carbon intensity production, so **Europe will need to build its own.**

“Volkswagen’s delivery promise: CO₂-neutral production including supply chain”

“Sustainability as selection criteria on par with quality and price”

1. Independently-Verified Zero CO₂ Credentials: World-First

Europe's Choice:

"No need for high energy mining, crushing, grinding and roasting processes used in hard-rock lithium deposits."

Hard-rock spodumene in Australia/Portugal with downstream fossil-fuel fired processing: roasting rocks in China: **13-15 tonnes CO₂/t LiOH•H₂O**

13-15 tonnes CO₂/t LiOH•H₂O

Salar-type lithium brine in South America: **5 tonnes CO₂/t LiOH•H₂O with heavy water impact** on a dry environment

5 tonnes CO₂/t LiOH•H₂O

Vulcan geothermal-type brine project: **negative CO₂/t LiOH•H₂O, decarbonizing** both the European grid and lithium supply chain simultaneously.

Vulcan Geothermal Brine

Zero Carbon Lithium™ Products: Premium, Peerless and Disruptive

2. Positive Scoping Study

Zero Carbon Lithium™ Process

2. Direct Lithium Extraction: Commercial Future of Lithium

DLE Plants: Commercially Operating Now

Multiple operational, commercial plants world-wide, including:

- DLE used at Livent's Hombre Muerto operation in Argentina for 25 years producing consistent product: 25ktpa LCE production
- Zangge DLE Lithium Project is fully operational in Qinghai, China with a capacity of 10ktpa LCE. Sunresin supplied equipment.
- Lanke DLE Lithium plant also in Qinghai, China: 20ktpa production in 2019, expanding to 30ktpa in 2020.

- The Vulcan Project will utilize a Direct Lithium Extraction (DLE) process to extract lithium from the brine, driven by readily-available heat & power used to produce premium, battery quality Zero Carbon Lithium™ hydroxide.

DLE from brines used by multiple commercially operating projects. Lithium industry is shifting to DLE processes, because:

- Lithium extraction in hours instead of months.
- Not weather-dependent like evaporation, in increasingly unstable climate.
- Ability to produce consistent chemical product for battery industry.
- Spent brine re-injected into reservoir with no evaporation losses. No water stress unlike current South American projects.

DLE Plants: In Development

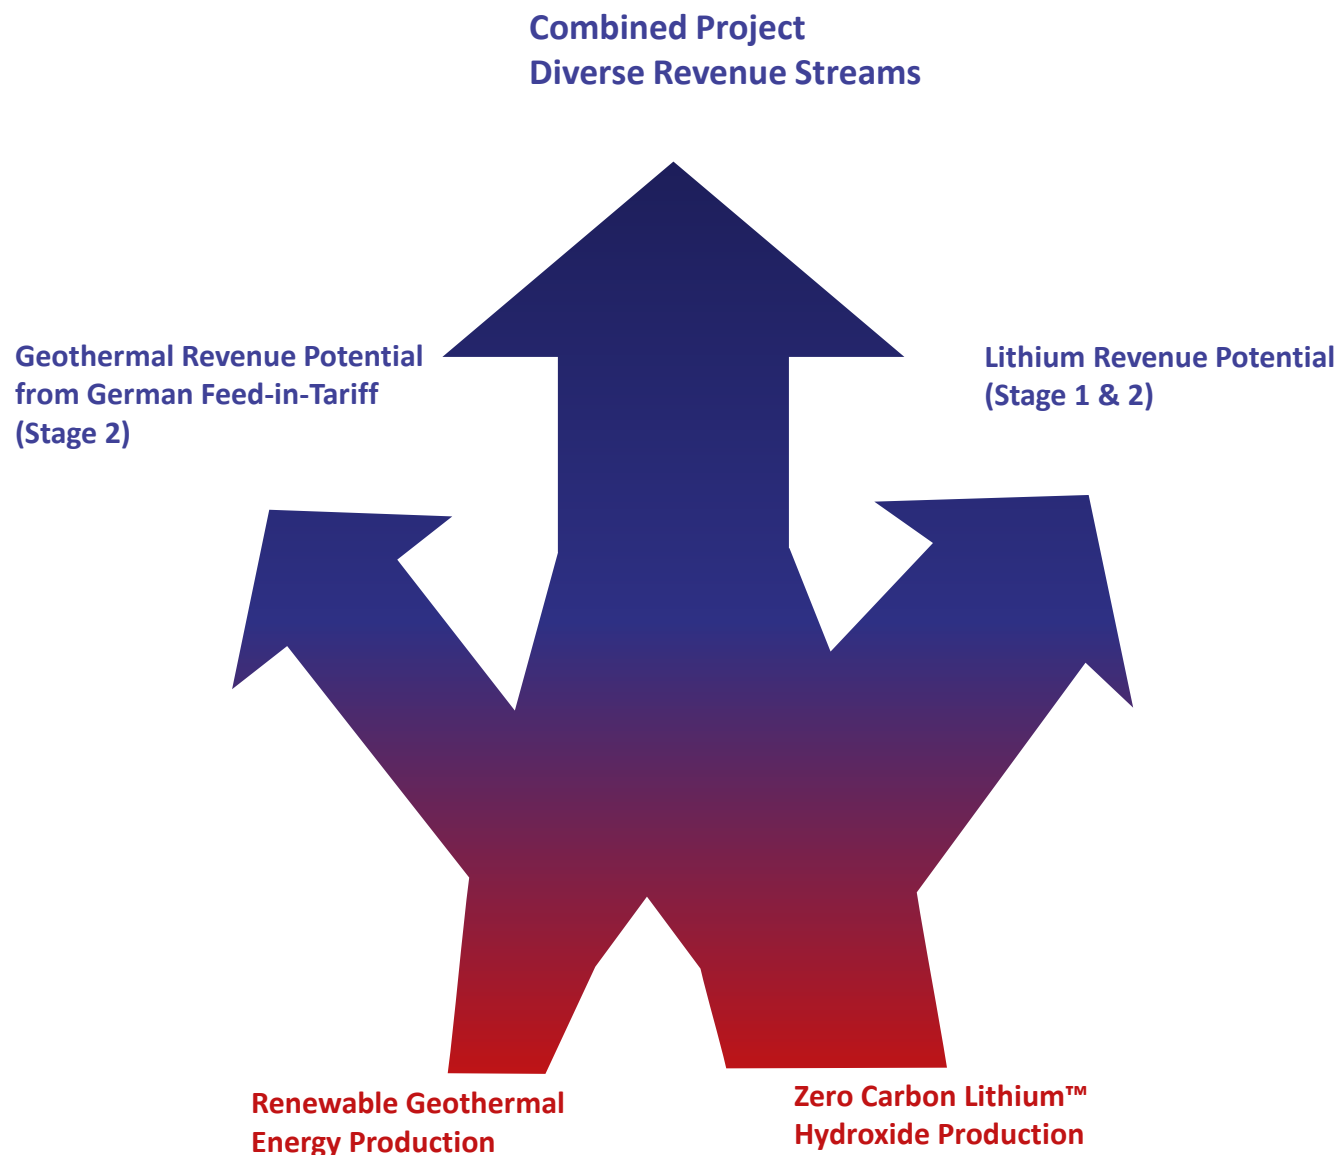

3. Dual Revenue Potential

For personal use only

- Potential to split project funding into renewables & lithium project with separate investors.
- When combined, the project is underpinned by favourable Feed-in-Tariff rates for geothermal energy produced.
- Exposure to upside of lithium price environment, widely forecast to improve in 2020s.
- Combined project revenue streams de-risk overall operation.

Funding flexibility & project de-risking from multiple revenue streams

4. Size: Vulcan Project Resource is World-Class

For personal use only

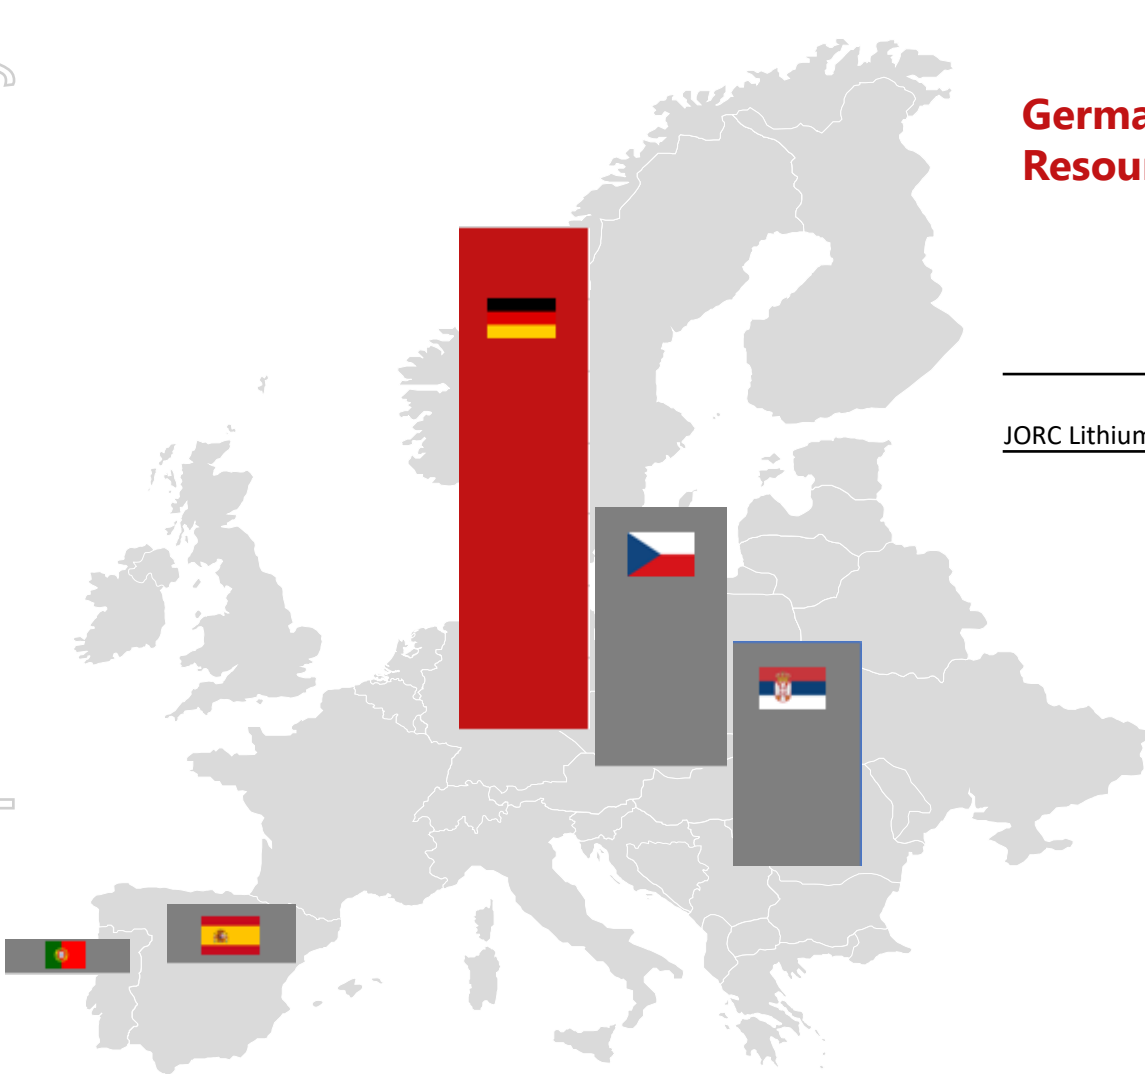

Chart compares resources from companies at different stages of development as detailed in Appendix 3, with Vulcan Lithium Project which is a mixture of Indicated and Inferred Mineral Resources as per VUL ASX announcement 20/01/2020. The Company is not aware of any new information or data that materially affects the information included in the announcement. All material assumptions and technical parameters underpinning the Mineral Resource in the relevant announcement continue to apply and have not materially changed. Market capitalisations converted to A\$m as at 23 January 2020

4. Size: Upper Rhine, Germany, is Europe's "Lithium Valley"

For personal use only

Germany: Largest JORC Lithium Mineral Resource Endowment in Europe

	Germany (Vulcan Project)	Czechia	Serbia	Spain	Portugal
JORC Lithium Mineral Resource Endowment (Mt LCE)	13.95	7.17	6.24	1.68	0.71

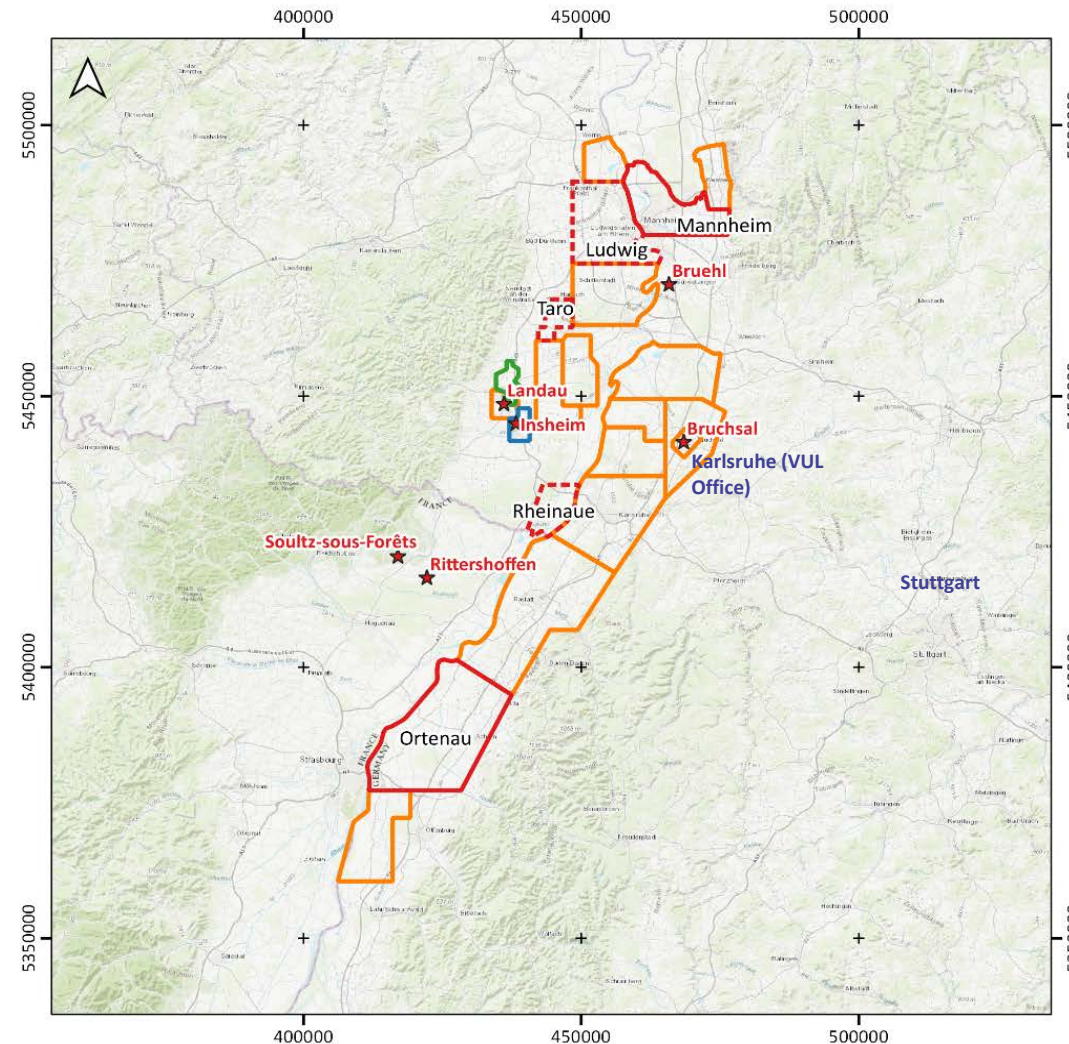

Image shows resources collated from companies at different stages of development as detailed in Appendix 3, with Vulcan Lithium Project which is a mixture of Indicated and Inferred Mineral Resources as per VUL ASX announcement 20/01/2020. The Company is not aware of any new information or data that materially affects the information included in the announcement. All material assumptions and technical parameters underpinning the Mineral Resource in the relevant announcement continue to apply and have not materially changed.

4. Size: Large, Strategic Project Area in the “Lithium Valley”

- Most well-explored graben system in the world: large quantities of existing 2D and 3D seismic data to **shortcut development timeline**.
- Dominant** license landholding in lithium-rich brine field - ~ 800 km² of license area.
- Thousands of historical wells and multiple operating geothermal wells in the region provide a **wealth of data** and **readily accessible brine**.
- Geothermal brine production socially & environmentally accepted in region with vineyards and communities next to existing operations.

4. Quality: Rare Lithium Grades, Heat & Brine Flow Rate

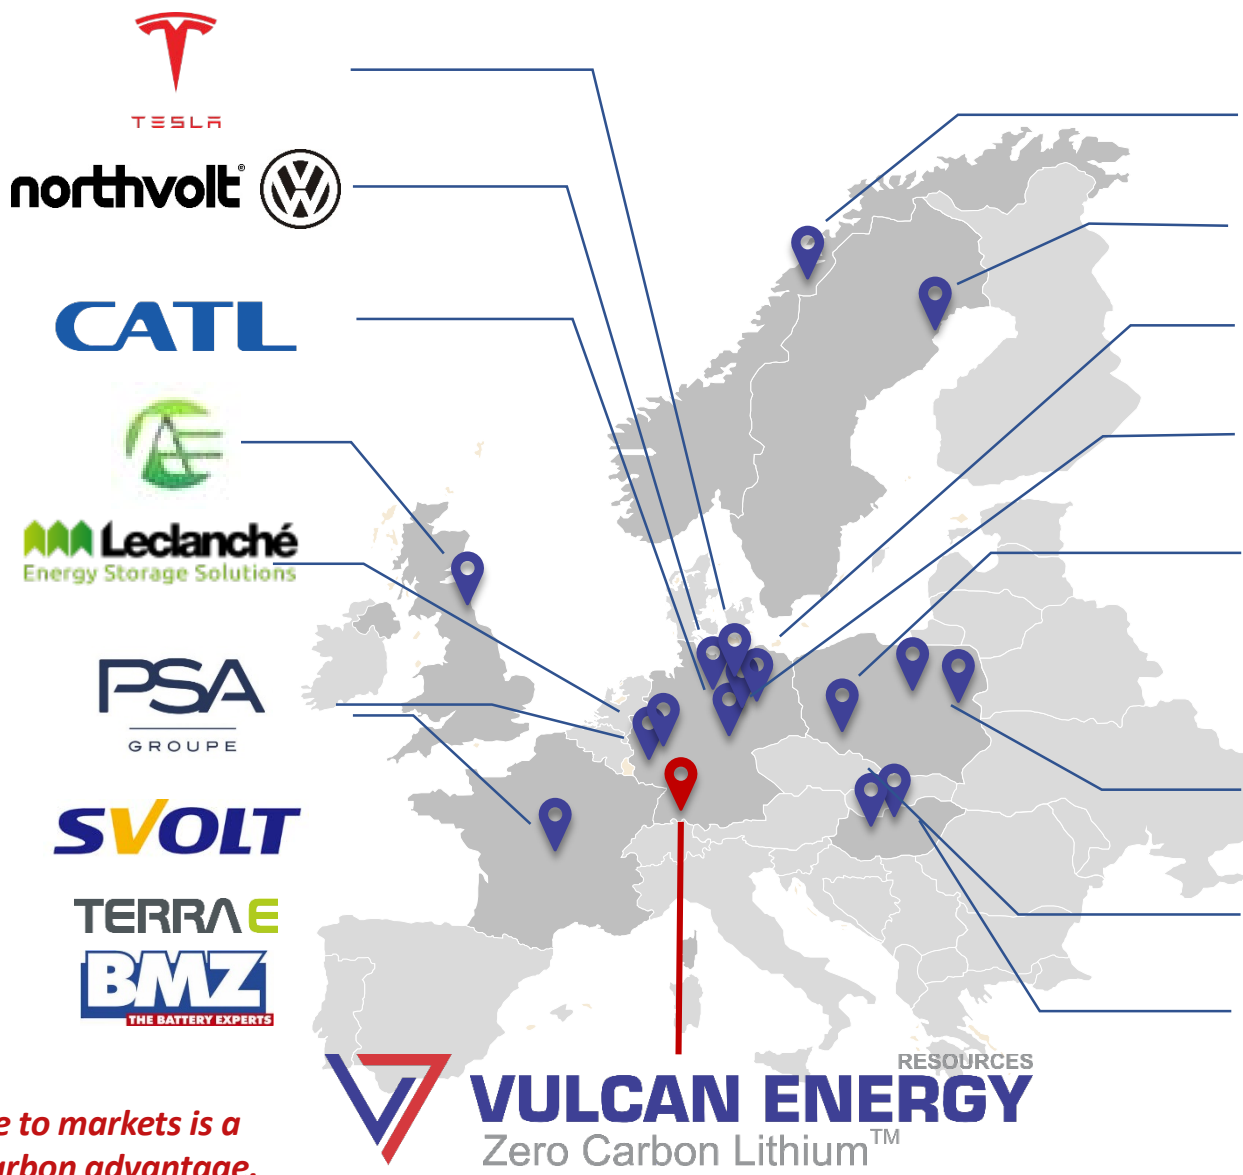

- Vulcan geothermal brine field exhibits Li values one to two orders of magnitude greater than typical geothermal brines¹: average of 181 mg/L Li.
- Typical geothermal brine fields have lithium values in the order of 1-10 mg/L Li¹.
- Only other known geothermal field with similar lithium grades & flow rate is Salton Sea, California¹.
- Sept 2019, Livent invested \$5.5M in E3 Metals to produce LiOH•H₂O from a brine with grades of 75 mg/L Li (less than half Vulcan's grade).
- Areas with heated brines are common, but the fluids are rarely also both lithium-rich & high flow rate.
- **Processing advantage of readily available heat & power** versus South American Li salar brines.

¹See Appendix 3

5. Location: Centre of Fastest Growing Lithium Market

For personal use only

- Brandenburg, 2021
Capacity Unknown
- Salzgitter, 2024
16 GWh, later 24 GWh
- Erfurt, 2022
14 GWh later 100 GWh
- Sunderland, 2010
2.5 GWh
- Willstät, 2020
1 GWh
- Germany & France, 2022
16 GWh, later 64 GWh
- Germany, 2023
20 GWh, later 24 GWh
- Germany, 202X
4 GWh, later 8 GWh

- Mo I Rana, 2023
Ramp up to 32 GWh
- Skellefteå, 2021
32 GWh later 40 GWh
- Brandenburg 2021
Ramp up to 8-12 GWh
- Bitterfeld, 2022
10 GWh
- Wroclaw, 2018
6 GWh, later 70 GWh
- Nysa 2021
Cathode Materials
- Nysa 2020
Cathode Materials
- Komarom 1 + 2, 2020
7.5 GWh, later 23.5 GWh
- Göd, 2018
3 GWh, later 15 GWh
- Europe, 202X
Capacity unknown

Vulcan's negligible distance to markets is a cost advantage as well as carbon advantage.

5. Location: Unprecedented Growth in Demand for Li in EU

China Lithium-Ion Battery Cell Production to 2018

Source: Adapted from Ministry of Industry & Information Technology of China

In the 2010s, China experienced the world's highest growth in lithium-ion battery production for electric vehicles. It caused a lithium supply shortage & 300% lithium price spike.

European Lithium-Ion Battery Cell Production Forecast to 2028

Source: Adapted from Benchmark Mineral Intelligence & Individual Company Announcements on Battery Capacity

In the 2020s, the same is forecast to happen in Europe, on a much larger scale.

Vulcan Energy Resources Target Market

Source: Adapted from Benchmark Mineral Intelligence & Individual Company Announcements on Battery Capacity. Assumes 0.9kg LCE/kWh for average EV battery.

Vulcan will capitalize on the fastest growing lithium market in the world, which has zero local supply.

6. German Utility Partnership: Shortcut to Development

- MoU agreement signed Nov 2019 with subsidiary of **German utility Pfalzwerke Group – Pfalzwerke geofuture**, for JV at operational Insheim geothermal plant to produce lithium hydroxide.
- **Transformational** agreement for Vulcan, gives access to lithium-rich, **producing brine operations** neighbouring Vulcan's existing project area.
- Vulcan to earn up to **80% of lithium rights** at Insheim (subject to completion of formal JV agreement) by completing Pre-Feasibility (PFS) and Definitive Feasibility (DFS) Studies.
- Pfalzwerke Gruppe is a German and international energy provider with annual revenue (2018) in excess of €1.3 billion.
- Insheim geothermal plant (shown) a shining example of geothermal best-practice, **operating in harmony with local community and environment since 2012**.
- Potential for Stage One **Zero Carbon Lithium™** hydroxide production at existing plant and infrastructure.

7. The Right Team for the Job

Dr. Francis Wedin – Managing Director & CEO

Founder of Vulcan Zero Carbon Lithium™ Project. Previously Executive Director of ASX-listed Exore Resources Ltd. Management experience in resources sector on four continents; bilingual; dual Swedish/EU & Australian nationality. Lithium industry executive since 2014. Three discoveries of JORC Lithium Resources on two continents including Lynas Find, now part of Pilbara Minerals' Pilgangoora Project in production supplying the Chinese market (ASX:PLS). PhD & BSc (Hons) in Mineral Exploration & MBA in Renewables.

Gavin Rezos - Chair

Executive Chair/CEO positions of two companies that grew from start-ups to the ASX 300. Extensive international investment banking experience; investment banking Director of HSBC with senior multi-regional roles in investment banking, legal and compliance functions. Currently Chair of Resource and Energy Group and principal of Viaticus Capital. Previously Non-Executive Director of Iluka Resources, Alexium International Group and Rowing Australia.

Dr. Horst Kreuter – CTO Geothermal

CEO of Geothermal Group Germany GmbH and GeoThermal Engineering GmbH (GeoT). Co- Founder of Vulcan Zero Carbon Lithium™ Project. Successful geothermal project development & permitting in Germany and worldwide. Widespread political, investor and industry network in Germany and Europe. Based in Karlsruhe, local to the project area in the Upper Rhine Valley.

Alex Grant
CTO Direct Lithium Extraction

Dr. Jens Grimmer
Senior Geologist, Lithium Expert

Dr. Michael Kraml
Senior Geochemist

Thorsten Weimann
Geothermal Plant Engineering Expert

Tobias Hochschild
