The Directors present their report on the consolidated entity consisting of Quickstep Holdings Limited and the entities it controlled at the end of, or during, the half year ended 31 December 2019. Throughout the report, the consolidated entity is referred to as the "Group" or "Quickstep".

#### **Directors**

The following persons were Directors of Quickstep Holdings Limited during the whole of the half year and up to the date of this report:

Mr. T H J Quick Mr. M H Burgess Mrs. L Heywood

Mrs. E Mannes was appointed a Director on 22 August 2019 and Mr. P Largier was appointed a Director on 19 December 2019 and both continue in office at the date of this report.

Mr. B A Griffiths was a Director from the beginning of the financial year until his resignation on 30 August 2019.

Mr. J C Douglas was a Director from the beginning of the financial year until his resignation on 21 November 2019.

#### **Review of Operations**

Total sales for the half year ended 31 December 2019 were \$38.4 million (H1 FY19 \$33.8 million) representing a 13.6% increase on the prior comparative period (pcp). The increase is attributable to ongoing growth in Joint Strike Fighter (JSF) program volumes to full rate production. Total revenue from JSF was \$27.9 million (H1 FY19 \$24.0 million) representing a 16.4% increase.

The \$2.3 million operating profit for the first half of FY20 represents a \$0.4m improvement on pcp including an improvement in gross profit of \$0.7 million partially offset by a modest increase in Corporate costs with spend on Research and Business Development (BD) activities aligned with the pcp. The investment in BD has resulted in a healthy pipeline of near term opportunities with significant new business awards anticipated over coming months.

The H1 FY20 net profit of \$1.5 million represents an improvement of \$0.6 million on pcp comprising the \$0.4 million increase in operating profit, an increase in net financing costs of \$0.6m (including \$0.7m interest expense on lease liabilities recognized for the first time under AASB 16) and a \$0.8 million tax benefit.

Net \$1.5 million cash out from operating activities for H1 FY20 was \$0.5 million unfavourable to that reported for the pcp noting a \$3.2 million reversal of deferred income on the C-130J contract during H1 FY20 compared to a \$0.9m increase in deferred income in the first half of FY19 – a turnaround of \$4.1 million. The deferred income reversal is now complete following transition to a new 5 year C-130J contract with cash receipts now closely aligned to deliveries. Capital expenditure of \$3.8 million (net of grants \$3.4 million) has been invested to provide new capability, particularly the flare housing manufacturing facility, increase capacity and improve operational efficiency.

Excluding the impact of lease liabilities coming on to the balance sheet with the implementation of AASB 16, net debt has increased by \$5.2 million to \$5.5 million since 30 June 2019 to fund the net \$3.4 million capital investment noted above and working capital needs associated with the reversal of deferred income on the C-130J contract. Total bank debt outstanding as at 31 December 2019 is \$8.8 million plus lease liabilities of \$18.5 million.

# A. About this Report

## A.2 Accounting Estimates and Judgements

Information about significant areas of estimation uncertainty and critical judgements in applying accounting policies are described below:

#### **Going Concern**

The Group has net assets of \$18,996,000 (1 July 2019 \$17,156,000 after adopting AASB16) and net current assets of \$9,115,000 (30 June 2019: \$11,449,000). Customer receipts on the C-130J contract are now closely aligned to deliveries which is expected to improve cash flow in the second half of FY20.

Profitability and operating cash flow are both expected to improve over the second half of FY20 benefiting from improved cash flow from the C-130J contract, an increase in cash profits on the back of strong revenue growth and an ongoing focus on cost control.

A \$6,000,000 short term working capital facility is in place with Export Finance Australia. The limit has recently been increased by \$2,000,000 to help fund strong revenue growth over the remainder of FY20 and into FY21 backed up by customer orders. ## B.2 Income Tax (Expense)/Benefit

Income tax (expense)/benefit comprises current and deferred tax. Current tax and deferred tax are recognised in profit or loss except to the extent that it is related to a business combination, or items recognised directly in equity or in other comprehensive income.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

The Group has recognised a deferred tax asset relating to previously unrecognised tax losses to the extent there are sufficient taxable temporary differences against which the unused tax losses can be utilised. Utilisation of tax losses also depends on the ability of the entity to satisfy certain tests at the time the losses are recouped. The recognised tax losses are subject to the shareholder continuity test.

As a result of improved profitability, the Group continues to review previously unrecognised tax losses and has determined that it is now probable that future taxable profits will be available against which the tax losses can be utilised. As a consequence, a deferred tax asset of \$1,188,000 was recognised for the half year, of which \$429,000 has been offset against current year estimate of tax payable.

## C.1 Loans and Borrowings

#### Short term facility

Quickstep Holdings Limited executed an Export Contract Loan (ECL) agreement with EFA on 28 June, 2017 a variation deed dated 28 June 2019 and a further variation deed dated 25 February 2020. This revolving loan facility is limited to \$6,000,000 (2019 \$4,000,000) and each drawing under the facility will be due for repayment within 10 months of the drawdown date. The facility is in place to support additional working capital requirements related to growth of JSF deliveries and is available to be drawn up to 31 May 2021 with final repayment no later than 25 March 2022.

The interest rate on the facility is a variable rate calculated as the sum of the base rate plus a margin of 6.56%, payable to EFA quarterly on funds drawn. A commitment fee of 1.5%pa accrues from the date of the agreement and is payable to EFA quarterly.

#### Lease liabilities

The group has initially applied AASB 16 at 1 July 2019, using the modified retrospective approach. Under this approach, comparative information is not restated and the cumulative effect of initially applying AASB 16 is recognised in accumulated losses at the date of this initial application. See Note E.2. Following the adoption of AASB 16, the group has presented lease liabilities within Loans and Borrowings.

#### **Recognition and Measurement**

#### Fair Value Measurement

When a derivative is designated as a cash flow hedging instrument, the effective portion of changes in the fair value of the derivative is recognised in Other Comprehensive Income and accumulated in the cash flow hedge reserve. Any ineffective portion of changes in the fair value of the derivative is recognised immediately in profit and loss. The Group uses forward foreign exchange contracts to hedge its currency exposure risk in relation to sales in US dollars – all hedges have a maturity date less than 1 year from reporting date.

#### Valuation of Financial Measurement – cash flow hedges

Foreign currency forward contracts are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured to their fair value at the end of each reporting period. The Group documents at the inception of the hedging transaction the relationship between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking various hedge transactions. The Group also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions have been and will continue to be highly effective in offsetting changes in fair values or cash flows of hedged items.

#### Fair Value Hierarchy

Financial assets and liabilities, including foreign currency hedges are considered level 2 in the fair value hierarchy. The carrying value of financial assets and liabilities carried at amortised costs, approximate their fair value. During the half year, there have been no transfers between levels in the fair value hierarchy.

Under AASB 15 the Group has determined that for made-to-order parts, the customer controls all the work in progress as the products are being manufactured. This is because under those contracts, parts are made to a customer's specification and if a contract is terminated by the customer, then the Group is entitled to reimbursement of the costs incurred to date, including a reasonable margin. Therefore, revenue from these contracts and the associated costs are recognised over time – i.e. before the goods are delivered to the customers' premises. Invoices are issued according to contractual terms. Uninvoiced amounts are presented as contract assets.

# E. Other Disclosures

This section provides details on other required disclosures relating to the Group to comply with the accounting standards and other pronouncements.

- **E.1** Subsequent Events
- **E.2** Changes in Significant Accounting Policies

## **E.1** Subsequent Events

There have been no matters or circumstances that have arisen since 31 December 2019 up to the date of this report that would significantly affect:

- the operations of the Consolidated Entity;
- the results of those operations; and
- the state of affairs of the Consolidated Entity.

## **E.2** Changes in Significant Accounting Policies

Except as described below, the accounting policies applied in these consolidated financial statements are the same as those applied in the Group's consolidated financial statements as for the year ended 30 June 2019.

The Group has initially adopted AASB 16 Leases effective from 1 July 2019. A number of other new standards are effective from 1 July 2019, but they do not have a material effect on the Group's financial statements.

#### **AASB 16 Leases**

AASB 16 introduced a single, on-balance sheet accounting model for leases, as a result, the Group, as a lessee, has recognized right-of-use assets representing its rights to use the underlying assets and lease liabilities representing its obligation to make lease payments.

The Group has applied AASB 16 using the modified retrospective approach, under which the cumulative effect of initial application is recognized in accumulated losses at 1 July 2019. Accordingly, the comparative information presented for FY19 has not been restated – i.e. it is presented, as previously reported, under AASB 117 and related interpretations. There are recognition exemptions for short-term leases and leases of low-value items.

The adjustment for AASB 16 has a positive impact on EBITDA as the costs of operating leases (previously recognised as part of EBIT expensed over the term of the lease) will now be excluded from EBITDA as lease costs will be recognised separately in depreciation (for the right of use assets) while interest on lease liabilities will be disclosed as part of financing costs.

On adoption of AASB 16, the group recognized lease liabilities in relation to leases which had been previously classified as 'operating Leases' under the principles of AASB 117 Leases. These liabilities were measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate as at 1 July 2019. The weighted average incremental borrowing rate applied to the lease liability on 1 July 2019 was 6.88%.

for the half-year ended 31 December 2019

## E. Other Disclosures

## **E.2** Changes to Significant Accounting Policies

#### **AASB 16 Leases**

In applying AASB 16 for the first time, the Group has used the following practical expedients permitted by the standard:

- applying a single discount rate to a portfolio of leases that have reasonably similar characteristics
- relying on previous assessments on whether leases are onerous as an alternative to performing an impairment review there were no onerous contracts as at 1 July 2019
- accounting for operating leases with a remaining lease term of less than 12 months as at 1 July 2019 as shortterm leases
- excluding initial direct costs for the measurement of the right-of-use asset at the date of initial application
- using hindsight in determining the lease term where the contract contains options to extend or terminate the

The Group has also elected not to reassess whether a contract is, or contains a lease at the date of initial application. Instead, for contracts entered into before the transition date the group relied on its assessment made by applying AASB 117 and Interpretation 4 Determining whether an Arrangement contains a Lease.

The Group leases assets including properties, production equipment and IT equipment.

As a lessee, the Group previously classified leases as operating leases or finance leases based on its assessment of whether the lease transferred substantially all of the risks and rewards of ownership. Under AASB 16, the Group recognizes right-of-use assets and lease liabilities for most leases – i.e. these leases are on-balance sheet.

However, the Group has elected not to recognize right-of-use assets and lease liabilities of low value assets. The Group recognizes the lease payments associated with these leases as an agreed expense on a straight line basis over the term of the lease.
