About BidEnergy

BidEnergy is an Australian-based technology company with a global client base. It is headquartered in Melbourne, with additional offices in the USA and UK. BidEnergy’s cloud-based RPA platform simplifies the complex energy spend management process by using automation, enabling organisations to have complete control over their energy spend and utility bill management. Unlike legacy energy consulting and business services, the platform automates the management of every component of the energy spend management process for large scale and multi-site clients. By automatically capturing and validating invoices and meter data, BidEnergy customers can streamline their accounting and payments processes, go to market at short notice to optimise their supply contracts and reduce or eliminate billing charges using sophisticated analytics and reporting.
