

1st April 2020

dorsaVi signs a reseller/distributor agreement with US based Therainc Inc (TheraNow) to provide a Telehealth solution for Physiotherapy clinics in the US and Australia

Melbourne, Australia, 1st April 2020; dorsaVi (ASX: DVL) today announced that it has signed a reseller/distributor agreement with US company, Therainc Inc (TheraNow) to provide in-clinic and on-site corporate Physiotherapists with a telehealth solution allowing clinicians to continue to provide care for their clients remotely through a 'virtual physiotherapy clinic'.

Acknowledging the current challenges to businesses from Coronavirus (COVID-19), dorsaVi has brought forward discussions with TheraNow to sign a 12-month agreement, distributing a white labelled telehealth product exclusively in the Australian market and non-exclusively in the US market. While the agreement creates significant new market opportunities for dorsaVi, it is too early to predict the likely impact of the agreement on the Company's financial results.

Physiotherapists in-clinic, and when servicing corporate clients, will be able to run their business 'virtually' enabling a continuity of care and an ongoing connection with their patients through a period where there is a clear need for doing business differently.

TheraNow President, Dr Harshivinderjit Bains (MD, PHD), said "TheraNow is very excited to partner with dorsaVi via a licensing and marketing agreement of our innovative telehealth/telerehabilitation platform, which will launch a global era of telemedicine in physiotherapy and rehabilitation. With the paralysis of the health care delivery system by COVID-19, there is no better time than the current for TheraNow and dorsaVi to use their core strengths to help deliver Physiotherapy/Physical Therapy services via a model where both the therapist and the patient can be in the safety of their own homes."

dorsaVi Chief Executive Officer Dr Andrew Ronchi (PHD) said: "We are delighted to be able to assist the physiotherapy and allied health market through providing the 'virtual clinic'. Technology is a great enabler, allowing clinicians to stay connected to their patients, involving them in their treatment and rehabilitation, whilst generating a new income stream for their business. Partnering with TheraNow and distributing a telehealth platform is very much aligned with dorsaVi's strategy to help people move well".

About dorsaVi

dorsaVi Ltd (ASX: DVL) is an ASX company focused on developing innovative motion analysis device technologies for use in clinical applications, elite sports, and occupational health and safety. dorsaVi believes its wearable sensor technology enables – for the first time – many aspects of detailed human movement and position to be accurately captured, quantified, and assessed outside a biomechanics lab, in both real-time and real situations for up to 24 hours.

Our technology has applications across three sectors:

- **Occupational Health and Safety (OHS):** dorsaVi enables employers to assess risk of injury for employees as well as test the effectiveness of proposed changes to OHS workplace design, equipment or methods based on objective evidence. dorsaVi has been used by major corporations including Sodexo, London Underground, Vinci Construction, Crown Resorts, Caterpillar (US), Monash Health, Coles, Woolworths, Toll, Toyota, Orora (formerly Amcor) and BHP Billiton.
- **Clinical:** dorsaVi is transforming the management of patients with its clinical solutions - ViMove, ViMove2 and Professional Suite – which provide objective assessment, monitoring outside the clinic and immediate biofeedback. dorsaVi TeleHealth provides a ‘virtual clinic’, enabling clinicians to do business differently and take their patient consultations on-line.
- **Elite Sports:** ViPerform is allowing coaches and medical teams managing elite athletes and teams to screen athletes and provide objective evidence for decisions on return to play, measure biomechanics and provide immediate biofeedback out on the field, tailor and track training programs and optimise technique and peak performance. ViPerform is being used in the US by the National Basketball Association (NBA), the Major Soccer League (MLS) and the National Football League (NFL), by the AFL and NRL clubs and by Barclays Premier League (EPL) clubs, England and Wales Cricket Board and the Board of Control for Cricket in India as well as various Olympic teams and athletes internationally.
