

3 July 2020

Investor Presentation

Centaurus Metals Ltd (ASX: CTM) is pleased to provide the Company's latest investor presentation (attached) following the announcement of a maiden JORC Mineral Resource estimate for its Jaguar Nickel Project in Brazil earlier this week.

The Company's Managing Director, Darren Gordon, was also interviewed yesterday as part of the Resources Rising Stars "10-in-10" Online CEO Interview Series.

Mr Gordon provides an overview of the Jaguar Mineral Resource as well as key recent developments and upcoming activities at the Jaguar Project.

To access the interview, please type the link below into your browser.

No responsibility for any errors or omissions from this presentation arising out of negligence or otherwise is accepted.
- This presentation may include forward looking statements. Forward looking statements are only predictions and are subject to risks, uncertainties and assumptions which are outside the control of Centaurus Metals. These risks, uncertainties and assumptions include commodity prices, currency fluctuations, economic and financial market conditions in various countries and regions, environmental risks and legislative, fiscal or regulatory developments, political risks, project delay or advancement, approvals and cost estimates. Actual values, results or events may be materially different to those expressed or implied in this presentation. Given these uncertainties, readers are cautioned not to place reliance on forward looking statements. Any forward-looking statements in this presentation speak only at the date of issue of this presentation. Subject to any continuing obligations under applicable law and the ASX Listing Rules, Centaurus Metals does not undertake any obligation to update or revise any information or any of the forward looking statements in this presentation or any changes in events, conditions or circumstances on which any such forward looking statement is based.
- The information in this report that relates to Exploration Results is based on information compiled by Mr Roger Fitzhardinge who is a Member of the Australasia Institute of Mining and Metallurgy. Mr Fitzhardinge is a permanent employee and shareholder of Centaurus Metals Limited. Mr Fitzhardinge has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Fitzhardinge consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.
- The information in this report that relates to the new June 2020 Jaguar Mineral Resources is based on information compiled by Mr Lauritz Barnes (consultant with Trepanier Pty Ltd) and Mr Roger Fitzhardinge (a permanent employee and shareholder of Centaurus Metals Limited). Mr Barnes and Mr Fitzhardinge are both members of the Australasian Institute of Mining and Metallurgy. Mr Barnes and Mr Fitzhardinge have sufficient experience of relevance to the styles of mineralisation and types of deposits under consideration, and to the activities undertaken to qualify as Competent Persons as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Specifically, Mr Fitzhardinge is the Competent Person for the database (including all drilling information), the geological and mineralisation models plus completed the site visits. Mr Barnes is the Competent Person for the construction of the 3-D geology / mineralisation model plus the estimation. Mr Barnes and Mr Fitzhardinge consent to the inclusion in this report of the matters based on their information in the form and context in which they appear.
- All information contained in this presentation on the Salobo Mine of Vale has been taken from the "Vale Production in 4Q18" Report, its 20-F Annual Report for 2018 and other public domain reports including their 2018 Vale Day presentation

Nickel – The Looming EV Revolution

- For personal use only
- Current nickel market size ~2.5Mt
 - Nickel demand for batteries growing strongly (more than 4X in six years to 2018) but from a low base – still only 145,000t or 6% of market
 - Depending on the scenario for the EV rate of adoption, nickel volumes to meet this additional demand vary between 750,000 tonnes and 2 million tonnes
 - Nickel demand from EV will far exceed nickel production from existing operations in any scenario of EV adoption

Where is the new supply going to come from?

EV nickel demand requires Class-1 nickel provided by sulphide and HPAL projects, rather than NPI which targets stainless steel production.

Centaurus - A Compelling Nickel Investment Opportunity

☀️ Focused on developing the advanced Jaguar Nickel Sulphide Project

☀️ Globally Significant Maiden JORC Indicated and Inferred Mineral Resource Estimate (MRE) of **48.0Mt at 1.08% Ni for 517,500 tonnes of nickel metal**

- 80% of nickel tonnes within 200 metres of surface
- 29% of Maiden MRE already in Indicated category

☀️ High Grade JORC MRE of **20.6Mt at 1.56% Ni for 321,400 tonnes of nickel metal**

☀️ Resource open at depth, multiple growth opportunities from resource extensional drilling and new discoveries

☀️ Project is in the **world class Carajás Mineral Province** – home to Vale, extensive regional mining infrastructure and some of the largest mineral deposits globally.

☀️ **Scoping Study** targeted for delivery in next 3-4 months;

Centaurus – COVID19 Response

**No impact on drilling to date
Centaurus now planning to ramp-up drilling in a
safe and sustainable manner**

- ☀️ Centaurus continues to work closely with the health authorities in the local municipalities to ensure the health and safety of its people and community.
- ☀️ Community Support:
 - 500 test kits as well as medical PPE (masks, coveralls and hand sanitiser) purchased and donated to the local health services of Tucumã and Sao Felix do Xingu
- ☀️ Business-continuity precautionary measures in place including:
 - Enhanced sanitisation procedures;
 - Site team separated into multiple shifts;
 - Daily health screenings;
 - Regular COVID19 testing of Tucumã team; and
 - Elimination of all non-essential travel

Board and Management Team

Extensive Brazil and Nickel Development Experience

MANAGEMENT TEAM

DARREN GORDON

MANAGING DIRECTOR

Chartered Accountant and Mining Professional with +25 years' experience

Extensive exposure to resource financing, development and operations in multiple commodities in Australia and Brazil

BRUNO SCARPELLI

BRAZIL COUNTRY MANAGER
& EXECUTIVE DIRECTOR

Engineer with +20 years of resource experience, focused in Brazil

Previously Environmental Coordinator at Vale's Carajás Iron Ore Operations in State of Para, Brazil

ROGER FITZHARDINGE

OPERATIONS MANAGER

Geologist with +20 years of experience, including senior roles with Mirabela Nickel

15 years of experience in Brazil

JOHN WESTDORP

CHIEF FINANCIAL OFFICER

25 years of finance experience covering multiple commodities and jurisdictions

JOHN KNOBLAUCH

PRINCIPAL METALLURGIST

+20 years of experience with strong nickel exposure through previous roles with Mirabela Nickel and Sally Malay Mining

Two years of experience in Brazil

ROCKY OSBORNE

PRINCIPAL GEOSCIENTIST

+40 years of experience, led the discovery of numerous nickel sulphide orebodies

17 years of experience in Brazil

NON-EXECUTIVE BOARD

DIDIER MURCIA

NON-EXECUTIVE CHAIRMAN

Lawyer with +30 years of experience across multiple commodities & jurisdictions. Chairman of several junior resource companies

MARK HANCOCK

NON-EXECUTIVE DIRECTOR

Chartered Accountant with +30 years of experience in senior commercial and financial roles across a number of leading companies in Australia and South East Asia

CHRIS BANASIK

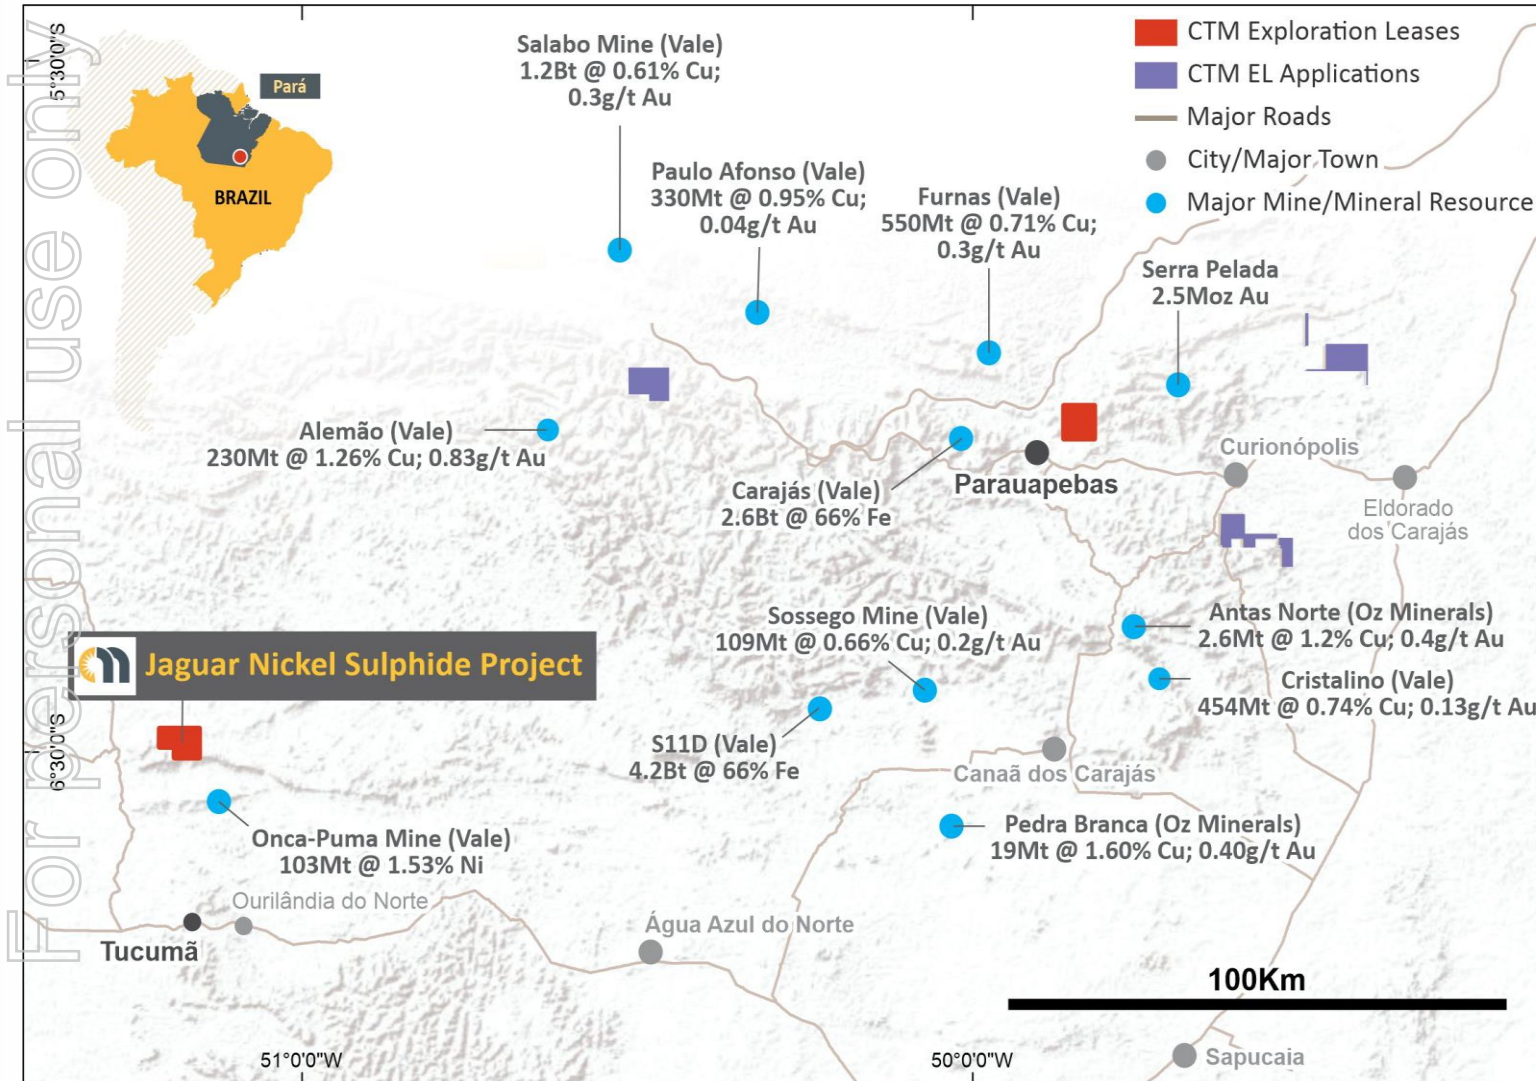

NON-EXECUTIVE DIRECTOR

Geologist with +30 years of experience. Extensive nickel sulphide experience with WMC. Founding Director of WA gold producer Silver Lake Resources

Brazil's Carajás Mineral Province – Land of the Giants

CentaurusMetals
Limited

- ☀ The Carajás is one of the world's most prolific mining regions – Effective industrial zone of Brazil
- ☀ Extensive infrastructure to support project development
- ☀ 10 IOCG deposits with resources of +100Mt Cu-Au for **+4.0Bt of Cu-Au resources, including Vale's giant Salobo Mine** which hosts Reserves of 1.2Bt @ 0.61% Cu, 0.3g/t Au
- ☀ Hosts the largest high-grade iron ore deposits on the planet, plus multiple large nickel laterite mines and deposits AND NOW
- ☀ **Hosts one of the largest near surface undeveloped nickel sulphide resources globally**

The Carajás contains one of the world's largest known concentrations of large-tonnage mineral deposits

Jaguar Project – Building Something Special

Opportunity

Advanced Ni asset +55,000m drilling,
Small for a major - Big for a junior?

High grade opportunities
Modern exploration techniques - EM

Win-win deal with Vale

Scoping Study Q4 2020
Main Environmental Study – Q2 2021

Jaguar Project – Large-Tonnage Resource at Surface

JORC Mineral Resource Estimate of 48.0Mt at 1.08% Ni for 517,500 tonnes of contained Nickel Metal

Classification	Ore Type	Tonnes		Grade		Contained Metal Tonnes		
		Mt	Ni %	Cu %	Co ppm	Ni	Cu	Co
Indicated	Transition Sulphide	0.3	1.09	0.09	310	3,500	300	100
	Fresh Sulphide	11.2	1.29	0.09	392	145,000	9,800	4,400
	Total Indicated	11.5	1.29	0.09	390	148,500	10,100	4,500
Inferred	Transition Sulphide	0.8	0.99	0.08	287	8,200	700	200
	Fresh Sulphide	35.6	1.01	0.07	255	360,800	24,800	9,100
	Total Inferred	36.4	1.01	0.07	255	369,000	25,500	9,300
Total		48.0	1.08	0.07	288	517,500	35,600	13,800

* Within 200m of surface cut-off grade 0.5% Ni; more than 200m from surface cut-off grade 1.0% Ni; Totals are rounded to reflect acceptable precision, subtotals may not reflect global totals.

Maiden JORC MRE based on more than 65,000m of diamond drilling

80% of MRE is within 200m of surface

29% of MRE (contained metal) is already in Indicated Category

- Mineralisation remains open at depth and along strike
- Significant potential to increase size of MRE with further drilling

Jaguar Project – High-Grade Open-pit Potential

MRE Contains Significant High-Grade portion of 20.6Mt at 1.56% Ni for 321,400 tonnes of contained Nickel Metal

Ni% Cut-off Grade		Tonnes Mt	Grade Ni %	Metal Tonnes Ni
Surface - 200m	+ 200m			
0.3	1.0	55.6	0.99	549,500
0.4	1.0	53.0	1.02	540,300
0.5	1.0	48.0	1.08	517,500
0.6	1.0	40.8	1.17	478,200
0.7	1.0	34.4	1.27	436,400
0.8	1.0	28.7	1.37	393,700
0.9	1.0	24.4	1.47	357,300
1.0	1.0	20.6	1.56	321,400
1.1	1.1	16.9	1.67	283,400
1.2	1.2	13.9	1.79	248,400
1.3	1.3	11.6	1.90	219,400

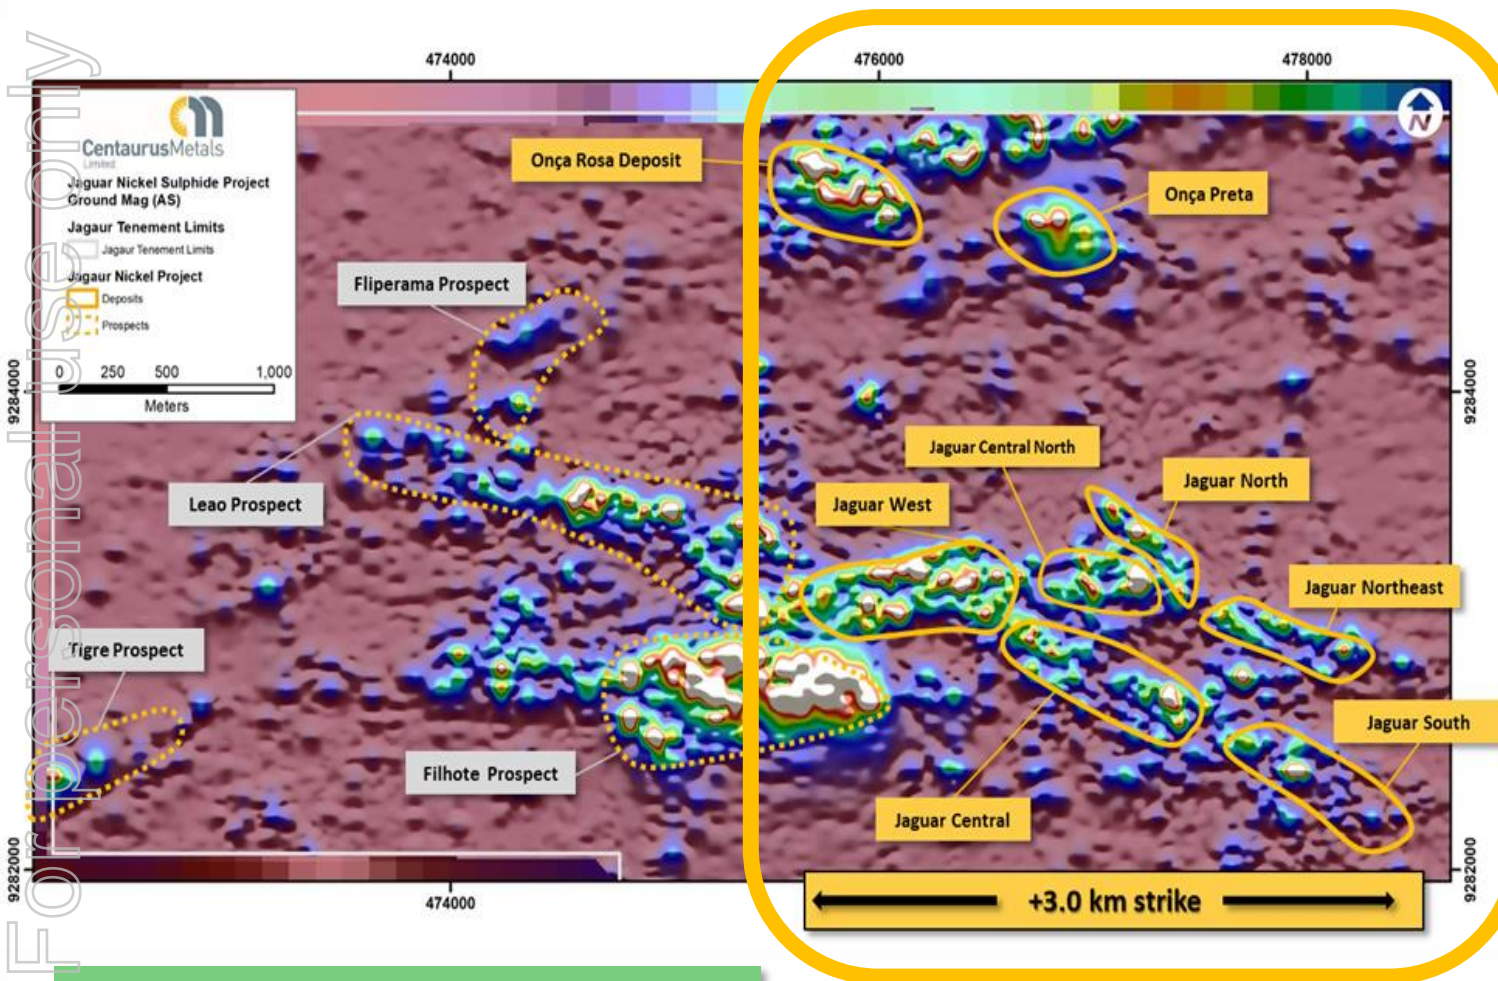

* Totals are rounded to reflect acceptable precision, subtotals may not reflect global totals.

- More than 70% of High-Grade MRE is within 200m of surface
- Supports potential for open pit operation and strong early cash flow generation to assist with payback on any future project development
- Mineralisation remains open at depth and along strike with significant potential to increase size of MRE with further drilling

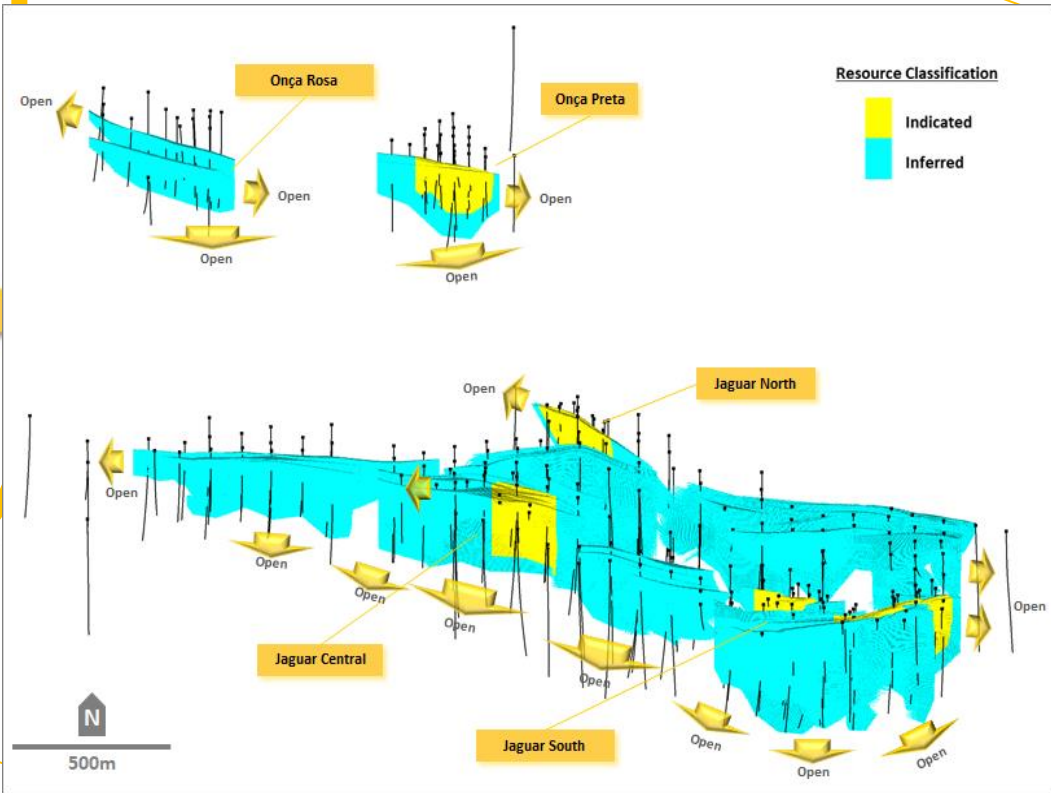

Classification	Ore Type	Tonnes		Grade Cu %	Co ppm	Contained Metal Tonnes		
		Mt	Ni %			Ni	Cu	Co
Indicated	Transition Sulphide	0.2	1.45	0.10	380	2,300	200	100
	Fresh Sulphide	7.0	1.62	0.10	477	113,000	7,100	3,300
	Total Indicated	7.1	1.61	0.10	474	115,200	7,200	3,400
Inferred	Transition Sulphide	0.2	1.69	0.15	457	4,200	400	100
	Fresh Sulphide	13.2	1.53	0.10	369	201,900	12,800	4,900
	Total Inferred	13.4	1.54	0.10	372	206,100	13,200	5,000
Total		20.6	1.56	0.10	407	321,400	20,500	8,400

* Cut-off grade 1.0% Ni; Totals are rounded to reflect acceptable precision, subtotals may not reflect global totals.

Jaguar Project – Multiple Deposits & Targets

**Resource Growth
In-fill and Extensional Drilling
Step-out Drilling**

**Greenfields Growth
Drilling to start in 2-3 months**

Jaguar South Deposit – Open at Depth and Along Strike

15.5Mt at 1.10% Ni for 170,700 tonnes of contained Nickel Metal

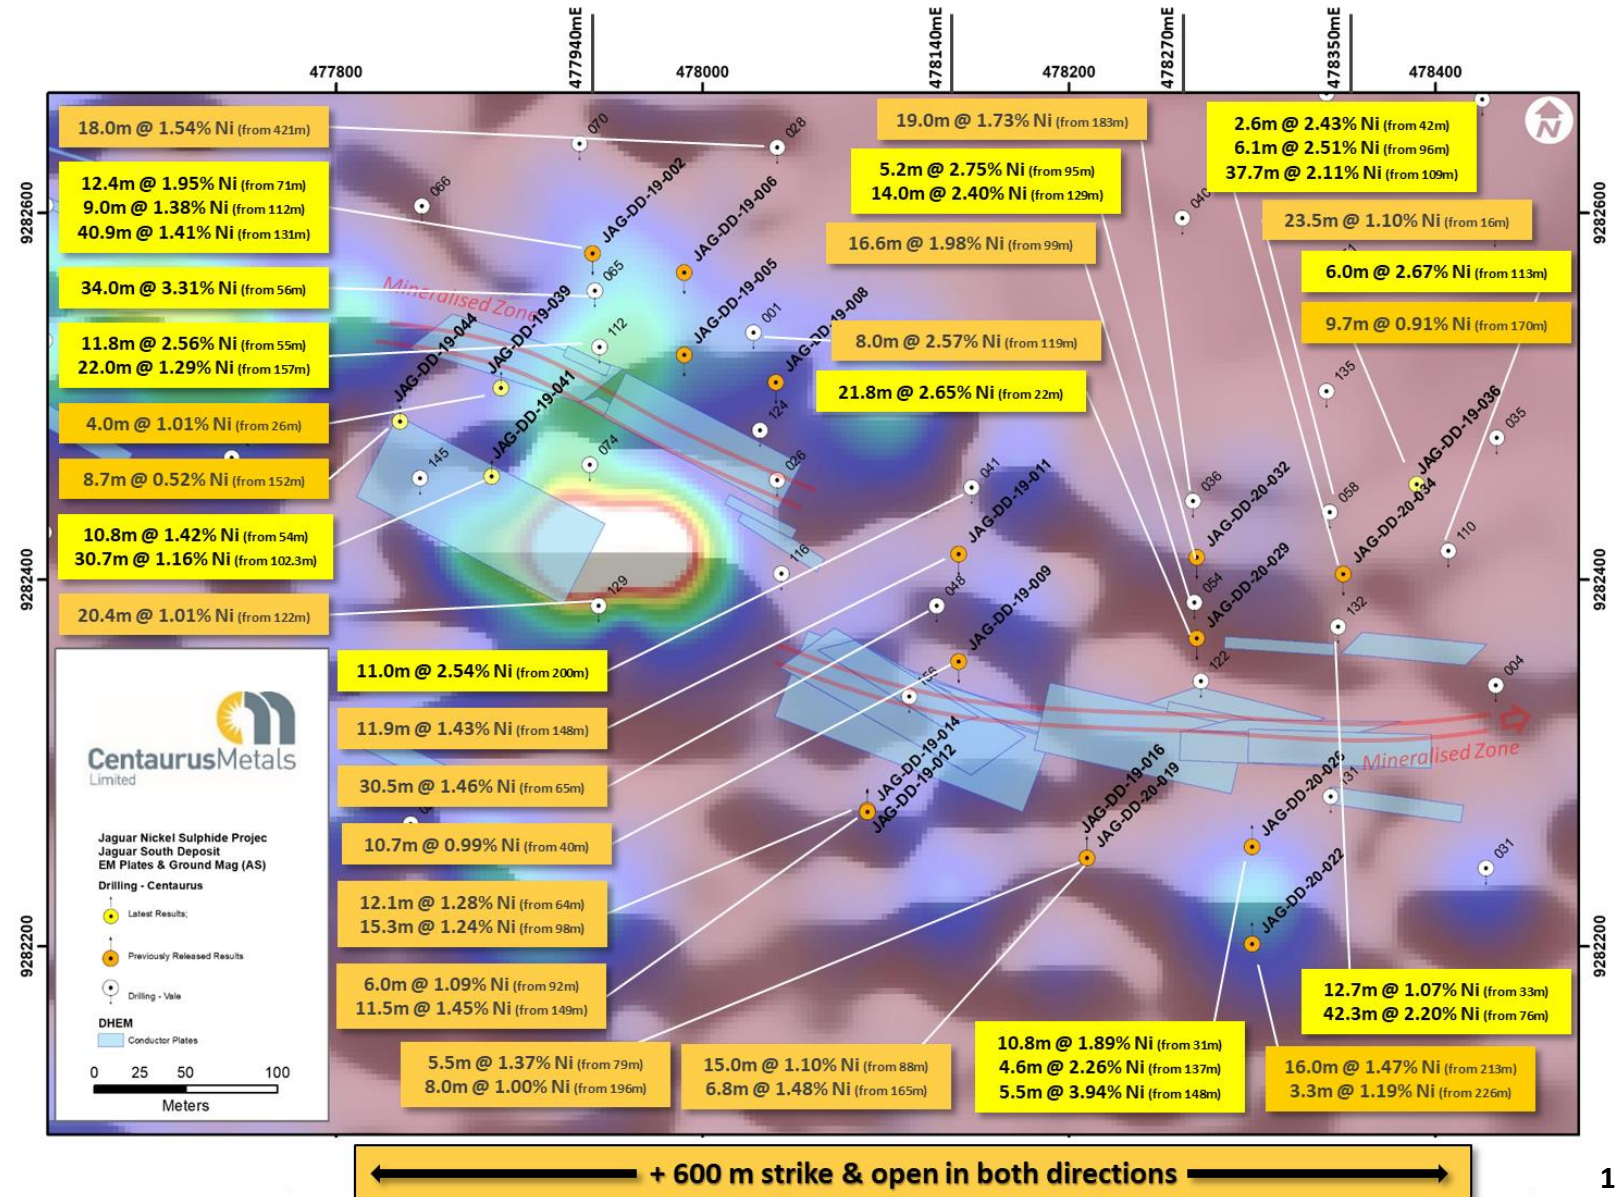

High-grade: 7.0Mt at 1.58% Ni for 110,900 tonnes of Nickel Metal

High-grade from surface and open along strike and at depth

Strong correlation between high-grade nickel and DHEM conductors

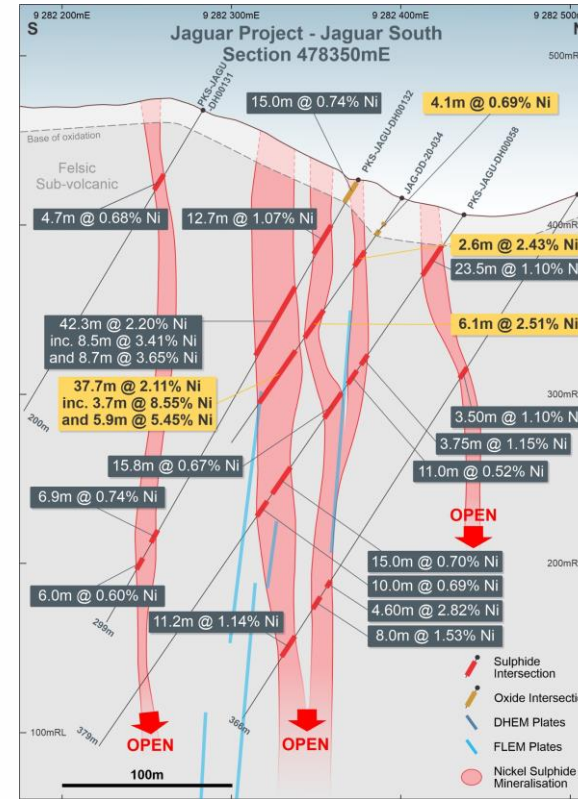

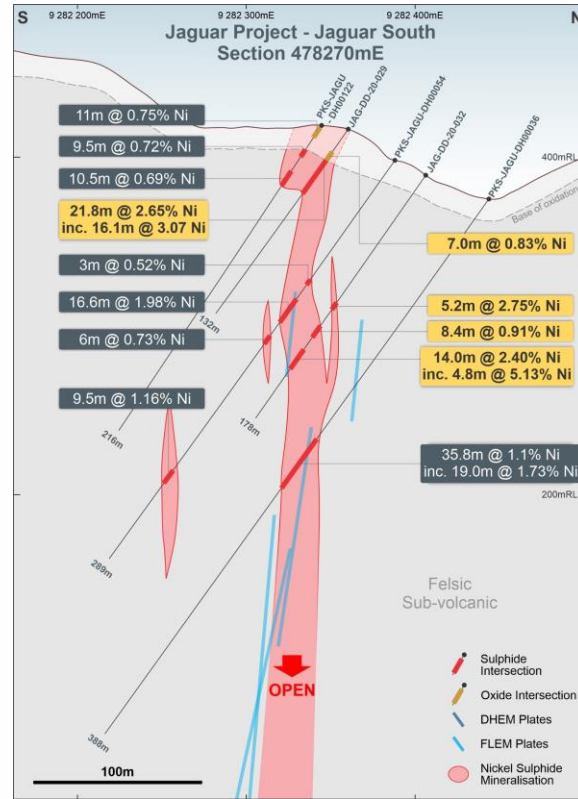

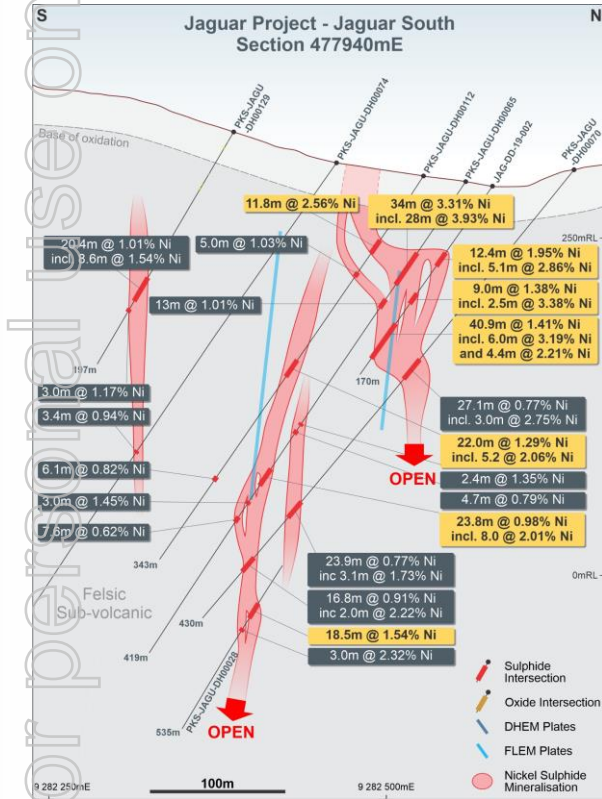

Step-out drilling is planned to test the DHEM conductors and potential down-dip extensions

Along strike drilling to test an interpreted high-grade plunge to the east-northeast

Jaguar South Deposit – High-Grade Zones Hanging Together

+600m strike of semi-massive and massive nickel sulphide from surface to +300m depth (and still open)

- Best intercepts from Jaguar South:**
- ❑ 34.0m at 3.31% Ni from 56m
 - ❑ 42.3m at 2.20% Ni from 76m
 - ❑ 37.7m at 2.11% Ni from 109m
 - ❑ 21.8m at 2.65% Ni from 22m
 - ❑ 14.0m at 2.40% Ni from 129m
 - ❑ 40.9m at 1.41% Ni from 131m
 - ❑ 30.5m at 1.46% Ni from 65m
 - ❑ 11.8m at 2.56% Ni from 55m
 - ❑ 11.0m at 2.54% Ni from 200m
 - ❑ 6.1m at 2.51% Ni from 96m
 - ❑ 10.8m at 1.89% Ni from 31m
 - ❑ 4.6m at 2.25% Ni from 137m
 - ❑ 5.5m at 3.94% Ni from 149m
 - ❑ 16.0m at 1.47% Ni from 213m
 - ❑ 30.7m at 1.16% Ni from 102m
 - ❑ 12.4m at 1.95% Ni from 71m
 - ❑ 19.0m at 1.73% Ni from 183m

Multiple untested DHEM conductor plates down dip Step-out drilling planned

Jaguar Central & North Deposits – Drilling Ongoing

2.8Mt at 1.14% Ni for 32,300 tonnes of contained Nickel Metal

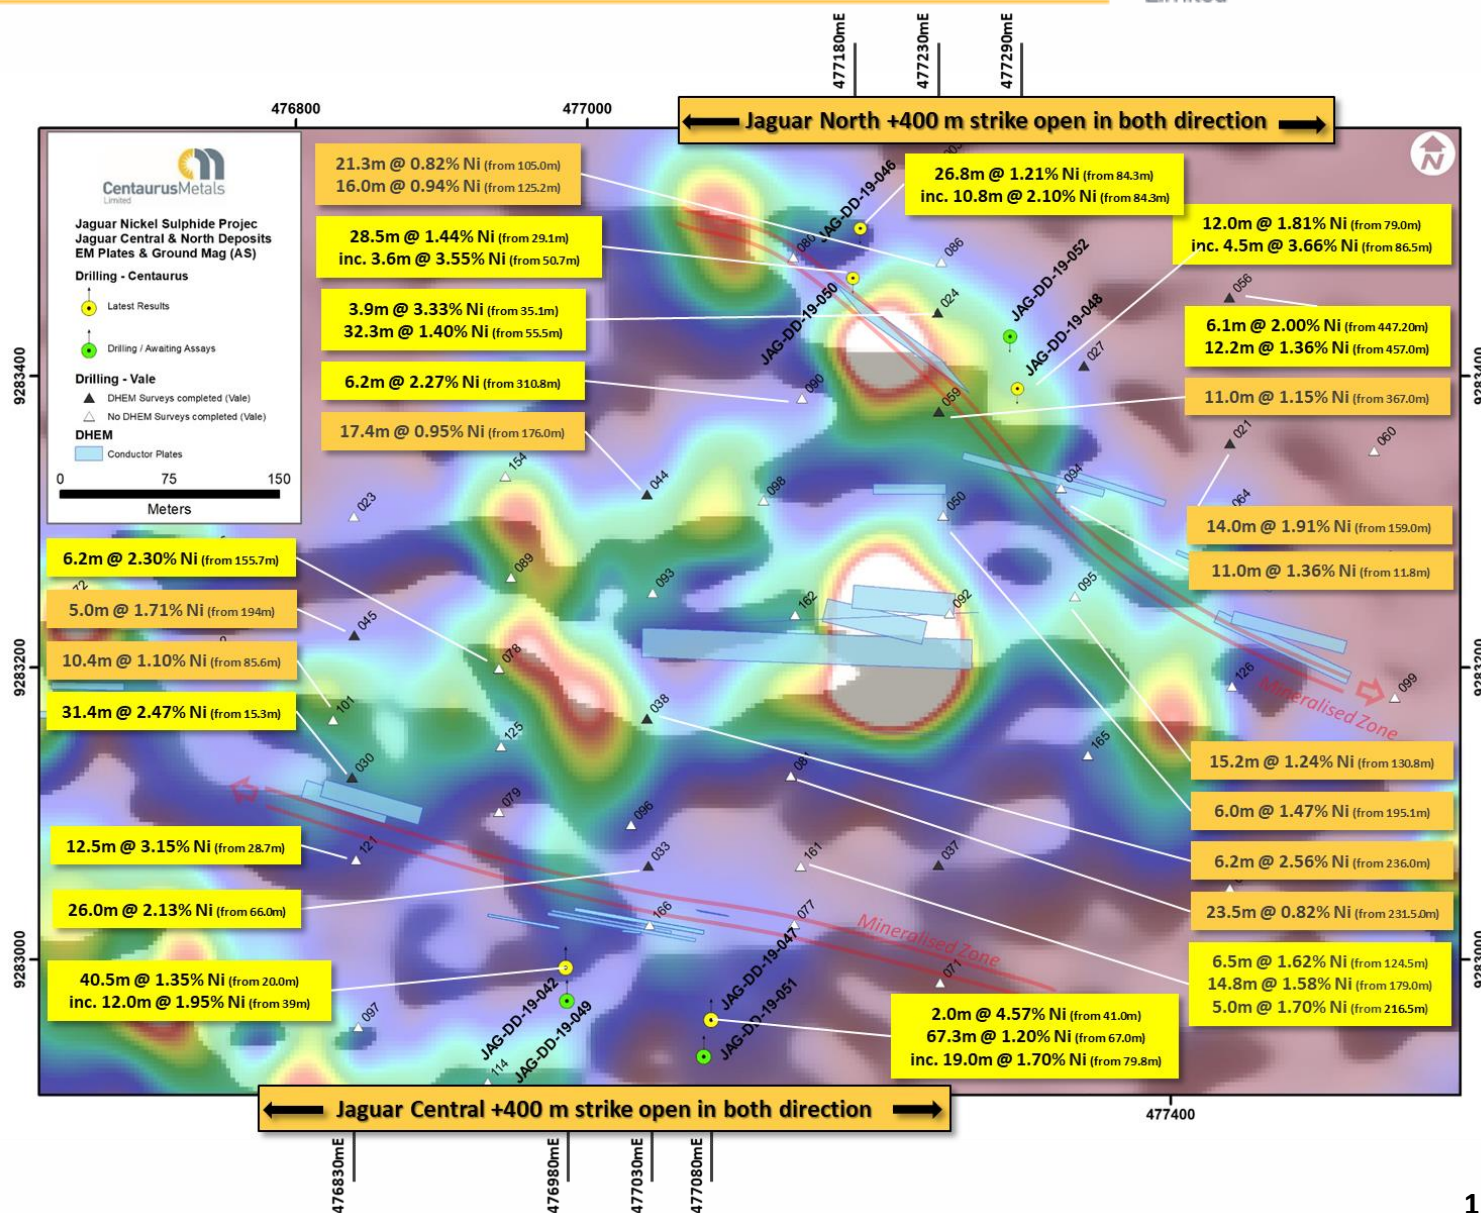

High-grade: 1.5Mt at 1.50% Ni for 22,100 tonnes of Nickel Metal

7.4Mt at 1.13% Ni for 83,400 tonnes of contained Nickel Metal

High-grade: 4.1Mt at 1.44% Ni for 59,400 tonnes of Nickel Metal

Jaguar North

Jaguar Central

Jaguar Central Deposit – More Results Soon

+400m strike of semi-massive nickel sulphide from surface to +300m depth (open along strike and down dip)

Results from first two CTM drill holes at Jaguar Central :

- ❑ 40.5m at 1.35% Ni from 20.0m, incl 12.0m at 1.95% Ni from 38.5m
- ❑ 67.3m at 1.20% Ni from 67.0m, incl 19.0m at 1.70% Ni from 79.8m
- ❑ 2.0m at 4.57% Ni from 41.0m.

Multiple DHEM conductor plates indicate continuity of semi-massive to massive sulphide mineralisation at depth
Step-out drilling already underway

Jaguar North Deposit – More Near Surface & High-Grade

Centaurus Metals
Limited

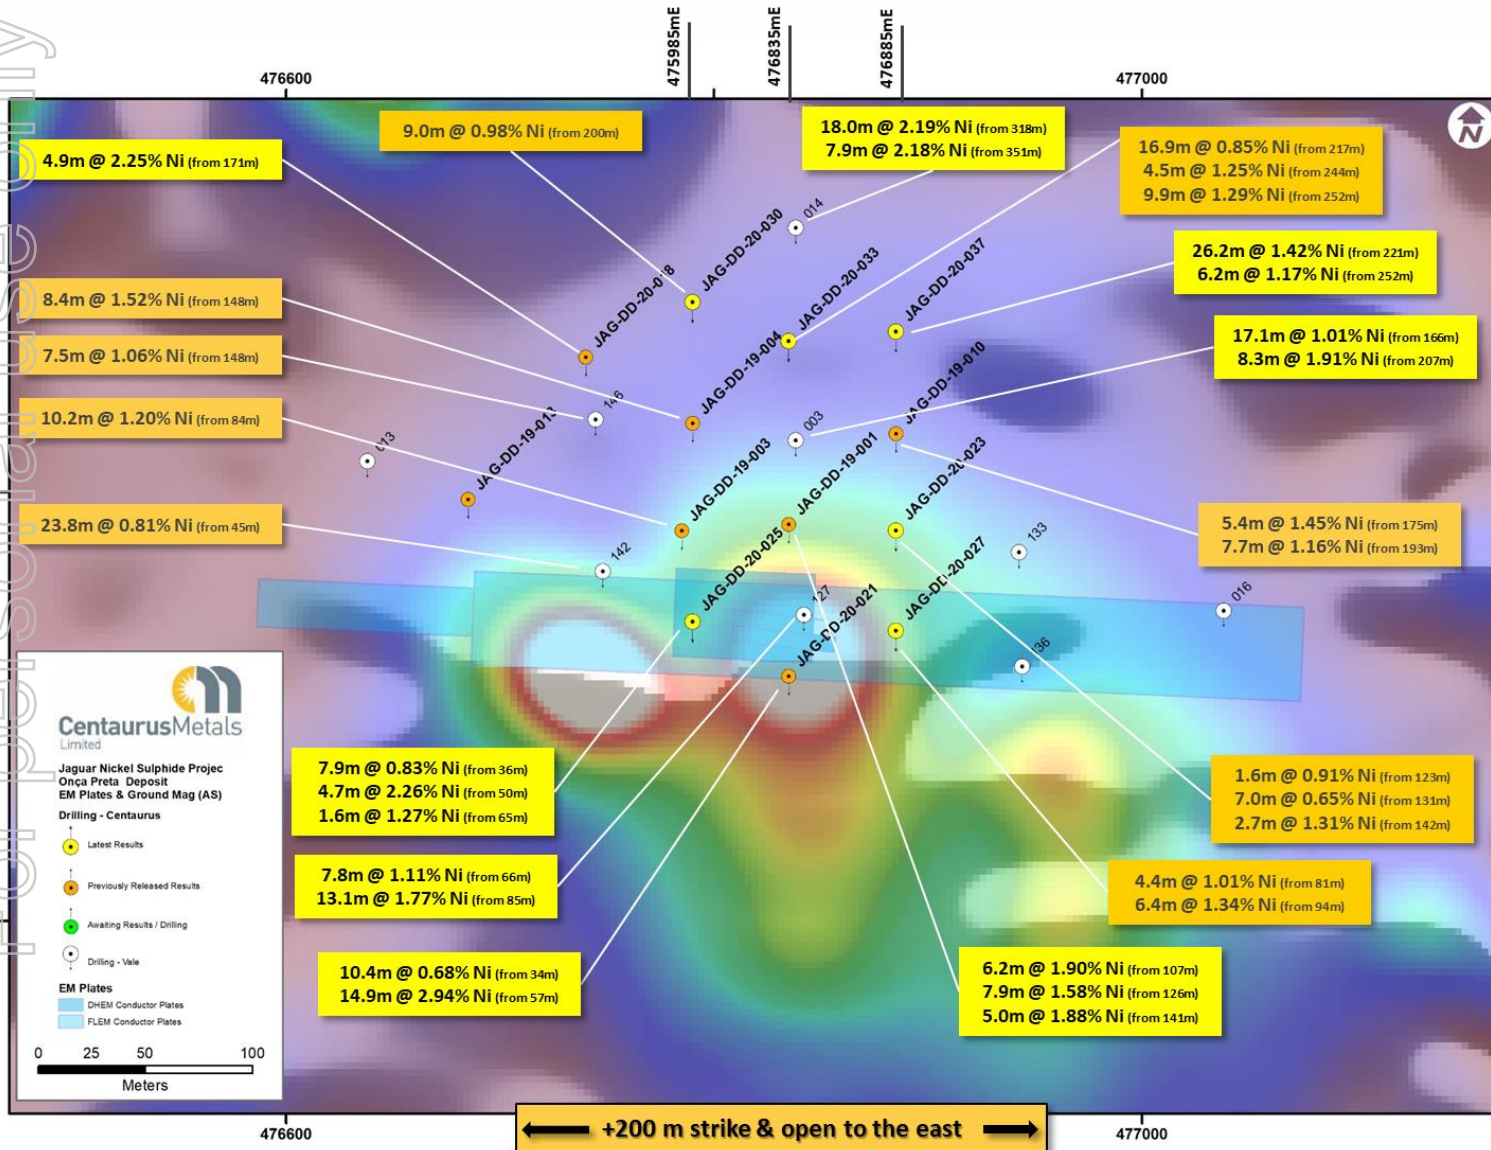

Results from first three CTM drill holes at Jaguar North:

- 26.8m at 1.21% Ni from 84.3m
 - incl 10.8m at 2.10% Ni from 84.3m
- 28.5m at 1.44% Ni from 29.1m
 - incl 3.6m at 3.55% Ni from 50.7m
- 12.0m @ 1.81% Ni from 79.0m
 - incl 4.5m at 3.66% Ni from 86.5m

+400m strike of semi-massive and massive nickel sulphide from surface to +300m depth (open along strike and down dip)

Onça Preta Deposit – High Grade and Near-Surface

3.6Mt at 1.59% Ni for 56,600t of Nickel Metal

High-grade: 2.9Mt at 1.75% Ni for 51,700 tonnes of Nickel Metal

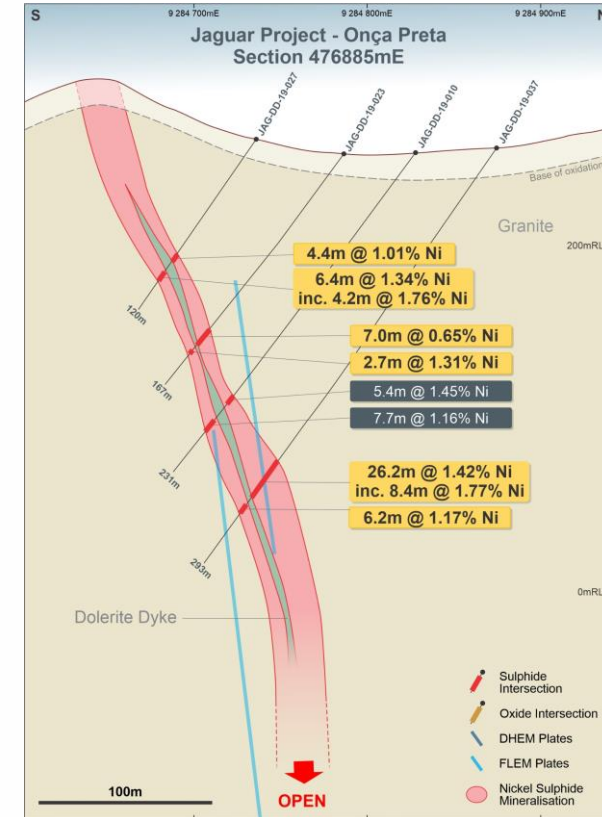

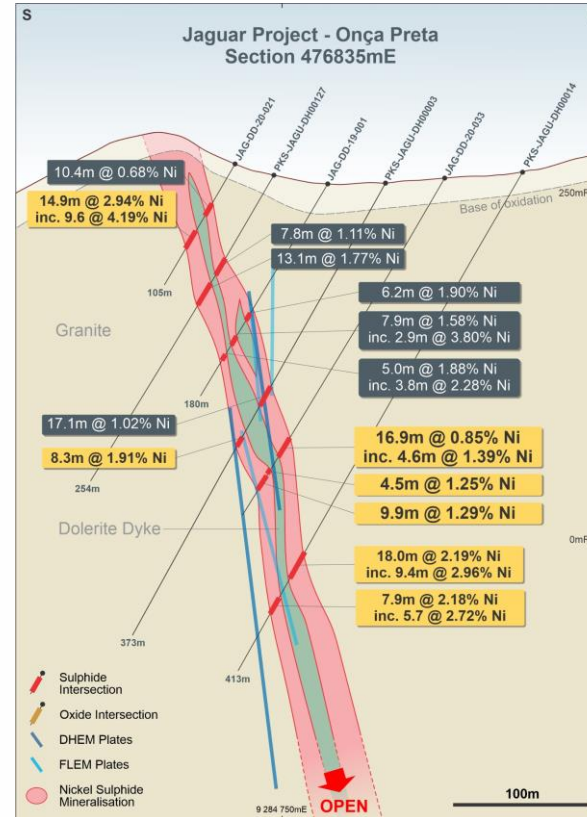

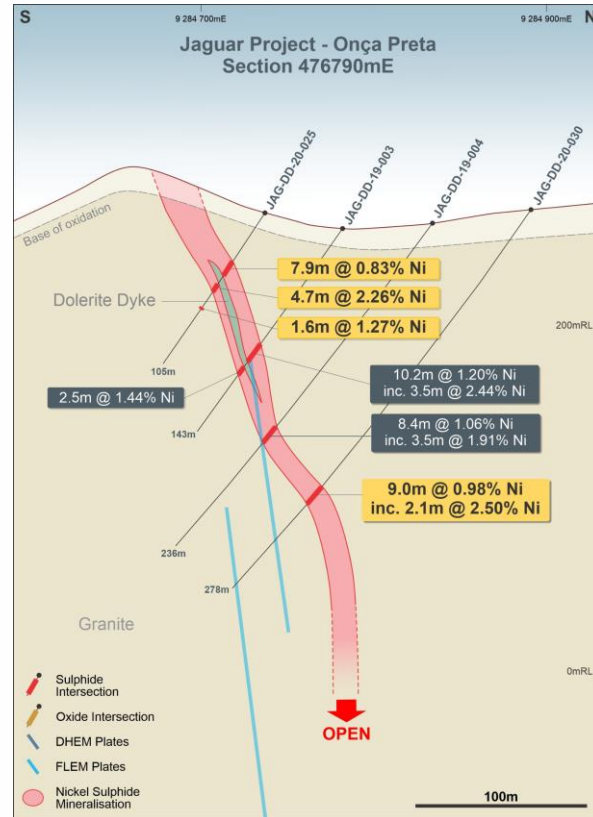

14.9m at 2.94% Ni from just 56.8m depth

Onça Preta Deposit – Width & Grade Increasing with Depth

+150m strike of semi-massive and massive nickel sulphide from surface to +300m depth – and open

Best intercepts from the Onça Preta Deposit:

- 14.9m at 2.94% Ni from 57m
- 18.0m at 2.19% Ni from 318m
- 7.9m at 2.18% Ni from 351m
- 26.2m at 1.42% Ni from 221m
- 4.7m at 2.26% Ni from 50m
- 9.9m at 1.29% Ni from 252m
- 6.2m at 1.90% Ni from 107m
- 13.1m at 1.77% Ni from 85m
- 4.9m at 2.25% Ni from 171m
- 7.9m at 1.58% Ni from 126m
- 10.2m at 1.20% Ni from 84m
- 17.1m at 1.02% Ni from 166m

- High- grade zones from surface to +300m down dip and +150m of along strike
- High correlation between high-grade nickel and DHEM conductors – **strong EM conductor continues below deepest drilling**
- Hydrothermal mineralisation points to a deep plumbing system which remains to be tested

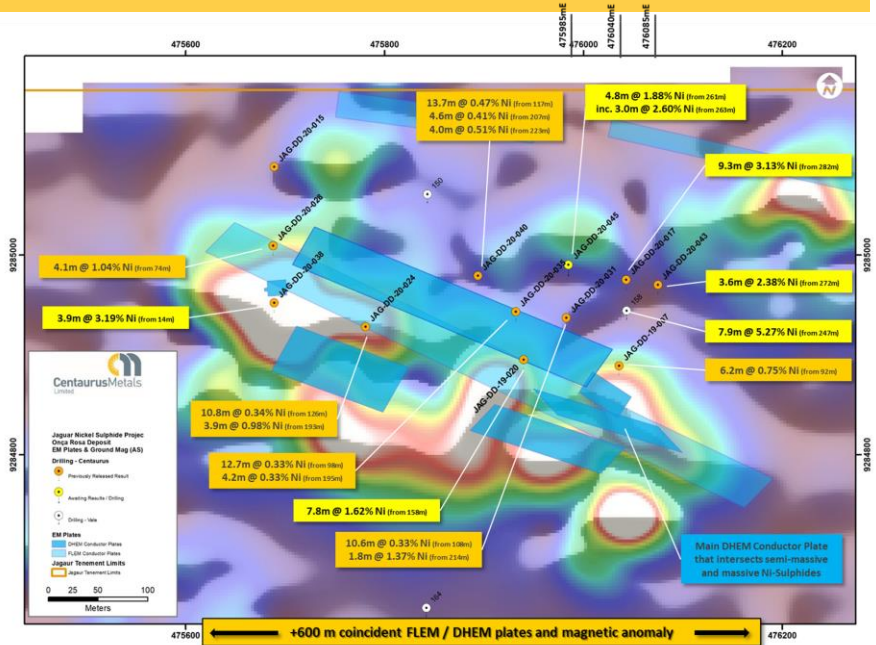

Onça Rosa – Got the “Pink Panther” by the tail!

600m long FLEM plate coincident with ground magnetic at major regional structural intersection

Significant intersections to date:

- ❑ 9.3m at 3.13% Ni (from 282m)
- ❑ 7.9m at 5.27% Ni (from 247m)
- ❑ 3.5m at 2.38% Ni (from 272m)
- ❑ 3.9m at 3.19% Ni (from 14m)
- ❑ 7.8m at 1.62% Ni (from 158m)

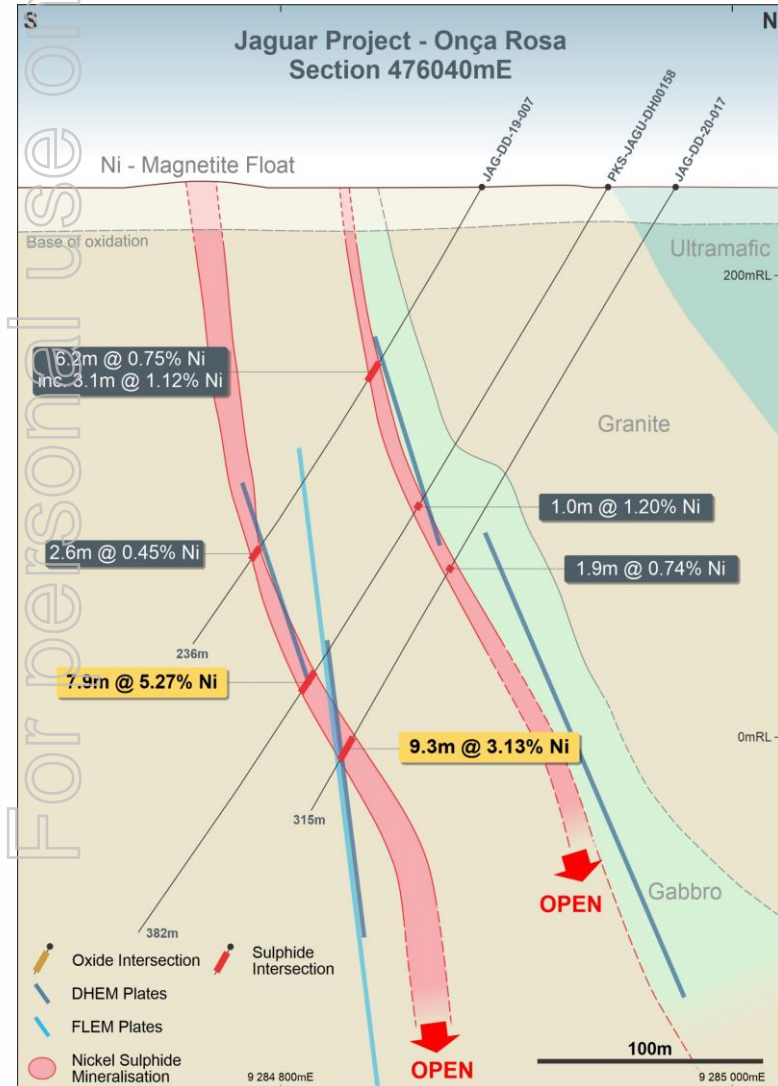

Step-out drilling is planned to test DHEM conductors and potential down-dip

7.9m at 5.27% Ni

2.1Mt at 1.49% Ni for 30,900 tonnes of Nickel Metal

High-grade: 1.1Mt at 2.20% Ni for 24,200 tonnes of Nickel Metal

For personal use only

Jaguar Project – Greenfields Growth Potential

The Jaguar Project sits at the intersection of two regionally important mineralising structures

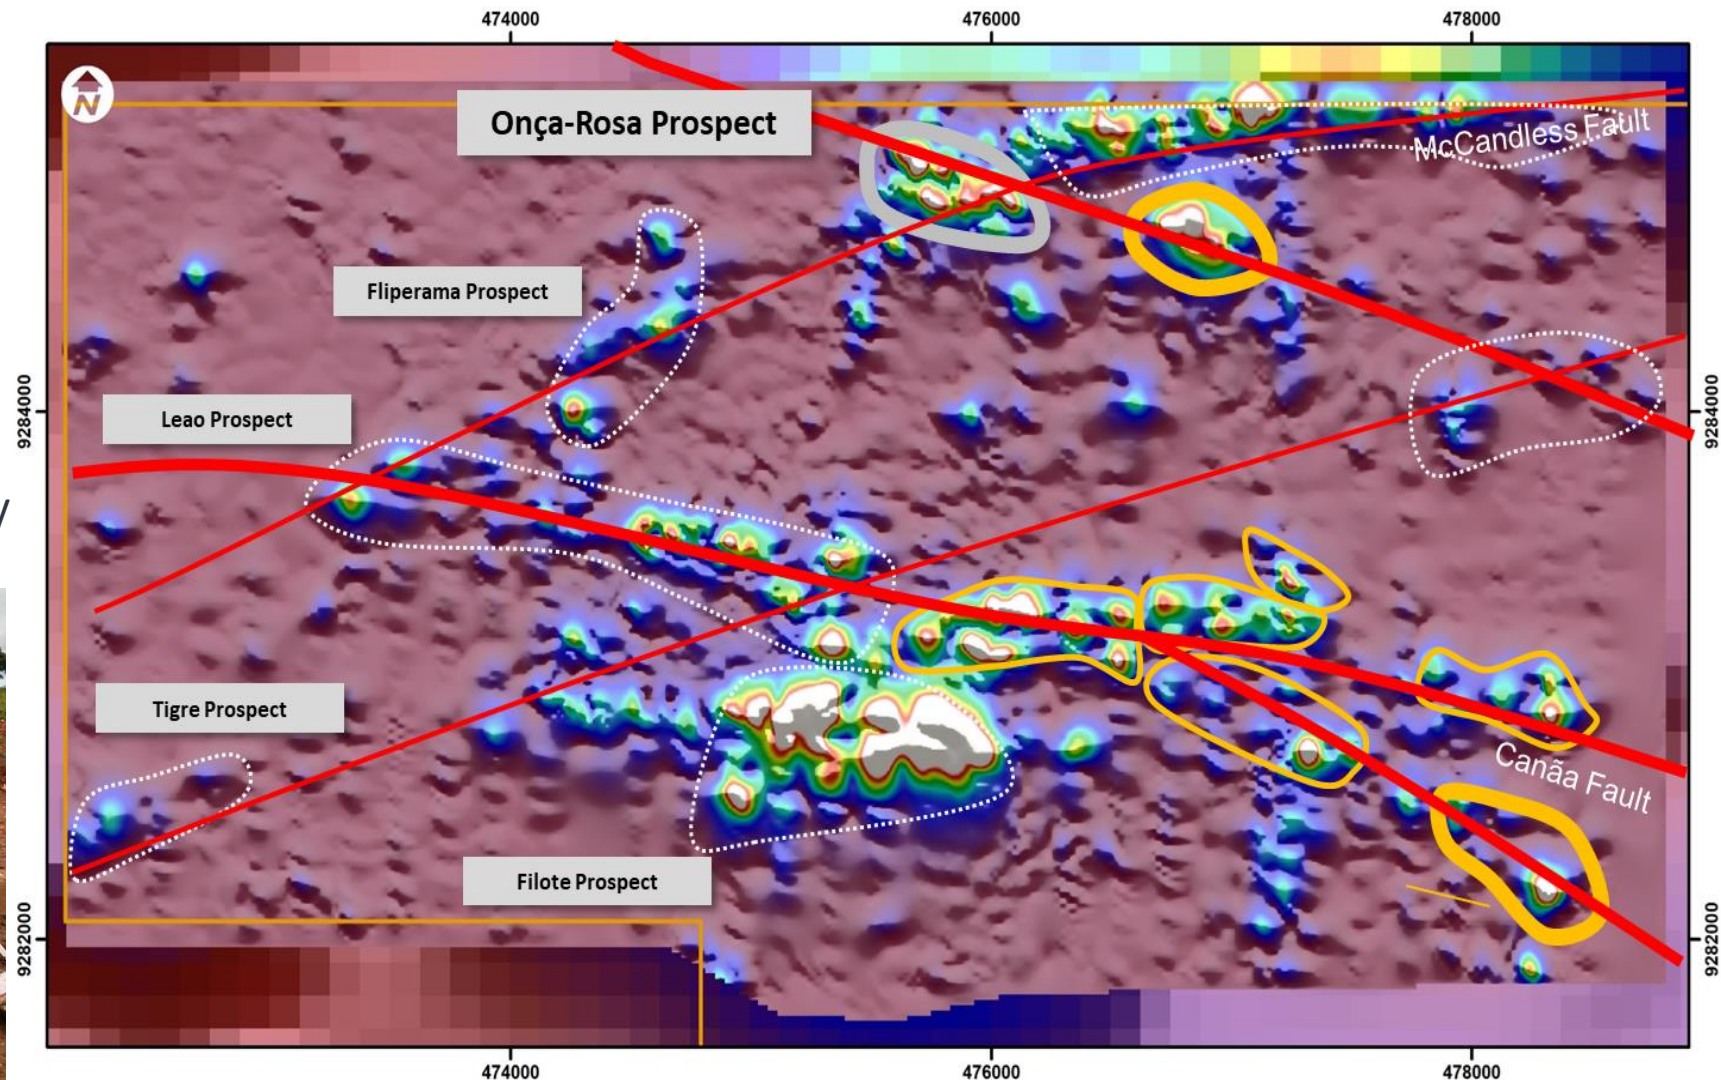

Multiple untested prospects

Coincident GeoTEM, Ground Mag and Geochem targets

Detailed Ground Mag – completed

FLEM – underway

Soil sampling & mapping – underway

Jaguar Project – Project Development Underway

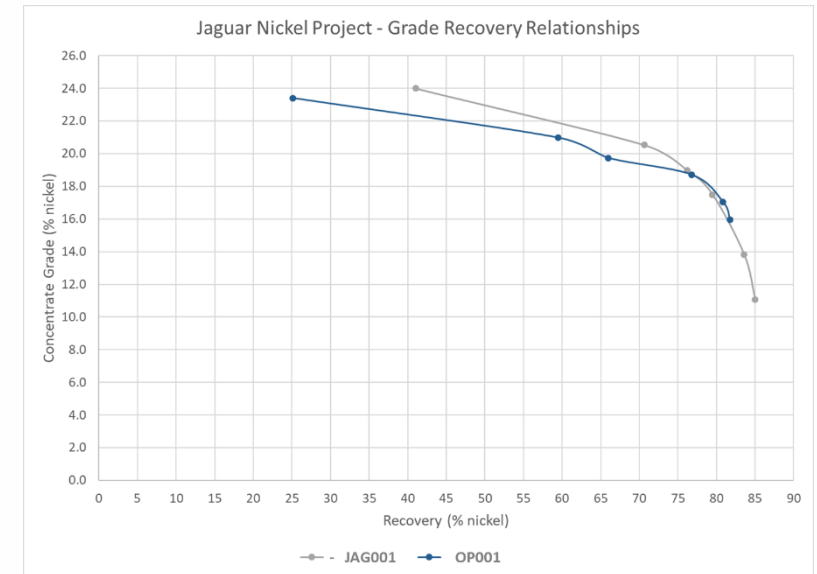

For personal use only

First float test on the Jaguar South ore at ALS Perth

Preliminary Metallurgical Testwork

- ☀ Flotation tests deliver **+80% nickel recoveries*** from Jaguar South and Onça Preta ore
- ☀ **Quality +16% nickel concentrate**, with high Fe:MgO (~5.5:1) and low arsenic – highly desirable marketable characteristics
- ☀ Using traditional “Western Australian” nickel flowsheet and reagents
- ☀ An **increase of 25% on historical results**, due to changes in feed head grade, grind sizes and reagent selection
- ☀ Metallurgical test work continues at ALS Metallurgy in Perth; new sample has arrived in Perth for testing

+80% nickel recoveries – quality +16% nickel concentrate

* See ASX Announcement of 31 March 2020 for further details of the preliminary metallurgical testwork and results

Jaguar Project – Environmental Licensing Underway

Fast-tracking Approvals

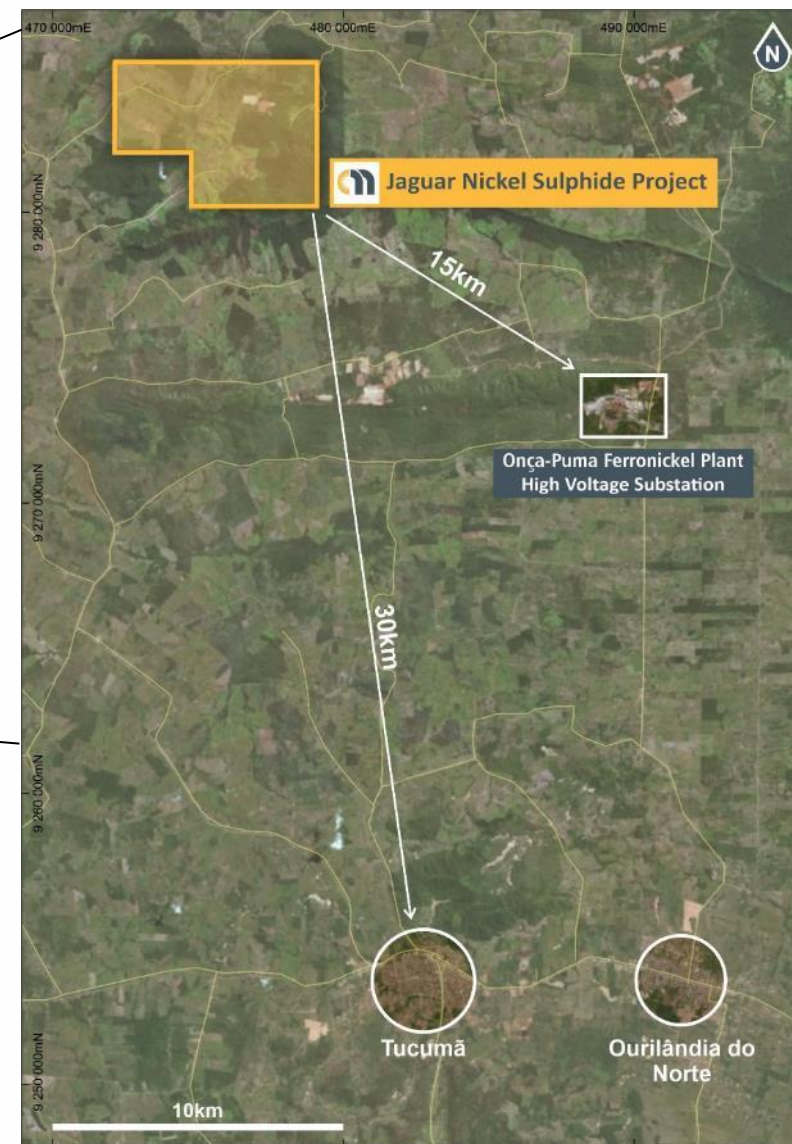

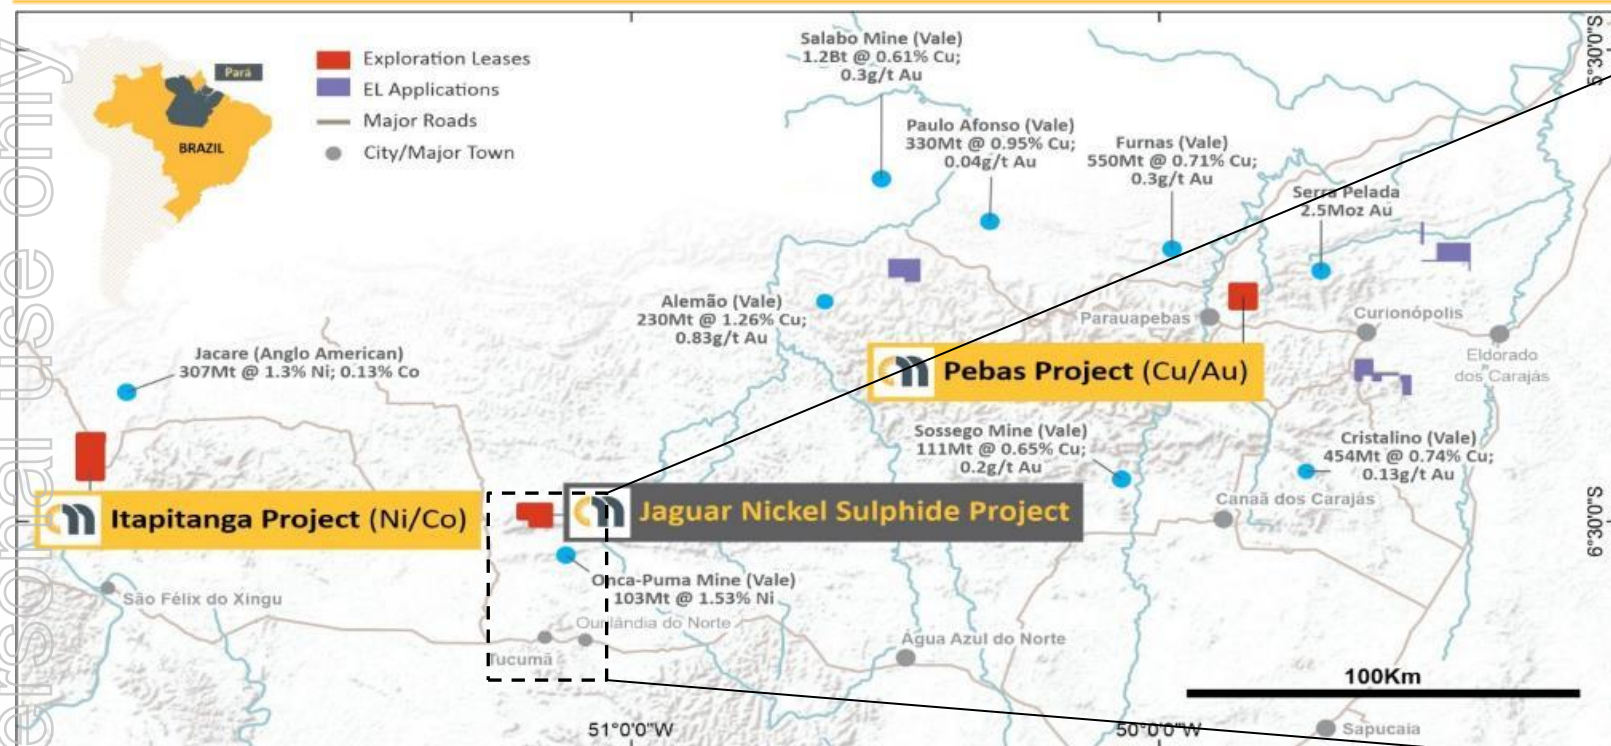

- ☀ Initial drilling licence secured through to October 2022
- ☀ Significant amount of environmental data historically collected by Vale for use by CTM in approval process
- ☀ Terms of reference received from Semas for main environmental study (EIA/RIMA)
- ☀ 80% of wet season data collection completed for EIA/RIMA work; **dry season data to commence in July 2020**
- ☀ Majority of the project footprint already disturbed (pasture land)
- ☀ Partnership in place with municipality to upgrade roads
- ☀ Strong community support for the project
- ☀ Target date to lodge main environmental study – Q2 2021

Jaguar Project – Outstanding Infrastructure and Logistics

CentaurusMetals
Limited

☀ 35km north of regional mining centres of Tucumã and Ourilândia do Norte (population 50,000) with access via all-weather roads – mining towns with strong skilled workforce

☀ High-Voltage (230kV) sub-station located 15km south-east at Vale’s Onça-Puma Ferronickel Plant as well as 138kV line running east-west through Tucumã

☀ Mining Lease Application lodged and Land Access Agreements in place

Jaguar Project – Only 15km From Onça Puma Ferronickel Plant

Centaurus – Key Investment Takeaways

- For personal use only
- ☀️ **Nickel focus** – high-grade nickel sulphide asset with flexible development options leveraged to strong long-term nickel market outlook
 - ☀️ **Favourable project location** - Carajás Mineral Province;
 - ☀️ **Globally Significant Maiden JORC MRE** – 48.0Mt at 1.08% Ni for 517,500t of contained nickel including high grade MRE of 20.6Mt at 1.56% Ni for 321,400t of contained nickel
 - ☀️ **80% of MRE is within 200 metres of surface**
 - ☀️ **Resource growth** - deposits open at depth and along strike – great potential to increase MRE with further drilling – step out drilling underway
 - ☀️ **Greenfields growth** - Multiple prospects with walk up drill targets - drilling soon
 - ☀️ **Scoping Study underway**

Centaurus represents a rare opportunity to invest in a rapidly unfolding high-grade nickel sulphide growth story in Brazil, at the perfect time in the nickel market cycle.
