In addition, we have now made it even easier to launch deals directly from our website with a zero touch, self provision deal workflow and data room offer. This offer is a world first and is backed by the power of the OPR digital marketing campaign.

We also continue to focus on the sales and marketing engine with progress this quarter in the areas of new hires, new systems and relentless optimisation of customer journey both pre and post sale.

Today we offer two clear and distinct solutions which deal with the two most common critical business events:

1. transactions, and
2. board meetings

thedocyard's deal management platform has already established its pedigree as the future of how deals get done, rightfully claiming the dealtech 2.0 label. It's data room "plus" offer continues to gain traction and loyalty from those working on deals, with the workflow and project management capabilities clearly differentiating the offer from the traditional data room only offer.

In the board portal space, thedocyard's recent acquisition of the Athena Board technology squarely places us at the forefront of an ever growing market around the digitisation and securing of board papers and the meeting process. The board portal market is predicted to grow sharply in the next 5 years and the Athena offer is quickly gaining the reputation of being the best technical solution with the best value offer on the market. The board portal market is expected to grow from \$2.5B (USD) (2018) to \$10.5B by 2026¹.

thedocyard is extremely well placed to establish itself as a global technology player in the enterprise software market and has quickly positioned itself as a true innovator and game changer in the traditional transactional and board technologies markets. With leading solutions, a very clear orientation towards innovation, technical excellence, customer experience and marketing prowess the conditions for work digitisation technologies has never been better.
