2 Details of the Offer

2.1 The Offer

By this Prospectus, the Company invites Investors to apply for up to 2,000 Shares at an issue price of \$0.30 per Share, to raise up to \$600 (before costs of the Offer).

The Offer will only be extended to specific parties on invitation from the Directors. Application Forms will only be provided by the Company to these parties.

The Shares offered under this Prospectus will rank equally with the existing Shares on issue. A summary of the material rights and liabilities attaching to the Shares is set out in Section 5.

2.2 Investment Risks

An investment in the Company should be considered speculative. There are a number of risk factors that could potentially impact the Company and its operations. For information about these risks, please refer to Section 4. The risks identified in Section 4 are not exhaustive and Eligible Shareholders should read this Prospectus in full and seek professional advice if they require further information on material risks in deciding whether to subscribe for Shares.

2.3 Purpose of the Offer

The Company is seeking to raise only a nominal amount under this Prospectus and, accordingly, the purpose of this Prospectus is not to raise capital.

The primary purpose of this Prospectus is to remove any trading restrictions that may have attached to Shares issued by the Company upon exercise of Options or conversion of Convertible Notes without disclosure under Chapter 6D of the Corporations Act prior to the Closing Date (including prior to the date of this Prospectus). Details of the Options issued by the Company and the outstanding Convertible Notes are set out in Section 3.2.

Relevantly, section 708A(11) of the Corporations Act provides that a sale offer does not need disclosure to investors if:

- (a) the relevant securities are in a class of securities that are quoted securities of the body; and
- (b) either:
 - (i) a prospectus is lodged with ASX on or after the day on which the relevant securities were issued but before the day on which the sale offer is made; or

- (ii) a prospectus is lodged with ASIC before the day on which the relevant securities are issued and offers of securities that have been made under the prospectus are still open for acceptance on the day on which the relevant securities were issued; and
- (c) the prospectus is for an offer of securities issued by the body that are in the same class of securities as the relevant securities.

2.4 Applications

Applications for Shares can only be made by Investors at the invitation from the Directors. By completing an Application Form, you will be taken to have declared that all details and statements made by you are complete and accurate and that you have received personally the Application Form together with a complete and unaltered copy of the Prospectus.

Payment for Shares must be made in full at the issue price of \$0.30 per Share.

Completed Application Forms and accompanying cheques, made payable to "AuStar Gold Limited" and crossed "Not Negotiable", must be mailed or delivered to the address set out in the Application Form by no later than the Closing Date.

The Company reserves the right to close the Offer early.

2.5 Not underwritten

The Offer is not underwritten.

2.6 ASX Listing

Application for Official Quotation of the Shares offered pursuant to the Offer has been made or will be made within seven days of the date of this Prospectus.

If the Shares are not admitted to Official Quotation by ASX before the expiration of three months after the date of issue of this Prospectus, or such period as varied by ASIC, the Company will not issue any Shares and will repay all Application Monies within the time prescribed under the Corporations Act, without interest.

The fact that ASX may grant Official Quotation to the Shares is not to be taken in any way as an indication of the merits of the Company or the Entitlement Offer Shares offered for subscription.

2.7 Issue

The issue of Shares offered under this Prospectus will take place as soon as practicable after the Closing Date. Pending the issue of the Shares or payment of refunds pursuant to this Prospectus, all application monies will be held by the Company in trust for the Applicants in a separate bank account as required by the Corporations Act. The Company, however, will be entitled to retain all interest that accrues on the bank account and each Applicant waives the right to claim interest.

The Directors will determine the recipients of all the Shares. The Directors reserve the right to reject any Application or to allocate any Applicant fewer Shares than the number applied for. Where the number of Shares issued is less than the number applied for, or where no issue is made, surplus Application Monies will be refunded without any interest to the Applicant as soon as practicable after the Closing Date. Interest will not be paid on moneys refunded.

The Company's decision on the number of Shares to be allocated to an Applicant will be final.

2.8 Defects in Applications

If an Application Form is not completed correctly or if the accompanying payment is the wrong amount, the Company may, in its discretion, still treat the Application Form to be valid. The

Company's decision to treat an application as valid, or how to construe, amend or complete it, will be final.

2.9 Applicants outside Australia

The distribution of this Prospectus outside Australia may be restricted by law.

This Offer does not, and is not intended to, constitute an offer in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

Residents of countries outside Australia should consult their professional advisers as to whether any government or other consents are required, or whether any formalities need to be observed should they wish to make an application to take up Shares on the basis of this Prospectus. The return of a duly completed Application Form will be taken to constitute a representation and warranty that there has been no breach of such laws and that all approvals and consents have been obtained.

4 Risk factors

There are a number of risk factors that could potentially impact the Company and its operations. Prospective new Investors should consider the risk factors described below, together with information contained elsewhere in this Prospectus and the publicly available information about the Company, including previous disclosures made by the Company in accordance with its periodic and continuous disclosure obligations, before deciding whether to participate in the Offer.

The below list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by Investors in the Company. Other factors not specifically referred to may in the future materially affect the financial performance of the Company and the value of the securities offered under the Offer. Therefore, the securities to be issued pursuant to the Offer carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those securities.

Potential Investors should consider that an investment in the Company is speculative and should consult their professional advisers before deciding whether to participate in the Offer.

4.1 Financing Risk

As recognised in the Company's Half Yearly Financial Report released on ASX on 16 March 2020, the Company incurred a net loss for the half year ended 31 December 2019 of \$904,243 and had net current liabilities \$1,185,275. While the Board is of the view that the Company will be able to continue as a going concern, the Company may not generate sufficient funds from its operations to fund its planned activities and may need to raise additional funds in the future. There is no guarantee that the Offer will be fully subscribed. Any additional equity financing will dilute shareholdings and may have a negative impact on the Company's share price. Other funding alternatives may also be considered, including, debt funding, joint venture or farm-out arrangements, alternative funding arrangements (e.g. streaming finance or convertible loan) or

asset sales. None of these alternatives have been determined at present, and any need to implement a funding alternative would be considered if the need arises having regard to the circumstances at that time. There is no assurance that the Company will be able to implement any specific alternative. The implementation of any of the alternative funding arrangement may also affect the market price of the shares.

4.2 Economic Risks

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities. The underlying price of gold is a key factor in the Company's performance and one over which the Company has no control.

If activities cannot be funded, there is a risk that tenements may have to be surrendered or not renewed. Furthermore, share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as general economic outlook, interest rates and inflation rates, currency fluctuations, changes in investor sentiment toward particular market sectors, the demand for, and supply of, capital, terrorism or other hostilities; and government fiscal, monetary and regulatory policies.

None of AuStar, its directors or officers warrant the future performance of the Company or any return on an investment in the Company.

4.3 Operating Risks

The Company's operations may be affected by various factors, including failure to achieve predicted grades or production rates, operational and technical difficulties, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, adverse weather conditions, industrial and environmental accidents, industrial disputes and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment, availability of sufficient and suitably qualified personnel, tailings disposal capacity constraints, failure to secure approvals to amendments to work plans required for the operations, capacity to process and mine and the additional capital investment, if any, required to upgrade or replace existing plant and equipment as required by the business or operations. Losses resulting from any of these risks could have a material adverse effect on the Company's financial resources or could result in a total loss of the assets affected, and accordingly, may affect the market price of the shares.

4.4 Development Risks

Mineral development is a high risk undertaking and successful development cannot be guaranteed. The Company's financial performance will substantially depend on the accuracy of the cost estimates for the proposed development, other current and future expansion, development and infrastructure plans, working capital requirements and the duration of relevant works program. The cost and time forecasts are estimates only, based on assumptions including those in relation to study costs, scope and duration, the approvals process and timeline estimated, and operational issues, all of which are subject to uncertainty. An increase in capital/operating costs, an increase in the study timelines, and delays to planned projects could have an adverse impact on the Company's performance.

4.5 Exploration Risks

The business of exploration for gold and other minerals and their development involves a significant degree of risk and depends on factors that include successful exploration and the establishment of Resources and Reserves within the meaning of the 2012 JORC Code and completion of feasibility and other studies in relation to such projects and the Company may not be successful in doing so.

There is no assurance that future exploration expenditure will result in discoveries or upgrade existing mineralisation to the stage where such can be successfully commercially exploited.

4.6 Mineral and Resource Risks

Exploration involves a significant degree of risk and exploration operations can be hampered by force majeure circumstances and cost overruns for unforeseen events, including unexpected variations in geology and equipment malfunction.

Mineral Resources which are not Ore Reserves do not have demonstrated economic viability. The estimate of Mineral Resources may be materially affected by environmental, permitting, legal, title, taxation, socio-political, marketing, operational cost, metal price, mining control, dilution or other relevant issues.

The category of reported Inferred Mineral Resources is the lowest level of confidence under the JORC Code. The evaluation of these resources with the intention of upgrading resource categories and converting them to reserves is impacted by a number of issues, including mining dilution, metallurgical recovery and grade variability. There can be no guarantee that the resources will be developed to the point of production.

4.7 Reserve categories, conversion of resources to reserves and the identification of mining inventory generally

Reserve and resource estimates are expressions of judgment based on knowledge, experience and industry practice. Estimates which were valid when originally calculated may alter significantly when new information or techniques become available. In addition, by their very nature, resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate.

Due to the nature of the mineralisation at its mines, the Company does not have substantial current JORC Resources on which mining and production plans are based as is often the case in nuggety, narrow vein gold mineralisation. The Company is focused on building its resource inventory, however, as further information becomes available through additional drilling, fieldwork and analysis, the estimates are likely to change. This may result in alterations to development plans which may, in turn, adversely affect the Company's operations. The variables on which estimates of resources and reserves are made include a number of factors and assumptions such as historical production, assumed effects of regulation by government agencies, assumptions regarding future prices and future capital and operating costs, all of which may vary considerably from those initially planned or used in determining any such resources or reserves. Changes in any underlying assumptions that affect either the cost of recovery or the viability of recovery of any resource will affect any calculation of Reserves.

4.8 Tenement maintenance and title risks

Interests in tenements in Australia are governed by Federal and State legislation and are evidenced by the granting of licences or leases. Each licence or lease is for a specific term and carries with it annual expenditure and reporting commitments, as well as other conditions requiring compliance. Consequently, the Company could lose title to or its interest in tenements if licence conditions are not met or if insufficient funds are available to meet expenditure commitments as and when they arise.

Further, mining and exploration tenements are subject to periodic renewal. There is no guarantee that current or future tenements will be renewed or approved. Renewal of the term of a granted tenement is at the discretion of the relevant government authority. Renewal conditions may include increased expenditure or work commitments or compulsory relinquishment of the areas comprising the Company's projects. The imposition of new conditions or the inability to meet those conditions may adversely affect the operations, financial position and/or performance of the Company.

4.9 Native Title

The Company is aware of a registered native title claim over the area of its tenements which, though subject to relevant agreements, may possibly affect its future operations or performance.

No guarantee can be given that these native title rights (nor any native title rights over areas in which the Company may in future acquire an interest in) will not affect the Company.

4.10 Key Personnel and Industrial Relations Risks

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its directors and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these key personnel ceases their involvement with the Company.

The ability of the Company to achieve its objectives depends on the access to personnel and external contractors who have the required skills and qualifications or who can provide technical expertise and other services. If the Company cannot secure personnel or external contractors or if the services of the present personnel and external contractors cease to become available to the Company, this may affect the Company's ability to achieve its objectives.

The Company will be subject to the risk of employment disputes, industrial action and work stoppages by future employees and employees of contractors who provide services which are necessary for the continued operation of the Company's operations, which may have a material adverse effect on the Company.

4.11 COVID-19

The outbreak of the coronavirus disease (COVID-19) is impacting global economic markets. The nature and extent of the effect of the outbreak on the performance of the Company remains unknown. The Company's Share price may be adversely affected in the short to medium term by the economic uncertainty caused by COVID-19. Further, any governmental or industry measures taken in response to COVID-19 may adversely impact the Company's operations and are likely to be beyond the control of the Company.

COVID-19 safe work practices have and will continue to be adopted in relation the Company's operations, however, COVID-19 restrictions on movement and activities may adversely affect the Company's operations.

The Directors are monitoring the outbreak of COVID-19 closely and have considered the impact of COVID-19 on the Company's business. However, the situation is continually evolving, and the consequences are therefore inevitably uncertain.

In compliance with its continuous disclosure obligations, the Company will continue to update the market in regard to the impact of COVID-19 on the Company.

4.12 Liquidity, market capitalization and price fluctuation

The Company is a small company in terms of market capitalization and it may not be covered by a broad base of research analysts. As a consequence there may be relatively few buyers and sellers of securities on the ASX at any given time and the market price may be highly volatile, particularly in times of share market turbulence or negative investor sentiment. This may present difficulties for shareholders seeking to liquidate their holdings. The market price of the shares in the Company can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration and development stocks in particular. Neither the Company nor the directors warrant the future performance of the Company or any return on an investment in the Company.

4.13 General economic climate

The Company's funding position and financial performance is impacted by a variety of general global economic and business conditions. A deterioration in these conditions could have an adverse impact on the Company's financial performance.

4.14 Environmental and compliance risks

The operations and proposed activities of the Company are subject to Australian State and Federal laws and regulations concerning the environment. As with most mineral resource operations and exploration and development projects, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. It is the Company's intention to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws, in order to minimise damage to the environment and risk of liability. Nevertheless, there are certain risks inherent in the Company's activities which could subject the Company to extensive liability.

Environmental planning, rehabilitation requirements and legacy issues associated with historical mining, may all result in significant liability and require various approvals. The Company's operational, development and exploration programs also subject to approvals by various and multiple government departments responsible to monitor and control exploration and mining. Where approvals or variations to existing approvals, work plans, licences or permits are required, there is a risk that these approvals may not be forthcoming, either at all or in a timely manner, or that they may not be able to be obtained on acceptable terms.

While it may be reasonably expected that all requisite approvals will be forthcoming, and whilst obligations for expenditure may be predicated on any requisite approvals being obtained, it cannot be guaranteed that any or all requisite approvals will be obtained.

A failure to obtain any approval would mean that the ability to amend existing workplans, undertake proposed development plans or infrastructure upgrades, participate in or develop any project, or possibly acquire any project, may be limited or restricted either in part or absolutely, which may have a material adverse effect on the Company.

4.15 Occupational health and safety

The mining industry has become subject to increasing occupational health and safety responsibility and liability. The potential for liability is a constant risk. If the Company fails to comply with necessary OH&S legislative requirements, it could result in fines, penalties and compensation for damages as well as reputational damage.

4.16 Contractual Risk

All companies operate through a series of contractual relationships with operators, technical experts, project managers, suppliers, customers and contractors generally. All contracts carry risks associated with the performance by the parties of their obligations as to time and quality of work performed. To the extent that third parties default in their obligations under such documents, it may be necessary for the Company to take legal action which may be costly and no guarantee can be given by the Company that a legal remedy will ultimately be granted on appropriate terms. In the event the Company wishes to vary, terminate or amend contractual relationships due the Company's circumstances or requirements of the operations, the Company may incur penalties and liabilities or such action may lead to legal action with the consequences as mentioned previously.

4.17 Litigation and Insurance Risk

As with any company, the Company is (or will be) exposed to risks of litigation which may have a material adverse effect. The Company could become exposed to litigation from employees, regulators or third parties. To the extent that such risks are not covered by insurance, an adverse outcome in litigation or the cost of responding to potential or actual litigation may have a material adverse impact on financial performance.

The Company maintains insurance coverage that is substantially consistent with mining and exploration industry practice. However, there is no guarantee that such insurance or any future necessary coverage will be available to the Company at economically viable premiums (if at all) or that, in the event of a claim, the level of insurance carried by the Company now or in the future

will be adequate, or that a liability or other claim would not materially and adversely affect the Company's business.

4.18 Changes in political environment and international conflicts

The Company's share price and ability to generate returns to Investors can be affected by changes in legislation, domestic or foreign governments and government policy. Events may occur within or outside Australia that could impact upon the world economy, the operations of the Company and the market price of the Company's Shares. These events include war, acts of terrorism, civil disturbance, political intervention and natural events such as earthquakes, floods, fires and poor weather.

5 Rights Attaching to Shares

5.1 Rights attaching to Shares

Shares issued pursuant to this Prospectus will be fully paid ordinary shares in the capital of the Company and will rank equally with the existing Shares including for any dividend issued after the date of this Prospectus.

The rights and liabilities attaching to Shares are set out in the Constitution and are regulated by the Corporations Act, the general law, the ASX Listing Rules and ASX Settlement Operating Rules. The Constitution may only be varied by a special resolution passed by at least 75% of Shareholders present (and entitled to vote).

The following is a summary of the principal rights of Shareholders.

- (a) The power to issue Shares and other securities in the capital of the Company lies with the Board, subject to the restrictions contained otherwise in the Constitution, the ASX Listing Rules and the Corporations Act.
- (b) Each Shareholder is entitled to receive notice of, and to attend, general meetings of the Company and to receive all notices, accounts and other documents required to be sent to Shareholders under the Constitution, the Corporations Act and the ASX Listing Rules. A Director may call a meeting of members and members may also requisition or convene general meetings in accordance with the procedures for member-initiated meetings set out in the Corporations Act. Shareholders must be given at least 28 days written notice of any general meeting unless otherwise permitted by the Corporations Act.
- (c) Every Shareholder present in person or by proxy at a meeting of Shareholders has one vote on a vote taken by a show of hands, and on a poll, every Shareholder who is present in person or by proxy has one vote for every fully paid Share held. A poll may be demanded at a meeting in the manner permitted by the Corporations Act.
- (d) Dividends are payable upon the determination of the Directors, who may fix the amount, time for payment and method of payment of dividends. Subject to the rights of holders of shares with any special, preferential or qualified rights, any dividends that may be declared by the Company are payable on all Shares in proportion to the amount paid up.
- (e) If the Company's Share capital is divided into different classes of Shares, the rights attached to any class may be varied by a special resolution passed at a general meeting of the holders of Shares in that class or with the written consent of three quarters of the holders of Shares in that class.
- (f) Subject to the Corporations Act, Listing Rules and ASX Settlement Operating Rules, a Shareholder may transfer Shares by an instrument in writing in a form approved by the Directors. Except as otherwise provided for in the ASX Listing Rules or the ASX Settlement Operating Rules, the Directors may in certain circumstances refuse to register any transfer

of Shares, or request ASX or the share registry to apply a holding lock to prevent a proper ASX transfer of Shares.

- (g) If a Shareholder holds a number of Shares that is less than a marketable parcel (as defined in the ASX Listing Rules), the Company has the power to sell or dispose of such Shares unless otherwise instructed by the Shareholder. The net proceeds from the sale will be paid to the Shareholder.
- (h) Subject to any special rights (at present there are none), any surplus assets on a winding up are to be distributed to Shareholders in proportion to the number of Shares held by them irrespective of the amounts paid or credited as paid.
