SciDev chemistry to be trialled at Olympic Dam

Highlights

- **SciDev has received a trial order from Olympic Dam, Australia's largest copper mine and one of the world's most significant polymetallic deposits.**
- **The trial is scheduled to last for approximately 6-months, commencing in the December quarter of CY2020.**
- **The trial includes an initial A\$1m purchase order for SciDev's MaxiFlox chemistry, reflecting approximately 3-months of consumption.**
- **SciDev's MaxiFlox chemistry and process applications are being used at a growing number of key global copper mines reflecting the benefits of the Company's bespoke solutions.**

SciDev Limited (ASX:SDV; **SciDev**, or the **Company**) is pleased to advise that it has received a trial purchase order with Olympic Dam, Australia's largest copper operation, owned by BHP Group Limited (ASX: BHP). Olympic Dam is a globally significant mine located in central South-Australia and operates a fully integrated processing facility from ore to metal.

The trial will focus on the utilisation of SciDev's chemistries in the Hydromet and Concentrator sections of the Olympic Dam Processing Plant. SciDev's South Australian based staff will be on site to deliver the associated professional services. The trial is anticipated to last for approximately 6 months and is scheduled to commence in the December quarter of CY2020.

Commenting on the trial, SciDev Managing Director and Chief Executive Officer, Lewis Utting said: *"The order from BHP Group's Olympic Dam operation is a significant opportunity for SciDev. The opportunity to transfer our chemistry and knowhow from the waste processing side directly to the production side of a mining operation reflects the potential for the company's bespoke chemistries. We look forward to working with the team at Olympic Dam and will continue to keep the market updated on developments."*
