## Operating and financial review

### Group overview

The Company was established in 2003 and listed on the ASX in 2008.

The Group's focus is the development and commercialisation of the Sprintex® twin screw supercharger and supercharger systems incorporating the Sprintex® twin screw supercharger.

The Group's HQ facility in Perth, Western Australia is our dedicated research and development base, and is where our creative Design, Engineering and Calibration team work together to provide technical and innovative solutions to support both aftermarket and OEM requirements with the use of the Sprintex® twin screw supercharger. With capability for low volume production, manufacturing and testing at the facility, the team is well equipped to provide engineering concept ideas and solutions at low cost.

The Sprintex production facility in Malaysia in the 'Glenmarie' area of Shah Alam, Selangor was commissioned in January 2013 encompassing 1,800 sqm. This is jointly-owned with AutoV Corporation, parent company of Proreka (M) Sdn. Bhd, a Tier-1 automotive component manufacturer and supplier. Certified to ISO9008 and able to provide high volume quality parts and systems, supported by a highly trained production and engineering team, the Malaysian facility and its team have continued to grow and expand their knowledge and performance to provide a solid production platform for the Group. The Group also has a distribution and final assembly facility in Detroit, Michigan USA, where it can launch its products to the USA and Canadian markets. The shared facility of over 36,000 sqm also provides customer support and sales and marketing for the region.

### *After market supercharger systems*

The focus of the Group's activities during the year has been:

1. Further development and refinement of the supercharger system on additional models within the Chrysler/Jeep Pentastar range of vehicles, including the new JL, tuning solutions for the current ranges of vehicles, as well as looking at potential for other OEM platforms, including Ford and GM.
2. After achieving CARB (California Air Resources Board) approval in June 2016 for the Sprintex Supercharger systems for the 3.6L V6 Pentastar engine for JK, Jeep, Challenger, Charger, Dodge RAM as well as on the 4.0L TJ and 3.8L JK Wrangler, the Group was successful in obtaining CARB certification on the Toyota 86/Subaru BRZ range. All main product lines for the Company have now achieved CARB certification and meet or exceed emission requirements in 50 states in the USA.
3. Continued development of the supercharger and system to provide a Stage 2 option on the V6 Pentastar and Toyota 86/Subaru BRZ.
4. Ongoing expansion and development of the North American market for the Company's products.
5. Expansion and development in the Asia and Middle East markets for the Company's products.
6. Research and development of an OEM twin boosted system.
7. Research and development of an OEM high torque at low RPM system for diesel platforms.

### *Business strategies*

The Group is focused on developing new superchargers and supercharger systems from its dedicated R&D facility in Perth with manufacturing of products being primarily from the Group's production facility in Malaysia. The expanded range of products is intended to immediately service the needs of the aftermarket sector, where the key drivers are improved performance, while also enabling the Group to showcase its products to Original Equipment Manufacturers with whom the Group is continuing to build business relationships, with a view to securing future sales orders.

### Operating results for the year

The Company has continued focusing on the development of aftermarket supercharger systems after establishing a production facility in Malaysia in 2013. The financial results reflect this focus, including write-offs of fixed assets and inventory in Perth

following the Perth facility being downsized to a dedicated research and development facility, The Company has also been required to continue providing cash support for the operations of the JV in Malaysia:

The accounting policies used in this report are the same as those used in the last audited annual report.

**(a) Going concern**

The Company has net liabilities of \$6,646,617 (2019: net liabilities of \$4,507,852) and net current liabilities of \$6,828,320 (2019: \$4,708,202) as at 30 June 2020 and incurred a loss of \$2,372,583 (2019: \$2,938,035) and net operating cash outflow of \$895,835 (2019: \$1,367,504) for the year ended 30 June 2020.

The Company's ability to continue as a going concern and meet its debts and future commitments as and when they fall due is dependent on a number of factors, including:

- delivery of existing and new products through the Company's distribution network to generate sales revenues and positive cash flows;
- the ability of the Company to raise additional financing; and
- the success of the manufacturing facility in Malaysia.

The financial report has been prepared on a going concern basis. In arriving at this position the directors have had regard to the fact that the Company has, or in the directors' opinion will have access to, sufficient cash to fund administrative and other committed expenditure for a period of not less than 12 months from the date of this report.

Should the Company not achieve the matters set out above, there is significant uncertainty whether it will be able to continue as a going concern and therefore whether it will be able to pay its debts as and when they fall due and realise its assets and extinguish its liabilities in the normal course of business and at the amounts stated in the financial statements.

The financial statements do not include any adjustments relating to the recoverability or classification of recorded asset amounts, or to the amounts or classification of liabilities that might be necessary should the Company not be able to continue as a going concern.

**2. Segment information**

The Company identifies its operating segments based on the internal reports that are reviewed and used by the executive management team (chief operating decision makers) in assessing performance and in determining the allocation of resources. Operating segments are identified by management based on the similarity of the products produced and sold.

The Company is operating in one segment, being the manufacture and distribution of the patented range of Sprintex® superchargers.

The accounting policies applied for internal reporting purposes are consistent with those applied in the preparation of the financial statements.
