Letter to shareholders

Dear Shareholder,

On behalf of Magnetite Mines Limited (**Company**), I am pleased to invite you to participate in a renounceable pro rata offer to eligible shareholders of one (1) new share for every four (4) shares held on the record date at an issue price of \$0.01 per new share, together with one (1) attaching quoted option for every two (2) new shares subscribed for (exercisable at \$0.05 each on or before 29 October 2021), to raise approximately \$5.65 million (**Rights Issue**).

The Rights Issue is partially underwritten to \$4 million by Lead Manager and Underwriter Mahe Capital.

Funds raised will be used to enable the Company to accelerate pre-feasibility study (**PFS**) work on its flagship Razorback Iron Project (**Project**) and position the Company for steady progress as it looks to monetise the inherent value of its large and well-positioned iron ore resources and progressively deliver value to shareholders, for general working capital and costs of the Rights Issue.

The Company intends to accelerate the PFS of the small scale, low capital start-up option which was successfully identified in the second half of 2019. The aim of the PFS is to optimise the value of the Project by assessing a range of development options, confirming the key valuation inputs and refining the final scope of the Project for more detailed engineering in subsequent feasibility study work. Key focus areas will be determined through studies, but are expected to include testing high value resource targets, selective mining studies, recovery optimisation through metallurgical testwork studies and further trials of NextOre Pty Ltd's magnetic resonance ore sorting solution (**NextOre Technology**).

Each of the Directors will participate in the issue. The Rights Issue is open to all eligible shareholders who have a registered address within Australia, New Zealand, Isle of Man and Malaysia and who hold Shares on the Record Date.

Eligible shareholders may apply for some or all of their Entitlement under the Rights Issue, and may also apply for additional New Shares and New Options in excess of their Entitlement (for further details see Section 2.3). The Rights Issue is scheduled to close at 5.00pm (WST) on Tuesday, 29 September 2020.

To participate, you will need to ensure that you have completed and returned the Entitlement and Acceptance Form and paid all application monies before this time and date. Details of how to accept the Rights Issue are provided on the Entitlement and Acceptance Form and in Section 2 of this Prospectus.

The Company is subject to a range of risks which apply to the mining and resources sector including the success of its operations and exploration programs, a loss of key personnel and the price of commodities. These risks and others are discussed in more detail in Section 4 of this Prospectus.

This fundraising is a major step in the value creation journey for the Company and we look forward to continued shareholder support as we advance the Project to deliver value for shareholders.

On behalf of the Directors, I invite you to consider this opportunity to support the Company's strategy and thank you for your continued support.

Yours faithfully

Peter Schubert
Executive Chairman

Investment overview

This Section is intended to highlight key information for potential investors. It is an overview only, and is not intended to replace the Prospectus. Potential investors should read the Prospectus in full before deciding to invest in Securities.

Key Information	Further Information
<p>Transaction specific prospectus</p> <p>This Prospectus is a transaction specific prospectus for an offer of continuously quoted securities (as defined in the Corporations Act) and has been prepared in accordance with section 713 of the Corporations Act. It does not contain the same level of disclosure as an initial public offering prospectus. In making representations in this Prospectus regard has been had to the fact that the Company is a disclosing entity for the purposes of the Corporations Act and certain matters may reasonably be expected to be known to investors and professional advisers whom potential investors may consult.</p>	Section 5.4
<p>Risk factors</p> <p>Potential investors should be aware that subscribing for Securities in the Company involves a number of risks. The key risk factors of which investors should be aware are set out in Section 4, including (but not limited to) risks in respect of:</p> <ul style="list-style-type: none">• Exploration stage and success <p>The Company is not at the development stage. There can be no assurance that exploration of the tenements currently held by the Company, or any other tenements that may be acquired in the future by the Company, will result in the discovery of an economic deposit. Investors should understand that mineral exploration and any subsequent development are high-risk undertakings.</p> <p>The Company hold projects upon which Mineral Resource estimates have been made. Despite the best efforts of the Company, there is no guarantee that development of the Razorback Iron Project (or any other projects the Company has or will obtain an interest) will be commercially viable.</p> <ul style="list-style-type: none">• Operating and project risks <p>The business of mineral exploration and mining involves risks and hazards. For example, in an exploration context no assurance can be given that ore bodies will be detected with preferred or desirable tonnages or grades. High risk and substantial expense can be incurred without the requisite or expected degree of reward. Even if commercial quantities of ore are discovered, unforeseen risks can arise in the development and production phase including mining or processing issues, environmental hazards, industrial and environmental accidents, industrial disputes and unexpected shortages or increases in the costs of consumables, labour forced disruption, the unavailability of materials and plant and equipment, mechanical failure or plant breakdown, unusual or unexpected geological formation, pit failures, changes in the regulatory environment and weather conditions. Such occurrences could result in damage to, or destruction of, mineral properties</p>	Section 4

<p>or production facilities, personal injury or death, environmental damage, delays in mining, monetary losses and possible legal liability.</p> <ul style="list-style-type: none"> Future capital requirements <p>The Company's activities will require substantial expenditure. There can be no guarantees that the funds raised through the Rights Issue will be sufficient to successfully achieve all the objectives of the Company's overall business strategy. If the Company is unable to use debt or equity to fund development after the substantial exhaustion of the net proceeds of the Rights Issue, there can be no assurances that the Company will have sufficient capital resources for that purpose, or other purposes, or that it will be able to obtain additional resources on terms acceptable to the Company or at all. Any additional equity financing may be dilutive to Shareholders and any debt financing if available may involve restrictive covenants, which may limit the Company's operations and business strategy.</p> <p>The Company's failure to raise capital if and when needed could delay or suspend the Company's business strategy and could have a material adverse effect on the Company's activities.</p> <ul style="list-style-type: none"> Commodity price volatility and exchange rates risks <p>In the event that the Company achieves exploration success, the revenue it will derive through the sale of commodities exposes the potential income of the Company to commodity price and exchange rate risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company. Such factors include supply and demand fluctuations for commodities, technological advancements, forward selling activities and other macro-economic factors. Furthermore, international prices of various commodities and some services are denominated in United States dollars, whereas the income and expenditure of the Company are and will be taken into account in Australian currency. This exposes the Company to the fluctuations and volatility of the rates of exchange between the United States dollar and the Australian dollar, as determined by international markets.</p>	
<p>Rights Issue</p> <p>This Prospectus is for a renounceable rights issue of one (1) New Share for every four (4) existing Shares held by Eligible Shareholders on the Record Date at an issue price of \$0.01 per New Share, together with one (1) attaching New Option for every two (2) New Shares subscribed for (exercisable at \$0.05 each on or before 29 October 2021) to raise up to approximately \$5.65 million (before costs).</p>	Section 1.1
<p>Shortfall Offer</p> <p>Any New Shares and New Options not taken up pursuant to the Rights Issue will become Shortfall Shares (Shortfall Offer). The Shortfall Offer is a separate offer of the Shortfall Shares (together with the attaching New Options on the same terms as the Rights Issue) made pursuant to this Prospectus and will remain open for up to 3 months following the Closing Date.</p> <p>Shortfall Shares and New Options issued under the Shortfall Offer shall be granted on the same terms and conditions as the Shares and New Options being offered under the Rights Issue. 1. Details of the Offers

1.1 Rights Issue

The Company is making a renounceable pro rata offer of ordinary fully paid Shares (**New Shares**) at an issue price of \$0.01 each to Eligible Shareholders at 5:00pm (WST) on the Record Date on the basis of one (1) New Share for every four (4) Shares held, together with one (1) attaching quoted option for every two (2) New Shares subscribed for (exercisable at \$0.05 each on or before 29 October 2021) (**New Options**).

The Lead Manager and Underwriter is Mahe Capital Pty Ltd (ACN 634 087 684) (**Mahe Capital**) who has agreed to partially underwrite the Rights Issue to \$4,000,000 (400,000,000 New Shares and 200,000,000 New Options). Please refer to Section 5.3 for more details.

At the date of this Prospectus the Company has on issue 2,261,041,255 Shares, 89,000,000 unquoted Options with various exercise prices (ranging from \$0.02 to \$0.10) and expiry dates (ranging from 26 November 2020 to 1 December 2024) and 172,624,545 quoted options with an exercise price of \$0.05 and expiry of 31 May 2021.

On the assumption that no Options are exercised before the Record Date, the Company proposes to offer approximately 565,260,314 New Shares and 282,630,157 New Options under the Rights Issue, subject to rounding. If all of the unquoted and quoted Options were exercised before the Record Date, approximately 630,666,450 New Shares and 315,333,225 New Options would be offered under the Rights Issue.

Where the determination of the Entitlement of any Eligible Shareholder results in a fraction of a Share or fraction of an Option, such fraction will be rounded up to the nearest whole Share or Option (as applicable).

New Shares issued under the Rights Issue will be issued as fully paid ordinary shares and will rank equally in all respects with the existing ordinary shares on issue. Further details on the rights and liabilities attaching to the New Shares proposed to be issued under the Rights Issue are contained in Section 5.1.

New Options issued under the Rights Issue will be issued on the terms and conditions contained in Section 5.2.

1.2 Underwriting and sub-underwriting

The Rights Issue is partially underwritten by Mahe Capital (**Underwriter**) to \$4,000,000 (400,000,000 New Shares and 200,000,000 New Options) (**Underwritten Amount**). Please refer to Sections 5.3 and 5.10 for further details.

The Underwriter has entered into sub-underwriting agreements for the Underwritten Amount.

No Sub-Underwriter, individually or together with any of its associates, will hold more than 20% of the voting power of the Company on completion of the Rights Issue.

1.3 Shortfall Offer

Any New Shares and New Options not taken up pursuant to the Rights Issue will become Shortfall Securities (**Shortfall Offer**). The Shortfall Offer is a separate offer of the Shortfall Securities made pursuant to this Prospectus and will remain open for up to 3 months following the Closing Date.

Shortfall Securities issued under the Shortfall Offer shall be granted on the same terms and conditions as the New Shares and New Options being offered under the Rights Issue. Shortfall Securities will only be issued if the Rights Issue is undersubscribed and will only be issued to the extent necessary to make up any shortfall in subscriptions. It is possible that there may be no Shortfall Securities available for issue.

The Shortfall Offer is, to the extent it is made in Australia, made under this Prospectus. To the extent the Shortfall Offer is made outside Australia, the Shortfall Offer is made without disclosure, a prospectus, lodgement, filing or registration, or other requirements of any applicable securities law, and only in circumstances where it is lawful to do so (such as to institutional or sophisticated investors). Persons outside Australia who apply for Shortfall Securities represent to the Company that they can apply for Shortfall Securities in circumstances which do not require the offer for Shortfall Securities or this Prospectus to be registered.

Eligible Shareholders who wish to subscribe for New Shares and New Options above their Entitlement may apply for Shortfall Securities under the Shortfall Offer by completing the appropriate section on their Entitlement and Acceptance Form. Investors who are not Eligible Shareholders may apply for Shortfall Securities by completing the Shortfall Application Form.

The Underwriter (in consultation with the Directors) will allocate Shortfall Securities pursuant to the Shortfall Offer at its sole discretion with a view to:

- (a) recognising the ongoing support of existing Shareholders of the Company;
- (b) identifying new potential long-term or cornerstone investors; and
- (c) ensuring an appropriate Shareholder base for the Company.

The Directors reserve the right at their absolute discretion to reject any application for Shortfall Securities or to issue a lesser number of Shortfall Securities than that applied for, and it is an express term of the Shortfall Offer that applicants for Shortfall Securities will be bound to accept a lesser number of Shortfall Securities allocated to them than applied for. If a lesser number is allocated, excess application money will be refunded without interest as soon as practicable.

No Shares will be issued under the Shortfall Offer if their issue would contravene the takeover prohibition in section 606 of the Corporations Act.

1.4 Opening and Closing Date

For the Rights Issue, the Company will accept Entitlement and Acceptance Forms from the Record Date for determining Entitlements until 5.00pm (WST) on Tuesday, 29 September 2020 or such other date as the Directors in their absolute discretion shall determine, subject to the requirements of the Listing Rules (**Closing Date**). If the Closing Date is varied, subsequent dates may also be varied accordingly.

The Shortfall Offer will remain open after the Closing Date for up to 3 months, unless closed earlier at the discretion of the Directors.

For personal use only

1.5 Proposed use of funds

Completion of the Offers will result in an increase in cash at hand of approximately \$4.0 million (before costs) on an Underwritten Amount basis and \$5.65 million (before costs) on a full subscription basis. The following indicative table sets out the proposed use of funds raised under the Rights Issue:

Proposed use	Underwritten Amount \$	Full Subscription \$
Razorback Iron Project pre-feasibility activities	3,060,000	4,100,000
Expenses of the Offers ¹	340,000	370,000
Working capital ²	600,000	1,182,000
TOTAL	4,000,000	5,652,000

Notes:

1. See Section 5.11 for further details relating to the estimated expenses of the Offers.
2. Working capital includes but is not limited to corporate administration and operating costs and may be applied to additional directors' fees or executive fees, ASX and share registry fees, legal, tax and audit fees, insurance and additional travel costs.

If the Rights Issue is not fully subscribed and the Company only raises the Underwritten Amount, then the funds will be used as per the Underwritten Amount column in the table above. If the amount raised is between the Underwritten Amount and full subscription then funds allocated will be scaled back from the intended full subscription use on a pro-rata basis to the extent possible.

The above is a statement of current intentions at the date of this Prospectus. Intervening events and new circumstances have the potential to affect the manner in which the funds are ultimately applied. The Board reserves the right to alter the way the funds are applied on this basis.

1.6 Effect on control of the Company

The maximum total number of New Shares proposed to be issued under the Offers is approximately 565,260,314 which will constitute 20.0% of the Shares on issue following completion of the Offers (assuming no other Shares are issued or convertible securities exercised or converted to Shares prior to the Record Date).

No shareholder will increase their voting power in the Company to 20% or more under the Rights Issue.

No nominee has been appointed for Ineligible Foreign Shareholders under section 615 of the Corporations Act and, as such, Eligible Shareholders will not be able to rely on the exception for rights issues in item 10 of section 611 of the Corporations Act. Accordingly, when an Eligible Shareholder applies for some or all of their Entitlement or additional New Shares, they will not be permitted to increase their voting power:

- (a) from 20% or below 20% to above 20%; or

(b) from a starting point of above 20% and below 90%,

as a result of accepting their Entitlement under the Offer without breaching section 606(1) of the Corporations Act.

As a consequence, the Company will not issue New Shares to any Applicant or other person if the result of any such issue would result in any person (and that person's associates) acquiring a relevant interest contrary to section 606 of the Corporations Act. This may result in the Company scaling back applications from Eligible Shareholders to ensure that no breach of section 606 of the Corporations Act occurs.

Without limiting the above, it is the responsibility of Eligible Shareholders to ensure that their participation under the Offer does not result in them breaching section 606 of the Corporations Act. Eligible Shareholders, by lodging applications for New Shares, acknowledge and accept the right and obligation of the Company to not allot or issue New Shares to them which would result in any breach by them of section 606 of the Corporations Act and direct the Company to so act. Eligible Shareholders who may be at risk of exceeding the 20% voting power threshold in section 606 as a result of acceptance of their Entitlement should seek professional advice before completing and returning their Entitlement and Acceptance Form.

As the Rights Issue is renounceable, the Company will appoint Mahe Capital to arrange for the sale of Entitlements that would have been given to Ineligible Foreign Shareholders and to account to them for the net proceeds of the sale. See Section 1.15(b) for further details.

The Underwriter presently has no Shares in the Company and it has indicated that it has no intention of acquiring Shares in the Company prior to the Record Date. Mahe Capital has agreed to partially underwrite the Rights Issue for up to \$4,000,000 (400,000,000 New Shares).

The Underwriter's maximum potential relevant interest in Shares and voting power in the Company under several scenarios are set out in the table below and are based on the assumption that no further Shares are issued.

	Total Underwriter Shares	Total MGT Shares	Underwriter voting power
Date of Prospectus	Nil	2,261,041,255	0%
<i>Rights Issue</i>			
• Fully subscribed*	Nil	2,826,301,569	0%
• 75% subscribed by Shareholders other than the Underwriter*	141,315,079	2,826,301,569	5.0%
• 50% subscribed by Shareholders other than the Underwriter*	282,630,157	2,826,301,569	10.0%
• 25% subscribed by Shareholders other than the Underwriter*	400,000,000	2,661,041,255	15.0%

For personal use only

	Total Underwriter Shares	Total MGT Shares	Underwriter voting power
• Underwritten Shares only	400,000,000	2,661,041,255	15.0%

Mahe Capital has confirmed with the Company that, to the extent that the Underwritten Amount is sub-underwritten and, in the event that:

- (i) no Eligible Shareholders take up their rights under this Prospectus; and
 - (ii) no Shortfall Shares are issued (other than the Underwritten Shares),
- no sub-underwriter will hold voting power of more than 20%.

1.7 Potential dilution to Shareholders

Eligible Shareholders should note that if they do not participate in the Rights Issue, their holdings are likely to be diluted. Examples of how the dilution may impact Shareholders are set out in the table below:

Holder	Holding as at Record Date	% at Record Date	Entitlement to Shares on 1 for 4 basis	% post-Offers if Entitlement not taken up (Min sub)	% post-Offers if Entitlement not taken up (Max sub)
Shareholder 1	140,000,000	6.19	35,000,000	5.26	4.95
Shareholder 2	60,000,000	2.65	15,000,000	2.25	2.12
Shareholder 3	40,000,000	1.77	10,000,000	1.50	1.42
Shareholder 4	20,000,000	0.88	5,000,000	0.75	0.71
Shareholder 5	15,000,000	0.66	3,750,000	0.56	0.53
Shareholder 6	10,000,000	0.44	2,500,000	0.38	0.35

Note:

1. The dilution effect shown in the table is the maximum percentage on the assumption that those Entitlements not accepted are subsequently placed pursuant to the Underwriter's discretion (in consultation with the Company). In the event all Entitlements are not accepted and some or all of the resulting Shortfall is not subsequently placed, the dilution effect for each Shareholder not accepting their Entitlement would be a lesser percentage. The dilution effect also assumes that no Shares will be issued, exercised or converted prior to the Record Date.

In the event the Offers are oversubscribed, the Directors reserve the right in their absolute discretion to utilise the Company's 15% placement capacity to issue additional New Shares and New Options pursuant to Listing Rule 7.1.

For personal use only

1.8 Substantial Shareholders

Based on available information as at the date of this Prospectus, there are no persons that have a relevant interest in 5% or more of the Shares on issue.

1.9 Minimum subscription

The minimum subscription amount for the Rights Issue is \$4,000,000 (being the Underwritten Amount).

1.10 Rights trading

The Entitlements under the Rights Issue are renounceable. Accordingly, there will be trading of Entitlements on ASX and you may dispose of your Entitlements to subscribe for Shares to any other party. If you do not take up your Entitlement to Shares under the Rights Issue by the Rights Issue Closing Date, the Rights Issue to you will lapse.

Trading of Entitlements on ASX is expected to occur in accordance with the timetable.

1.11 Issue date and dispatch

All Shares under the Rights Issue are expected to be issued on or before the date specified in the proposed timetable in this Prospectus.

Security holder statements and CHESST allotment confirmation notices will be dispatched one day after the issue of the Shares under the Rights Issue.

It is the responsibility of Applicants to determine their allocation prior to trading in the Shares. Applicants who sell Shares before they receive their holding statements do so at their own risk.

1.12 Application Monies held on trust

All Application Monies received for the Shares issued by this Prospectus will be held on trust in a bank account maintained solely for the purpose of depositing Application Monies received pursuant to this Prospectus until the Shares are issued under the Offers. All Application Monies received in respect of the Offers will be returned (without interest) if the Shares under the Offers are not issued.

1.13 ASX quotation

Application has been or will be made for the official quotation of the Securities offered by this Prospectus. If permission is not granted by ASX for the official quotation of the Securities offered by this Prospectus within three months after the date of this Prospectus (or such period as ASX allows), the Company will repay, as soon as practicable, without interest, all Application Monies received pursuant to this Prospectus.

1.14 CHESST

The Company participates in the Clearing House Electronic Sub-register System known as CHESST. ASX Settlement Pty Limited, a wholly owned subsidiary of ASX, operates CHESST in accordance with the Listing Rules and the ASX Settlement Operating Rules.

For personal use only

Under CHESS, Applicants will not receive a certificate but will receive a statement of their holding of Shares pursuant to their acceptance of the Offers.

Shareholders who are broker sponsored will receive a CHESS statement from ASX Settlement Pty Limited.

The CHESS statement will specify the number of Shares issued under this Prospectus, provide details of your holder identification number, the participant identification number of the sponsor and the terms and conditions applicable to the Shares.

If you are registered on the Issuer Sponsored sub-register, your statement will be despatched by Computershare Investor Services Pty Limited and will contain the number of Shares issued to you under this Prospectus and your security holder reference number.

A CHESS statement or Issuer Sponsored statement will routinely be sent to Security holders at the end of any calendar month during which the balance of their Security holding changes. Security holders may request a statement at any other time; however, a charge may be made for additional statements.

1.15 Residents outside Australia

(a) Ineligible Foreign Shareholders

This Prospectus, and any accompanying Entitlement and Acceptance Form, do not, and is not intended to, constitute an offer of Shares in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus or the Shares under the Rights Issue.

The distribution of this Prospectus in jurisdictions outside Australia may be restricted by law and persons who come into possession of this Prospectus should seek advice on and observe any such restrictions. Any failure to comply with such restrictions may constitute a violation of applicable securities laws.

The Company believes that it is unreasonable to extend the Rights Issue to Ineligible Foreign Shareholders. The Company has formed this view having considered:

- (i) the number and value of the Shares that would be offered to those Shareholders; and
- (ii) the cost of complying with the legal requirements and the requirements of regulatory authorities in the overseas jurisdictions.

Accordingly, Ineligible Foreign Shareholders will not be entitled to participate in the Rights Issue. Mahe Capital has been appointed to arrange for the sale of the Entitlements that would have been given to Ineligible Foreign Shareholders and to account for them for the net proceeds of the sale (see Section 1.15(b) for further details).

(b) Sale of Ineligible Foreign Shareholders rights

Mahe Capital has been appointed to sell the rights that would otherwise be held by Ineligible Foreign Shareholders.

Pursuant to the arrangement, the Company will place the Entitlements that would otherwise be issued to Ineligible Foreign Shareholders under a local shareholder reference number

For personal use only

and then Mahe Capital will then sell those Entitlements and provide the proceeds of those sales (net of expenses) back to the Company (or the Share Registry). The Company will then distribute to each of those Ineligible Foreign Shareholders their proportion of the proceeds of the sale net of expenses.

The Company will pay Mahe Capital a brokerage fee on the sale of Ineligible Foreign Shareholders Entitlements.

Mahe Capital will not be required to individually correspond on any matter with any of the Company's Ineligible Foreign Shareholders.

There is no guarantee Mahe Capital will be able to sell Ineligible Foreign Shareholders' Entitlements.

(c) **New Zealand offer restrictions**

The New Shares are not being offered or sold to the public within New Zealand other than to existing Shareholders of the Company with registered addresses in New Zealand at the Record Date to whom the offer of New Shares is being made in reliance on the transitional provisions of the *Financial Markets Conduct Act 2013* (New Zealand) and the *Securities Act (Overseas Companies) Exemption Notice 2013* (New Zealand).

This Prospectus has not been registered, filed with or approved by any New Zealand regulatory authority. This Prospectus is not an investment statement or prospectus under New Zealand law and is not required to, and may not, contain all the information that an investment statement or prospectus under New Zealand law is required to contain.

(d) **Isle of Man**

No offer or invitation to subscribe for Securities may be made to the public in the Isle of Man.

(e) **Malaysia**

This Prospectus may not be distributed or made available in Malaysia. No approval from, or recognition by, the Securities Commission of Malaysia has been or will be obtained in relation to any offer of New Shares and Attaching Options. The New Shares and New Options may not be offered or sold in Malaysia except pursuant to, and to persons prescribed under, Part I of Schedule 6 of the Malaysian Capital Markets and Services Act.

(f) **Notice to nominees and custodians**

Nominees and custodians that hold Shares should note that the Rights Issue is available only to Eligible Shareholders. The Company is not required to determine whether or not any registered holder is acting as a nominee or the identity or residence of any beneficial owners of Shares. If any nominee or custodian is acting on behalf of a foreign person, that holder, in dealing with its beneficiary, will need to assess whether indirect participation by the beneficiary in the Rights Issue is compatible with applicable foreign laws.

1.16 Taxation implications

The Directors do not consider it appropriate to give Applicants advice regarding the taxation consequences of subscribing for Shares.

For personal use only

The Company, its advisers and its officers do not accept any responsibility or liability for any such taxation consequences to Applicants. As a result, Applicants should consult their professional tax adviser in connection with subscribing for Shares.

1.17 Major activities and financial information

A summary of the activities and financial information relating to the Company for the financial year ended 30 June 2019 can be found in the Company's 2019 Annual Report announced on ASX on 30 September 2019 and, for the half-year ended 31 December 2019, the Half Yearly Report announced on ASX on 9 March 2020. The Company's continuous disclosure notices (i.e. ASX announcements) since the lodgement of its Annual Report on 30 September 2019 are listed in Section 5.5.

Copies of these documents are available free of charge from the Company. Directors strongly recommend that potential Applicants review these and all other announcements prior to deciding whether or not to participate in the Offers.

1.18 Privacy

The Company collects information about each Applicant provided on an Application Form for the purposes of processing the application and, if the application is successful, to administer the Applicant's Security holding in the Company.

By submitting an Application Form, each Applicant agrees that the Company may use the information provided by an Applicant on the Application Form for the purposes set out in this privacy disclosure statement and may disclose it for those purposes to the Share Registry, the Company's related bodies corporate, agents, contractors and third party service providers, including mailing houses and professional advisers, and to ASX and regulatory authorities.

If you do not provide the information required on the Application Form, the Company may not be able to accept or process your application.

An Applicant has an entitlement to gain access to, correct and update the information that the Company holds about that person subject to certain exemptions under law. A fee may be charged for access. Access requests must be made in writing to the Company's registered office.

Collection, maintenance and disclosure of certain personal information is governed by legislation including the *Privacy Act 1988* (Cth) (as amended), the Corporations Act and certain rules such as the ASX Settlement Operating Rules.

If you do not wish to accept all or part of your Entitlement, you are not obliged to do anything. The part of the Rights Issue that you do not accept will lapse by the Rights Issue Closing Date. However, you should be aware that as your Entitlement is renounceable, the Entitlement may have value should you choose to sell or trade your Entitlement on the ASX. The number of Shares you hold and the rights attached to those Shares will not be affected should you choose not to accept any of your Entitlement.

2.3 Subscribe for all of your Entitlement and apply for Shortfall Securities

If you wish to apply for New Shares and New Options in excess of your Entitlement under the Rights Issue by applying for Shortfall Securities you may do so by completing the relevant separate section of the Entitlement and Acceptance Form which accompanies this Prospectus, in accordance with the instructions referred to in this Prospectus and on the Entitlement and Acceptance Form. The Company does not guarantee that an Eligible Shareholder will be able to sell all or any part of their Entitlement on the ASX or that any particular price will be paid for the Entitlements sold on the ASX.

2.5 If you wish to sell all or part of your Entitlement under the Rights Issue other than on the ASX

Should you wish to sell part of your Entitlement under the Rights Issue other than on the ASX, and the purchaser of your Entitlement is an Ineligible Foreign Shareholder or a person that would be an Ineligible Foreign Shareholder if they were a registered holder of Shares, that purchaser will not be able to accept the Entitlement that they have purchased.

If the transferee wants to exercise some or all of the Entitlement, you should follow your stockbroker's instructions as to the most appropriate way to take up the Entitlement on their behalf. The Application Monies for Shares the transferee of the Entitlement wants to acquire must be received by the Share Registry in accordance with Section 2.2.

2.6 Entitlements not taken up

If you do not wish to accept any of your Entitlement, you are not obliged to do anything. However, you should be aware that as your Entitlement is renounceable, the Entitlement may have value should you choose to sell or trade all or some of your Entitlement on the ASX. The Rights Issue will lapse by the Rights Issue Closing Date. The number of Shares you hold and the rights attached to those Shares will not be affected should you choose not to accept any of your Entitlement.

3.4 Dividend Policy

4. Risk Factors

An investment in Securities offered by this Prospectus should be regarded as speculative. Activities in the Company, as in any business, are subject to risks which may impact on the Company's future performance. The Company has implemented appropriate strategies, actions, systems and safeguards for known risks, however some are outside its control.

The Directors consider that the following summary, which is not exhaustive, represents some of the major risk factors which prospective investors need to be aware of in evaluating the Company's business and the risks of investing in the Company. Prospective investors should carefully consider the following factors in addition to the other information presented in the Prospectus.

The principal risks include, but are not limited to, the following:

4.1 Risks specific to the Company

(a) Exploration stage and success

The Company is not at the development stage. Exploration is a high-risk activity that requires large amounts of expenditure over extended periods of time. The Company's exploration activities are subject to all the hazards and risks normally encountered in the exploration of minerals, including climatic conditions, hazards of operating vehicles and plant, risks associated with operating in remote areas and other similar considerations. Conclusions drawn during mineral exploration are subject to the uncertainties associated with all sampling techniques and to the risk of incorrect interpretation of geological, geochemical, geophysical, drilling and other data.

There can be no assurance that exploration of the tenements currently held by the Company, or any other tenements that may be acquired in the future by the Company, will result in the discovery of an economic deposit. Investors should understand that mineral exploration and any subsequent development are high-risk undertakings.

Further, the costs of the Company's exploration activities may materially differ from its estimates and assumptions. No assurance can be given that the Company's cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely affect the value of the Company's Shares.

The Company hold projects upon which Mineral Resource estimates have been made. Despite the best efforts of the Company, there is no guarantee that development of the Razorback Iron Project (or any other projects the Company has or will obtain an interest) will be commercially viable.

(b) Operating and project risks

The business of mineral exploration and mining involves risks and hazards. For example, in an exploration context no assurance can be given that ore bodies will be detected with preferred or desirable tonnages or grades. High risk and substantial expense can be incurred without the requisite or expected degree of reward. Even if commercial quantities of ore are discovered, unforeseen risks can arise in the development and production phase including mining or processing issues, environmental hazards, industrial and environmental accidents, industrial disputes and unexpected shortages or increases in the costs of consumables, labour forced disruption, the unavailability of materials and plant and equipment, mechanical failure or plant breakdown, unusual or unexpected geological formation, pit failures, changes in the regulatory environment and weather conditions. Such

For personal use only

occurrences could result in damage to, or destruction of, mineral properties or production facilities, personal injury or death, environmental damage, delays in mining, monetary losses and possible legal liability.

(c) **Future capital requirements**

The Company's activities will require substantial expenditure. There can be no guarantees that the funds raised through the Rights Issue will be sufficient to successfully achieve all the objectives of the Company's overall business strategy. If the Company is unable to use debt or equity to fund development after the substantial exhaustion of the net proceeds of the Rights Issue, there can be no assurances that the Company will have sufficient capital resources for that purpose, or other purposes, or that it will be able to obtain additional resources on terms acceptable to the Company or at all. Any additional equity financing may be dilutive to Shareholders and any debt financing if available may involve restrictive covenants, which may limit the Company's operations and business strategy.

In addition, and as announced on 4 September 2019 and 12 November 2019, the Company has entered into an agreement with the liquidators of Mintech Resources Pty Ltd (in liquidation) (**Mintech**) to amend the terms of redeemable notes held by Mintech. Under the agreement, notes with a face value of \$1,975,000 (with an applicable interest rate of 5% per annum) will mature on 31 August 2023 (**Notes**). In the event that the Company is unable to convert the Notes to Shares prior to Shares (in accordance with the terms of the Notes), the Company will have to repay the full face value (and all applicable interest) on the maturity date

The Company's failure to raise capital if and when needed could delay or suspend the Company's business strategy and could have a material adverse effect on the Company's activities.

(d) **Reliance on key management**

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel, including technical personnel and sub-contractors. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment or are incapacitated for any length of time.

(e) **Counterparty and joint venture risks**

The Company may in the future become a party to joint venture agreements governing the exploration and development of its projects. There is a risk that one of the Company's joint venture partners may default in their joint venture obligations or not act in the best interests of the joint venture. There is a risk of insolvency or managerial failure by any of the contractors or other suppliers used by the Company in any of its activities, or that any of those agreements are terminated in accordance with their terms. There is also a risk of legal or other disputes between the Company and co-venturers or contractors or others suppliers. This may have an adverse effect on the interests and prospects of the Company.

(f) **Commodity price volatility and exchange rates risks**

In the event that the Company achieves exploration success, the revenue it will derive through the sale of commodities exposes the potential income of the Company to commodity price and exchange rate risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company. Such factors include supply and demand fluctuations for commodities, technological advancements, forward selling activities and

For personal use only

other macro-economic factors. Furthermore, international prices of various commodities and some services are denominated in United States dollars, whereas the income and expenditure of the Company are and will be taken into account in Australian currency. This exposes the Company to the fluctuations and volatility of the rates of exchange between the United States dollar and the Australian dollar, as determined by international markets.

(g) **Tenement title**

The Company's title to its tenements generally requires the Company to continue to satisfy its expenditure or work commitments. The Company currently has no reason to believe that it will not satisfy those commitments. However, this cannot be guaranteed.

Interests in tenements in Australia are governed by federal and state legislation and are evidenced by the granting of licences. Each licence is for a specific term and carries with it annual expenditure and reporting commitments, as well as other conditions requiring compliance, such as satisfaction of statutory payments (including land taxes and statutory duties) and compliance with work programmes and public health and safety laws. Consequently, the Company could lose title to or its interest in tenements if licence conditions are not met or if insufficient funds are available to meet expenditure commitments as and when they arise.

Further, mining and exploration tenements, once granted, are subject to periodic renewal. There is no guarantee that current or future tenement renewals will be approved. Renewal of the term of a granted tenement is at the discretion of the relevant government authority and may include additional or varied expenditure or work commitments or compulsory relinquishment of the areas comprising the Company's projects. The imposition of new conditions or the inability to meet those conditions may adversely affect the operations, financial position and/or performance of the Company.

(h) **Land-owner and access risk**

The Company will be required to negotiate access arrangements and pay compensation to land owners, local authorities, traditional land users and others who may have an interest in the area covered by a mining tenement. The Company's ability to resolve access and compensation issues will have an impact on the future success and financial performance of the Company's operations. If the Company is unable to resolve such compensation claims on economic terms, this could have a material adverse effect on the business, results or operations and financial condition of the Company. Access to land for exploration purposes can be affected by land ownership, nature reserves and national parks, government regulation and environmental restrictions. Access is critical for exploration and development to succeed and the ability to be able to negotiate satisfactory commercial arrangements with landowners, farmers and occupiers is often essential.

(i) **Native title and Aboriginal heritage**

Tenements which may be acquired by the Company may be located within areas that are covered by potential Native Title claims. The *Native Title Act 1993* (Cth) and related State native title legislation and aboriginal heritage legislation may affect the Company's ability to obtain access to certain of exploration areas or to obtain mining production titles. Settling any such claims may incur costs to the Company. The degree to which this may impact on

For personal use only

the Company's activities will depend on a number of factors, including the status of tenements acquired and their locations.

In addition, there may be areas over which legitimate common law native title rights of Aboriginal Australians exist. If native title rights do exist, the ability of the Company to gain access to tenements (through obtaining consent of any relevant land owner), or to progress from the exploration phase to the development and mining phases of operations may be adversely affected.

(j) **Access and infrastructure risks**

Access on and to tenements may be subject to the availability of appropriate infrastructure such as road, rail, port and utilities or the consent of third parties. There is no guarantee that agreement can be reached with interested third parties or that the necessary infrastructure required to access, develop and potentially commence mining activities will be available or viable.

(k) **Litigation and counterparty risks**

The Company is not currently involved in any litigation, however like any corporation operating in a commercial setting, the Company is exposed to potential legal and other claims or disputes in the course of its business, including litigation from employees, regulators or other third parties. As with all litigation, there are risks involved. An adverse outcome in litigation or the cost of responding to potential or actual litigation may have a material adverse impact on the financial performance of the Company.

In addition, there is a risk of financial failure or default by a participant in any joint venture to which the Company is or may become a party, or the insolvency or managerial failure by any of the contractors or other suppliers used by the Company in any of its activities, or that any of those agreements are terminated in accordance with their terms. There is also a risk of legal or other disputes between the Company and co-venturers or contractors or others suppliers.

(l) **Technology risk**

The Company is currently conducting testing of NextOre's technology in relation to magnetite and iron ore projects. Whilst testing to date has been encouraging, there is no guarantee or assurance that the technology will be successful at a pilot plant scale or commercial scale, or if successful that it will be commercially viable or that the cost estimates and any underlying assumptions will be realised in practice.

(m) **Liquidity and volatility**

An investment in New Shares should be regarded as speculative. The Company also has a relatively small Shareholder base. As a consequence there is a risk, particularly in times of share market turbulence or negative investor sentiment, that there will not be a highly liquid market for Shares or that the price of Shares may decrease considerably. There may be relatively few buyers or sellers of securities on ASX at any given time and the market price may be highly volatile. This may result in Shareholders wishing to sell their Shares at such a time receiving a market price for their Shares that is considerably less than the price paid under the Rights Issue.

The past performance of the Company is not necessarily an indication as to future performance of the Company as the trading price of Shares can go up or down.

For personal use only

(n) **Resource and reserve estimates**

Resource and reserve estimates are expressions of judgements based on knowledge, experience and industry practice. Estimates that are valid when made may change significantly when new information becomes available through drilling, sampling and similar examinations.

In addition, resource and reserve estimates are necessarily imprecise and depend to some extent on geological interpretations, as well as various economic, commercial, technical, environmental and legal assumptions which may prove to be inaccurate.

Should the Company encounter mineralisation or formations different from those predicted, resource estimates may have to be adjusted and mining plans may have to be altered in a way which could adversely affect the Company's operations.

(o) **Regulatory risks**

Changes in legislative and administrative regimes, taxation laws, interest rates, other legal and government policies in Australia may have an adverse effect on the assets, operations and ultimately the financial performance of the Company and the market price of Shares.

Exploration and prospective production are dependent upon the granting and maintenance of various appropriate licences, permits and regulatory consents, approvals and authorisations, which may not be granted or may be withdrawn or by made subject to limitations at the discretion of government or regulatory authorities. Although the authorisations may be renewed following expiry or grant (as the case may be), there can be no assurance that such authorisations will be continued, renewed or granted, or as to the terms of renewals or grants. If the Company cannot obtain or retain the appropriate approvals or authorisations or there is a material delay in obtaining or renewing them or they are granted subject to onerous conditions, then the Company's ability to conduct its exploration or development operations and develop the Razorback Iron Project may be adversely affected.

(p) **Environmental risks**

The Company's operations and activities are subject to the environmental laws of Australia and any other places the Company may conduct business. As with most exploration and development projects, the Company's operations and activities are expected to have an impact on the environment, particularly if mine development proceeds. The Company attempts to conduct its operations and activities to the highest standard of environmental obligation, including compliance with all environmental laws and regulations. However, non-compliance with or breach of any conditions attached to the Company's mining or environmental licences may lead to penalties and/or revocation of the licence, and significant liability could be imposed on the Company for damages, clean-up costs or penalties in the event of certain environmental damage. This would require the Company to incur significant costs and may result in an adverse impact on the Company's cash flows, financial position and performance.

Further, the Company is unable to predict the effect of additional environmental laws and regulations which may be adopted in the future, including whether any such laws or regulations would materially increase the Company's cost of doing business or affect its operations in any area. There can be no assurances that new environmental laws, regulations or stricter enforcement policies, once implemented, will not oblige the Company

For personal use only

to incur significant expenses and undertake significant investments which could have a material adverse effect on the Company's operations, financial position and performance.

(q) **Insurance risks**

Company will endeavour to maintain insurance within ranges of coverage in accordance with industry practice. However, in certain circumstances, the Company's insurance may not be of a nature or level to provide adequate cover. The occurrence of an event that is not covered or fully covered by insurance could have an adverse effect on the Company's operations and financial position and performance.

Insurance of risks associated with minerals exploration is not always available and, where available, the costs can be prohibitive. There is a risk that insurance premiums may increase to a level where the Company considers it is unreasonable or not in its interests to maintain insurance cover or not to a level of coverage that is in accordance with industry practice. The Company will use reasonable endeavours to insure against the risks it considers appropriate for the Company's needs and circumstances. However, no assurance can be given that the Company will be able to obtain such insurance coverage in the future at reasonable rates or that any coverage it arranges will be adequate and available to cover claims.

4.2 Risks specific to the Rights Issue

Termination by Underwriter and terms of underwriting

The Underwriting Agreement includes various termination events upon the occurrence of which the Underwriter may elect to terminate the Underwriting Agreement.

In the event that the Underwriting Agreement is terminated:

- (i) the Rights Issue will not be underwritten and may not raise the full amount intended;
- (ii) the Directors may determine not to proceed with the Rights Issue; and/or
- (iii) the Company may have insufficient funds to complete all of the expenditure set out in Section 1.5.

For further details of the Underwriting Agreement refer to Section 5.3(a).

4.3 General Risks

(a) **Coronavirus disease**

The outbreak of coronavirus disease (COVID-19) is having a material effect on global economic markets. The global economic outlook is facing uncertainty due to the pandemic, which has had and may continue to have a significant impact on capital markets and share prices.

The Company's Share price may be adversely affected by the economic uncertainty caused by COVID-19. Further, any measures to limit the transmission of the virus implemented by governments around the world (such as travel bans and quarantining) may adversely impact the Company's operations.

(b) **Discretion in use of capital**

The Board and the Company's management have discretion concerning the use of the Company's capital resources as well as the timing of expenditures. Capital resources may be used in ways not previously anticipated or disclosed. The results and the effectiveness of the application of capital resources are uncertain. If they are not applied effectively, the Company's financial and/or operational performance may suffer.

(c) **Investment in capital markets**

As with all stock market investments, there are risks associated with an investment in the Company.

Securities listed on the stock market, and in particular securities of mining and exploration companies, have experienced extreme price and volume fluctuations that have often been unrelated to the operating performances of such companies. These factors may materially affect the market price of Shares regardless of the Company's performance. The price of Shares might trade below or above the issue price for the New Shares.

(d) **General economic conditions**

The operating and financial performance of the Company is influenced by a variety of general economic and business conditions, including levels of consumer spending, oil prices, inflation, interest rates and exchange rates, supply and demand, industrial disruption, access to debt and capital markets and government fiscal, monetary and regulatory policies. Changes in general economic conditions may result from many factors including government policy, international economic conditions, significant acts of terrorism, hostilities or war or natural disasters. A prolonged deterioration in general economic conditions, including an increase in interest rates or a decrease in consumer and business demand, could be expected to have an adverse impact on the Company's operating and financial performance and financial position.

The Company's future possible revenues and Share prices may be affected by these factors, which are beyond the control of the Company.

(e) **Changes in government policies and legislation**

Any material adverse changes in government policies or legislation of Australia or any other country that the Company may acquire economic interests in may affect the viability and profitability of the Company.

(f) **Unforeseen risks**

There may be other risks which the Directors are unaware of at the time of issuing this Prospectus which may impact on the Company and its operations, and on the valuation and performance of the Company's Shares.

(g) **Force majeure**

The Company's may be adversely affected by risks outside the control of the Company including labour unrest, civil disorder, war, subversive activities or sabotage, fires, floods, explosions or other catastrophes, epidemics or quarantine restrictions.

The Company's projects may be situated within a bush fire prone land area and as such, the Company may be adversely affected by the consequences of catastrophic bushfires,

For personal use only

particularly in extreme fire danger weather conditions. Such consequences may include personal injury/death, damage to infrastructure and business interruption.

(h) **Climate change risks**

Climate change is a risk the Company has considered, particularly related to its operations in the mining industry. The climate change risks particularly attributable to the Company include:

- (i) the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the Company and its profitability. While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences; and
- (ii) climate change may cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the Company operates.

4.4 **Investment Speculative**

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company.

The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Securities. Shareholders should consider that the investment in the Company is high risk and should consult their professional adviser before deciding whether to apply for Securities pursuant to this Prospectus.

These rights and liabilities can involve complex questions of law arising from an interaction of the Constitution with statutory and common law requirements. For a Shareholder to obtain a definitive assessment of the rights and liabilities which attach to Shares in any specific circumstances, the Shareholder should seek legal advice.

The Directors may from time to time pay to the Shareholders any interim dividends as they may determine. No dividend shall carry interest as against the Company. (e) **Transfer of Shares**

A Shareholder may transfer Shares by a market transfer in accordance with any computerised or electronic system established or recognised by ASX or the Corporations Act for the purpose of facilitating transfers in Shares or by an instrument in writing in a form approved by ASX or in any other usual form or in any form approved by the Directors.

The Directors may refuse to register any transfer of Shares, other than a proper market transfer, where permitted by the Listing Rules or the ASX Settlement Rules. (i) **Variation of rights**

Under section 246B of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders vary or abrogate the rights attaching to Shares.

- (q) A holder must give notification to the Company in writing no later than the time of providing a notice of exercise if they consider that the issue of Shares upon exercise of the New Options may result in the contravention of section 606 of the Corporations Act, failing which the Company will be entitled to assume that the issue of Shares upon exercise of the New Options will not result in any person being in contravention of section 606 of the Corporations Act.

5.3 Material contracts

(a) Underwriting Agreement

Mahe Capital is acting as Lead Manager and Underwriter. The Rights Issue is partially underwritten to \$4,000,000 (400,000,000 New Shares) (**Underwritten Amount**).

Mahe Capital will be paid a fee for managing and partially underwriting the Rights Issue and the Company will also be required to reimburse the Underwriter for all of the reasonable costs incurred by the Underwriter in relation to the Rights Issue. For more details, please refer to Section 5.10.

The Underwriting Agreement contains a number of provisions ordinarily found in agreements for underwriting arrangements of this type, including that:
