## **ASX Announcement (AMX)**

# **Aerometrex gains traction in the US**

First sale of 3D dataset in the US to leading Defence contractor

US capture program underway despite COVID

Denver (Colorado) office gaining momentum

Denver, Centennial, Miami and Orlando captures complete

Aerometrex Limited (ASX: AMX)(the 'Company') is pleased to announce the signing of its first US enterprise client, and provides the following update on the progress of its US growth strategy.

Aerometrex now has a contingent of trained sales and technical staff in the US, led by Rick Cassidy (President). Sales staff are located in California, Florida and Denver, the imagery capture program is centred in Denver, and all production and delivery services continue to be headquartered in Adelaide.

Despite the impact of COVID-19 Aerometrex is proceeding with its US 3D capture program and has now captured the downtown (Central Business District) areas of the City of Denver (CO), Centennial (CO), Orlando (FL) and Miami (FL). A capture program of San Francisco CA will be undertaken at the next available weather opportunity.

### **First US sale of 3D dataset**

Aerometrex is very pleased to announce the sale of its first 3D dataset to a leading US Defence contractor. Whilst the financial impact of this first US sale is immaterial, it is an exciting milestone in the Company's growth strategy. The sale is for a specific project and has the potential to develop into a much larger program.

Aerometrex is continuing to pursue large enterprise opportunities in the US and has been gaining traction in this market. The Company looks forward to providing further updates on progress of its US growth strategy in the near future.

Commenting on the Company's progress, Aerometrex Managing Director Mark Deuter said: "The US market provides a tremendous growth opportunity for Aerometrex's 3D modelling and aerial imagery. We have carefully planned out our growth strategy for the US market, and the signing of our first enterprise client in the US is an exciting step as we begin commercialising our technology in this market. We have been gaining good traction in the US and look forward to announcing further new client signings."

*This release is approved by the Board of Directors of Aerometrex Limited.*
