DIVIDEND REINVESTMENT PLAN

The Auswide Bank dividend reinvestment plan is operational for the interim dividend for the half year ended 31 December 2020.

The choices are for Full Participation where the dividend on all fully paid shares or contributing shares held is reinvested in new shares, or Partial Participation where the dividend on a specified number of shares is reinvested in new shares.

To participate in the plan, shareholders must complete the Application Form and lodge the form with the Company's Share Registry. Full terms and conditions of the dividend reinvestment plan and the application form will be forwarded to shareholders by the Company's Share Registry.

Ranking for dividend

Shares issued under the plan will rank equally in every respect with existing fully paid permanent ordinary shares and will participate in all cash dividends declared after the date of issue.

Issue price of the new shares

The shares issued under the Plan in respect of the final dividend for the current year will be issued at adiscount of 2.5% on the weighted average sale price of the Company's shares sold through normal trade on the ASX during the five trading days immediately following the Record Date.

The final date for the receipt of the application form for participation in the dividend reinvestment plan is 8 March 2021.

REVIEW OF OPERATIONS AND FINANCIAL RESULTS

Principal activities

Auswide Bank Ltd is an approved deposit-taking institution and licensed credit and financial services provider. Auswide Bank provides deposit, credit, insurance and banking services to personal and business customers across Australia, principally in regional and metropolitan Queensland, Sydney and Melbourne. The majority of the company's loan book is comprised of residential mortgage loans. Auswide Bank also offers personal loans and business banking products and services although these portfolios are not yet a material part of the loan book.

There were no significant changes during the period in the nature of the activities of the consolidated entity.

Profitability

Auswide Bank's statutory consolidated net profit after tax for the half-year ending 31 December 2020 was $11.472m, representing a 23.94% increase from $9.256m at the end of the prior corresponding period.

Auswide Bank’s total operating income for the half-year to 31 December 2020 increased to $43.476m compared to $39.520m for the corresponding period, an increase of 10.01%.

Net interest revenue for the half-year increased from $34.516m to $38.262m, up 10.85% compared to the prior corresponding period.

The company’s NIM for the half-year ended 31 December 2020 was 2.01% compared to the year ended 30 June 2020 of 1.97%. The strong NIM was driven by growth in customer deposits and proactive management of funding lines in the face of competitive home loan pricing.

REVIEW OF OPERATIONS AND FINANCIAL RESULTS (continued)

Financial position

Auswide Bank's loan book (including Investments in Managed Investment Schemes reported in Other financial assets in the Statement of Financial Position) recorded growth on an annualised basis of 13.41% across the period, increasing from $3.266 billion at 30 June 2020 to $3.485 billion at 31 December 2020.

Home loan settlements during the half-year totalled $527.006m, an increase of 57.86% compared to $333.836m at the end of the prior corresponding period.

Arrears continued to trend downwards, with total arrears past due 30 days decreasing from $12.559m at 30 June 2020 to $8.819m at 31 December 2020. Arrears past due 30 days represented 0.25% of total loans and advances at 31 December 2020 compared to 0.39% at 30 June 2020.

Retail deposits recorded growth of 6.53%, increasing from $2.620 billion at 30 June 2020 to $2.791 billion at 31 December 2020. This strong growth in retail deposits allowed for a reduction in the balance of securitised loans, one of the more expensive funding lines. Retail deposits continue to be Auswide Bank's largest source of funding.

Capital management

Auswide Bank remains in a strong capital position with a consolidated capital ratio at the end of December 2020 of 13.32% and a Tier 1 capital ratio of 10.88%. The consolidated capital ratio has increased from 12.95% at 30 June 2020, as a result of the issuance of additional Tier 2 capital and increasing operating profits. The capital ratio remains comfortably in excess of the Board's target.

Outlook and strategy

Auswide Bank’s loan book growth has continued at above system growth across the first half of the financial year. The annualised growth rate of total loans and advances (including Investments in Managed Investment Schemes) has been 13.41% compared to system growth (per RBA Financial Aggregates Dec 20) of 1.8%. Loan book growth has been achieved with significant improvement in broker flows following the successful implementation of strategic initiatives. Participation in the First Home Loan Deposit Scheme, strong growth in our Private Bank, improving regional Queensland markets and an improving brand strength are driving growth.

The Bank accomplished a number of initiatives in the late part of FY20 which resulted in increased efficiencies across the processing capabilities of the back-office 3rd Party Loan Origination Team (LOS), within Support Services. These initiatives, which included revamped digital work-flow-manager and processes, as well as the expansion of its flexible workforce within the team, saw an uplift of over 189% in file management capacity, resulting in a 215% uplift in approval outcomes for the Bank’s clients and brokers. Further development in the last 6 months of a well-proven automated document classification system, with one of the Bank’s existing well established business partners, has the Bank well positioned to drive further productivity and enhanced broker and customer experience for this channel.

Funding from customer deposits has continued to grow, now representing 74.44% of the total funding mix. Branch deposit growth of 8.73% since June 2020 has been a highlight. Auswide Bank has continued to build partnerships to achieve continued growth in customer deposits and funding of the loan book.

There was one reduction in the RBA cash rate in the six months to December 2020 taking the rate down to 0.10% which has placed pressure on the return on assets and resulted in continuing marketplace competition for both front book lending and term deposit funding. Auswide Bank’s strategic focus remains on building the customer deposit base and decreasing reliance on higher cost funding, facilitating a more efficient funding mix.

REVIEW OF OPERATIONS AND FINANCIAL RESULTS (continued)

Outlook and strategy (continued)

Investment in digital capability continues with the last quarter of 2020 devoted to upgrading the core banking system and also the commitment to several new digital product offerings which include a new website, internet banking solution, mobile app and mobile payments. These new offerings will assist in transforming the digital capability of the Bank in line with our peers. During this period Auswide Bank will also increase the capacity of the IT team to better serve our customers and our internal teams.

The Bank continued to support customers during the COVID-19 pandemic by offering repayment deferrals and interest only conditions during the period of uncertainty and financial stress. Staff personally contacted customers to discuss their individual circumstances and as at the end of December 2020 pleasingly the number of customers who continued to be impacted had reduced from over 1,200 totalling approx. $380m to less than 150 customers with approx. $37m in total loan facilities. While uncertainty remains the Board is satisfied that the provisions set aside adequately cover risks arising from current and future doubtful debts.

The Board constantly reviews opportunities to drive scale through acquisition and partnerships. The capital base remains strong and well in excess of the Board's target which will assist any planned loan book growth and provide opportunity for M&A opportunities and fintech partnering.

Dividend

A final dividend in respect of the year ended 30 June 2020 of 10.75 cents per ordinary share (fully franked) was paid on 18 September 2020.

On 23 February 2021 the Directors of Auswide Bank Ltd declared an interim dividend of 19.0 cents per ordinary share (fully franked) in respect of the December 2020 half-year, payable on 19 March 2021. The amount estimated to be appropriated in relation to this dividend is $8.116m. The dividend has not been provided for in the 31 December 2020 half-year financial statements.

The Board has resolved to maintain the Dividend Reinvestment Plan for the interim dividend payable on 19 March 2021.

Going concern

The Board of Directors of Auswide Bank have assessed that the going concern basis of accounting remains appropriate.

The strength of the financial results from FY20 continued across the first half of FY21 reflecting robust operations across the period.

Despite the impacts of COVID-19 in the 6 months to December 2020, the first half FY21 NPAT was $11.472m, up 23.94% on the $9.256m reported for the first half of FY20.

There are also indicators to support confidence in operations for the remainder FY21, including forecast performance and cash flows, as well as actual loan flows, NIM maintenance and expense management in January 2021.

Liquidity also remains strong, with various facilities available to be utilised if required. COVID-19 has not had a material impact on Auswide's ability to perform its banking activities, with branches remaining open and lending business continuing with no significant issues experienced.

Any loan contract changes relating to COVID-19 have not resulted in any material impact to ongoing operations or performance.

Despite the economic impact of COVID-19, Auswide has performed well and expects that this will continue; the Board of Directors have therefore been able to assess that Auswide Bank remains a going concern.

Subsequent events

There has been no other matter since the end of the half-year that will significantly affect the results of the operations in future years or the state of affairs of the company. However, the Board of Directors remains vigilant of any unforeseen risks which may arise as a result of rapidly evolving situations arising from the economic impact of COVID-19.

1 . General information

1.1 Statement of compliance

The half year financial report for the period ended 31 December 2020 has been prepared in accordance with Accounting Standard AASB 134 *Interim Financial Reporting* and the Corporations Act 2001. Compliance with AASB 134 ensures compliance with International Financial Reporting Standard IAS 34 *Interim Financial Reporting*.

These condensed consolidated financial statements do not include all the notes of the type normally included in an annual financial report. Accordingly, this report is to be read in conjunction with the annual report for the year ended 30 June 2020 and any public announcements made by Auswide Bank Ltd during the interim reporting period in accordance with the continuous disclosure requirements of the *Corporations Act 2001*.

1.2 Basis of preparation

These financial statements have been prepared on an accrual basis and are based on historical cost, except for land and buildings, hedging instruments, financial instruments held at fair value through profit or loss or other comprehensive income that have been measured at fair value.

Auswide Bank Ltd fulfils the requirements referred to in *ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191*, dated 24 March 2016, and in accordance with that Corporations Instrument amounts in the directors' report and the financial statements are rounded off to the nearest thousand dollars, unless otherwise indicated.

These financial statements have been prepared in Australian Dollars (AUD) which is the functional and presentation currency of the Company.

The accounting policies and methods of computation in the preparation of these financial statements are consistent with those adopted and disclosed in the previous financial year and corresponding interim reporting period, unless otherwise stated.

1.3 Application of new and revised Australian Accounting Standards

The Group has adopted all of the new and revised Standards and Interpretations issued by the Australian Accounting Standards Board (AASB) that are relevant to its operations and effective for an accounting period that begins on or after 1 January 2020.

Any new, revised or amending Accounting Standards or Interpretations that are not yet mandatory have not been early adopted.

Any significant impact on the accounting policies of the consolidated entity from the adoption of these Accounting Standards and Interpretations are disclosed in the relevant accounting policy. The adoption of these Accounting Standards and Interpretations did not have any significant impact on the financial performance or position of the consolidated entity.

1.4 Comparative figures

When required by Accounting Standards, comparative figures have been adjusted to conform to changes in presentation for the current financial year.

1.5 Going concern

The financial statements are prepared on a going concern basis. The group has net assets of $250m, recorded positive operating and total cash flows and has a liquidity risk management policy, as disclosed in section 4.4 of the financial statements for year ended 30 June 2020. As a consequence of this, the Directors are of the view that the group is well placed to manage its business risks successfully despite the current economic climate. Accordingly, they believe the going concern basis is appropriate.

3.3 Dividends

A final fully franked dividend in respect of the year ended 30 June 2020 of 10.75 cents per ordinary share ($4.562m) was paid on 18 September 2020.

The Board declared a fully franked dividend of 19.0 cents per ordinary share ($8.116m), for the six months to 31 December 2020, payable on 19 March 2021. In accordance with Accounting Standards, dividends are only provided for as declared or paid, therefore this dividend has not been provided for in the interim financial statements.

The Board of Directors resolved to maintain the Dividend Reinvestment Plan (DRP) for the interim dividend for the 2020/21 financial year.

4 . Financial assets, liabilities and related financial risk management

4.1 Capital risk management

Consistent with Basel III, the approach to capital assessment provides for a quantitative measure of the capital adequacy and focuses on:

- credit risk arising from on-balance sheet and off-balance sheet exposures;
- market risk arising from trading activities;
- operational risk associated with banking activities;
- securitisation risks; and
- the amount, form and quality of capital held to act as a buffer against these and other exposures.

Details of the capital adequacy ratio are set out in the following table.

Consolidated entity	**31 Dec 20 $'000**	30 Jun 20 $'000
Total risk weighted assets	**1,735,939**	1,631,807
Capital base	**231,230**	211,382
Risk-based capital ratio	**13.32%**	12.95%

4.2 Credit risk management

Credit risk is the risk that a customer or counterparty will default on its contractual obligations resulting in financial loss to the Group. The Group's main income generating activity is lending to customers and therefore credit risk is a principal risk. Credit risk mainly arises from loans and advances to customers, debt investments, contract assets, loan commitments and financial guarantees. The Group considers all elements of credit risk exposure such as counterparty default risk, geographical risk and sector risk for risk management purposes.

Under the direction of the Board of Directors, management has developed risk management policies and procedures to establish and monitor the credit risk of the Company. The risk management procedures define the credit principles, lending policies and decision making processes which control the credit risk of the Company.

Credit risk exists predominantly on the Group's loan portfolio. Other assets that are subject to credit risk include cash and cash equivalents, amounts due from other institutions, receivables, certificates of deposit, securitisation notes and deposits, loan commitments and bank guarantees.

The loan portfolio consists of mortgage lending, personal lending and commercial lending. Loan commitments and bank guarantees are off balance sheet exposures of the loan portfolio, which are also subject to credit risk. These groupings, by product type, have been assessed as reflecting similar performance behaviours, based on the Group's analysis of its loan portfolio.

Credit risk on mortgage lending is minimised by the availability and application of insurances including lenders' mortgage insurance, property insurance and mortgage protection insurance. Credit risk in the mortgage loan portfolio is managed by generally protecting loans in excess of 80% LVR with one of the recognised mortgage insurers and securing the loans by first mortgages on residential property.

The company has a diversified branch network consisting of 18 branches and agencies across Queensland, and a business centre in Brisbane city. The company also employs Business Development Managers in Sydney and Melbourne to conduct interstate business. All regional loan staff and panel valuers are locally based ensuring an in depth knowledge of the local economy and developments in the real estate market.

4 . Financial assets, liabilities and related financial risk management (continued)

4.2 Credit risk management (continued)

The Board of Directors and management receive reports on a monthly basis to monitor and supervise the past due loans in the portfolio, as well as economic forecasts, and ensures credit procedures are adhered to on a timely and accurate basis.

The Group's maximum exposure to credit risk at balance date in relation to each class of financial asset is the carrying amount of those assets as recognised on the balance sheet. In relation to off balance sheet loan commitments, the maximum exposure to credit risk is the maximum committed amount as per terms of the agreement. The maximum credit risk exposure does not take into account the value of any security held or the value of any mortgage or other insurance to mitigate the risk exposure.

The Group minimises concentrations of credit risk in relation to loans receivable by undertaking transactions with a large number of customers principally within the states of Queensland, New South Wales and Victoria. Diversification of the mortgage portfolio assists in minimising credit risk by reducing security concentrations in particular geographic locations.

Credit risk on personal lending is minimised by the availability of consumer credit insurance, as well as the lending policies and processes in place.

Commercial lending credit risk is minimised requiring collateral as security, which is mostly residential property, in addition to the use of bank guarantees in some circumstances. The risk management policies and decision making procedures also aid in minimising credit risk on commercial exposures.

Off balance sheet loan commitments and bank guarantees are also subject to credit risk, which is minimised by following credit guidelines for issuing credit, as well as monitoring and following review processes for exposures in relation to bank guarantees and undrawn credit.

Credit risk on cash, cash equivalents and amounts due from other institutions have been assessed as low risk with a negligible probability of default, due to amounts being invested with investment grade credit institutions with a no loss history.

Credit risk on certificates of deposit is assessed as low and probability of default negligible. Risk is minimised by using clearly defined policies for investment grade rated credit institutions, combined with the current economic outlook and on the basis of no prior losses in the Group's history on these investments.

External securitised notes are subject to low credit risk and negligible probability of default due to securitisation trusts having a structure that utilises an excess income reserve to absorb any losses, reducing the risk of note balances being affected. The securitisation deposits are made with investment grade rated credit institutions.

The Group has provision for $1.75m to account for macroeconomic and potential impacts of COVID-19 on the lending portfolio taking into account latest economic forecasts and uncertainty in the economy as well as repayment deferral arrangements that remain due to COVID-19.

4.2.1 Sources of credit risk

Key sources of credit risk for the Group predominantly emanate from its business activities including loans and advances to customers, debt investments, loan commitments etc. The Group monitors and manages credit risk by class of financial instrument. The table below outlines such classes of financial instruments identified, their relevant financial statement line item, maximum exposure to credit risk at the reporting date and expected credit loss recognised.

4.2.2 Measurement of expected credit loss (ECL)

The key inputs used for measuring ECL are:

- probability of default (PD);
- loss given default (LGD); and
- exposure at default (EAD).

These figures are generally derived from internally developed statistical models and other historical data and they are adjusted to reflect probability-weighted forward-looking information, using methodology and inputs similar to those disclosed in the Annual Report for the year ended 30 June 2020.

4.2.3 Sensitivity analysis and forward looking information

The following table shows the reported ECL based on the probability weighting of scenarios, with the sensitivity range reflecting the ECL impacts assuming a 100% weighting is applied to the base case scenario, the downside scenario or the severe downside scenario (with all other assumptions held constant). As at 31 December 2020, the probability weighted ECL is a blended outcome taking into consideration the respective scenarios.

The base case scenario incorporates a reasonable level of portfolio stress driven by forecast macro-economic factors, including potential impacts of the COVID-19 pandemic, additional funding opportunities with the RBA and the government's commitment to supporting jobs, incomes and businesses as Australia responds to COVID-19.

4 . Financial assets, liabilities and related financial risk management (continued)

4.2 Credit risk management (continued)

Scenario	ECL	Macroeconomic forecast
	Dec 20 $m	
Reported ECL	7,118	
100% base case	6,997	Includes a reasonable level of portfolio stress. Unemployment is expected to remain stable, but higher than pre-COVID-19 levels for some time. GDP has recovered with forecast of 4.0% for 2021, however continued recovery may be slow, with a forecast of 3.0% for 2022 year.
100% downside	7,257	Assumes a moderate but reasonable level of portfolio stress.
100% severe downside	7,617	Assumes a more severe level of portfolio stress where unexpected pandemic-driven economic factors may adversely impact anticipated recovery.

Assumptions

The judgements and associated assumptions have been made within the context of the impact of COVID-19, and reflect historical experience and other factors that are considered to be relevant, including expectations of future events that are believed to be reasonable under the circumstances. In relation to COVID-19, judgements and assumptions include the extent and duration of the pandemic, the impacts of actions of governments and other authorities, and the responses of businesses and consumers in different industries. Accordingly, the Group's ECL estimates are inherently uncertain and, as a result, actual results may differ from these estimates.

Significant increase in credit risk

The Group monitors all financial assets that are subject to impairment requirements to assess whether there has been a significant increase in credit risk since initial recognition. If there has been a significant increase in credit risk the Group will measure the expected loss allowance based on lifetime rather than 12-month ECL.

The Group has used the assumption that 30 days past due represents significant increase in credit risk. The Bank considers 90 days past due as representative of a default having occurred and a loan being credit impaired.

The Group has identified the following three stages in which financial instruments have been classified in regards to credit risk;

- stage 1 - performing exposure on which loss allowance is recognised as 12 month expected credit loss;
- stage 2 - where credit risk has increased significantly and impairment loss is recognised as lifetime expected credit loss; and
- stage 3 - assets are credit impaired and impairment loss is recognised as lifetime expected credit loss. Interest is accrued on a net basis, on the amortised cost of the loans after the ECL is deducted.

4.2 Credit risk management (continued)

LANA of $119.742m (Jun 20: $114.807m) is an additional exposure under AASB 9 not recognised on the balance sheet, but is immaterial to the concentrations in the above table.

4.2.8 Specific provision

The Group has complied with the provisioning requirements under the APRA prudential standard APS220 Credit Quality and includes a specific provision amounting to $4.065m (Jun 20: $3.577m) determined in accordance with the aforementioned prudential standard.

4.2.9 Financial instruments classified at FVTPL

The maximum exposure to credit risk of the notes held in MISs designated at FVTPL is their carrying invested amount, which was $46.971m at 31 December 2020 (Jun 20: $60.613m). The change in fair value due to credit risk for the MISs designated at FVTPL is a decrease of $0.383m for the period (Jun 20: $1.051m). The Group uses the performance of the portfolio to determine the change in fair value attributable to changes in credit risk of its MISs designated at FVTPL.

4.2.10 Analysis of financial instruments by past due status

Under the Group's monitoring procedures a significant increase in credit risk is identified before the exposure has defaulted and at the latest when the exposure becomes 30 days past due. The table below provides an analysis of the gross carrying amount of loans and advances (excluding effects of hardship accounts) by past due status, that are over 30 days past due.

Consolidated entity	**31 Dec 20 $'000**	30 Jun 20 $'000
30 days and less than 60 days	**3,414**	1,609
60 days and less than 90 days	**150**	903

365 days and over	**3,915**	4,900
	8,819	12,559

4.2.11 Collateral held as security and other credit enhancements

Mortgage lending

The Group holds residential properties as collateral for the mortgage loans it grants to its customers. The Group monitors its exposure to retail mortgage lending using the LVR (loan to value ratio), which is calculated as the ratio of the gross amount of the loan to the value of the collateral. The valuation of the collateral excludes any adjustments for obtaining and selling the collateral. The value of the collateral for residential mortgage loans is typically based on the collateral value at origination. For credit-impaired loans the value of collateral is based on the most recent appraisals. Subsequent appraisals are performed on securities held for credit-impaired loans, to more closely monitor the Group's exposure. The Group will take possession of security property in line with its MIP (mortgagee in possession) policy and any loss resulting from subsequent sale will be recorded as an expense, resulting in a reduction in any provision that was held for that exposure. There are also procedures in place for the recovery of bad debts written off; debt recovery processes are performed internally as well as through the use of third parties.

The table below shows the exposures from mortgage loans by ranges of LVR and those generated through the FHLDS (First Home Loan Deposit Scheme). Under the FHLDS, a government guarantee for loan monies above 80% of the value of the property purchased is provided, effectively reducing credit risk exposure.

Personal lending

The Group's personal lending portfolio consists of secured and unsecured term loans and unsecured credit cards. For loans with the purpose of purchasing vehicles and the like, the vehicle can be used as security for a secured personal loan, if acceptable under the applicable lending policy. The personal lending portfolio exhibits similar traits and behaviours regardless of whether the loan is secured or unsecured.

Commercial lending

The Group requests collateral, which is usually in the form of residential property, as security for corporate lending. Bank guarantees are also used at times, which utilise cash, residential or commercial mortgages as security. The table below shows the exposures from commercial loans by ranges of LVR.

Consolidated entity	Gross carrying amount 31 Dec 20 $'000	Gross carrying amount 30 Jun 20 $'000	Expected credit loss 31 Dec 20 $'000	Expected credit loss 30 Jun 20 $'000

Total	**58,360**	68,119	**1,459**	1,101

Other financial assets

The Group holds other financial assets at amortised cost with a carrying amount of $462.278m (Jun 2020: $440.284m) and at FVTOCI with a carrying amount of $0.918m (Jun 20: $0.918m). These are high quality investments and as per policy the Group only invests in certain types of financial assets which are investment grade and of lower credit risk.

Independent Auditor's Review Report to the Members of Auswide Bank Ltd

Report on the Half-Year Financial Report

Conclusion

We have reviewed the half-year financial report of Auswide Bank Ltd (the "Company") and its subsidiaries (the "Group"), which comprises the condensed consolidated statement of financial position as at 31 December 2020, and the condensed consolidated statement of profit or loss and other comprehensive income, the condensed consolidated statement of cash flows and the condensed consolidated statement of changes in equity for the half-year ended on that date, notes comprising a summary of significant accounting policies and other explanatory information, and the directors' declaration.

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of Auswide Bank Ltd is not in accordance with the *Corporations Act 2001*, including:

(a) giving a true and fair view of the Group's financial position as at 31 December 2020 and of its performance for the half-year ended on that date; and

(b) complying with Accounting Standard AASB 134 *Interim Financial Reporting and the Corporations Regulations 2001.*

Basis for Conclusion

We conducted our review in accordance with ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*. Our responsibilities are further described in the *Auditor's Responsibilities for the Review of the Half-year Financial Report* section of our report. We are independent of the Group in accordance with the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the annual financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of the Company, would be in the same terms if given to the directors as at the time of this auditor's review report.

Directors' Responsibilities for the Half-year Financial Report

The directors of the Company are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the half-year financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Review of the Half-year Financial Report

Our responsibility is to express a conclusion on the half-year financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including giving a true and fair view of the Group's financial position as at 31 December 2020 and its performance for the half-year ended on that date, and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
