After excluding the impact of AASB 16, EBITDA and profit before tax were up 75% and 353% respectively on the prior corresponding period.

The results for the period were impacted by several factors including:

- stronger than expected revenue growth in both transport and logistics across Australia,
- a continued focus on winning quality revenue, east coast expansion and increased customer related COVID activity,
- customers adapting their supply chains in response to changing border restrictions between states and territories, by increasing product holdings in certain states resulting in improved warehouse utilisation,
- improvement in flooring industry profit margins as a result of increased transport and warehouse volumes,
- Brisbane warehousing benefited from increased activity from current and new clients,
- significant volume increases in interstate freight into WA, however this business was negatively impacted by inefficiencies resulting from natural disasters and ongoing rail issues,
- WA courier and parcel businesses negatively impacted by ongoing driver shortages,
- receipts in the period of \$1,312,500 in respect of certain qualifying businesses within the Group who qualified for JobKeeper early in the period, and
- continued focus on receivables, cost reduction and productivity initiatives resulting in improved margins.

The Company generated strong cash flows during the period and while maintaining significant cash liquidity has directed cash flows to targeted business investment and long term debt reduction of \$7,770,000. The Company's net assets increased by 6.4% compared with the prior corresponding period, from \$81,614,185 to \$86,814,818, which is largely attributable to the current period's profit after tax.

As a consequence of the strong operating results, in particular towards the end of the period, the directors have decided to declare an interim dividend of 2 cents per share fully franked, payable on 28 April 2021.

Notes to the condensed consolidated financial statements
31 December 2020

1. BASIS OF PREPARATION OF HALF-YEAR REPORT

This general purpose financial report for the half-year reporting period ended 31 December 2020 has been prepared in accordance with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Act 2001*. CTI Logistics Limited and its subsidiaries (together referred to as the "Group") is a for-profit entity.

This condensed interim financial report does not include all the notes of the type normally included in an annual financial report. Accordingly, this report is to be read in conjunction with the annual report for the year ended 30 June 2020 and any public announcements made by CTI Logistics Limited during the interim reporting period in accordance with the continuous disclosure requirements of the *Corporations Act 2001*.

Estimates

The preparation of interim financial reports requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amount of assets and liabilities, income and expense. Actual results may differ from these estimates.

In preparing this consolidated interim financial report, the significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements as at and for the year ended 30 June 2020.

As the COVID-19 pandemic continues to impact Australia and the world, the Group's focus remains on keeping its people well, and maintaining safe and reliable operations. The Group has considered the impact of COVID-19 on each of its significant accounting judgements and estimates, particularly with respect to assumptions used in determining expected credit losses on receivables, impairment of non-current assets and going concern. At this stage no further significant estimates have been identified as a result of COVID-19, however management is monitoring the increased level of uncertainty in all future cash flow forecasts used in asset valuation and financial viability.

2. SEGMENT INFORMATION

(a) Description of segments

Management has determined the operating segments based on the reports reviewed by the Group's Executive Chairman.

The Group's Executive Chairman considers the business from a product and services perspective and has identified three reportable segments: transport, logistics and property.

The reportable segments include the following operations:

- Transport services - includes the provision of courier, taxi truck, parcel distribution, fleet management and line haul freight.
- Logistics – includes the provision of warehousing and distribution, specialised flooring logistics, supply based management services and document storage services.
- Property - rental of owner-occupied and investment property.

"Other" segments include the provision of security services and the corporate head office. None of these segments meets any of the quantitative thresholds for determining reportable segments.

The Group's Executive Chairman assesses the performance of the operating segments based on segment profit before income tax.
