The directors present their report, together with the financial statements, on the consolidated entity (referred to hereafter as the 'Consolidated entity') consisting of Cohiba Minerals Limited (referred to hereafter as the 'Company' or 'parent entity') and the entities it controlled at the end of, or during, the half-year ended 31 December 2020.

### **Directors**

The following persons were directors of Cohiba Minerals Limited during the whole of the half-year and up to the date of this report, unless otherwise stated:

Mr Mordechai Benedikt (Executive Chairman)  
Mr Andrew Graham (Executive Director)  
Mr Nachum Labkowski (Non-Executive Director)

### **Principal activities**

The principal activity of the consolidated entity during the period was the exploration for natural resources, including metals, precious metals and minerals. There have been no significant changes in the nature of those activities during the period.

### **Review of operations**

The loss for the Consolidated entity after providing for income tax amounted to \$813,219 (31 December 2019: \$362,608).

### *Financial performance*

During the year, operating expenses increased by \$450,611 to \$813,219 (31 December 2019: \$362,608). This was mainly driven by a non-cash share based payment expense which has been recorded for the half-year period amounting to \$420,925. Other operating expenses remained consistent during the half-year period.

### *Financial position*

Net assets of the consolidated entity increased from \$3,956,176 to \$11,402,264, attributable to the capital raisings completed by the Company during the half-year period. This in turn increased the Company's cash reserves from \$904,285 at 30 June 2020 to \$6,994,555 as at 31 December 2020.

Below is a summary of the consolidated entity's operations during the period.

#### Olympic Domain Farm-in Agreement (EL's 6118, 6119, 6120, 6121, 6122, 6183 & 5970)

During the half-year period the company carried out a drilling campaign and despite three unseasonal weather events that resulted in widespread flooding and substantial delays due to loss of access to the drill sites, Cohiba completed its initial drilling program at Horse Well which comprised four deep drill holes being HWDD01, HWDD02, HWDD03 and HWDD04. As at 31 December 2020, the assay results relating to the drilling campaign were pending.

Analytical results are pending for HWDD03 and HWDD04. No samples were submitted for HWDD01 which did not show any visual evidence of appreciable mineralisation.

Planning is currently underway for up to an additional 5 drill holes in the Horse Well area which are targeting additional discrete IOCG targets as well as potential extensions to the mineralised zone associated with HWDD04 and possibly HWDD03.

Cohiba has engaged the services of some subject matter experts (SME) in the area of IOCG deposits and they have reviewed the drill core and the logging data and have provided significant feedback in relation to Cohiba's program of work moving forward.

No on-ground work was carried out at Pernatty C during the period. The drilling program at Pernatty C which was to be undertaken following the Horse Well drilling program was delayed and then temporarily postponed due to access issues, as a major powerline upgrade was being undertaken directly adjacent to the approved drill hole sites in the northern area. This program of work will still go ahead, and efforts are also being made to expand the size of the current program (requires approval by the Kokatha Aboriginal Corporation).

Pyramid Lake Update (E74/594)

During the half-year period, the company's consultants continued to work on the Mining Proposal and the Mine Closure Plan, concurrent with the Mining Lease application. Groundwork Plus are coordinating the delivery of the Mining Plan and Mine Closure Plan and have completed a 14-year mine schedule and associated backfill plan as part of this process. The Final Flora and Fauna Study has been submitted. The Surface and Groundwater Studies were completed during the period and the final reports have been submitted as part of the overall Mine Plan. There is still some additional work to be completed on the Invertebrate Study which should be finished during the remainder of the financial year.

Wee Macgregor Project Update (ML's 2504, 2773, 90098)

No significant work was conducted by the company during the half-year period other than discussions with parties regarding potential involvement in the Wee Macgregor.

Cobalt X Pty Ltd (a wholly owned subsidiary of Cohiba) has maintained all of these tenements in good standing and in accordance with the Farm-in Agreement in early March 2021 will be able to fully exert its right in relation to an 80% ownership in the tenements. Under the Farm-In agreement Cobalt X Pty Ltd was only responsible for ensuring the tenements were in good standing to exert its rights, which will be carried out in March 2021.

Queensland (Cobalt X) Project (EPM's 26376, 26377, 26379 & 26380)

No significant work was conducted by the company during the half-year period on these tenements.

**Note 7. Contingent assets**

During the half-year period the Company announced that it had provided Olympic Domain Pty Ltd (**OD**) with notification that it had exceeded the \$1.5 million expenditure requirement to secure an 80% ownership in the Olympic Domain tenements (**Tenements**) in South Australia. Under the terms of the farm-in/joint venture agreements, upon the company earning its 80% interest in the Tenements, the parties would contribute to expenditure in accordance with their percentage Tenement interests.

During the half-year the Company announced that OD has refused to acknowledge the exceedance of the expenditure milestone to enable the Company to secure its 80% interest in the Tenements (Phase 3 by expenditure of \$500k). With the milestone being reached it would require OD to contribute its 20% pro-rata of all expenditure costs going forward.

The Company commenced legal proceedings to enforce its rights and these proceedings are ongoing in the Supreme Court of Victoria (**Court**). The Company continues to pursue finalisation of this matter and will provide further updates once these matters progress. Upon the proceedings being finalised and the Company obtaining confirmation that its 80% interest has been registered, the Company will send a request to OD for reimbursement of its 20% interest in the project for all expenditure carried out from the date of confirmation.

**Note 8. Contingent liabilities**

With the exception of deposits held, which are refundable to the Group only if or when the Group exits an area of interest and appropriately rehabilitates the underlying land following its exploration activities, there were no contingent liabilities at 31 December 2020 (31 December 2019: Nil).

**Note 9. Events after the reporting period**

Subsequent to 31 December 2020 and up to the date of this report, the Company issued 25,545,557 Shares for the conversion of 25,545,557 CHKOA options with an exercise price of \$0.01 (1 cent) per option.

No other matter or circumstance has arisen since 31 December 2020 that has significantly affected, or may significantly affect the Consolidated entity's operations, the results of those operations, or the Consolidated entity's state of affairs in future financial years.

and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
