Dear fellow shareholders,

Bass Oil Annual Report for the Financial Year ended 31 December, 2020

Melbourne-based Bass Oil (ASX:BAS), an Australian-listed Indonesian oil producer focused on expanding oil and gas production from its onshore holdings in Indonesia's prolific South Sumatran Basin, is pleased to present the Company's annual report for the financial year ended 31 December, 2020.

The Company's principal asset is a 55% Operator interest in the long-life Tangai-Sukananti licence hosting multiple in-field, exploration, development and production opportunities.

In regard to COVID-19 and the recent lower oil price environment, the Company's key focus was to remain disciplined, ensuring the health and safety of our staff, whilst delivering and optimising, ongoing production throughout CY2020, whilst not compromising the integrity of our field operations.

We are now seeing a welcome recovery in the oil price. This allows Bass to consider organic growth opportunities from our current portfolio of assets along with acquisition of oil properties in Indonesia as well as attractive Australian opportunities.

Full Year Highlights included:

- Oil production (Bass 55% share) totalled 157,754 barrels
- Net entitlement oil totalled 86,765 barrels – up 4% YoY
- Gross revenue totalled US\$3.15 – down 38% YoY
- Gross Profit US\$0.65 million
- Earnings before interest, tax and depreciation and amortisation (EBITDA) US\$0.10 million
- Earnings before interest and tax (EBIT) US\$0.35 million
- Net Profit/(loss) After Tax of US(\$0.50 million)

I commend the report to you.

Yours sincerely,

Peter Mullins

Chairman

CHAIRMAN'S MESSAGE

Dear fellow Bass Oil shareholders,

The year 2020 will go down in history, due to COVID-19's domestic and global economic impacts, as one of the most turbulent years in living memory. That turbulence and associated unstable business conditions created a number of challenges and hurdles for our Company that needed to be overcome, and we did overcome them. It is in this context that I am pleased on behalf of your Board, to present to you the Annual Report of Bass Oil Limited for the 12 months ended 31 December, 2020.

Importantly, Bass is proud to report that it recorded zero incidents resulting in injuries over 2020, which is a credit to all staff in Indonesia and Australia. Furthermore, the Company, its employees, consultants and contractors, have accumulated over 4.7 million working hours without a Lost Time Injury, a truly creditable performance.

In 2020, Bass and our fellow oil industry peers, saw the full impact of the COVID health pandemic which had the dual effect of the collapse in the oil markets driving down the oil price for Indonesian product to almost US\$18 per barrel, while restricting movements of personnel in Indonesia, Australia and between the two. The Company responded to these challenges early and was able to limit their impact. Bass achieved the following key outcomes. Net entitlement oil production increased 4% from 83,276 barrels to 86,765 barrels year on year. Sales revenue decreased 38% from US \$5.05 million to \$3.15 million, resulting in a net loss after tax of (\$0.50) million this year, down from a \$0.40 million profit in 2020.

Bass Oil's focus is on building an energy business, initially in Indonesia. During the downturn in the oil markets in 2020, the Company worked to also identify acquisition opportunities elsewhere. We have continued to engage with and assess a number of those potential acquisitions over the period. While no transaction moved to completion, this reflects your Company's tight due diligence and adherence to an expansion policy based on identifying projects with significant growth potential, proven economics and profitability, not sentiment.

I am pleased to report that there has been no interruption to our operations during the COVID-19 threat and that oil prices have recently started to recover. Whilst the pandemic continues, Bass is actively monitoring and complying with all Government directions to ensure the health and safety of all staff is protected throughout this period. The Company continues to safeguard its financial position, via a reduction in overheads, which includes a cut to Directors' fees and salaries.

Fortunately, Bass is in a stable position, being debt free and operating in a low-cost environment. The Company has optimised its field operations, reducing direct operating costs to around US\$20/barrel at current production rates.

In closing, I thank particularly this year, our shareholders for your loyalty, support of the Company, and your personal encouragement through the year to our Board and management.

Finally, I thank our Melbourne-based executive team, our Indonesian-based operations team and my fellow Directors for their diligent attention to the affairs of your Company. We will continue to work on strategically positioning ourselves for growth in Indonesia and elsewhere as high-quality value-adding growth opportunities present themselves.

Peter Mullins
Chairman
31 March 2021

MANAGING DIRECTOR'S REPORT

Dear fellow Bass Oil shareholders,

During 2020, the global economy was severely impacted by the onset of the COVID-19 pandemic. The major impact on the oil and gas sector was a collapse of the oil price which momentarily even saw prices for benchmark crudes turn negative. The result of this tumult was that Bass immediately implemented a cost reduction program.

Corporate overheads were significantly reduced, including a 50% cut in Directors' fees and salaries. All discretionary activities and expenditure were deferred or suspended. These measures, in combination with the fact that Bass carries no debt, assisted the Company to successfully weather the storm within these financial market environments.

The Company is grateful to the efforts of the entire Bass team, in Indonesia and Australia, for their sacrifice to achieve the outcomes summarised within this annual report for the year ended 31 December, 2020. The financial markets, along with the oil price, have since begun to stabilise and the Company believes that it is now well positioned to achieve through calendar 2021, the growth that Directors and shareholders expect. The performance of Bass' assets, and growth potential, is covered in this report.

Key financial highlights for the year included:

- Gross revenue totalled \$3.15 million – down 38% YoY
- Earnings before interest, tax and depreciation and amortisation (EBITDA) \$0.10 million
- Earnings before interest and tax (EBIT) (\$0.35) million
- Net profit/(loss) after tax (\$0.50) million

In regard to COVID-19 and the recent lower oil price environment, our key focus was to remain disciplined, ensuring the health and safety of our staff, whilst delivering and optimising, ongoing production throughout CY2020, whilst not compromising the integrity of our field operations.

Bass is committed to supporting government and community efforts in both Indonesia and Australia, to limit the spread of the virus, and supporting business continuity with regard to our staff and our contractors.

As such, Bass activated a Business Continuity Plan (BCP) designed to protect the health and safety of our people, including the wearing of masks at work, health screening protocols, restricting travel and meetings, implementing working from home protocols and making changes to field and office access arrangements. The BCP includes contingency plans that will allow production operations to continue in the event of any of the field operations team contracting the virus.

We are now seeing a welcome recovery in the oil price, improving the opportunity to take advantage of more realistically priced assets for sale that are now starting to present themselves.

MANAGING DIRECTOR'S REPORT (cont'd)

Tangai-Sukananti KSO

Bass' experienced Indonesian on-site personnel and Jakarta-based technical and management teams operate the Tangai-Sukananti KSO production assets, containing the producing Bunian and Tangai oil fields, within the oil rich onshore South Sumatran Basin in Indonesia. The team has maintained its focus throughout 2020 on optimising production within the KSO. This lifted total production capacity and minimised decline from existing wells (see Figure 1). The KSO is considered long-life with production expected beyond current license expiry in mid-2025.

The assets provide a future platform for growth through low-cost field development opportunities and execution of value-accretive acquisitions requiring minimal additional corporate overheads, given Bass' established Jakarta-based personnel.

Total oil field production for the year ending 31 December 2020, was 157,754 barrels (or 86,765 barrels on a net entitlement basis). Bass expects to hold production steady through calendar 2021. If the oil price remains at current levels, the Company anticipates launching its next Indonesia drilling program later this year, aimed at providing a significant production up-lift in 2022. The next well to be drilled is expected to be the Tangai-5 development well.

Figure 1: Tangai-Sukananti Historical Production (55% basis)

MANAGING DIRECTOR'S REPORT (cont'd)

Substantive technical review

The focus of the Jakarta and Melbourne-based sub-surface teams in 2020 has been to update the comprehensive, integrated reservoir study and dynamic reservoir model following the drilling of the successful Bunian-5 development well.

This work was successfully completed during the year. It has been employed to inform the Company's future development plans and to update the Company's 1P, 2P and 3P reserves and contingent resource estimates for the year end 2020 reserves review.

The study identified a number of exciting production and reserve growth opportunities within our existing Indonesia fields. These include:

- Increased confidence of the benefits of drilling the Tangai 5 development well which will be positioned updip of all the existing producers
- The identification of a possible major extension of the Bunian field to the west which would see it encompass the previously identified Bunian West feature, previously considered a stand-alone opportunity
- The possible extension of the Bunian field should allow a significant increase in oil rates and recoveries from a future appraisal and development drilling program
- Modelling of the K reservoir in the Bunian field has identified the potential to improve recoveries and reduce development costs through the application of horizontal drilling techniques

Bass Oil's recent completion of its year end 2020 reserves review, has been summarised in this annual report and in a separate ASX release. For the first time since the Company acquired the Tangai-Sukananti KSO assets, Bass has reported their 3P reserves as they represent the significant growth potential of the fields.

The total 100% Field 2P Reserves at 31 December, 2020 are assessed to be 1.703 million barrels of oil. This reflects the reserves for the Bunian and Tangai oil Fields (Figure 2). In accordance with ASX reporting requirements for fiscal environments that use production sharing contracts or similar, Bass reports Net Entitlement 2P Reserves of 0.549 million barrels. Net Entitlement Reserves are the share of oil costs and profits that Bass is entitled to receive under the KSO signed with PT Pertamina.

MANAGING DIRECTOR'S REPORT (cont'd)

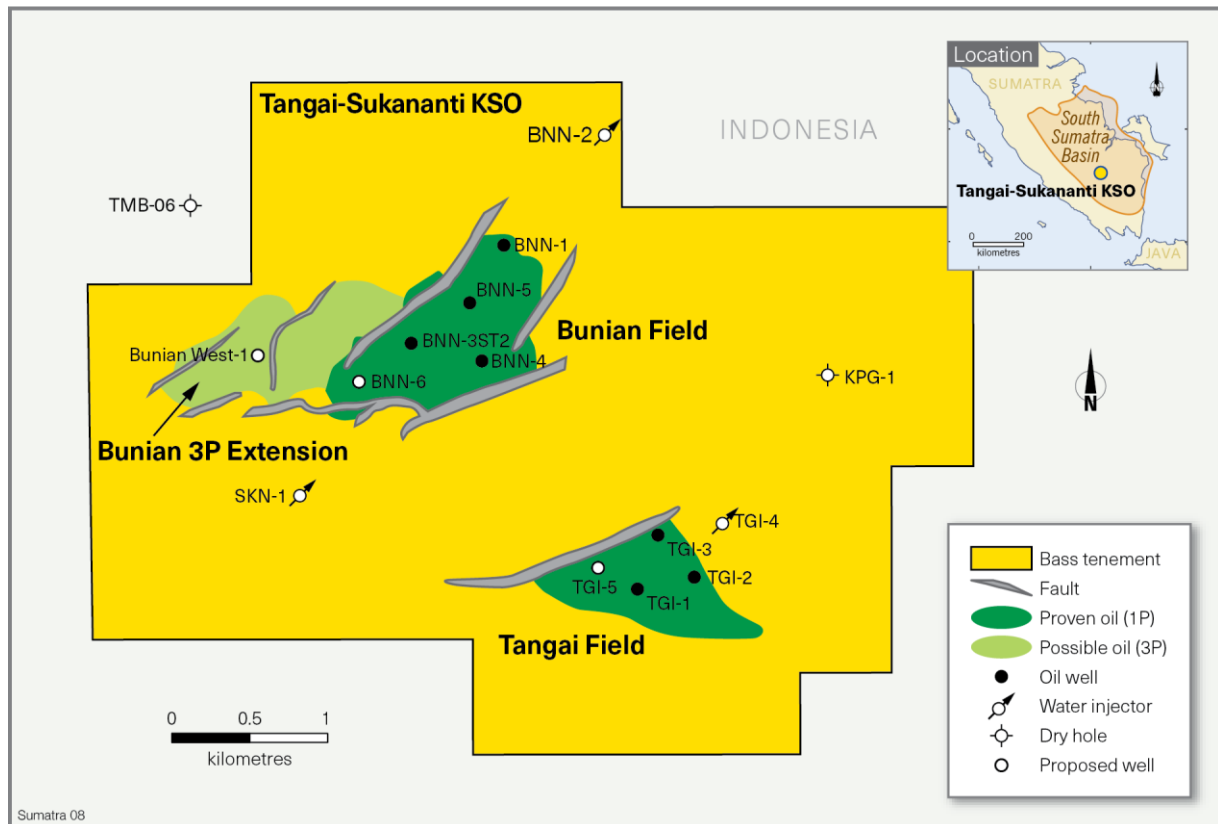

Figure 2: Tangai-Sukananti KSO Location Map

Business development

Bass commenced the 2020 calendar year actively engaged in the evaluation of, and negotiations on a number of growth opportunities. The onset of the COVID 19 pandemic, the resultant rapid deterioration of the global fiscal climate, along with the precipitous fall in oil prices, led to a suspension of business development activities throughout most of 2020.

The final quarter of 2020 saw a substantial recovery in the global economic climate along with an increase in oil prices and more stable and improving fiscal outlook for the energy industry. Consequently, Bass recommenced its business development activities and is reviewing a number of more realistically priced onshore Indonesian and other acquisition opportunities outside of Indonesia.

Bass applies stringent and consistent evaluation criteria to all opportunities which it considers, commencing with the Petroleum System, and including all aspects of production materiality, geographic location, acquisition costs and execution risk.

Your company anticipates that this reactivated Business Development focus will continue during calendar 2021.

RESERVES AND RESOURCES

Reserves and Contingent Resources

(For 12 month period ending 31 December 2020)

The 2020 reserves review has been influenced by strong performance at all existing wells, in particular Bunian-3 and Tangai-1, throughout 2020.

The outcomes at Bunian-5, along with the conclusion of over 12 months of geotechnical studies informed a Static and Dynamic Model update in 2020 that significantly improved the Oil-in-place for the Tangai Field, increased the oil column in the Bunian Field and indicated a 3P case for the Bunian field with substantial upside potential. This upside potential was identified during the study where the main Bunian structure may extend and in fact, envelope the Bunian West feature as described in figure 1.

Whilst the gross field reserves decreased slightly, largely reflecting the year's production, the year-on-year movements in Net Entitlement Reserves reflect a slight increase in both the 1P and 2P reserves for the Bunian and Tangai fields under the fiscal terms of the KSO. .

The results give your Board and management a high level of confidence in our forward development drilling program for 2021/22 and beyond.

Resources & Reserves as at 31 December, 2020			
100% Field Reserves (MMbbl)			
Category	Proved 1P	Proved & Probable 2P	Proved, Probable & Possible 3P

Total	0.283	0.836	1.401

Table 1: Tangai-Sukananti Reserves and Resources

RESERVES AND RESOURCES (cont'd)

Reserves

The 2P Field Reserves in the Tangai-Sukananti KSO are assessed as at 31 December, 2020, to be 1.703 million barrels of oil on a 100% JV basis. This reflects the proved and probable reserves for the Bunian and Tangai oilfields (see Tables 1 and 2 as well as figure 2). In accordance with ASX reporting requirements for fiscal environments that use production sharing contracts or similar, Bass reports Net Entitlement 2P Reserves of 0.549 million barrels. Net Entitlement Reserves are the share of cost oil and profit oil that Bass is entitled to receive under the KSO signed with the Indonesian government body, PT Pertamina. The Net Entitlement Reserves formula varies with the fiscal environment, cost recovery status and oil price.

Contingent Resources

The total 100% Field 2C Contingent Resources for the Tangai-Sukananti KSO at 31 December, 2020 are assessed to be 0.836 million barrels of oil. The Field Contingent Resources comprise volumes attributed to currently producing or future planned wells in the Bunian and Tangai oil fields post licence expiry in July, 2025. This presents a future development opportunity to increase, or bring forward reserves.

Notes on Calculation of Reserves and Resources

The 2020 Dynamic Model have updated the oil volumetrics, development scenarios and drilling locations used in this report. Additionally, a decline curve analysis (DCA) was conducted on the current wells. The 1P, 2P and 3P cases are a combination of the forecasts from both the Dynamic Model and the DCA as deemed to best represent realistic outcomes.

The Bunian Field is currently producing from only the TRM3 sandstone. However, the K reservoir is expected to become a significant contributor to future production with future planned drilling. The Tangai Field has one producing reservoir (the M sandstone).

All reserves and resources are estimated by deterministic estimation methodologies consistent with the definitions and guidelines in the Society of Petroleum Engineers (SPE) 2007 Petroleum Resources Management System (PRMS).

Under the SPE PRMS guidelines, "Reserves are those quantities of petroleum anticipated to be commercially recoverable by application of development projects to known accumulations from a given date forward under defined conditions". Net Entitlement Reserves are the reserves that Bass has a net economic entitlement to. That is, a share of cost oil and profit oil that Bass is entitled to receive under the KSO signed with the Indonesian government body, PT Pertamina

Contingent Resources are "those quantities of petroleum estimated, as of a given date, to be potentially recoverable from known accumulations by application of development projects, but which are not currently considered to be commercially recoverable owing to one or more contingencies".

Qualified Petroleum Reserves and Resources Evaluator Statement

The information contained in this section regarding Bass Oil's 2020 reserves and contingent resources is based on and fairly represents information and supporting documentation reviewed by Mr Giustino Guglielmo who is an employee of Bass Oil Limited and holds a Bachelor of Engineering (Mech). He is a member of the Society of Petroleum Engineers (SPE) and a Fellow of the Institution of Engineers Australia (FIEAust) and as such, is qualified in accordance with ASX listing rule 5.4.1 and has consented to the inclusion of this information in the form and context in which it appears in this section.

Table 2: Tangai-Sukananti Reserves and Resources including revisions

SAFETY

Bass Oil implements daily, a strict, industry-standard health and safety regime around its Operatorship of the Tangai-Sukananti production assets. This safety regime is energetically promoted by Pertamina, Indonesia's state-owned oil company.

The major safety challenge of 2020 was managing the impact of the COVID 19 pandemic. Whilst the impact was felt globally, developing countries such as Indonesia were amongst those impacted the most. Bass implemented pandemic response plans to ensure the health of all employees in the field and the Jakarta office. To date, these plans have minimised the impact on the Company's employees as well as its operations. Bass remains watchful, as uncertainty still exists in Indonesia as a result of the COVID-19 pandemic. This uncertainty will remain at least until a roll out of an effective COVID vaccine covers a majority of the population.

Regarding our normal operations, the Bass approach, under our Health, Safety, Environment, Quality and Community (HSEQC) protocols, prioritises the ongoing design, implementation and monitoring of robust and inclusive safety cultures and outcomes across the entire business but in particular, to ensure the well-being of our Indonesian field teams and reliability of field operations.

In short, we strive for 'zero incidents' in all activities.

Bass is proud to report that over 2020, it recorded zero incidents resulting in injuries, an outcome which is a credit to all staff in Indonesia and Australia. The total Safe Work Hours achieved up to 31 December, 2020, was more than 4.7 million hours. This is an outstanding achievement.

All staff and employees are to be commended for their diligence in making Bass a safe place to work.

The challenge remains an ongoing one. We will continue to minimise potential hazards and risks associated with operations as our assets and operating environment change.

ENVIRONMENT

In addition to our Safety focus, the Company is highly focused to preserve the natural onshore environment in which we operate, including respect for local communities within our operating footprint.

Over 2020, our field teams fully met regulated air and noise management requirements. Our monitoring systems indicated all parameters of ambient air quality and emissions were better than established quality standards. Noise monitoring in production operations was conducted in accordance with the provisions of the Indonesian UKL-UPL guidelines and indicated that noise levels at all locations monitored, met the set quality standards.

In terms of on-site surface Water Quality and Aquatic Biota, new internal monitoring systems to ensure local water quality remains good and not impacted by production processes, are being implemented, with stability to date in the diversity index of plankton being monitored in local water bodies. Laboratory analysis of samples of water drainage, surface water and wells showed good water quality that met biological measuring standards.

Bass Oil's environmental protocols include respect for community. In 2020, the Company continued to deliver on its Corporate Social Responsibility program, via community development assistance, especially for the villages of Tanjung Leaning and Kayu Ara. Bass also ensured that the increased movements in heavy vehicle traffic had a minimal impact on the local communities in the area.

Bass continues to strive to achieve the lightest possible footprint in the environment in which we work.

DIRECTORS' REPORT

The Directors present their report on the results of Bass Oil Limited consolidated entity ("BAS" or "Bass" or "the Company" or "the Group") for the year ended 31 December 2020.

DIRECTORS

The names and details of the Company's directors in office during the financial year and until the date of this report follow. Directors were in office for the entire period unless otherwise stated.

Peter F Mullins FFin

Chairman and non-executive independent director (Appointed 16 December 2014)

Mr Mullins has over 40 years banking experience in Australia and New York, specialising in Institutional and Corporate Finance across a broad industry range, including Oil & Gas. He is experienced in Mergers and Acquisitions, Structured Finance, IPO's and Capital Raisings.

Mr Mullins retired as Head of Institutional Banking SA&NT with the Commonwealth Bank (CBA) in 2009 and took up a part time role as Senior Advisor, Institutional, Corporate and Business Banking for CBA in SA&NT. He retired from this role in 2013.

Mr Mullins was a Director of Somerton Energy Limited for 3 years prior to its merger with Cooper Energy Limited in 2012.

He is a Fellow of the Financial Services Institute of Australasia.

Mr Mullins served on the Audit and Risk Committee during the period.

Giustino (Tino) Guglielmo BEng (Mech)

Managing director from 1 February 2017, previously was Executive Director (Appointed 16 December 2014)

Mr Guglielmo is a Petroleum Engineer with over 40 years of technical, managerial and senior executive experience in Australia and internationally.

Mr Guglielmo was the CEO and Managing Director of two ASX listed companies; Stuart Petroleum Limited for seven years and Ambassador Oil & Gas Limited for three years. Both companies merged with larger ASX listed companies generating significant value for shareholders following the identification of compelling resource potential in their respective petroleum resource portfolios.

Mr Guglielmo also worked at Santos Limited, Delhi Petroleum Limited, and internationally with NYSE listed Schlumberger Corp. His experience spans the Cooper basin, Timor Sea, Gippsland basin, and exposure to US land and other international basins.

Mr Guglielmo was a member of the Resources and Infrastructure Task Force and the Minerals and Energy Advisory Council, both South Australian Government advisory bodies. He is a Fellow of the Institution of Engineers, Australia, a member of the Society of Petroleum Engineers and Australian Institute of Company Directors. Mr Guglielmo resigned as a director of Octanex Limited - on 17 July 2018.

Mr Guglielmo served on the Audit and Risk Committee during the period.

Mark L Lindh - Non-executive independent director (Appointed 16 December 2014)

Mr Mark Lindh is a corporate advisor with in excess of 15 years' experience in advising mining and resources companies with a particular focus on the energy sector.

He is a founding director of Adelaide Equity Partners Limited, an investment and advisory company. He is currently a non-executive Chairman of Aerometrex Limited (ASX Code AMX) and a Non-Executive Director of Advanced Braking Technology Limited.

Mr Lindh served on the Audit and Risk Committee during the period.

DIRECTORS' REPORT (cont'd)

Hector M Gordon BSc (Hons)

Non-executive independent director (Appointed 23 October 2014)

Mr Gordon currently serves on the Board of Cooper Energy Limited as a Non-Executive Director.

Mr Gordon is a geologist with over 40 years of experience in the upstream petroleum industry, primarily in Australia and Southeast Asia. Until June 2017 Mr Gordon was employed by Cooper Energy Limited as Executive Director - Exploration & Production.

Mr Gordon's previous employers also include Beach Energy, Santos Limited, AGL Petroleum, TMOC Resources, Esso Australia and Delhi Petroleum Pty Ltd. He is currently a Non-Executive Director of Cooper Energy Limited, which is a substantial shareholder of Bass Oil Limited.

Mr Gordon is a member of the American Association of Petroleum Geologists and a member of the Society of Petroleum Engineers.

Mr Gordon served as Chair of the Audit and Risk Committee during the period.

INTERESTS IN THE SHARES & OPTIONS OF THE COMPANY

As at the date of this report, the interests of the Directors in the shares and options of Bass Oil Limited were:

	Number of Ordinary Shares	Number of Options over Ordinary Shares
P F Mullins	60,800,000	7,600,000
G Guglielmo	285,630,465	10,000,000
M L Lindh	113,811,393	10,000,000
H M Gordon	25,266,668	2,500,000

COMPANY SECRETARY

Mrs R Hamilton was appointed Company Secretary on the 31st March 2011. She has been a Chartered Accountant for over 25 years.

DIVIDENDS

During the year and to the date of this report, no dividends were recommended, provided for or paid.

PRINCIPAL ACTIVITY

The principal activity of the Group during the year was oil production from low cost oil production assets in Indonesia. The Company realigned its corporate strategy following the acquisition of a 55% interest in Tangai-Sukananti KSO, which contains producing assets located in the prolific oil and gas region of South Sumatra, Indonesia.

OPERATING AND FINANCIAL REVIEW

Operating results for year

The Group's operating loss for the year ended 31 December 2020 after income tax was \$499,826 (31 December 2019: profit of \$398,418).

DIRECTORS' REPORT (cont'd)

Review of Financial Condition

Liquidity

The Group's consolidated statement of cash flows for the year recorded a decrease of \$545,229 (2019: decrease of \$213,246) in cash and cash equivalents. The cash flows were derived from operating receipts of \$3,555,327 (2019: \$5,064,484) and capital raising net of transaction costs of \$(6,736) (2019: \$944,649).

There were cash outflows to suppliers and employees of \$3,384,788 (2019: \$3,768,975) and taxation paid of \$249,216 (2019: \$486,512). Further cash outflows of deferred payments to Cooper Energy of \$nil (2019: \$883,638), and net cash outflows in investing activities of \$360,308 (2019: \$940,023) relating to expenditure on oil properties.

Cash assets at 31 December 2020 were \$95,642 (2019: \$640,871).

CHANGES IN THE STATE OF AFFAIRS

The major challenge of 2020 was managing the impact of the COVID 19 pandemic. Whilst the impact was felt globally, developing countries such as Indonesia were amongst those impacted the most. Bass implemented pandemic response plans to ensure the health of all employees in the field and the Jakarta office. To date, these plans have minimised the impact on the Company's employees as well as its operations. Bass remains watchful, as uncertainty still exists in Indonesia as a result of the COVID-19 pandemic. This uncertainty will remain at least until a roll out of an effective COVID vaccine covers a majority of the population. There have been no other changes in the state of affairs.

MATTERS SUBSEQUENT TO THE END OF THE FINANCIAL YEAR

No other matter or circumstance has occurred subsequent to year end that has significantly affected, or may significantly affect, the operations of the Company, the results of those operations or the state of affairs of the entity in subsequent financial years.

LIKELY DEVELOPMENTS AND EXPECTED RESULTS

Since assuming the operator role at the Tangai-Sukananti KSO, Bass has highlighted a number of prospective targets and leads that warrant further testing and development.

The Company's view is that there is a substantial quantity of oil reserves that remain undeveloped, within the Bunian and Tangai Fields.

SHARE OPTIONS

Unissued shares

As at the date of this report there were 367,986,328 unissued ordinary shares under options (367,986,328 at 31 December 2019).

INDEMNIFICATION AND INSURANCE OF DIRECTORS AND OFFICERS

BAS maintains a directors and officers insurance policy and has paid an insurance premium for the policy. The contract of insurance prohibits disclosure of the amount of the premium and the nature of the liabilities insured. Pursuant to the constitution the Company has entered into Deeds of Indemnity with the Directors and Chief Financial Officer.

DIRECTORS' REPORT (cont'd)

INDEMNIFICATION OF OFFICERS AND AUDITORS

The company has not otherwise, during or since the end of the financial year, except to the extent permitted by law, indemnified or agreed to indemnify an officer or auditor of the company or of any related body corporate against a liability incurred as such an officer or auditor.

DIRECTORS' MEETINGS

The number of meetings of directors (including meetings of committees of directors) held during the year and the number of meetings attended by each director was as follows:

	Board Meetings		Audit and Risk Committee	
	Held	Attended	Held	Attended
P F Mullins	6	6	2	2
G Guglielmo	6	6	2	2
H M Gordon	6	6	2	2

REMUNERATION REPORT (AUDITED) (31 December 2020)

This Remuneration Report outlines the director and executive remuneration arrangements of the Group in accordance with the *Corporations Act 2001* and its Regulations. For the purposes of this report, key management personnel (KMP) of the Group are defined as those persons having authority and responsibility for planning, directing and controlling the major activities of the Group, directly or indirectly, including any director (whether executive or otherwise) of the parent company, and includes the Company Secretary.

Details of Key Management Personnel (including executives of the Group)

(i) Directors

P F Mullins	Chairman
G Guglielmo	Managing Director
H M Gordon	Director (Non-executive)
M L Lindh	Director (Non-executive)

(ii) Executives

S J Brealey	Staff Geologist New Ventures
R M Hamilton	Company Secretary

There have been no changes to key management personnel after 31 December 2020 and before the date the financial report was authorised for issue.

The Board of Directors ("the Board") is responsible for determining and reviewing remuneration arrangements for the directors and executives. No remuneration consultant was engaged nor was any remuneration advice sought during the period.

The Board assesses the appropriateness of the nature and amount of remuneration of executives on a periodic basis by reference to relevant employment market conditions with the overall objective of ensuring maximum stakeholder benefit from retention of a high quality, high performing executive team.

DIRECTORS' REPORT (cont'd)

REMUNERATION REPORT (AUDITED) (31 December 2020) (cont'd)

Remuneration Philosophy

The performance of the Company largely depends upon the quality of its directors and executives. To this end, the Company embodies the following principles in its remuneration framework:

- Provide competitive rewards to attract high calibre executives.

Remuneration Structure

In accordance with best practice corporate governance, the structure of non-executive director and executive remuneration is separate and distinct.

Non-Executive Director Remuneration

Remuneration policy

The Board seeks to set aggregate remuneration at a level that provides the Company with the ability to attract and retain directors of the highest calibre, whilst incurring a cost that is acceptable to shareholders. The amount of aggregate remuneration sought to be approved by shareholders and the fee structure is reviewed annually. The Board considers advice from external consultants if required, as well as the fees paid to non-executive directors of comparable companies when undertaking the annual review process.

The Company's constitution and the ASX Listing Rules specify that the aggregate remuneration of non-executive directors shall be determined from time to time by a general meeting. The latest determination was at the Annual General Meeting held on 3 October 2001, when shareholders approved an aggregate remuneration of AUD 250,000 per year.

Structure

The remuneration of non-executive directors consists of director's fees and committee fees for the non-executive director who chairs the Audit and Risk Committee. The payment of additional fees for chair of the Audit and Risk Committee recognises the additional time commitment required by a non-executive director who chairs a sub-committee. The non-executive directors also receive retirement benefits in the form of superannuation. There are no other retirement benefits, other than superannuation.

The table below summaries the non-executive director remuneration (excluding superannuation):

Board fees	AUD
Chairman	75,000
Directors	50,000
Incremental Audit and Risk Committee fees	
Chairman	5,000

No other fees are paid for serving on Board committees or on boards of wholly owned subsidiaries.

Non-executive directors have been encouraged by the Board to hold shares in the Company.

The remuneration of non-executive directors for the period ending 31 December 2020 and 31 December 2019 is detailed in Table 1 and 2 respectively of this Remuneration Report.

In response to the COVID-19 pandemic all director fees and the executive director's salary were cut by 50% from 1 April 2020 for twelve months.

DIRECTORS' REPORT (cont'd)

REMUNERATION REPORT (AUDITED) (31 December 2020) (cont'd)

Executive Remuneration

Objective

The Company aims to reward executives with a level and mix of remuneration commensurate with their position and responsibilities within the Company so as to:

- Reward executives for individual performance;
- Align the interests of executives with those of shareholders; and
- Ensure that total remuneration is competitive by market standards.

Structure

In determining the level and make-up of executive remuneration, the Board engages external consultants as needed to provide independent advice. No consultant was engaged in the current year.

Remuneration consists of fixed remuneration being base salary and superannuation and/or consultancy fees.

The proportion of base salary and superannuation and/or consultancy fees for each executive is set out in Table 1.

Fixed remuneration

Objective

Fixed remuneration is reviewed regularly by the Board, with access to external advice if required.

Structure

Executives are given the opportunity to receive their fixed (primary) remuneration in a variety of forms including cash and superannuation. It is intended that the manner of payment chosen will be optimal for the recipient without creating undue costs for the Company. The fixed remuneration component of executives is detailed in Table 1.

Employment contracts

Managing Director and Chief Executive Officer

Mr G Guglielmo was appointed Managing Director and Chief Executive Officer ("CEO") on 1 February 2017.

The Managing Director and CEO is employed under a rolling contract and under the terms of the contract, Mr Guglielmo receives fixed remuneration of AUD\$300,000 per annum. If there is cause for termination, the Company can terminate the contract immediately without compensation, other than any employee entitlements up to the date of termination. Otherwise, the contract may be terminated at any time by either side giving six months' notice in writing or by the Company paying six months' salary in lieu of notice, unless mutually agreed.

Staff Geologist New Ventures

Dr S Brealey was appointed Staff Geologist New Ventures on 16 May 2018.

The Staff Geologist New Ventures was employed under a maximum term contract of 24 months and under the terms of the contract, Dr Brealey received fixed remuneration of AUD\$225,000 per annum. The contract concluded on 16 May 2020. Dr Brealey was not considered a KMP from 1 January 2020.

DIRECTOR'S REPORT (cont'd)

REMUNERATION REPORT (AUDITED) (31 December 2020) (cont'd)

Consultancy Services Agreements

The Group has entered into consultancy agreements with Robyn Hamilton.

Details of the agreements entered into by the Group and outstanding as at 31 December 2020 are set out below:

	Type	Details	Term
Robyn Hamilton	Consultancy	Minimum of 1 day per week at an agreed hourly rate, from 6 October 2014	The agreement is on a going forward basis with the Company being able to terminate the agreement, at no less than one month's notice.

Company performance

The remuneration of Bass executives and contractors is not formally linked to financial performance measures of the Company. In accordance the Section 300A of the Corporations Act 2001 the following table summarises Bass' performance over a four and half year period:

Measure	Dec 2020	Dec 2019	Dec 2018	Dec 2017 (6 months)	June 2017
Net profit/(loss) \$	(499,826)	398,418	(419,615)	(98,149)	(1,357,287)
Basic profit/(loss) per share ¢ per share *	0.000	0.000	(0.000)	(0.000)	(0.001)
Share price at the beginning of the year * \$	0.003	0.003	0.003	0.001	0.001
Share price at the end of the year * \$	0.002	0.003	0.003	0.003	0.001
Dividends per share ¢	Nil	Nil	Nil	Nil	Nil

* Prices have been rounded to three decimal points

Other transactions and balances with key management personnel and their related parties

In accordance with AASB 124: "Related Party Disclosures", key management personnel (KMP) have authority and responsibility for planning, directing and controlling the activities of the Bass Oil Limited. Hence, KMP are deemed to include the following:

- the non-executive Directors of Bass Oil Limited; and
- certain executives in the Managing Director's senior leadership team.

During the year the Group paid corporate advisory and investor relations fees to Adelaide Equity Partners Limited (a director related entity of Mr M Lindh) of \$6,624 (31 December 2019: \$24,015) and capital raising success fees to Adelaide Equity Partners Limited of \$nil (31 December 2019: \$47,304) (both under a corporate advisory and investor relations mandate). The fees were provided under normal commercial terms and conditions. Amounts outstanding at balance date were \$nil (31 December 2019: \$11,365). The Group had a corporate advisory & investor relations mandate with Adelaide Equity Partners. The mandate had a monthly retainer of A\$5,000 per month and was terminated on 20 April 2020.

During the year the Group paid rent to Adelaide Equity Partners Limited of \$2,430 (31 December 2019: \$7,377) (under a rental of premises mandate). The rental was provided under normal commercial terms and conditions. Amounts outstanding at balance date were \$nil (31 December 2019: \$nil). The rental arrangement ceased on 30 April 2020.

End of the REMUNERATION REPORT (AUDITED) (31 December 2020)

DIRECTORS' REPORT (cont'd)

HEALTH, SAFETY AND ENVIRONMENT

The Company has adopted an Environment Policy and a Safety Policy and conducts its operations in accordance with the Indonesian government regulations.

The Company's petroleum exploration and development activities are subject to environmental conditions specified by the Indonesian regulatory authorities. During the period there were no known contraventions by the Company of any relevant environmental regulations.

The Company considers all injuries are avoidable and has policies and procedures to ensure employees and contractors manage safety accordingly. There is a continuous process of monitoring and evaluating our procedures. During the year there were no recorded health and safety incidents.

CORPORATE GOVERNANCE

The Company's Corporate Governance Statement for the year ended 31 December 2020 may be accessed from the Company's website at www.bassoil.com.au.

AUDITOR INDEPENDENCE AND NON-AUDIT SERVICES

A copy of the auditor's independence declaration as required under section 307C of the Corporations Act 2001 in relation to the audit for the year ended 31 December 2020 is included on page 25.

Non-audit services

The Directors are satisfied that the provision of non-audit services, during the period, by the auditor (or by another person or firm on the auditor's behalf) is compatible with the general standard of independence for auditors imposed by the Corporations Act 2001. The Audit and Risk Committee, in conjunction with the Chief Financial Officer, assesses the provision of non-audit services by the auditors to ensure that the auditor independence requirements of the Corporation Act 2001 in relation to the audit are met.

Details of amounts paid or payable to the auditor for non-audit services provided during the period by the auditor are outlined in note 9 to the financial statements.

The directors are of the opinion that the services as disclosed in note 9 to the financial statements do not compromise the external auditor's independence, based on advice received from the Audit and Risk Committee, for the following reasons:

- All non-audit services have been reviewed and approved to ensure that they do not impact the integrity and objectivity of the auditor, and
- none of the services undermine the general principles relating to auditor independence as set out in Code of Conduct APES 110 Code of Ethics for Professional Accountants issued by the Accounting Professional & Ethical Standards Board, including reviewing or auditing the auditor's own work, acting in a management or decision-making capacity for the company, acting as advocate for the company or jointly sharing economic risks and rewards.

Signed in accordance with a resolution of the Directors

Chairman
Melbourne, 31 March 2021

Auditor's Independence Declaration

To the Directors of Bass Oil Limited

In accordance with the requirements of section 307C of the *Corporations Act 2001*, as lead auditor for the audit of Bass Oil Limited for the year ended 31 December 2020, I declare that, to the best of my knowledge and belief, there have been:

- a no contraventions of the auditor independence requirements of the Corporations Act 2001 in relation to the audit; and
- b no contraventions of any applicable code of professional conduct in relation to the audit.

Melbourne, 31 March 2021

DIRECTORS' DECLARATION

In accordance with a resolution of the directors of Bass Oil Limited, I state that:

In the opinion of the directors:

- (a) the financial statements and notes of the consolidated entity, are in accordance with the Corporations Act 2001, including:
 - (i) giving a true and fair view of the consolidated entity's financial position as at 31 December 2020 and its performance for the year ended on that date; and
 - (ii) complying with Accounting Standards and Corporations Regulations 2001; and
- (b) there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable; and
- (c) the financial statements and notes comply with International Financial Reporting Standards as stated in Note 2(a).

This declaration has been made after receiving the declarations required to be made to the directors in accordance with section 295A of the Corporations Act 2001 for the financial year ended 31 December 2020.

On behalf of the Board

Chairman
Melbourne, 31 March 2021

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 December 2020

Note 1. Corporate Information

The consolidated financial statements of Bass Oil Limited ("Parent Entity" or "Company") and its controlled entities (collectively as "Consolidated Entity" or "the Group") for the year ended 31 December 2020 was authorised for issue in accordance with a resolution of the directors on 31 March 2021.

Bass Oil Limited is a company limited by shares incorporated in Australia whose shares are publicly traded on the Australian Stock Exchange.

The nature of the operations and principal activities of the Group are oil production.

Note 2. Summary of Significant Accounting Policies

Basis of Preparation

The financial report has been prepared on the basis of historical cost, except for the revaluation of certain non-current assets and financial instruments. Cost is based on the fair values of the consideration given in exchange for assets. All amounts are presented in United States dollars, unless otherwise noted.

In the application of the Group's accounting policies, which are described below, management is required to make judgements, estimates and assumptions about carrying values of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements. Actual results may differ from these estimates.

Going Concern

The consolidated financial statements have been prepared on the going concern basis, which assumes that the Group will be able to realise its assets and extinguish its liabilities in the normal course of business and at amounts stated in the financial report.

For the year ended 31 December 2020 the Group incurred a loss after tax of \$499,826 (31 December 2019: made a profit after tax of \$398,418), had a net cash outflow from operating activities of \$93,038 (31 December 2019: inflows of \$778,061) had a net cash outflow from investing activities of \$360,308 (31 December 2019: \$940,023) and a net cash outflow from financing activities of \$91,883 (31 December 2019: \$50,729).

At 31 December 2020, the Group has a cash balance of \$95,642 (31 December 2019: \$640,871) and the current liabilities exceed current assets by \$305,721 (31 December 2019: current assets exceed current liabilities by \$114,725). While current liabilities exceed current assets, \$803,259 of current liabilities is not expected to be payable in the near future.

Further, the cash balance of \$95,642 at 31 December 2020, was lower than expected as three months of revenue was outstanding at balance date. Since balance date these invoices have all been received and the usual payment cycle has resumed.

The Directors have prepared a cash flow forecast through to March 2022 which indicates that the Group needs to invest in further drilling if production levels are to be maintained. The current cash resources will not be sufficient to fund planned drilling commitments, business development opportunities and working capital requirements without the raising of additional funds, and unless additional funding is obtained, cash resources will be exhausted later in the year.

The Group will be required to secure additional funding (which may include debt, a pro-rata issue to shareholders and/or a placement of shares) if the Group is to proceed with the planned drilling programme and business development opportunities through to 31 March 2022.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 December 2020

Note 2. Summary of Significant Accounting Policies (cont'd)

Based on the Group's cash flow forecast and achieving the funding referred to above, the Directors believe that the Group will be able to continue as a going concern.

Should the Group be unsuccessful in achieving the initiatives set out above, a material uncertainty would exist that may cast significant doubt on the ability of the Group to continue as a going concern and, therefore, whether it will realise its assets and extinguish its liabilities in the normal course of business.

The financial report does not include any adjustments relating to the recoverability and classification of recorded asset amounts and the amount and classification of liabilities that might be necessary should the Group not continue as a going concern.

For personal use only

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 December 2020

Note 2. Summary of Significant Accounting Policies (cont'd)

(a) Statement of Compliance

These financial statements are general purpose financial statements which have been prepared in accordance with the Corporations Act 2001, Accounting Standards and Interpretations, and comply with other requirements of the law. The financial statements comprise the consolidated statements of the Group. For the purpose of preparing the consolidated financial statements, the Company is a for-profit entity.

Compliance with Australian Accounting Standards ensures that the financial statements and notes of the Company and the Group comply with International Financial Reporting Standards.

(b) New Accounting Standards and Interpretations

The Group has adopted all of the new and revised Standards and Interpretations issued by the Australian Accounting Standards Board (the AASB) that are relevant to its operations and effective for an accounting period that begins on or after 1 January 2020.

Any new or amended Accounting Standards or Interpretations that are not yet mandatory have not been early adopted.

The following Accounting Standards and Interpretations are most relevant to the consolidated entity:

Conceptual Framework for Financial Reporting (Conceptual Framework)

The consolidated entity has adopted the revised Conceptual Framework from 1 January 2020. The Conceptual Framework contains new definition and recognition criteria as well as new guidance on measurement that affects several Accounting Standards, but it has not had a material impact on the consolidated entity's financial statements.

(c) Basis of consolidation

The consolidated financial statements comprise the financial statements of Bass Oil Limited and its subsidiaries as at 31 December each year (the Group).

Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Specifically, the Group controls an investee if and only if the Group has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- Exposure, or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns.

The financial statements of subsidiaries are prepared for the same reporting period as the parent company, using consistent accounting policies. In preparing the consolidated financial statements, all intercompany balances and transactions, income and expenses and profit and losses resulting from intra-group transactions have been eliminated in full.

Subsidiaries are fully consolidated from the date on which control is transferred to the Group and cease to be consolidated from the date on which control is transferred out of the Group.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 December 2020

Note 2. Summary of Significant Accounting Policies (cont'd)

(d) Foreign currency translation

Transactions and balances

Transactions in currencies other than an entity's functional currency are initially recorded in the functional currency by applying the exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in currencies other than an entity's functional currency are retranslated at the foreign exchange rate ruling at the reporting date. Foreign exchange differences arising on translation are recognised in the income statement.

Foreign exchange differences that arise on the translation of monetary items that form part of the net investment in a foreign operation are recognised in the translation reserve in the consolidated financial statements.

Non-monetary assets and liabilities that are measured in terms of historical cost in currencies other than an entity's functional currency are translated using the exchange rate at the date of the initial transaction. Non-monetary assets and liabilities denominated in currencies other than an entity's functional currency that are stated at fair value are translated to the functional currency at foreign exchange rates ruling at the dates the fair value was determined.

The year-end exchange rate used for 31 December 2020 was AUD/USD 1:0.7006 (31 December 2019: 1:0.7058).

(e) Cash and cash equivalents

Cash and cash equivalents in the statement of financial position comprise cash at bank and short term deposits with an original maturity of three months or less that are readily convertible to known cash amounts of cash which are subject to an insignificant risk of changes in value.

For the purposes of the statement of cash flows, cash and cash equivalents consist of cash and cash equivalents as defined above.

(f) Financial assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognised financial assets are measured subsequently in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

Classification of financial assets

Debt instruments that meet the following conditions are measured subsequently at amortised cost:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Debt instruments that meet the following conditions are measured subsequently at fair value through other comprehensive income (FVTOCI):

- the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling the financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 December 2020

Note 2. Summary of Significant Accounting Policies (cont'd)

(f) Financial assets (cont'd)

By default, all other financial assets are measured subsequently at fair value through profit or loss (FVTPL).

Despite the foregoing, the Group may make the following irrevocable election/designation at initial recognition of a financial asset:

- the Group may irrevocably elect to present subsequent changes in fair value of an equity investment in other comprehensive income if certain criteria are met; and
- the Group may irrevocably designate a debt investment that meets the amortised cost or FVTOCI criteria as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch.

(i) Amortised cost and effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period.

For financial assets other than purchased or originated credit-impaired financial assets (i.e. assets that are credit-impaired on initial recognition), the effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) excluding expected credit losses, through the expected life of the debt instrument, or, where appropriate, a shorter period, to the gross carrying amount of the debt instrument on initial recognition. For purchased or originated credit-impaired financial assets, a credit-adjusted effective interest rate is calculated by discounting the estimated future cash flows, including expected credit losses, to the amortised cost of the debt instrument on initial recognition.

The amortised cost of a financial asset is the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, adjusted for any loss allowance.

The gross carrying amount of a financial asset is the amortised cost of a financial asset before adjusting for any loss allowance.

Interest income is recognised using the effective interest method for debt instruments measured subsequently at amortised cost and at FVTOCI. For financial assets other than purchased or originated credit-impaired financial assets, interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired (see below). For financial assets that have subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the amortised cost of the financial asset. If, in subsequent reporting periods, the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset.

For purchased or originated credit-impaired financial assets, the Group recognises interest income by applying the credit-adjusted effective interest rate to the amortised cost of the financial asset from initial recognition. The calculation does not revert to the gross basis even if the credit risk of the financial asset subsequently improves so that the financial asset is no longer credit-impaired.

Interest income is recognised in profit or loss and is included in the "other income – interest received" line item.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 December 2020

Note 2. Summary of Significant Accounting Policies (cont'd)

(f) Financial assets (cont'd)

Impairment of financial assets

The Group recognises a loss allowance for expected credit losses "ECL" on investments in debt instruments that are measured at amortised cost or at FVTOCI, lease receivables, trade receivables and contract assets, as well as on financial guarantee contracts. The amount of expected credit losses is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective financial instrument. The Group always recognises lifetime ECL for trade receivables, contract assets and lease receivables. The expected credit losses on these financial assets are estimated using a provision matrix based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate.

For all other financial instruments, the Group recognises lifetime ECL when there has been a significant increase in credit risk since initial recognition. However, if the credit risk on the financial instrument has not increased significantly since initial recognition, the Group measures the loss allowance for that financial instrument at an amount equal to 12-month ECL.

Lifetime ECL represents the expected credit losses that will result from all possible default events over the expected life of a financial instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

(g) Inventories

Inventories are stated at the lower of cost and net realisable value. Costs of inventories are determined on a first-in-first-out basis. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

(h) Joint arrangements

A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement.

The consolidated entity has recognised its share of jointly held assets, liabilities, revenues and expenses of joint operations. These have been incorporated in the financial statements under the appropriate classifications.

(i) Plant and equipment

Plant and equipment is stated at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is calculated on a straight-line basis over the estimated useful life of the assets as follows:

- Office furniture and equipment – over 3 to 10 years

The assets' residual values, useful lives and amortisation methods are reviewed and adjusted, if appropriate, at each financial year end. Gains or losses on disposals are determined by comparing proceeds with the carrying amount and are included in profit or loss.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 December 2020

Note 2. Summary of Significant Accounting Policies (cont'd)

(j) Leases

The Group as lessee

The Group assesses whether a contract is or contains a lease, at inception of the contract. The Group recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets (such as tablets and personal computers, small items of office furniture and telephones). For these leases, the Group recognises the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the Group uses its incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise:

- Fixed lease payments (including in-substance fixed payments), less any lease incentives receivable;
- Variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- The amount expected to be payable by the lessee under residual value guarantees;
- The exercise price of purchase options, if the lessee is reasonably certain to exercise the options; and
- Payments of penalties for terminating the lease, if the lease term reflects the exercise of an option to terminate the lease.

The lease liability is presented as a separate line in the consolidated statement of financial position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made.

The Group remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) whenever:

- The lease term has changed or there is a significant event or change in circumstances resulting in a change in the assessment of exercise of a purchase option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate.
- The lease payments change due to changes in an index or rate or a change in expected payment under a guaranteed residual value, in which cases the lease liability is remeasured by discounting the revised lease payments using an unchanged discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used).
- A lease contract is modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured based on the lease term of the modified lease by discounting the revised lease payments using a revised discount rate at the effective date of the modification.

The Group did not make any such adjustments during the periods presented.

The right-of-use assets comprise the initial measurement of the corresponding lease liability, lease payments made at or before the commencement day, less any lease incentives received and any initial direct costs. They are subsequently measured at cost less accumulated depreciation and impairment losses.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 December 2020

Note 2. Summary of Significant Accounting Policies (cont'd)

(j) Leases (cont'd)

Whenever the Group incurs an obligation for costs to dismantle and remove a leased asset, restore the site on which it is located or restore the underlying asset to the condition required by the terms and conditions of the lease, a provision is recognised and measured under AASB 137. To the extent that the costs relate to a right-of-use asset, the costs are included in the related right-of-use asset, unless those costs are incurred to produce inventories.

Right-of-use assets are depreciated over the shorter period of lease term and useful life of the underlying asset.

If a lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the Group expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset. The depreciation starts at the commencement date of the lease.

The right-of-use assets are presented as a separate line in the consolidated statement of financial position.

The Group applies AASB 136 to determine whether a right-of-use asset is impaired and accounts for any identified impairment loss as described in Note 2(k) below.

(k) Impairment of non-financial assets other than indefinite life intangibles

Non-financial assets other than indefinite life intangibles are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

The Group conducts an annual internal review of asset values, which is used as a source of information to assess any indicators for impairment. If any impairment exists, an estimate of the asset's recoverable amount is calculated.

An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. Recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. Non-financial assets that suffered an impairment are tested for possible reversal of the impairment whenever events or changes in circumstances indicate that the impairment may have reversed.

(l) Oil properties

Oil properties are carried at cost including construction, installation of infrastructure such as roads and the cost of development of wells.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it's probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the profit or loss during the financial period in which they are incurred.

Oil properties are amortised on the Units of Production basis using the latest approved estimate of Proven (1P) Reserves. Amortisation is charged only once production has commenced. No amortisation is charged on areas under development where production has not yet commenced.

(m) Provision for restoration

The Group records the present value of its share of the estimated cost to restore operating locations. The provision is based on the net present value of the current agreed monthly payment to Pertamina to cover the anticipated obligations relating to the reclamation, waste site closure, plant closure, production facility removal and other costs associated with the restoration of the site. Pertamina is responsible for all restoration.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 December 2020

Note 2. Summary of Significant Accounting Policies (cont'd)

(m) Provision for restoration (cont'd)

When the liability is recorded the carrying amount of the production asset is increased by the restoration costs which are depreciated over the producing life of the asset. Over time, the liability is increased for the change in the present value based on a risk free discount rate and monthly payment to Pertamina. The unwinding of the discount is recorded as an accretion charge within finance costs.

Any changes in the estimate of the provision for restoration arising from changes in the amount required to be paid to Pertamina or changes in the discount rate of the restoration provision are recorded by adjusting the provision and the carrying amount of the production or exploration asset and then depreciated over the producing life of the asset. Any change in the discount rate is applied prospectively.

(n) Trade and other payables

Trade payables and other payables are carried at amortised cost due to their short term nature they are not discounted. They represent liabilities for goods and services provided to the Group prior to the end of the financial year that are unpaid and arise when the Group becomes obliged to make future payments in respect of the purchase of these goods and services.

(o) Contributed equity

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

(p) Revenue recognition

Revenue is recognised in profit or loss when the significant risks and rewards of ownership have been transferred to the buyer. Revenue is recognised and measured at the fair value of the consideration or contributions received, net of goods and service tax ("GST"), to the extent it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured.

Revenue is recognised at an amount that reflects the consideration to which the consolidated entity is expected to be entitled in exchange for transferring goods or services to a customer. For each contract with a customer, the consolidated entity: identifies the contract with a customer; identifies the performance obligations in the contract; determines the transaction price which takes into account estimates of variable consideration and the time value of money; allocates the transaction price to the separate performance obligations on the basis of the relative stand-alone selling price of each distinct good or service to be delivered; and recognises revenue when or as each performance obligation is satisfied in a manner that depicts the transfer to the customer of the goods or services promised.

Variable consideration within the transaction price, if any, reflects concessions provided to the customer such as discounts, rebates and refunds, any potential bonuses receivable from the customer and any other contingent events. Such estimates are determined using either the 'expected value' or 'most likely amount' method. The measurement of variable consideration is subject to a constraining principle whereby revenue will only be recognised to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur. The measurement constraint continues until the uncertainty associated with the variable consideration is subsequently resolved. Amounts received that are subject to the constraining principle are recognised as a refund liability.

Sales revenue

Sales revenue is recognised on the basis of the Group's interest in a producing field ("entitlements" method), when the physical product and associated risks and rewards of ownership pass to the purchaser, which is at the time the oil is received at the Pertamina terminal. Revenue earned under a production sharing contract ("KSO") is recognised on a net entitlements basis according to the terms of the KSO.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 December 2020

Note 2. Summary of Significant Accounting Policies (cont'd)

(p) Revenue recognition (cont'd)

Other income

Other income is recognised in profit or loss at the fair value of the consideration received or receivable, net of GST, when the significant risks and rewards of ownership have been transferred to the buyer or when the service has been performed.

Interest income

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Group and the amount of revenue can be measured reliably. Interest income is accrued on a time basis, by reference to the principle outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

(q) Employee benefits

A liability is recognised for benefits accruing to employees in respect of wages and salaries, annual leave and sick leave in the period the related service is rendered.

Liabilities recognised in respect of short term employee benefits, are measured at their nominal values using the remuneration rate expected at the time of settlement.

(r) Income tax and other taxes

Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the reporting date.

Deferred income tax is provided on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. Deferred income tax liabilities are recognised for all taxable temporary differences except:

- when the deferred income tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and that, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; or
- when the taxable temporary difference is associated with investments in subsidiaries, associates or interests in joint ventures, and the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax assets are recognised for all deductible temporary differences, carry-forward of unused tax assets and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry-forward of unused tax credits and unused tax losses can be utilised, except:

- when the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; or
- when the deductible temporary difference is associated with investments in subsidiaries, associates or interests in joint ventures, in which case a deferred tax asset is only recognised to the extent that it is probable that the temporary difference will reverse in the foreseeable future and taxable profit will be available against which the temporary difference can be utilised. The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 December 2020

Note 2. Summary of Significant Accounting Policies (cont'd)

(r) Income tax and other taxes (cont'd)

Unrecognised deferred income tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax assets and deferred tax liabilities are offset only if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and liabilities relate to the same taxable entity and the same taxation authority.

Indonesian First Tranche Petroleum

A provision for deferred income tax payable related to tax potentially payable by the Group on its share of First Tranche Petroleum which has already been recovered from Tangai-Sukananti KSO production. This tax is payable in the event the contractors exhaust the pool of cost recovery prior to expiry of the KSO. The cost recovery pool has been exhausted during the year and tax is now payable.

Other taxes

Revenues, expenses and assets are recognised net of the amount of GST or VAT except:

- when the GST or VAT incurred on a purchase of goods and services is not recoverable from the taxation authority, in which case the GST or VAT is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- receivables and payables, which are stated with the amount of GST or VAT included.

The net amount of GST or VAT recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statement of financial position.

Commitments and contingencies are disclosed net of the amount of GST or VAT recoverable from, or payable to, the taxation authority.

(s) Earnings per share

Basic earnings per share is calculated as net profit/(loss) attributable to members of the parent, adjusted to exclude any costs of servicing equity (other than dividends), divided by the weighted average number of ordinary shares, adjusted for any bonus element.

(t) Critical accounting estimates and judgements

The preparation of a financial report in conformity with Australian Accounting Standards requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

These accounting policies have been consistently applied by each entity in the consolidated entity, and the estimates and underlying assumptions are reviewed on an ongoing basis.

The judgements, estimates and assumptions that have a significant risk of causing a material adjustment to the carrying values of assets and liabilities within the next financial year are discussed below.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 December 2020

Note 2. Summary of Significant Accounting Policies (cont'd)

(t) Critical accounting estimates and judgements (cont'd)

(i) Impairment of Oil Property Assets

Oil properties impairment testing requires an estimation of the value in use of the cash generating unit to which deferred costs have been allocated. The value in use calculation requires the entity to estimate the future cash flows expected to arise from the cash generating unit and a suitable discount rate in order to calculate present value. Other assumptions used in the calculations which could have an impact on future years includes available reserves and oil prices.

(ii) Useful Life of Oil Property Assets

As detailed at Note 2 (l) in the Annual Report, oil properties are amortised on the Units of Production basis using the latest approved estimate of Proven (1P) Reserves. Amortisation is charged only once production has commenced. No amortisation is charged on areas under development where production has not yet commenced. Estimates of reserve quantities are a critical estimate impacting amortisation of oil property assets.

(iii) Estimates of Reserve Quantities

The estimated quantities of Proven and Probable hydrocarbon reserves reported by the Company are integral to the calculation of the amortisation expense relating to oil properties, and to the assessment of possible impairment of these assets. Estimated reserve quantities are based upon interpretations of geological and geophysical models and assessments of the technical feasibility and commercial viability of producing the reserves. These assessments require assumptions to be made regarding future development and production costs, commodity prices, exchange rates and fiscal regimes. The estimates of reserves may change from period to period as the economic assumptions used to estimate the reserves can change from period to period, and as additional geological data is generated during the course of operations. Reserves estimates are prepared in accordance with the Company's policies and procedures for reserves estimation which conform to guidelines prepared by the Society of Petroleum Engineers.

(iv) Coronavirus (COVID-19) pandemic

Judgment has been exercised in considering the impacts that the Coronavirus (COVID-19) pandemic has had, or may have, on the consolidated entity based on known information. This consideration extends to the nature of the products and services offered, customers, supply chain, staffing and geographic regions in which the consolidated entity operates. Other than as addressed in specific notes, there does not currently appear to be either any significant impact upon the financial statements or any significant uncertainties with respect to events or conditions which may impact the consolidated entity unfavourably as at the reporting date or subsequently as a result of the Coronavirus (COVID-19) pandemic.

(v) Income tax

The consolidated entity is subject to income taxes in the jurisdictions in which it operates. Significant judgement is required in determining the provision for income tax. There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. The consolidated entity recognises liabilities for anticipated tax audit issues based on the consolidated entity's current understanding of the tax law. Where the final tax outcome of these matters is different from the carrying amounts, such differences will impact the current and deferred tax provisions in the period in which such determination is made.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 December 2020

Note 2. Summary of Significant Accounting Policies (cont'd)

(t) Critical accounting estimates and judgements (cont'd)

(vi) Lease term

The lease term is a significant component in the measurement of both the right-of-use asset and lease liability. Judgement is exercised in determining whether there is reasonable certainty that an option to extend the lease or purchase the underlying asset will be exercised, or an option to terminate the lease will not be exercised, when ascertaining the periods to be included in the lease term. In determining the lease term, all facts and circumstances that create an economical incentive to exercise an extension option, or not to exercise a termination option, are considered at the lease commencement date. Factors considered may include the importance of the asset to the consolidated entity's operations; comparison of terms and conditions to prevailing market rates; incurrence of significant penalties; existence of significant leasehold improvements; and the costs and disruption to replace the asset. The consolidated entity reassesses whether it is reasonably certain to exercise an extension option, or not exercise a termination option, if there is a significant event or significant change in circumstances.

(vii) Incremental borrowing rate

Where the interest rate implicit in a lease cannot be readily determined, an incremental borrowing rate is estimated to discount future lease payments to measure the present value of the lease liability at the lease commencement date. Such a rate is based on what the consolidated entity estimates it would have to pay a third party to borrow the funds necessary to obtain an asset of a similar value to the right-of-use asset, with similar terms, security and economic environment.

(viii) Lease make good provision

A provision has been made for the present value of anticipated costs for future restoration of leased premises. The provision includes future cost estimates associated with closure of the premises. The calculation of this provision requires assumptions such as application of closure dates and cost estimates. The provision recognised for each site is periodically reviewed and updated based on the facts and circumstances available at the time. Changes to the estimated future costs for sites are recognised in the statement of financial position by adjusting the asset and the provision. Reductions in the provision that exceed the carrying amount of the asset will be recognised in profit or loss.

(ix) Restoration provision

A provision has been made for the present value of anticipated costs for future rehabilitation of land explored or mined. The consolidated entity's mining and exploration activities are subject to various laws and regulations governing the protection of the environment. The consolidated entity recognises management's best estimate for assets retirement obligations and site rehabilitations in the period in which they are incurred. Actual costs incurred in the future periods could differ materially from the estimates. Additionally, future changes to environmental laws and regulations, life of mine estimates and discount rates could affect the carrying amount of this provision.

(x) Provision for impairment of inventories

The provision for impairment of inventories assessment requires a degree of estimation and judgement. Net realisable value tests are performed at least annually and represent the estimated selling price, less estimated costs of completion and sale.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 December 2020

Note 3. Financial Risk Management Objectives and Policies

The Group's principal financial instruments comprise receivables, payables, cash, deposits and borrowings.

The Group manages its exposure to key financial risks, including oil price, interest rate and currency risk in accordance with the Group's financial risk management policy. The objective of the policy is to support the delivery of the Group's financial targets whilst protecting future financial security.

The main risks arising from the Group's financial instruments are interest rate risk, foreign currency risk, commodity price risk, credit risk and liquidity risk. The Group uses different methods to measure and manage different types of risk to which it is exposed. These include monitoring levels of exposure to interest rate and foreign exchange risk and assessments of market forecasts for interest rates, foreign exchange and commodity prices. The risks are summarised below.

Primarily responsibility for identification and control of financial risks rests with the Managing Director under the authority of the Board. The Board reviews and agrees management's assessment for managing each of the risks identified below.

The carrying amounts and net fair values of the Group's financial assets and liabilities at 31 December 2020 are cash and cash equivalents \$95,642, trade and other receivables \$1,571,334, other financial assets \$31,705, trade and other payables \$1,007,065.

Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: foreign currency risk, commodity price risk and interest rate risk. Financial instruments affected by market risk include deposits, trade and other receivables, trade and other payables, and borrowings.

The sensitivity analyses in the following sections relate to the position as at 31 December 2020.

The sensitivity analyses have been prepared on the basis that the amount of the financial instruments in foreign currencies is all constant. The sensitivity analyses are intended to illustrate the sensitivity changes in market variables on the Group's financial instruments and show the impact on profit and loss and shareholders' equity, where applicable.

Foreign currency risk

The Group has transactional currency exposure arising from corporate costs which are denominated in Australian dollars (AUD), and oil sales costs which are denominated in Indonesian Rupiah (IDR) and United States dollars. The Group does not undertake any hedging activities.

The Group owns oil production assets in Indonesia and is exposed to foreign currency risk arising from various currency exposures, to the United States dollar.

The Board approved the policy of holding certain funds in United States dollars to manage foreign exchange risk. The Group's exposure to foreign exchange risk at the reporting date was as follows:

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 December 2020

Note 3. Financial Risk Management Objectives and Policies (cont'd)

Foreign currency risk (cont'd)

	31 December 2020	
	AUD \$	IDR \$
Financial assets:		
Cash and cash equivalents	8,449	30,935
Trade and other receivables	454	521,117
Financial liabilities:		
Trade and other payables	60,898	633,387

At the reporting date, if the currencies set out in the table above, strengthened or weakened against the United States dollar by the percentage shown, with all other variables held constant, net profit for the year would increase/(decrease) and net assets would increase/(decrease) by:

	31 December 2020	
	AUD \$	IDR \$
Impact on post tax profit		
Exchange rate +10%	(5,199)	(8,133)
Exchange rate -10%	5,199	8,133
Impact on equity		
Exchange rate +10%	(5,199)	(8,133)
Exchange rate -10%	5,199	8,133

Management believes the risk exposures as at the reporting date are representative of the risk exposure inherent in the financial instruments. A movement of +/- 10% is selected because a review of recent exchange rate movements and economic data suggests this range is reasonable.

Commodity Price Risk

The Group is exposed to commodity price fluctuations through the sale of petroleum products denominated in US dollars. The Group may enter into commodity crude oil price swap and option contracts to manage its commodity price risk.

If the US dollar oil price changed by +/-10% from the average oil price during the period, with all other variables held constant, the estimated impact on post-tax profit and equity would have been:

	31 December 2020 \$
Impact on post tax profit	
USD oil price +10%	315,040
USD oil price -10%	(315,040)
Impact on equity	
USD oil price +10%	315,040
USD oil price -10%	(315,040)

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 December 2020

Note 3. Financial Risk Management Objectives and Policies (cont'd)

Interest rate risk

The Group's exposure to market interest rates is related primarily to the Group's cash and cash equivalents.

The Group constantly analyses its interest rate opportunity and exposure. Within analysis consideration is given to existing positions and alternative arrangement on fixed or variable deposits.

The following sensitivity analysis is based on the interest rate opportunity/risk in existence at reporting date.

At reporting date, if interest rates changed by +/- 1%, with all other variables held constant, the estimated impact on post-tax profit and equity would have been:

	31 December 2020
	\$
Impact on post tax profit	
Interest rates +1%	956
Interest rates - 1%	(956)
Impact on equity	
Interest rates +1%	956
Interest rates -1%	(956)

A movement of + and -1% is selected because this is historically within the range of rate movements and available economic data suggests this range is reasonable.

Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

Ultimate responsibility for liquidity risk management rests with the Board of Directors, which has built an appropriate liquidity risk framework for the management of the Group's short, medium and longer term funding and liquidity management requirements. The Group manages liquidity risk by maintaining adequate banking facilities through monitoring of future rolling cash flow forecasts of its operations, which reflect management's expectations of the settlement of financial assets and liabilities.

The financial liabilities are trade and other payables, and borrowings. At 31 December 2020, the Group had \$1,007,065 (2019: \$1,296,255) in trade and other payables. Trade payables are non-interest bearing and have a contractual maturity of less than 30 days.

The only financial assets are cash and cash equivalents, trade and other receivables, and other financial assets. At 31 December 2020, the Group had \$95,642 (2019: \$640,871) in cash and cash equivalents, \$1,571,334 (2019: \$1,746,569) in trade and other receivables, and \$31,705 (2019: \$31,322) in other financial assets.

The following table details the Group's remaining contractual maturity for its non-derivative financial liabilities. The table has been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay. The table includes both interest and principal cash flows.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 December 2020

Note 3. Financial Risk Management Objectives and Policies (cont'd)

Liquidity risk (cont'd)

	Weighted average effective interest rate	Less than one year	One to two years	Greater than two years	Total
	%	\$	\$	\$	\$
31 December 2020					
Trade and other payables	-	1,007,065	-	-	1,007,065
31 December 2019					
Trade and other payables	-	1,296,255	-	-	1,296,255

Credit risk

Credit risk arises from financial assets of the Group, which comprise cash and cash equivalents, trade and other receivables, and other financial assets.

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group. The Group have adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral or other security, where appropriate, as a means of mitigating the risk of financial loss from defaults.

The carrying amount of financial assets recorded in the financial statements, net of any provisions for losses, represents the Group's maximum exposure to credit risk without taking account of any collateral or other security obtained.

In addition, receivable balances are monitored on an ongoing basis with the result being that the Group's exposure to bad debts is not significant. Currently there are no receivables that are impaired or past due but not impaired.

Apart from Pertamina, the Indonesian State owned oil Company, the largest customer of the Group, the Group does not have significant credit risk exposure to any other counterparty.

The credit risk on liquid funds is banks with high ratings assigned by international credit rating agencies.

Fair value of financial instruments

The Directors consider that the carrying amount of the financial assets and liabilities recorded in the financial statements approximate their fair values unless otherwise stated.

Capital management

Capital is defined as equity. When managing capital, management's objective is to ensure the entity continues as a going concern as well as to maintain optimal returns to shareholders.

The Group will seek to raise further capital, if required, to fund its future strategy for the development of the Tangai-Sukananti field.

The Group is not subject to any externally imposed capital requirements.

Trade and other payables		7,596	7,717
Provisions		1,507	1,792
Share issue costs		14,707	22,982
		21,756	23,220
Net deferred tax assets not recognised		(21,756)	(23,220)
Net deferred tax assets and (liabilities)		-	-
(c) Unrecognised deferred tax assets			
Deferred tax assets have not been recognised in respect of the following items:			
Temporary differences		21,756	23,220
Revenue tax losses		5,287,927	5,193,647
Capital tax losses		178,840	162,679
		5,488,523	5,379,546

For personal use only

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 December 2020

Note 10. Income Tax (cont'd)

Deferred tax assets have not been recognised in respect to these items as it is not probably at this time that future taxable profits will be available against which the group can utilise the benefit.

	Note	Consolidated	
		2020 \$	2019 \$
(d) Movement in recognised net deferred tax assets			
Opening balance		-	-
Recognised in equity		(8,276)	(11,100)
Recognised in income		8,276	11,100
Closing balance		-	-
(e) Movement in provision for tax			
Opening balance		715,359	870,624
Current tax expense		122,880	331,247
Less payments		(249,216)	(486,512)
Closing balance		589,023	715,359

The provision for tax relates to income tax payable in Indonesia. The tax only becomes payable when there are no cost recoveries available to be carried forward at the end of the tax year in Indonesia (31 December). There were no cost recoveries available to be carried forward at 31 December 2020, meaning that the tax was payable on 30 April 2021. The Group has entered into discussions with the Indonesian tax office regarding a payment plan for the tax provision of \$589,023.

The provision for tax covers the tax years from 2010 to 2020.

Effect of shares issued October 2020		-	87,410,959
Weighted average number of ordinary shares at 31 December		<u>3,342,140,096</u>	<u>2,832,029,899</u>

There is no dilution effect on diluted EPS as the company was operating at a net loss for the year.

Note 26. Key Management Personnel Disclosures

The aggregate compensation made to directors and other members of key management personnel of the Group is set out below:

		Consolidated	
	Note	2020 \$	2019 \$
Short-term employee benefits		250,197	561,403
Post-employment benefits		19,694	46,701
		<u>269,891</u>	<u>608,104</u>

(a) Employment agreements

The Group may terminate Mr Guglielmo's employment agreement by giving six months' notice. The Group has a contingent liability of \$115,000 (2019: \$116,000) in relation to this agreement, if Mr Guglielmo is not required to work out the notice period.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 December 2020

Note 27. Parent Entity Disclosures

Information relating to Bass Oil Limited

	Parent	
	2020	2019
	\$	\$
Current assets	84,084	404,242
Total assets	2,284,712	2,606,217
Current liabilities	65,921	162,343
Total liabilities	2,861,166	2,866,962
Net assets	(576,454)	(260,745)
Contributed equity	26,684,884	26,674,268
Foreign exchange reserve	3,129,996	3,129,996
Accumulated losses	(30,391,334)	(30,065,009)
Total shareholder's equity	(576,454)	(260,745)
Loss of the parent entity	(326,325)	(1,035,178)
Total comprehensive income/(loss) of the parent entity	(326,325)	(1,035,178)

The Parent Entity has a net asset deficiency of \$576,454 as at 31 December 2020.

The commitments and contingencies of the parent entity are the same as disclosures in Note 26 excluding the commitments relating to Tangai-Sukananti KSO.

Note 28. Related Party Disclosures

Terms and conditions of transactions with related parties other than KMP

During the year the Group paid corporate advisory and investor relations fees to Adelaide Equity Partners Limited (a director related entity of Mr M Lindh) of \$6,624 (31 December 2019: \$24,015) and capital raising success fees to Adelaide Equity Partners Limited of \$nil (31 December 2019: \$47,304) (both under a corporate advisory and investor relations mandate). The fees were provided under normal commercial terms and conditions. Amounts outstanding at balance date were \$nil (31 December 2019: \$11,365). The Group had a corporate advisory & investor relations mandate with Adelaide Equity Partners. The mandate had a monthly retainer of A\$5,000 per month and was terminated on 20 April 2020.

During the year the Group paid rent to Adelaide Equity Partners Limited of \$2,430 (31 December 2019: \$7,377) (under a rental of premises mandate). The rental was provided under normal commercial terms and conditions. Amounts outstanding at balance date were \$nil (31 December 2019: \$nil). The rental arrangement ceased on 30 April 2020.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 December 2020

Note 29. Segment Information

For management purposes there is only one operating segment, which is oil production.

The chief operating decision maker only reviews consolidated financial information. The chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segment, has been identified as the Board.

The Board does not currently receive segment Statement of Financial Position and Statement of Comprehensive Income information. For exploration activities the Board managed each exploration activity of each permit through review and approval of joint venture cash calls, Authority for Expenditure (AFE's) and other operational information. For oil production (from the Tangai-Sukananti KSO located in South Sumatra Basin in Indonesia) the Board manages the activity through review of production details, review and approval of the joint venture cash calls and other operational information.

The result for the year ended 31 December 2020 was from oil production.

The consolidated entity operates in the oil and gas industry in Indonesia.

The consolidated assets and liabilities as at 31 December 2020 and 2019 relate to oil production.

For the current financial year, the Group's revenue of \$3,150,396 was received from the sale of oil in Indonesia to Pertamina EP (the Indonesian State owned oil Company).

	Australia	Indonesia	Total
31 December 2020			
Revenue	-	3,150,396	3,150,396
Other revenue	196,669	-	196,669
Total revenue	196,669	3,150,396	3,347,065
Segment assets	84,509	3,817,952	3,902,461
Segment liabilities	(65,921)	(1,913,024)	(1,978,945)
31 December 2019			
Revenue	-	5,052,319	5,052,319
Other revenue	71,213	-	71,213
Total revenue	71,213	5,052,319	5,123,532
Segment assets	406,012	4,439,562	4,845,574
Segment liabilities	(162,340)	(2,270,508)	(2,432,848)

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 December 2020

Note 30. Reconciliation of Cash Flows from Operating Activities

For the purposes of the Statement of Cash Flows, cash includes cash on hand and at bank, and short term deposits at call.

Reconciliation of profit after income tax to net cash provided/used in operating activities

	Note	Consolidated	
		2020 \$	2019 \$
Net profit/(loss) after tax		(499,826)	398,418
<i>Adjustments for:</i>			
Depreciation	6	87,850	108,485
Amortisation		370,190	340,213
Accretion interest		14,713	27,003
Non-cash decrease in provision		-	(204,658)
Foreign exchange adjustment		(2,401)	(26,315)
		<hr/>	<hr/>
		(29,474)	643,146
<i>Changes in assets and liabilities</i>			
(Increase)/decrease in trade and other receivables		175,236	(258,064)
Decrease/(increase) in other assets		20,227	98,366

Note 31. Reserves

	Note	Consolidated	
		2020 \$	2019 \$
Currency translation reserve ⁽ⁱ⁾		3,129,996	3,129,996
		<hr/>	<hr/>
		3,129,996	3,129,996

- (i) The Currency translation reserve was recognised at 31 December 2017 with the change in functional and presentational currency to USD. In order to derive US dollar opening balances, the Australian dollar functional currency assets and liabilities at 1 July 2017 were converted at the spot rate of US\$1:A\$0.77 on the reporting date; and the contributed equity, reserves and retained earnings were converted at applicable historical rates and the difference has given rise to the recognition of the Currency translation reserve.

Note 32. Contingent Liabilities

As at 31 December 2020 the Group had no contingent liabilities (2019:\$Nil), except in relation to Employment agreements with key management personnel as detailed in Note 26.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 December 2020

Note 33. Subsequent Events

No other matter or circumstance has occurred subsequent to year end that has significantly affected, or may significantly affect, the operations of the Company, the results of those operations or the state of affairs of the entity in subsequent financial years.

Note 34. General Information

Bass Oil Limited (the Company) is a listed public company incorporated in Australia. The address of its registered office and principle place of business is as follows:

Level 5
11-19 Bank Place
Melbourne, VIC, 3000
Australia

For personal use only

Independent Auditor's Report

To the Members of Bass Oil Limited

Report on the audit of the financial report

Opinion

We have audited the financial report of Bass Oil Limited (the Company) and its subsidiaries (the Group), which comprises the consolidated statement of financial position as at 31 December 2020, the consolidated statement of profit or loss and other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies, and the Directors' declaration.

In our opinion, the accompanying financial report of the Group is in accordance with the *Corporations Act 2001*, including:

- a giving a true and fair view of the Group's financial position as at 31 December 2020 and of its performance for the year ended on that date; and
- b complying with Australian Accounting Standards and the *Corporations Regulations 2001*.

Basis for opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material uncertainty related to going concern

We draw attention to Note 2 in the financial statements, which indicates that the Group incurred a net loss of \$499,826, and had a net cash outflow from operating activities of \$93,038 during the year ended 31 December 2020. As stated in Note 2, these events or conditions, along with other matters as set forth in Note 2, indicate that a material uncertainty exists that may cast doubt on the Company's/Group's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report of the current period. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

In addition to the matter described in the *Material uncertainty related to going concern* section, we have determined the matters described below to be the key audit matters to be communicated in our report.

Key audit matter	How our audit addressed the key audit matter
Oil properties - Notes 2(l), 2(t)(i) & 18	
<p>At 31 December 2020, the carrying value of oil properties was \$1,935,331.</p> <p>In accordance with AASB 136 <i>Impairment of Assets</i>, the Group is required to assess at each reporting date if there are any indicators of impairment which may suggest the carrying value is in excess of the recoverable value.</p> <p>The process undertaken by management to assess whether there are any impairment indicators involves an element of management judgement.</p> <p>This area is a key audit matter due to the significant judgement involved in determining the existence of impairment indicators.</p>	<p>Our procedures included, amongst others:</p> <ul style="list-style-type: none"> • Obtained and corroborated management's assessment of impairment indicators; • Assessed whether any other potential impairment indicators exist; • Evaluated the competence, capabilities and objectivity of management's experts in the evaluation of potential impairment indicators; • Obtained and reviewed internal reporting prepared by management to assess the performance of oil properties; • Understood and verified the key inputs and assumptions included in management's internal reporting; and • Assessed the appropriateness of the related financial statement disclosures.

Information other than the financial report and auditor's report thereon

The Directors are responsible for the other information. The other information comprises the information included in the Group's annual report for the year ended 31 December 2020, but does not include the financial report and our auditor's report thereon.

Our opinion on the financial report does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors' for the financial report

The Directors of the Company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the Directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the Directors are responsible for assessing the Company's/Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website at: http://www.auasb.gov.au/auditors_responsibilities/ar1_2020.pdf. This description forms part of our auditor's report.

Report on the remuneration report

Opinion on the remuneration report

We have audited the Remuneration Report included in the Directors' report for the year ended 31 December 2020.

In our opinion, the Remuneration Report of Bass Oil Limited, for the year ended 31 December 2020 complies with section 300A of the *Corporations Act 2001*.

Responsibilities

The Directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.
