\$7.88m Kuniko IPO closes heavily subscribed

Key points:

- The Directors of Kuniko Limited have resolved to close the Priority and Public Offers (Offers) following an outstanding response from investors which saw both Offers being heavily oversubscribed.
- No further applications will be accepted by Kuniko.

Further to its announcement of 21 April 2021, Vulcan Energy Resources Limited Ltd (ASX: VUL; Vulcan or the Company) is pleased to advise the close of the \$7.88 million IPO raise for the spin out of its wholly owned subsidiary, Kuniko Limited.

The Offers were heavily oversubscribed and the Company would like to thank all shareholders and applicants for their support. The process was managed in a way to accommodate as many Vulcan shareholders as possible and Kuniko will have over 2,000 shareholders upon listing.

Kuniko is working with the ASX to finalise all listing conditions in order to list on the ASX as soon as possible. Kuniko expects to complete the listing process in the coming weeks. Refunds on unsuccessful applications under the Offers will be returned closer to the time of listing.

The Joint Lead Managers to the public offer were Canaccord Genuity and Vert Capital.

Management Comment: Gavin Rezos, Chairman of Vulcan and Kuniko said: On behalf of the Vulcan Directors, I wish to thank our existing shareholders who participated in the Offers. Given the extraordinary demand and in an effort to accommodate as many Vulcan applicants as possible, a substantial portion of the public offer was allocated to Vulcan priority offer subscriptions. This strong shareholder support provides a solid foundation for Kuniko as an exciting zero carbon battery metals exploration and sustainable development company in Norway.”

Highlights

Globally unique **Zero Carbon Lithium™** Project.

Combined lithium chemicals & renewable energy project in the Upper Rhine Valley of Germany.

EU's **largest** lithium resource.

Located at the heart of the EU Li-ion battery industry.

Fast-track development towards supplying the EU's battery & electric vehicle industry.

About Vulcan

Vulcan is aiming to become the world's first lithium producer with net zero greenhouse gas emissions. Its ZERO CARBON LITHIUM™ Project intends to produce a battery-quality lithium hydroxide chemical product from its combined geothermal energy and lithium resource, which is Europe's largest lithium resource, in Germany. Vulcan's unique, ZERO CARBON LITHIUM™ Project aims to produce both renewable geothermal energy, and lithium hydroxide, from the same deep brine source. In doing so, Vulcan intends to address lithium's EU market requirements by reducing the high carbon and water footprint of production, and total reliance on imports. Vulcan aims to supply the lithium-ion battery and electric vehicle market in Europe, which is the fastest growing in the world. The Vulcan Zero Carbon Lithium™ project has a resource which can satisfy Europe's needs for the electric vehicle transition, from a source with net zero greenhouse gas emissions, for many years to come.
