Reconciliation to Appendix 4E

The final audited results reflect a reduction of 2% (or \$254k) in total FY21 sales revenue as reported in the Appendix 4E lodged on the ASX at the end of August. This variance was due to the delay in a single hardware shipment and, resulting in revenue being transferred from June to July. This revenue will consequently be included in the FY22 period.

The external audit recommended it would be prudent to make some small additional cost accruals (\$87k) which resulted in an overall increase in net loss from \$4.320m as reported in Appendix 4E to a net loss of \$4.652m as reported in the FY21 annual report.
