These transactions may, together with other shares in Nitro acquired by the Underwriters or their respective affiliates in connection with its ordinary course sales and trading, principal investing and other activities, result in the Underwriters or their respective affiliates disclosing a substantial holding and earning fee.

The Underwriters and/or their respective affiliates may also receive and retain other fees, profits and financial benefits in each of the above capacities and in connection with the above activities, including in its capacity as a lead manager to the Offer.

By continuing to read this Presentation, readers agree, to the maximum extent permitted by law, that they will not seek to sue or hold the Nitro Parties or the Underwriter Parties liable in any respect in connection with this Presentation or the Offer. Statements in this Presentation are made only as at the date of this Presentation. The reader, Nitro and the Underwriters (on behalf of each other member of the Underwriter Parties), by accepting and providing this Presentation respectively, expressly disclaims any fiduciary relationship between them, or the assumption of any duty by the Underwriter Parties or Nitro Parties to the reader, and agree that the reader is responsible for making its own independent judgment with respect to the Offer, any other transaction and any other matter arising in connection with this Presentation.

Determination of eligibility of investors for the purposes of the Offer is determined by reference to a number of matters, including legal requirements and the discretion of Nitro and the Underwriters. Nitro and the Underwriters disclaim any liability in respect of the exercise or otherwise of that discretion, to the maximum extent permitted by law.

SECTION 6

KEY RISKS

KEY RISKS (1/4)

Key risks

- This section discusses some of the key risks associated with any investment in Nitro together with risks relating to participation in the Offer which may affect the value of Nitro shares. The risks set out below are not listed in order of importance and do not constitute an exhaustive list of all risks involved with an investment in Nitro.
- Before investing in Nitro, you should be aware that a number of risks and uncertainties, which are both specific to Nitro and of a more general nature, may affect the future operating and financial performance of Nitro and the value of Nitro shares.

- Before investing in Nitro shares, you should carefully consider the risk factors and your personal circumstances. Potential investors should consider publicly available information on Nitro (such as that available on the ASX website) and seek professional advice from an adviser who is licensed by ASIC to give that advice before making an investment decision.
- Nothing in this Presentation is financial product advice and this Presentation has been prepared without taking into account your investment objectives or personal circumstances.

Completion	If Completion of the Acquisition does not occur as a result of a failure to satisfy conditions (or otherwise), Nitro will need to consider alternative uses for the proceeds from the Offer, or ways to return such proceeds to shareholders.
Reliance on information provided	Nitro undertook a due diligence process in respect of the Acquisition, which relied in part on the review of financial, technical, operational and other commercial information which was provided to Nitro by the vendors of Connective. Despite making reasonable efforts, Nitro has not been able to verify the accuracy, reliability or completeness of all the information which was provided to it. If any of the information provided and relied upon by Nitro in its due diligence process and preparation of this Presentation proves to be incomplete, incorrect, inaccurate or misleading, there is a risk that the actual financial position and performance of Connective (and the financial position and performance of Nitro following the Acquisition) may be materially different to the expectations and targets reflected in this Presentation. There is also a risk that due diligence conducted has not identified issues that would have been material to the decision to enter into the Acquisition, which may also have a material adverse issue that was not identified prior to entry into the Acquisition could have an adverse impact on the reputation, financial performance or operations of Nitro.
Revenue synergies	The success of the Acquisition is partially dependent on the realisation of the potential revenue synergies noted on page 16. Failure to fully realise Nitro's revenue synergies in size, nature and timing may have a detrimental impact on the value of the Connective business acquired.
Retention of key personnel	The success of the Acquisition and subsequent integration is partially dependent upon the retention of key senior management at Connective. The loss of such key senior management could slow Nitro's ability to operate and integrate the Connective business as well as realise the overall benefits of the Acquisition. In particular, the loss of such key senior management at Connective could have an adverse impact on Connective operations, customer relationships, and technical development, as well as overall performance.
Loss-making operations	Like many start-up technology companies, Connective has incurred regular operating losses since inception. The Connective business may not be able to achieve or maintain profitability or positive free cash flow in the near term if at all and as such the business will likely require ongoing funding from Nitro's cash reserves or from new equity issuances.
Integration	Integration could take longer, be more complex or cost more than expected, encounter unexpected challenges or issues (including differences in corporate culture between the businesses being integrated or loss of, or reduction in, key personnel, expert capability or employee productivity, or failure to procure or retain employees of Connective) or divert the attention of management. Impacts of the integration process may in turn cause the anticipated benefits and synergies of the integration of the Connective business into Nitro to be less than estimated resulting in a detrimental impact on the value of the business.

KEY RISKS (2/4)

For personal use only

Historical liabilities
Risks associated with existing contractual arrangements
Underwriting and funding
Foreign exchange and foreign regulations
Failure to retain existing clients or attract new customers

Following completion of the Acquisition, Nitro may become directly or indirectly exposed to liabilities that Connective may have incurred or be liable for in the past as a result of prior acts or omissions, including liabilities which were not identified during Nitro's due diligence or which are greater than expected, or for which Nitro was unable to negotiate sufficient protection in the Share Purchase Agreement or accepted as a tolerable risk.

A number of material customer and supplier contracts to which Connective is a party contain provisions which will give the counterparty a right to terminate the contract because of the change in control which will occur at Completion ("change of control provision"). Contracts may also be terminable for convenience on short notice or at will. While the Share Purchase Agreement includes obligations for Connective to seek the consent of the relevant counterparties to the change of control for certain contracts deemed material by Nitro, there is a risk that Nitro has not identified all contracts which are material to the Connective business, or that limitations imposed under the Share Purchase Agreement will mean that Nitro is not compensated in the event that consent is not obtained.

The breach, termination or non-renewal of material contracts or loss of business could have adverse consequences for Nitro.

It is intended that the purchase price for the Acquisition and the cost of the integration activities will be funded through the proceeds of the Offer.

The Offer is underwritten by the underwriters. Under the Underwriting Agreement, the Joint Lead Managers have agreed to manage and underwrite the Offer, subject to the terms and conditions of the agreement. If certain conditions are not satisfied or certain customary termination events occur, one or both Joint Lead Managers may terminate the underwriting agreement. If the underwriting agreement is terminated, the Company will not be able to complete the Acquisition, unless it can source alternative funding to meet its obligations under the Share Purchase Agreement. That alternative funding could be on less favourable terms. Please see Appendix B for a summary of the material terms of the Underwriting Agreement.

A significant proportion of Nitro's revenues, costs and expenses are incurred in foreign currencies, whereas Nitro reports in U.S. dollars. As a result of the use of these various currencies, Nitro is subject to foreign currency fluctuations, which may materially affect its financial position and operating results.

Connective is also subject to the laws of the foreign jurisdictions in which it operates and could be adversely impacted by changes to laws or regulations in those jurisdictions in the future.

Nitro's business depends on its ability to retain its existing customers, and the Company's growth depends on its ability to attract further business from existing customers and to attract new customers. If customers do not continue to use Nitro's software or increase their use over time, and if new customers do not choose to use Nitro's software, the growth in revenue may slow, or revenue may decline.

Nitro's business is partly dependent on the conversion of customer sales from investment in sales and marketing campaigns and initiatives, which is expected to continue to increase as the business grows. Failure to realise the intended benefits from sales and marketing investment could negatively impact Nitro's ability to attract new customers and may adversely impact Nitro's operating and financial performance.

KEY RISKS (3/4)

Nitro operates in a competitive industry	<p>Nitro competes against other international document productivity and electronic signature software providers, as well as with internally-developed or manual paper-based systems. The global document productivity industry is rapidly evolving, is increasingly competitive and the market leaders have significantly more financial and operational resources than Nitro. As such, there is a risk that at any time Nitro may compete less effectively against its competitors, causing it to lose market share and the ability to develop or secure new clients.</p>
Reliance on up-take of SaaS-based document productivity and electronic signature software	<p>Nitro's future growth in revenues depends on the increasing adoption of SaaS-based document productivity and electronic signature software solutions. It may be difficult for Nitro to persuade potential customers to change existing on-premise, perpetual license or manual paper-based solutions to adopt Nitro's SaaS-based software product. If Nitro's software is not accepted and used by more organisations, or if the market for such solutions fails to grow as expected, Nitro's platform could be adversely affected and revenue growth may slow.</p>
Failure to adequately maintain and develop Nitro's software platform	<p>Nitro's business model depends on the Company's ability to continue to ensure that customers are satisfied with the products that Nitro offers. There is a risk that Nitro fails to maintain its software platform adequately, or that updates may introduce errors and performance issues, causing customer satisfaction in the Company's software to fall. Additionally, the failure to successfully develop new product features and modules may have a materially adverse impact on Nitro's future operations and financial performance.</p>
Cyber security incidents or breaches of data privacy rules and regulations	<p>The use of information technology is critical to Nitro's ability to deliver products and services to customers and the growth of its business. It is possible that measures taken by Nitro to prevent technology breaches may prove to be inadequate. Any accidental or deliberate security breaches or other unauthorised access to Nitro's information technology systems or customer data may subject Nitro to reputational damage, a loss of confidence in the services provided, a disruption of services to customers, claims by customers, loss of customers, theft and misappropriation of funds, legal action and regulatory scrutiny. Nitro may also be required to incur costs to rectify system vulnerabilities or introduce additional safeguards to minimise the risk of future security breaches.</p>
Disruption or failure of technology systems and software	<p>Nitro and its customers are dependent on the performance, reliability and availability of the Company's technology platforms, data centres and global communications systems. There is a risk that these systems may be adversely affected by disruption, failure, service outages or data corruption that could occur as a result of computer viruses, malware, internal or external misuse by websites, or other disruptions including natural disasters, power outages or other similar events. This could potentially lead to a loss of customers, legal claims by customers, and an inability to attract new customers.</p>
Inability to attract or retain key personnel	<p>The success of the Company is dependent upon the ongoing retention of key personnel, in particular the senior management team. The loss of such personnel, or any delay in their replacement, could have a materially adverse impact on management's ability to operate the business and achieve its growth strategies and prospects, including through the development and commercialisation of new solutions or modules. The loss of key personnel could also have an adverse impact on operations, with the potential loss of key customer relationships, potential loss of business process knowledge and an adverse impact on financial performance.</p>
Failure to realise benefits from research and development	<p>Historically, Nitro has invested significantly in research and development and it expects to continue to do so in the future in order to further expand and improve its product capabilities and to maintain its competitive position. Software development is expensive and often involves an extended period of time to achieve an ROI; or Nitro may receive no economic benefit at all from such investment.</p>

KEY RISKS (4/4)

<p>Reliance on third party information technology suppliers</p>	<p>Nitro relies on certain contracts with third party suppliers to maintain and support its hosting infrastructure. Any failure or disruption to the services provided from or termination of contracts for any reason with third party service providers could negatively impact operating and financial performance. It could also expose the Company to claims for loss and damage from customers that may exceed the amounts that Nitro is entitled to recover from the third-party service providers.</p>
<p>Future acquisitions</p>	<p>Nitro will evaluate a range of growth driven initiatives in the future, which may include further acquisitions. It expects only to do so to the extent that such acquisitions are in complementary to Nitro's growth strategy. Although Nitro intends to undertake comprehensive due diligence before completing any future acquisition, such due diligence may not reveal issues that later impact on the returns from that acquisition or the extent to which the acquisition meets Nitro's growth strategy.</p>
<p>Non-participation in the Entitlement Offer</p>	<p>As the Entitlement Offer is non-renounceable, entitlement rights under the Offer cannot be traded on ASX or otherwise transferred. If Nitro shareholders do not participate in the Entitlement Offer, or do not take up their full entitlements to acquire shares under the Entitlement Offer, their percentage shareholding will be diluted and they will not have an opportunity to realise value for their entitlements.</p>
<p>Market risks</p>	<p>The price of Nitro shares (including the shares to be issued pursuant to the Offer) on the ASX will be affected by the financial performance of Nitro and may rise or fall due to numerous often unpredictable factors, including:</p> <ul style="list-style-type: none"> • Australian and international general economic conditions, including inflation rates, the level of economic activity, interest rates and currency exchange rates; • tensions and acts of terrorism in Australia and around the world; • investor perceptions in the local and global markets for listed stocks; and • changes in the supply and demand of software and technology securities.
