**Altech Chemicals Limited ASX: ATC FRA:A3Y**

**Company Presentation**

**Iggy Tan  
Managing Director**

**Altech Chemicals**  
Limited

**Altech Chemicals**  
Limited

- Halve the cost per KWh of battery production
- Below the \$US100/KWh threshold
- “4680” Tesla cell (5x energy, 6x power)
- 3TWh per year at its own factories by 2030
- Equal 20 giga factories
- Increased use of Silicon in anodes

**Tesla Battery  
Day 2020**

Altech Chemicals  
Limited

- Forms SEI layer on first charge
- Lithium becomes inactive
- 8-10% First cycle loss capacity

10% of lithium is lost on first charge

Lithium ions in SEI become inactive

First charge loss reduces life of battery

Problem facing today's lithium ion batteries

Altech Chemicals  
Limited

For personal use only

- SEI layer cracks, exposing new sites for further lithium adsorption
- Corrosive HF ions, attack SEI layer, creating further lithium degradation

Cracks in SEI layer creates further lithium loss

More Li replaces the SEI  
Corrosive HF ions creates more lithium loss

Continual  
consumption of  
Lithium

**Altech Chemicals**  
Limited

- **Reduces first cycle loss (Tau et al., 2019)**
- **Improves cycling stability**
- **Improves high-rate performance (Feng et al., 2016)**
- **Improves fast charging capability (Kim et al., 2016)**
- **Prevents thermal runaway under mechanical abuse (Xu et al. 2019)**

**Why HPA  
Coating ?**

Altech Chemicals Limited

# Literature - Alumina coated graphite performance <sup>1</sup>

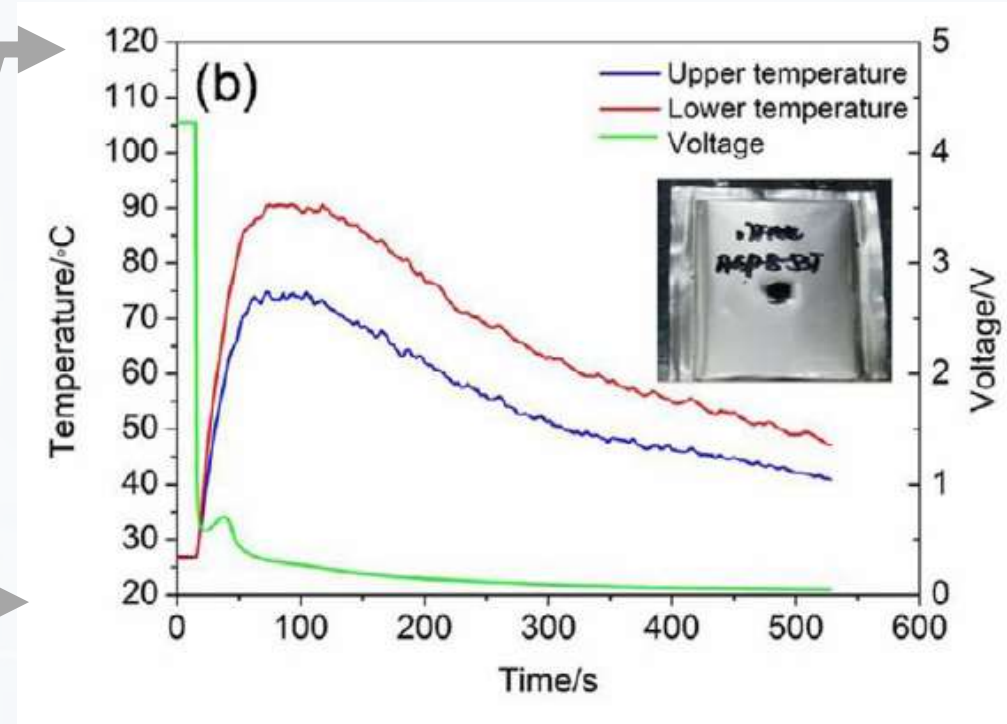

Altech Chemicals Limited

# Nail Test – Coated graphite prevents runaway <sup>1</sup>

For personal use only

Non Coated graphite 600 Deg C

Coated graphite 100 Deg C

Altech Chemicals  
Limited

## 1. Vapour Method

- Atomic Layer Deposition – costly, complex, not mass production

## 2. Solids Method

- Non continuous layer

## 3. Liquid Method

- Most promising
- Easy to commercialise

Coating  
Methods

Altech Chemicals  
Limited

- **2 nm layer of high purity alumina coating**
- **Pre-forms an SEI layer**
- **Reduces first-cycle-loss capacity and increased battery life**
- **Alumina layer converts corrosive HF to inert material**

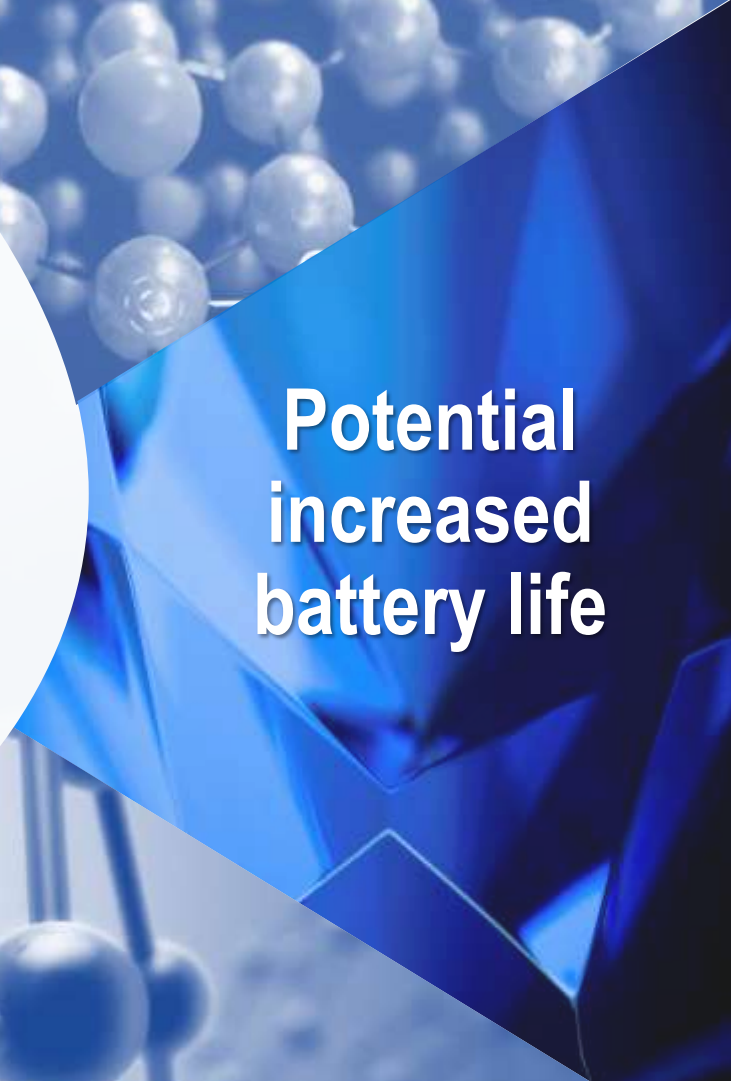

**Our nano  
alumina coating  
technology is  
game changing**

Altech Chemicals  
Limited

For personal use only

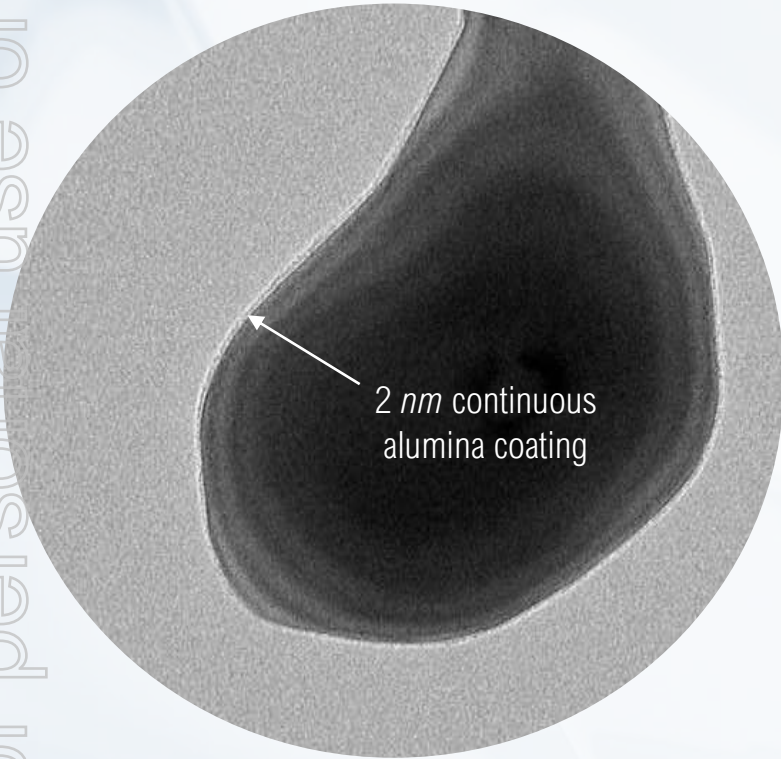

Potential increased battery life

**Altech Chemicals**

Altech alumina coating technology

Current attempts at alumina coating

**Under the  
Electron  
Microscope**

**Altech Chemicals**  
Limited

- **First phase, 100 cycle battery tests completed**
- **Coated graphite performance over non coated is encouraging**
- **Further test runs required for repeatability**
- **Potential improvements to lithium-ion battery life, capacity and chargeability**

**Promising  
Results in half  
cell battery  
testing**

Altech Chemicals  
Limited

For personal use only

- Ten times capacity Si (3,579 mAh/g) C (372 mAh/g)
- Promising anode material
- But volume expansion 300% on lithiation (C 13%)
- But 40-50% first cycle loss
- But higher fade during life (short cycle life)

6 carbon atoms hold 1 Li<sup>+</sup> ion

1 Si atom holds 4 Li<sup>+</sup> ions

Silicon most  
promising  
future anode  
additive

Altech Chemicals  
Limited

- 300% volume expansion causes fracturing
- In the anode it causes swelling
- Delamination & loses contact with copper foil
- Early failure of the battery

Fracturing of the Si particle

Delamination at the anode

electrical  
isolation

## Barriers to Silicon Use

## ASX ANNOUNCEMENT AND MEDIA RELEASE

15 March 2021

# ALTECH – BREAKTHROUGH SILICON ALUMINA COATING DEVELOPMENT

### Highlights

- Breakthrough silicon alumina coating development
- Tesla vision is for more silicon in lithium-ion battery anodes
- Silicon has ten times energy capacity compared to graphite
- Capacity retention during cycling potentially improved

Altech alumina coating

Silicon  
Particle

# Alumina coating of Silicon in our Lab

Altech's disruptive technology

**Altech Chemicals**  
Limited

- **250 year Kaolin mine in Australia**
- **All permits in place – ready to dig**
- **HPA processing plant in Johor, Malaysia**
- **Stage 1 and 2 construction completed**
- **9 patents pending**
- **Bottom quartile costs**
- **Certified “green” project by CICERO**

## **HPA Project Summary**

**Altech Chemicals**  
Limited

- **10 Year off take arrangement with Mitsubishi**
- **Lump sum build contract with SMS Group**
- **Senior loan of US\$190m secured with KFW IPEX bank (ECA cover)**
- **Assessing US\$144m junior debt – listed green bonds**
- **Looking for JV partner for US\$100m for 49% of project**

## **HPA Project Summary**

**Altech Chemicals**  
Limited

- **Pre-tax NPV 7.5 US\$ 505 million**
- **Payback (full rate) 3.9 years**
- **IRR - 22%**
- **EBITDA US\$ 76 million p.a.**
- **Capital cost US\$ 298 million\***
- **Production Costs - US\$ 8.55 /kg**
- **LT Sale Price - US\$ 26.9/kg**
- **Gross Margin – 68%**
- Pre tax, pre financing equity model

## Use and Source of Funds

- To date ATC has spent US\$ 57m on the project incl Eng, land, Stage 1 & 2 construction
- Meckering deposit valued at (US\$4/t) US\$50.8m
- Total of US\$107m for ATC 51%

\* US\$ 76 m of cash reserves required by KfW for project protection

^ Altech Advanced Materials AG has option to purchase 49% for US\$100m

^ Open to other strategic investors or JV partners

# Forward Looking Statements

## Forward-looking Statements

This announcement contains forward-looking statements which are identified by words such as 'anticipates', 'forecasts', 'may', 'will', 'could', 'believes', 'estimates', 'targets', 'expects', 'plan' or 'intends' and other similar words that involve risks and uncertainties. Indications of, and guidelines or outlook on, future earnings, distributions or financial position or performance and targets, estimates and assumptions in respect of production, prices, operating costs, results, capital expenditures, reserves and resources are also forward looking statements. These statements are based on an assessment of present economic and operating conditions, and on a number of assumptions and estimates regarding future events and actions that, while considered reasonable as at the date of this announcement and are expected to take place, are inherently subject to significant technical, business, economic, competitive, political and social uncertainties and contingencies. Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of our Company, the Directors and management. We cannot and do not give any assurance that the results, performance or achievements expressed or implied by the forward-looking statements contained in this announcement will actually occur and readers are cautioned not to place undue reliance on these forward-looking statements. These forward looking statements are subject to various risk factors that could cause actual events or results to differ materially from the events or results estimated, expressed or anticipated in these statements.

The green bonds terms referred to in this ASX announcement are indicative in nature; are non-binding; and contain the general terms of proposed a transaction. Any future commitment for the bonds will be subject to and is contingent upon all internal approvals of the structuring agent as well as the satisfactory completion of detailed due diligence (including but not limited to HPA market, legal and technical due diligence) and legally binding documentation including senior lender and inter-creditor agreements. There is no certainty that the green bond facility will be approved or that a transaction will be concluded based on what is contemplated in the term sheet. The Company makes no representations or warranties whatsoever as to the outcome of the green bond finance process.

## Competent Persons Statements – Meckering Kaolin Deposit

The information in this announcement that relates to Mineral Resources and Ore Reserves is extracted from the report entitled "Maiden Ore Reserve at Altech's Meckering Kaolin Deposit" released on 11 October 2016; the report is available to view on the Company's website [www.altechchemicals.com](http://www.altechchemicals.com). The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of estimates of Mineral Resources and Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.
