While always very mindful of dilution to existing shareholders, we saw this measured capital raising as an opportunity to broaden our shareholder base. We are grateful for the ongoing support shown by our institutional shareholders and are delighted to welcome several specialist emerging market funds from North America, Asia and Europe.

KEY RISKS AND INTERNATIONAL OFFER RESTRICTIONS

1. KEY RISKS

COVID-19

Events related to the Coronavirus pandemic (COVID-19) and in particular new variants of COVID-19 have resulted in significant market volatility. There is continued uncertainty as to ongoing and future response of governments and authorities globally as well as a likelihood of a global or more localised economic recessions of unknown duration or severity. As such, the full impact of COVID-19 to consumer behaviour, suppliers, employees, the Operating Companies (defined below) and Frontier are not fully known. Given this, the impact of COVID-19 could potentially be materially adverse to Frontier's financial and operational performance, and that of its Operating Companies. Further, any government or industry measures may adversely affect Frontier's operations and that of its Operating Companies and are likely beyond the control of Frontier. In compliance with its continuous disclosure obligations, Frontier will continue to update the market in regard to any material impact of COVID-19 on Frontier's business.

MARKET CONDITIONS

The price at which Frontier's shares are quoted on ASX may increase or decrease due to a number of factors outside of Frontier's control. The events relating to COVID-19 have recently resulted in a decline in general economic conditions together with significant volatility to financial markets including the prices of shares trading on the ASX. These factors may cause Frontier's shares to trade at prices above or below the placement price. There is no assurance that the price of the shares offered under the placement will increase when they are quoted on the ASX.

EARLY-STAGE BUSINESS RISK

Frontier has interests ranging from 30% to 100% in a portfolio of businesses (run by the companies in which Frontier has interests which operate online classified businesses (**Operating Companies**)) some of which are in the early stages of development. These early-stage businesses may not have well-developed business strategies in place, strong customer and supplier relationships or a strong market reputation. Early market advantages, positions or market share, if any, may not be durable, and the businesses are not yet all in a position of profitability nor do they all generate consistent, meaningful revenue. These businesses may also experience differing degrees of growth (should they grow at all). Should these businesses underperform or fail, this may have a broader impact on the ability of Frontier to meet its objectives, and could adversely impact the financial position and performance of Frontier or the value of the New Shares.

Further, given the early stage nature of their businesses, it is likely that not all the Operating Companies will be able to fund their operations out of operating cash flows, and will require additional capital over time.

ISSUES ASSOCIATED WITH OTHER SHAREHOLDERS IN OPERATING COMPANIES

In many cases, Frontier is not the sole owner of each Operating Company. Where Frontier does not have a majority equity position in an Operating Company, it must rely on the shareholders' agreements in place in respect of the Operating Companies to ensure it can exercise control over that Operating Company. Furthermore, despite the terms of the shareholders' agreements, Frontier may not be able to exercise full control over the operations of the Operating Companies.

Disagreements with other shareholders of an Operating Company, in particular its founders, including with respect to the operations, directions or policies of the Operating Company may adversely impact Frontier's ability to guide the operations of the Operating Company, which may impact its ability to achieve its goals, and there is no guarantee Frontier will be able to resolve these disputes.

OPERATIONS IN DEVELOPING COUNTRIES

Frontier's Operating Companies all operate in developing countries. As a general rule, the economic, political, legal, regulatory and tax environment in these countries is not as developed or stable as in Australia. The future of these countries may contain political instability in the form of coups, military activity, revolutions and anarchy. Political and social upheaval in Frontier's markets may adversely affect its business operations. Further, the Operating Companies conduct their businesses in countries that may not have developed or stable legal, regulatory or tax systems. If any legal, regulatory or tax issues relating to Frontier or the Operating Companies arise in these countries, they may be subject to unknown laws and legal, regulatory or tax processes.

Further, foreign ownership laws in these jurisdictions may adversely impact Frontier's ability to hold or increase its interests in the Operating Companies or engage in activities such as repatriating funds from the Operating Companies or their subsidiaries in the relevant jurisdictions.

KEY RISKS AND INTERNATIONAL OFFER RESTRICTIONS (CONT.)

RELIANCE ON SYSTEM AND CONTENT INTEGRITY

The performance of the websites of Frontier's Operating Companies is very important to the reputation of those Operating Companies, their ability to attract customers and their ability to achieve overall market acceptance of their services. These websites rely on telecommunications operators, data centres and other third parties for key aspects of the process of maintaining their websites and providing their products and services to customers. Frontier's and the Operating Companies' influence over these third parties is limited. Any system failure that causes an interruption to an Operating Company's services could materially affect its business. System failures, if prolonged, could reduce the attractiveness of an Operating Company's services to clients and visitors to the websites and would damage its business reputation and brand name.

Although the Operating Company's systems have been designed around industry-standard architectures, they remain vulnerable to damage or interruption from earthquakes, floods, fires, power loss, telecommunication failures, terrorist attacks, computer viruses or similar events. Frontier's disaster recovery planning cannot account for all eventualities. The Operating Companies' websites have experienced system failures in the past and may do so in the future. If frequent or persistent significant system failures are experienced on an Operating Company's website, the relevant Operating Company or Frontier may need to take steps to increase the reliability of these systems and invest in further or improved back-up systems. This could be expensive, reduce operating margins and may not be successful in reducing the frequency or duration of unscheduled downtime. It would also negatively impact the Operating Company's business reputation and brand name, which may in turn impact Frontier's operations and reputation.

LOSS OF KEY PERSONNEL

Frontier's success is dependent on the retention of key employees, including the Chief Executive Officer, Shaun Di Gregorio who has been responsible for establishing Frontier and forming its relationships with the Operating Companies. Loss of the Chief Executive Officer and other key employees, or an inability to attract, retain and motivate additional highly-skilled employees required of the anticipated expansion of Frontier's activities could adversely affect its growth plans and financial position.

In addition, each Operating Company is generally run by the founder or founders of the business of that Operating Company, and Frontier relies on those individuals to operate the business in conjunction with Frontier and provide local expertise in the jurisdiction in which the Operating Company conducts its business. There is a risk that if the founder or founders were to leave the Operating Company, the relevant Operating Company may suffer from a decline in performance, take longer to implement its business plan or otherwise be unable to meet its goals.

DECLINE IN AUTOMOTIVE, PROPERTY AND GENERAL ADVERTISING MARKET, OR ECONOMIC CONDITIONS IN FRONTIER'S TARGET MARKETS

The automotive, property and general advertising markets, and economic conditions generally, in jurisdictions of the Operating Companies are subject to factors outside the control of Frontier. These factors include the COVID-19 pandemic, the general market outlook for economic growth and interest rates, and other factors which may impact on the level of ownership of, and number of transactions with respect to, the underlying assets traded on the websites of the Operating Companies. Should these markets enter a downward cycle, this may impact on the operations, financial position and performance of the Operating Companies and in turn impact on the ability of Frontier to meet its objectives.

RISKS ASSOCIATED WITH INTELLECTUAL PROPERTY

Third parties may copy or otherwise obtain and use an Operating Company's proprietary information without authorisation or may develop similar technology independently. In addition, competitors may be able to design around the Operating Companies' technology or develop competing technologies substantially similar to those of the Operating Companies without any infringement of proprietary rights. Any legal action that Frontier or the Operating Companies may bring to protect their intellectual property could be unsuccessful and expensive and would divert management's attention from other business concerns.

In some circumstances the Operating Companies have not taken steps to register intellectual property that is material to their business, so may have difficulties enforcing these rights against third parties or may themselves be prevented from using their intellectual property by third parties who have prior rights.

One of the key assets of each Operating Company is the domain names used for the operation of the website run by the businesses. There is a risk that third parties could challenge the use or ownership of the domain name, the relevant Operating Company could fail to renew its registration of that domain name, or the relevant Operating Company could transfer ownership of the registration to another party without Frontier's consent. Any inability to maintain control over or continue using the domain names of the Operating Companies could have a material adverse impact on Frontier's financial position or performance of its operations.

FOREIGN CURRENCY RISK

Frontier has costs, expenses and investments denominated in multiple currencies and Frontier Singapore's functional currency is USD. Frontier's share price is denominated in Australian Dollars. Frontier will also report its financial results in Australian Dollars. Accordingly, Frontier's reported financial performance and ability to fund its operations and investments will be influenced by fluctuations in exchange rates between the Australian Dollar and other currencies in which it may earn income, incur expenses or hold investments, or in which Frontier Singapore prepares its accounts and settles transactions.

KEY RISKS AND INTERNATIONAL OFFER RESTRICTIONS (CONT.)

RISKS ASSOCIATED WITH INVESTMENT INTO OPERATING COMPANIES AND PROVISION OF INFORMATION

Although Frontier performed due diligence on the Operating Company and assets and founders of the relevant business when acquiring an interest in the relevant Operating Company, Frontier's due diligence was reliant on the accuracy of information provided by the founders of the relevant business and information from regulators in the relevant jurisdictions.

If the Operating Companies provided Frontier with inaccurate information or failed to provide Frontier with relevant information, or there were other failings in the due diligence performed by Frontier, it is possible there could be historical or other issues associated with the Operating Companies or their ownership which Frontier did not identify or properly address during due diligence, or that the optimal transaction or ownership structure from a legal or commercial perspective was not adopted, each of which could impact on Frontier's financial position and performance.

DECLINE IN THE GROWTH OF INTERNET AND SMARTPHONE PENETRATION AND RATE OF MIGRATION ONLINE

Internet and smartphone penetration in the markets in which Frontier operates has been growing. However, there can be no guarantee that this growth or rate of growth will continue in the future. In addition, growth in online advertising is underpinned by a range of factors including migration from more traditional forms of media. Migration has been driven by a number of factors affecting both buyers and sellers, including increased internet penetration and broadband speeds. While increased internet penetration and a migration of advertising to new media has occurred over recent years there can be no guarantee that this will continue in the future, which may have an adverse effect on the growth of Frontier.

INCREASED COMPETITION

The internet is a business medium with low barriers to entry. It could be possible for current or new competitors to adopt certain aspects of the Operating Companies' or Frontier's business model without great financial expense, thereby reducing the Operating Companies and Frontier's ability to differentiate their services. Any significant competition to Frontier or the Operating Companies may adversely affect Frontier's ability to meet its objectives.

MANAGING RAPID GROWTH

Frontier aims to experience rapid growth in the scope of its operating activities, which will include both the Operating Companies growing their operations in the countries which they operate, as well as Frontier seeking additional investments in new jurisdictions.

This growth is anticipated to result in an increased level of responsibility for both existing and new management personnel, both in Frontier and the Operating Companies. If Frontier, or the Operating Companies are unable to manage growth successfully, including through the successful recruitment, training, integration and management of the staff required to support this expected growth, it may not be able to take advantage of market opportunities, satisfy customer expectations, execute their business plan or respond to competitive pressure.

NEW TECHNOLOGY SUBSTITUTION

The number of people who access information through devices other than personal computers, including mobile phones, has greatly increased in recent years. If Frontier's Operating Companies are unable to maintain the existing level of visits to their websites due to alternative device usage or if they are significantly slower than their competitors to adapt to technological change, they could fail to capture what may be an increasingly important segment of the markets in which they operate. A reduction in visits to these websites could have an adverse effect on their ability to attract new customers and retain their existing customer base. This may in turn adversely affect Frontier's ability to meet its objectives.

CORRUPTION OF THE OPERATING COMPANIES' DATABASES

Databases of the Operating Companies are a valuable asset. They are subject to risks associated with computer viruses, physical or electronic break-ins, loss of data from physical damage or from failures in third party service providers or operating systems and similar disruptions, as well as to damage from the inadvertent introduction of incorrect programming language by its employees. An irrecoverable loss of any of the databases would be expensive to remedy, would have a material adverse effect on the relevant Operating Company's operations and financial position, and would damage its business reputation and brand name, which may in turn impact on the financial position and performance of Frontier.

KEY RISKS AND INTERNATIONAL OFFER RESTRICTIONS (CONT.)

HACKING AND VANDALISM

The businesses of the Operating Companies may be adversely affected by malicious third party applications that interfere with, or exploit, security flaws in their websites. If an Operating Company's efforts to combat these malicious applications are unsuccessful, or if its products and services have actual or perceived vulnerabilities, its business reputation and brand name may be harmed and user traffic could decline, which may in turn result in an adverse effect on Frontier's operations and financial position.

DEPENDENCE ON INTERNET INFRASTRUCTURE

Frontier's Operating Companies are dependent on the ongoing maintenance of the global, regional and local internet infrastructure to provide the necessary data speed, capacity and security to allow them to offer viable services. The internet has experienced significant growth in the number of users and amount of traffic, in particular in the countries in which the Operating Companies operate. To the extent that the internet continues to experience increased numbers of users, there can be no assurance that the internet infrastructure will continue to be able to support the demands placed on it by continued growth.

DISPLAY OF INAPPROPRIATE CONTENT

Frontier does not have the ability to guarantee that all content displayed on the websites of the Operating Companies is appropriate at all times. Frontier cannot guarantee that such material is not obscene, offensive or otherwise damaging to its business reputation and brand name, or the reputation of the relevant Operating Company, its customer and advertisers, or any third party.

RELATIONSHIP WITH CAR DEALERS, CAR MANUFACTURERS, REAL ESTATE AGENTS AND PROPERTY DEVELOPERS

Many of the Operating Companies generate revenue through advertisements from car dealers, car manufacturers, real estate agents and property developers. In many cases, no formal ongoing arrangements exist between the relevant Operating Company and its advertisers, or only informal or short-term contracts are in place. Should a significant number of car dealers, car manufacturers, real estate agents or property developers cease dealing with the relevant Operating Companies or cancel or fail to renew their agreements this may have an adverse effect on the growth prospects and financial performance of the Operating Companies.

RELIANCE ON ADVERTISERS TO RESPOND TO LEADS

Once a lead is submitted to an advertiser through the website of an Operating Company, it is the advertiser's responsibility to respond to the lead. There is a risk that advertisers may not appropriately respond to leads. This may have a negative impact on the consumer's perception of the relevant Operating Company, which in turn may have an impact on Frontier's growth prospects and financial performance.

NEW INVESTMENTS

Frontier's business model is to invest in online classifieds businesses in underdeveloped, emerging markets. As such, Frontier may make investments in circumstances where the directors believe that those investments support Frontier's growth strategy. However, there can be no assurances that Frontier will be able to identify and complete suitable investments successfully. Investing in new businesses can place significant strain on management, employees, systems and resources. A business in which Frontier invests may not perform in line with expectations and due diligence performed on the new business will rely on the quality of information provided to Frontier, and as such may not identify all issues.

GOVERNMENT LAWS AND REGULATIONS

Frontier and the Operating Companies are subject to local laws and regulations in each of the jurisdictions in which they operate (including taxation legislation), some of which give rise to risks to the Operating Companies' businesses or restrict their ability to perform certain transactions.

ADDITIONAL REQUIREMENT FOR CAPITAL

Should the funds raised be insufficient to fulfil Frontier's planned short term expenditure requirements, Frontier may have an immediate requirement to raise further funds and there is no assurance that Frontier will be able to secure additional funding on acceptable terms.

KEY RISKS AND INTERNATIONAL OFFER RESTRICTIONS (CONT.)

RISKS ASSOCIATED WITH AN INVESTMENT IN SHARES

There are general risks associated with investments in equity capital. The trading price of Frontier shares may fluctuate with movements in equity capital markets in Australia and internationally. This may result in the market price for the shares offered under the Placement being less or more than the applicable offer price. Generally applicable factors which may affect the market price of shares include:

- general movements in Australian and international stock markets;
- investor sentiment;
- Australian and international economic conditions and outlook;
- changes in interest rates and the rate of inflation;
- change in government regulation and policies;
- announcement of new technologies;
- geo-political stability, including international hostilities and acts of terrorism.

No assurances can be given that the New Shares offered under the Placement will trade at or above their offer price. None of Frontier, its Board or any other person guarantees the market performance of the New Shares.

2. ACQUISITION RISKS

NO DUE DILIGENCE ON E24

Given Frontier is a long term shareholder of E24 and has had a director on its board, Frontier did not undertake a due diligence process in respect of the acquisition, and instead has relied on its knowledge of the company based on the financial and other information (including unaudited financial information) concerning the company which it has received in its capacity as a shareholder. Frontier has not been able to verify the accuracy, reliability or completeness of all the information which was provided to it against independent data. If any of the data or information provided to and relied upon by Frontier proves to be incomplete, incorrect, inaccurate or misleading, there is a risk that the actual financial position and performance of E24 and therefore the combined Frontier group may be materially different to the financial position and performance reflected in this Presentation. Furthermore, there is a risk that there are issues Frontier is not aware of that would have been material to the decision to enter into the Acquisition. A material adverse issue that was not identified prior to entry into the Acquisition could have an adverse impact on the financial performance or operations of Frontier.

FUTURE EARNINGS MAY NOT BE AS EXPECTED

Frontier has undertaken financial and business analysis of the Acquisition in order to determine its attractiveness to Frontier (including the possible benefits from 100% ownership of the Operating Companies in LATAM). It is possible that such analysis draws conclusions and forecasts that are inaccurate or which will not be realised in due course. To the extent that the actual results achieved by E24 is different than those anticipated, or any unforeseen difficulties emerge in moving to 100% ownership, there is a risk that the profitability and future earnings of the operations of Frontier after having acquired 100% of E24 may differ (including in a materially adverse way) from the what Frontier expects.

FRONTIER MAY NOT SUCCESSFULLY INTEGRATE E24 WITH ITS OTHER LATAM OPERATIONS

The integration of E24 with Frontier's other LATAM operations carries risk, including potential delays or costs in implementing necessary changes and difficulties in integrating various operations. The success of the Acquisition, and the ability to realise the expected benefits of the Acquisition outlined in this Presentation, is dependent on the effective and timely integration of the E24 business.

ARRANGEMENT WITH E24'S KEY SUPPLIERS AND CUSTOMERS

Each of E24'S contracts with its suppliers and customers may contain change of control provisions that will be triggered by the Acquisition and, when triggered, entitle the counterparty to terminate the relevant contract.

Any termination or non-renewal or renewal on less favourable terms of a material contract could materially adversely affect the financial position and prospects of the relevant business.

KEY RISKS AND INTERNATIONAL OFFER RESTRICTIONS (CONT.)

E24 LIABILITIES

Following completion of the Acquisition, Frontier may become 100% responsible for any outstanding liabilities that E24 has incurred prior to the Acquisition, including any liabilities that are not known to Frontier, for which insurance may not be available, and for which Frontier may not have post-Acquisition recourse under the agreements for the Acquisition and which may result in Frontier being liable for fines and penalties or subject to other sanctions. Such liabilities could include liabilities relating to current or future litigation or other proceedings, failure by E24 or Frontier to hold required regulatory approvals, authorisations or licences, regulatory actions (including without limitation in relation to any such failure), warranty or performance claims, historical tax liabilities and other liabilities.

Such liabilities may adversely affect the financial performance or position of Frontier and even put at risk the group's capacity to carry on its business in one or more of the geographic regions in which the group will operate following the Acquisition, and may be more costly than expected to remedy.

THE FINANCIAL CAPACITY OF, AND RECOURSE TO, THE VENDOR MAY BE LIMITED AND THERE IS COUNTERPARTY AND CONTRACTUAL RISK

The ability of Frontier to achieve its stated objectives will depend on the performance by the parties of their obligations under the agreements for, and related to, the Acquisition. If any party defaults in the performance of their obligations, it may be necessary for Frontier to approach a court to seek a legal remedy, which can be expensive and time consuming.

Furthermore, if a warranty, indemnity or other claim was made by Frontier against the vendor under any Acquisition agreement, there is a risk that such claim may be contested or that funds may not be available to meet the claim in its entirety. Any inability to recover amounts claimed under any acquisition agreement could materially adversely affect Frontier's financial position and performance.
