## **REDCASTLE RESOURCES LTD (FORMERLY TRANSCENDENCE TECHNOLOGIES LIMITED) DECEMBER 2021 QUARTERLY ACTIVITIES REPORT**

The Board of Redcastle Resources Limited (**RC1** or the **Company**) provides the following report on its activities for the quarter ended 31 December 2021.

During the quarter, the Company has completed re-compliance with Chapters 1 and 2 of the ASX Listing Rules and has been reinstated to official quotation on 24 December 2021. The Board wishes to thank shareholders for their patience.

The Company is now a gold and mineral resources exploration company. Its immediate focus will be pursuing success at its 100% owned Redcastle Gold Project. The Redcastle Gold Project covers a prospective area of 1,088ha, surrounding the locality of the historical Redcastle Mining Centre within the Mt Morgans District of the Mt Margaret Mineral Field of WA, approximately 60km east of Leonora and 60km west of Laverton in the North-eastern Goldfields. Gold was originally discovered at the Redcastle Mining Centre in 1897. The Company has identified immediate target areas based on its review of historical exploration results including drilling programs by previous owners.

Programme of Work Reg ID 100494 has been lodged with the Department of Mines, Industry Regulation and Safety (DMIRS) and assessment is now complete and approval has been granted on 7<sup>th</sup> January 2022, with an 18-hole 1275-metre RC drilling programme now marked out and due to commence during February 2022. The drilling is to confirm:

- Orientation and continuity of the known mineralisation
- Details regarding the extent of the historic underground workings
- Preliminary geotechnical data

Having raised \$4.5m under its re-compliance prospectus, the Company is well funded to carry out its activities at the Redcastle Gold Project as well as pursuing other opportunities within the mineral resources industry.

The Board has significant expertise and experience in the resources industry particularly with the appointment of Mr Trevor Dixon as technical director. Mr Dixon is an entrepreneur with more than 30 years of experience in the mining and exploration sector in Western Australia. He was a founding vendor to listed companies including Jubilee Mines, Terrain Minerals, Regal Resources and Kin Mining where he served as the founding managing director and former chairman.

## Background to the Project

The Project is a gold focused holding consisting of:

- a) one (1) pending Mining Lease (MLA) (which is expected to be granted in the next 3-6 months, following native title negotiations);
- b) one (1) granted Mining Lease (ML); and
- c) nine (9) granted Prospecting Licences (PL's),

covering a prospective area (1,088ha) surrounding the locality of the historical Redcastle Mining Centre within the Mt Morgans District of the Mt Margaret Mineral Field of WA approximately 60km east of Leonora and 60km west of Laverton in the North Eastern Goldfields.

The tenements comprising the Project (**Tenements**) are set out below:

Gold was originally discovered at the Redcastle mining centre in 1897.

Gold targets are located within highly altered and sheared mafic rocks that have been intruded by small ovoid granites and porphyries. Several significant historical drill intersections that have never been followed up present as immediate target areas.

The northern portion of the project area hosts the 7.5km long east-west trending mineralised 'Redcastle Reef' (Fig1)

Exploration is focusing on the delineation of structures sub-parallel to the Redcastle Reef that could potentially be concealed beneath the weathered regolith. The majority of mineralised zones in the Redcastle area are open along strike and at depth, they have not been tested beneath the zone of weathering and oxidation, 40-50m (vertical depth). The Redcastle Reef and associated sub-parallel structures are the most obvious target zones.

**Figure 1 Redcastle tenement holding and regional geology**

The source of the alluvial gold on the holdings with the exception of the Redcastle Mining Centre remains unknown however additional mineralisation on site could be sitting directly above an as yet undiscovered sub-parallel reef, related to the Redcastle Reef, that is concealed beneath the regolith.

The Redcastle Reef appears to be a large scale, late stage local dilational feature caused by folding and subsequent brittle fracturing of the mafic greenstone sequence along granitic contacts.

The local greenstone terrain is characterised by open, upright folds, low grade metamorphism and relatively continuous stratigraphy. Regionally the Redcastle Project area is separated by the Keith-Kilkenny Tectonic Zone, to the west, and the Laverton Tectonic Zone to the east with polyphase deformation, variable metamorphic grade, discontinuous stratigraphy and an association with fault bound polymictic conglomerates developed during late extension.

Gold mineralisation is associated with NW trending quartz lodes and the alluvial cover in close proximity to such lodes. The most extensive workings are for eluvial gold but numerous hard rock workings are scattered throughout the Redcastle area. The majority of the district's major producers lie within or immediately adjacent to a major tectonic zone. Gold mines in mafic sequences tend to occur in quartz reefs in dilational fault zones with little host rock alteration.

Following the Acquisition, the Vendors of the Tenements will retain rights to all alluvial gold and a 2% overriding gross royalty over all minerals sold from the Tenements.

Further details with respect to the Project were included in the notice of meeting lodged with ASX on 10 September 2021 and the Prospectus dated 20 September 2021.

### **BUSINESS MODEL OVERVIEW**

Following completion of the Public Offer and the Proposed Acquisition, the Company's proposed business model will be to further explore and develop the identified mineral deposits at the Project. The Company's main objectives on completion of the Public Offer are:

- a) systemically explore the Project for gold through geological mapping, surface sampling and drilling on the Project;
- b) continue to pursue other acquisitions that have a strategic fit for the Company;
- c) focus on mineral exploration or resource opportunities that have the potential to deliver growth for Shareholders;
- d) implement a growth strategy to seek out further exploration and acquisition opportunities; and
- e) provide working capital for the Company.

### **CHANGE OF NAME**

On completion of the Acquisition, the Company has changed its name to 'Redcastle Resources Limited'.

### **SHARE CONSOLIDATION AND COMPLETION OF RE-COMPLIANCE**

During the quarter, the Company completed the 1 for 2.858 share consolidation which was approved by the shareholders at the General Meeting held on 12 October 2021.

Subsequent to the end of the quarter, the Company issued 267,500,000 shares as part of its re-compliance with chapter 1 and 2 of the listing rules, comprising of:

1. 42,500,000 consideration shares to vendors
2. 225,000,000 shares pursuant to the public offer

In addition, 30,000,000 Lead Manager options and 12,000,000 Director options were issued.

The updated capital structure of the Company is as follows:

Description	Number
Ordinary Fully Paid Shares	328,284,155
Unlisted Options (exercisable at \$0.091; expiry 4/12/2022)	6,298,113
Unlisted Options (exercisable at \$0.03; expiry 13/12/2025)	42,000,000

## CASH POSITION

At the end of the quarter, the Company had cash reserves of approximately \$4.147 million. The Appendix 5B report attached to this report contains the Company's cash flow statement for the quarter.

### Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
