

Holista Delivers Record Full-Year Revenue and Positive Outlook for 2022

ASX Announcement

28 February 2022

Highlights

- Full-year revenue jumps 13% to a record high of \$8m with three out of four of Holista's businesses contributing to the growth
- Net loss before tax improves significantly to \$1.2m (2020 loss: \$5.6m) despite the impact of the COVID-19 global crisis
- Dietary Supplements is a major contributor to the improved results as sales increase 18% to \$6.2m over the previous corresponding period (pcp)
- Food Ingredients sales lift 33% pcp to \$1.4m and Ovine Collagen sales rise 43% pcp to \$248k
- Infection Control sales detracted but is expected to stage a turnaround this year
- Positive 2022 outlook with multiple growth opportunities and improving trading conditions across all divisions

Holista Colltech Limited (ASX: HCT, **Holista** or the **Company**) is pleased to provide the following commentary in respect to its unaudited FY2021 full year results.

Holista and its consolidated entities (the **Group**) posted a 12.9% increase in Group revenue to a record high of just over \$8 million for the 12-months ended 31 December 2021 as the full year net loss before income tax expense narrowed significantly to \$1.2 million from a loss of \$5.6 million in the previous year.

The improved result was achieved despite the negative impact of COVID-19 with three out of four of Holista's key divisions delivering strong growth over the previous corresponding period (**pcp**).

Divisional Performance

The Company's Dietary Supplements division continued to be the largest income contributor to the Group. Revenue from this business jumped by 18% to \$6.2 million as sales rebounded strongly from the easing in COVID-19 restrictions in Malaysia and an increase consumer focus on health and wellbeing.

Holista's Healthy Food Ingredients business division was another standout as sales lifted by 33% to \$1.4 million in 2021. The result was driven by increased orders for Holista's GI Lite™ innovation from US-based Costanzo's Bakery, Inc. and HWH International, and increased orders for its proprietary 80Less™ healthy sugar substitute from drinks manufacturer Rex Industry Berhad.

The Collagen Manufacturing business division also grew strongly with sales up by 43% to \$248,000 in 2021 compared to the previous corresponding period.. The improvement is mainly due to increased orders from Behn Meyer in Thailand as the COVID-19 restrictions eased.

However, revenue from Holista's Infection Control division fell to \$229,000 in 2021 from \$665,000 in the pcp. Supply chain disruptions from COVID-19 contributed to the disappointing result, although sales have started to recover in recent months and the launch of new products are expected to further lift the performance of this business in 2022.

Expenses and Profit

Holista posted a significant improvement in pre-tax net loss to \$1.2 million in 2021 compared with a \$5.6 million loss in the 2020 financial year. Net loss after tax also improved materially to \$1.3 million versus \$5.7 million in the previous year.

A decrease in expenses and the change in the sales mix between Holista's various businesses were the main drivers for the improved loss position.

The Company's Dietary Supplements and Ovine Collagen divisions generated better margins as these are more established businesses, while the Healthy Food Ingredients and Infection Control Solutions divisions are expected to see improved margins as these businesses continue to scale up.

Outlook

Holista is expecting to deliver further growth in revenue and earnings with its four businesses facing better trading conditions and the following in 2022.

The Supplements business continues to see strong demand for its supplements and vitamins in light of the ongoing easing of COVID-19 social restrictions in Malaysia. The launch of Holista's water soluble vitamin D product is also expected to contribute to growth in this business. Vitamin D is increasing being recognised a key nutrient for immunity and Holista will continue to use this opportunity in Malaysia and other countries.

The outlook for Food Ingredients is also bright following the 12th of October 2021 announcement of a term sheet collaboration agreement with Country Farms (the Agreement), a wholly owned subsidiary of Berjaya Corporation Berhad, to customise and commercialise the Company's unique healthy food innovations for several international franchises under Berjaya's umbrella.

Country Farms has completed the final testing of a healthier version of croissant that will be launched in 327 Starbucks stores across Malaysia in the second half of 2022, and Holista expects more food products using its technology to be announced later this year.

Under the Agreement, Country Farms will be the Centre of Distribution for Holista's range of healthy food products for companies within the Berjaya group, which includes the franchises of Starbucks, 7-Eleven and Kenny Rogers Roasters, amongst others.

Holista is also working a range of plant-based meats to compliment the low GI range at the request of Starbucks Malaysia.

Meanwhile, the Ovine Collagen business could lead to an improvement in earnings this year. Guangzhou Sinbio Cosmetic Co Ltd is undertaking tests and securing regulatory approval to import Holista's cosmetic-grade collagen into China.

As part of this process, Holista's Material Safety Data Sheet (MSDS) for bulk ovine collagen has been granted approval by Chinese Customs. This will allow Holista to ship bulk raw collagen to the country for final testing.

Finally, the Infection Control business is expected to stage a turnaround this year from improved sales of its Natshield™ sanitiser, nasal balm, and wipes.

This includes the nasal balm, which was launched online in Q4 2021 and will be sold in the United States through multi-level marketing network in the near future; and the previously announced SARS-CoV-2 rapid test kit branded as Gene Sign that is awaiting final approval by regulators in Colombia.

Securing the approval in Colombia will also give Gene Sign corresponding approvals in Brazil, Argentina and Mexico thanks to an arrangement between the four countries.

In North America, Gene Sign is also in the process of gaining approval under the Medical Device Single Audit Program (MDSAP) with the United States Food and Drug Administration (FDA).

Separately, Gene Sign's Reverse-Transcription Loop-Mediated Isothermal Amplification (RT-LAMP) technology is undergoing final evaluation in the United Kingdom to secure COVID Testing Devices Authorisation (CTDA) that will allow it to be sold in that market. Similar application is being undertaken in Colombia.

This announcement has been approved by the Board of Directors. All figures are unaudited and subject to change.

The final audited figures will be included in Holista's Annual Report, which is being finalised.

Company Update

Group Operations Review:

Holista Colltech Limited (**Holista** or the **Company**) posted a 12.9% increase in group revenue to a record high of just over \$8 million for the 12-months ended 31 December 2021 as the full year net loss before income tax expense narrowed significantly to \$1.2 million from a loss of \$5.6 million in the previous year. Net loss after tax also improved materially to \$1.3 million versus \$5.7 million in the previous year.

The improved result was achieved despite the negative impact of COVID-19 with three out of four of Holista's key divisions delivering strong growth over the previous corresponding period (**pcp**).

During the 2021 financial year (**FY2021**), Holista and its controlled entities (the **Group**) focused on the following four core business areas:

- Healthy Food Ingredients
- Infection Control Solutions
- Dietary Supplements ; and
- Ovine Collagen

Dietary Supplements:

The Company's Dietary Supplements business division continued to be the largest income contributor to the group. Revenue from this business jumped by 18% to \$6.2 million as sales rebounded strongly from the easing of COVID-19 restrictions in Malaysia, increased consumer focus on health and wellbeing, and the launch of a new health supplement called Hydro D in Q3 FY2021.

Hydro D is a water-soluble vitamin D that has far better absorption compared to fat-soluble base and more efficient to supplement the body's immune system. Studies have also shown that deficiency in Vitamin D contributes to the causal pathway of COVID-19 mortality risk and disease severity¹.

Holista is planning to develop other new products to be sold commercially this year, including chewable Omega-3 gummies for children.

Healthy Food Ingredients:

Holista's Healthy Food Ingredients business division increased sales by 33% to \$1.4 million in FY2021. The result was driven by increased orders for Holista's GI Lite™ innovation from US-based Costanzo's Bakery, Inc. and HWH International, and increased orders for its proprietary 80Less™ healthy sugar substitute from drinks manufacturer Rex Industry Berhad.

Ovine Collagen:

The Collagen Manufacturing business division also grew strongly in the period with sales up by 43% to \$248,000 in FY 2021 compared to the previous corresponding period. The improvement is primarily due to increased orders from Behn Meyer in Thailand as the COVID-19 restrictions eased.

Infection Control Solutions:

Holista's Infection Control Solutions business division achieved sales of \$229,000 in FY2021 compared with \$665,000 in the previous corresponding period. This is the second year that this business contributed to the Group's revenue.

Supply chain disruptions from COVID-19 contributed to a drop in revenue, although sales have begun to recover in recent months with the launch of new products, such as the nasal balm, expected to lift the performance of this business in 2022.

Company Update (continued)

Outlook

Holista is expecting to deliver further growth in revenue and earnings with its four businesses divisions facing better trading conditions and the following in 2022.

The Supplements business continues to see strong demand for its supplements and vitamins in light of the ongoing easing of COVID-19 social restrictions in Malaysia. The launch of Holista's water soluble vitamin D product is also expected to further contribute to growth in this business.

The outlook for Food Ingredients is bright following the 12th of October 2021 announcement of a term sheet collaboration agreement with Country Farms, a wholly owned subsidiary of Berjaya Corporation Berhad, to customise and commercialise the Company's unique healthy food innovations for several international franchises under Berjaya's umbrella.

Country Farms has completed the final testing of a healthier croissant that will be launched in 327 Starbucks stores across Malaysia in the second half of 2022, and Holista expects more food products using its technology to be announced later this year.

Under the agreement, Country Farms will be the centre of distribution for Holista's range of healthy food products for companies within the Berjaya group, which includes the franchises of Starbucks, 7-Eleven and Kenny Rogers Roasters, amongst others. Holista is also working a range of plant-based meats to compliment the low GI range at the request of Starbucks Malaysia.

Meanwhile, the Ovine Collagen business could also lead to an improvement in earnings in FY2022. Guangzhou Sinbio Cosmetic Co Ltd is undertaking tests and securing regulatory approval to import Holista's cosmetic-grade collagen into China. As part of this process, Holista's Material Safety Data Sheet (MSDS) for bulk ovine collagen has been granted approval by Chinese Customs. This will allow Holista to ship bulk raw collagen to China for final testing.

Finally, the Infection Control business is expected to stage a turnaround during FY2022 from improved sales of its Natshield™ sanitisers, nasal balm and wipes.

This includes the nasal balm, which was launched online in Q4 2021 and will be sold in the United States through multi-level marketing network in the near future; and the previously announced SARS-CoV-2 rapid test kit branded as "Gene Sign" that is awaiting final approval by regulators in Colombia.

Securing the approval in Colombia will also give Gene Sign corresponding approvals in Brazil, Argentina and Mexico thanks to an arrangement between the four countries.

In North America, Gene Sign is also in the process of gaining approval under the Medical Device Single Audit Program (MDSAP) with the United States Food and Drug Administration (FDA).

Separately, Gene Sign's Reverse-Transcription Loop-Mediated Isothermal Amplification (RT-LAMP) technology is undergoing final evaluation in the United Kingdom to secure COVID Testing Devices Authorisation (CTDA) that will allow it to be sold in that market. Similar application is being undertaken in Colombia.
