APPENDIX 4E

ASX PRELIMINARY FINAL REPORT FOR THE YEAR ENDED 31 DECEMBER 2021

1 REPORTING PERIOD

Reporting period "Current period" From 1 January 2021 to 31 December 2021
Previous corresponding period From 1 January 2020 to 31 December 2020

2 RESULTS FOR ANNOUNCEMENT TO THE MARKET

			\$,000
Revenue from ordinary activities	down	35%	to 20,533
Profit (loss) from ordinary activities after tax attributable to members	down	2%	to 8,541
Net profit (loss) for the period attributable to members	down	2%	to 8,541
		2021	2020
Net asset value per share		\$1.215	\$1.205
Net asset value per share at fair market value		\$1.782	\$1.622

During 2021 the Company paid two dividends to shareholders. A final dividend of 3.0 cents per share franked to 100% on 30 April 2021 and an interim dividend of 3.1 cents per share franked to 100% on 29 October 2021.

	Record date	Date payable	Amount per security	Franked amount per security
Current year				
Final dividend	16 April 2021	30 April 2021	\$0.030	\$0.030
Interim dividend	16 October 2021	29 October 2021	\$0.031	\$0.031
Previous year				
Final dividend	16 March 2020	30 March 2020	\$0.028	\$0.028
Interim dividend	16 October 2020	30 October 2020	\$0.029	\$0.029

Commentary on results for the period

During the period ended 31 December 2021, the Company:

- **Delivered a profit before tax of \$12.19 million (2020: \$12.42 million)**
- **Increased visible leasing revenue to \$9.2 million (2020: \$9.0 million)**
- **Paid two fully franked dividends totalling 6.1 cents per share; and**
- **Provided Shareholders with targets for the next four dividend payments.**

Pricing on the Company's permanent water portfolio has continued to stabilise in what has been a challenging time for the global economy, reaffirming that water as an asset class can continue to perform well even in times of uncertainty.

The NAV from a Fair Market Value perspective at 31 December 2021 was \$1.78 which has increased from \$1.62 at 31 December 2020. After experiencing a pull back in NAV in early 2020 due to a pricing correction for permanent water assets, prices have continued to rise with general and high security prices increasing in value especially through the second half of the year.

At 31 December 2021, the Company is carrying \$97.35 million (or \$0.81 per share) of unrealised capital gain on the water portfolio. This is excluded from the statutory financial statements due to the application of Australian Accounting Standards.

The NAV of the Company in accordance with Australian Accounting Standards (which excludes unrealised gains) at 31 December 2021 is \$1.22 per share (31 December 2020: \$1.21 per share).

The statutory NAV position of the Company includes accumulated impairment losses of \$0.171 million across the Company's water asset portfolio.

31 December 2021	Per Company Statement of Financial Position \$'000	Per Fair Market Value* \$'000	Variance \$'000
Assets			
Permanent water entitlements	241,111	338,366	97,255

* Fair Market Value is evaluated on a monthly basis by the Company's independent valuer "Aither Pty Ltd".
It is a non IFRS measure that is not reviewed or audited by the Company's auditor.

3 DIVIDENDS

31 December 2021	Amount per security	Franked amount per security at 30%	Amount per security of foreign source dividend cents
Final dividend(s)			
Current year	\$0.030	\$0.030	-
Previous year	\$0.028	\$0.028	-
Interim dividend(s)			
Current year	\$0.031	\$0.031	-
Previous year	\$0.029	\$0.029	-

On 28 February 2022, the Director's announced a final dividend of 3.2 cents (\$0.032) per ordinary share franked to 100% with a record date of 15 April 2022 to be paid on 29 April 2022.

4 DIVIDEND REINVESTMENT PLAN

The Board has determined that the Dividend Reinvestment Plan (DRP) will continue to operate for the final dividend for the 2021 financial year (payable 29 April 2022). Participants in the DRP are entitled to a 3% discount to the share price (based on a 5-day VWAP prior to the record date, as determined in accordance with the DRP Rules). The last day for elections under the DRP is 18 April 2022.

2021 DECEMBER

ANNUAL REPORT

Personal Use Only

Duxton Water's Investment Manager is part of the broader Duxton group of companies that operates Australian agricultural businesses in viticulture, dried fruit, nuts, broadacre, bees, dairies and apples. In any given year, the Duxton businesses produce 15-20 different commodities and provide jobs for over 500 people living in rural communities every year.

For personal use only

We are one of Australia's leading water lease providers that proudly supported over 100 small and large Australian farming business in 2021. Our purpose is to provide farmers with access to water through long-term water leases at a fraction of the cost of owning the same water licenses outright.

CHAIRMAN'S LETTER TO SHAREHOLDERS

For personal use only

Thursday 24 February 2022

Dear Shareholders,

It is my pleasure to present to you, the FY2021 annual financial report for Duxton Water Limited. While 2021 was a challenging year for many businesses, **Duxton Water has delivered another great outcome for its shareholders in FY2021.**

Our business model of partnering with farmers, both large and small to assist with managing their water supply has continued to be met with positivity from our lessees and irrigator customers. This year we continued to support several agricultural industries including but not limited to dairy, viticulture, citrus, broadacre, olives, tree nuts, apples, and dried fruit.

This water year has seen a significant improvement in rainfall experienced over the Murray Darling Basin when compared to the last 4 years. This widespread rainfall has caused flooding and dam spill events over the last 4-5 months, which has caused harvest and crop quality challenges for basin irrigators.

Major dam storages are at their highest levels of the last 10 years which should support strong opening allocation announcements for next season. We have continued to provide our range of water supply products (leases, forwards, spot sales and carry over) to our customers during these wetter conditions, so they can proactively plan for upcoming seasons.

FY2021 saw the execution of our first 10-year water lease which provides a supply of water for this customer until 2031. We believe this to be one of the first 10 year leases in Australia. While irrigators tend to use less water in the wetter years, we are starting to see an increased demand from irrigators looking for longer term water security (5-10 years+).

For personal use only

We have continued to look for new opportunities to expand and diversify our lease book. Focusing on long-term water leases not only provides us with a stable and visible revenue stream, but also reduces our exposure to the spot allocation market. This means our revenue generated from temporary allocation sales will continue to fall as a percentage of overall revenue, whilst lease revenue will continue to increase. By focusing on the long-term leasing portfolio, we reduce our exposure to the variable pricing seen in the temporary spot market.

Over the last five years, Duxton Water has supported 100's of Australian farming businesses by providing long term water leases, forwards, or spot allocation sales, and 2021 was no different. Even though **FY2021 has brought us back to a wetter part of the climatic cycle, our long-term view of providing consistent and stable returns to shareholders remains strong.**

We continued to meet our fully franked dividend targets and provide additional dividend targets out to 2024. Our composition of high and general security assets has meant our long-term portfolio appreciated in value by 10% and we have continued to lock away new long term water leases to maintain our strong leasing revenue stream.

Through the establishment of Duxton Water Limited, shareholders have been able to obtain exposure to an alternative asset class in Australian water entitlements. We solely invest in the Australian water assets. Through 2021, we continued to develop and mature our portfolio of water assets, primarily focused in the southern Murray Darling Basin. **100% of our water assets are active in the delivery of water to Australian irrigation businesses.** This is facilitated through entitlement leases as well as the provision of both spot allocation and forward contract allocation sales.

Leases

Our long-term water leases provide irrigators with a fixed and reliable supply of water each year. These leases are a useful risk mitigation tool for irrigators to take advantage of when it comes to navigating Australia's unpredictable and harsh climate. Our leases allow farmers to invest capital into land and production assets rather than having their balance sheets tied up in water ownership. **Typically, a farmer can generate a higher return from owning land assets when compared to water assets, hence our long-term water leases are a great value proposition for irrigators looking to expand their operations.**

Our business model aims to provide a stable and visible leasing revenue stream to our shareholders by leasing out our permanent water entitlements to Australian farming businesses. The price for long-term water leases is dictated by the market and is largely dependant on climatic conditions.

We received leasing revenue of \$9.2 million in FY2021 which is comparable to FY2020. As a percentage of the portfolio, our leasing revenue represents 75% of our portfolio by value. The allocation received on the remainder of our portfolio is periodically sold down into the spot allocation market throughout the water year.

At 31 December 2021, we had a WALE (weighted average lease expiry) of 1 year which increases to 4.5 years with the inclusion of the current renewal options. **Based on the current lease book and the leases we have contracted to commence in the new water year, our WALE on 1 July 2022 is expected to be 1.8 years or 6.1 years including renewal options.**

We will continue to engage with existing and new customers to lock in long term leasing arrangements to further support our WALE and leasing revenue stream as leases continue to roll off. **We expect our forecasted WALE of 1.8 years to increase between now and 1 July 2022.**

PORTFOLIO GROWTH					
PROFIT (EBT)		EARNINGS PER SHARE		DIVIDENDS PAID	
2021	2020	2021	2020	2021	2020
\$12.2m	\$12.4m	7.1 cents	7.3 cents	6.1 cents	5.7 cents

Portfolio of Australian Water Assets

Our portfolio has continued to perform well in what has been the wettest start to the water year since 2010/2011. Our diversification strategy of owning a mix of water entitlements that differ by class, type, and location has continued to work exceptionally well for the Company and its shareholders. Over the last 5 years we have seen two wet periods and one dry period. **Through these variable and diverse conditions, we have continued to meet our business objectives and pay dividends to our shareholders in line with our stated dividend targets.**

Our portfolio of water assets was valued at \$340 million at 31 December 2021, with a total of 80GL of permanent water entitlements held. This is compared to \$320 million at 31 December 2020, when we held 81GL of permanent water entitlements. During FY2021, we repositioned part of the portfolio that generated statutory profits for shareholders but also resulted in a 1GL reduction in entitlements held.

FY2021 saw entitlement pricing continue to strengthen across most of the major entitlements within the basin. There has been significant demand for both high security and general security assets. Demand for high security permanent entitlements has come from irrigators (both large and small) who are looking to further drought proof their businesses on the back of successful 2021 harvests. There has also been strong demand from large scale permanent horticultural producers, who have a long-term and increasing, inelastic demand for water. General security assets have also drawn interest as allocations are now at 100% on general security in NSW Murray, Murrumbidgee and Lachlan. **Permanent entitlement prices in the southern basin have on average increased 16.5% since the start of 2021.**

The graphs below provide an insight into the portfolio composition at the end of the year and the table shows the change in volume of water held by entitlement type.

Entitlement Portfolio Value by Region

Water Security Breakdown

For personal use only

Since Duxton Water started in 2016, most of the major entitlements on issue in the southern basin have on average seen a Compound Annual Growth Rate (CAGR) of 16%. **These major entitlements make up a large portion of the Duxton Water portfolio and over the last 5 years have increased in value by approx. 82%.**

This value uplift is broadly reflective of long-term drivers rather than shorter term climate conditions. The demand and supply drivers of water prices are evolving as evidenced by the increasing shift from annual to permanent horticulture. Permanent horticulture has an increasing and inelastic demand for water, in both wet and dry conditions, as opposed to annual cropping that has the option to plant each year based on the current conditions.

We will continue to build our portfolio by reinvesting excess free cashflow into additional permanent water entitlements. **This will have a compounding effect not only to the assets held on our balance sheet, but also our revenue lines. This will further support our ability to continue to provide 2+ years of dividend targets.**

Water Portfolio Diversification

Financial Summary

Duxton Water reported a net profit before tax (NPBT) of \$12.2 million for FY2021 (FY2020: \$12.4 million). Even though wetter conditions have prevailed across the basin over the last 6-9 months, the Company's strong result is a testament to the durability of our portfolio, and water as a long-term investment proposition. **Our long-term view of delivering balanced returns across all parts of the climatic cycle has once again been tried and tested with a positive outcome being recognised for all shareholders.**

Whilst returns from allocation sales were lower, our leasing revenue stream and realised capital gain from rebalancing the permanent entitlement portfolio, enabled the Company to deliver another great result for our shareholders in FY2021.

We generated a strong annual EPS of 7.1 cents per share which remains relatively unchanged from last year of 7.3 cents per share in 2020. During FY2021 we paid out 6.1 cents per share of fully franked dividends to shareholders (FY2020: 5.7 cents per share fully franked).

Our balance sheet remains in a very strong position. At 31 December 2021, we had net debt of \$93 million compared to a total portfolio valuation of \$340 million. This puts our gearing at 27% which is well within our self-imposed max net debt limit of 35%. Having a self-imposed max net debt limit leaves us well placed should we wish to pursue further opportunities should they arise. **The liquid nature of water assets means we can very quickly and efficiently redeploy capital to take advantage of suitable opportunities.**

In November 2021, we commenced an on-market share buy back. With our share price trading at a 15-20% discount to our Net Asset Value, our Board felt an on-market share buy back was in the interests of all shareholders. **Purchasing shares at this discount to NAV creates value for existing shareholders and acts as a proxy to buying water at a discount; it's the cheapest water we can buy.**

Dividends

We are pleased to have delivered on both of our dividend targets in FY2021. We paid fully franked dividends of 6.1 cents per share to our shareholders during the year (FY2020: 5.7 cents per share). This comprised of a final 2020 dividend of 3.0 cents per share paid in April 2021, followed by an interim 2021 dividend paid in October 2021 of 3.1 cents per share (both franked to 100%).

The October 2021 dividend marked our ninth successive and increasing dividend paid to shareholders. Our consistent and reliable dividend stream is backed by long term leases on a stable and defensive asset class (similar to property or infrastructure). Giving consideration to our visible and steady leasing income stream, we are pleased to announce and confirm our final 2021 dividend of 3.2 cents per share (franked to 100%) to be paid in April 2022.

Our portfolio composition means we are able to provide shareholders with balanced returns over the climatic cycle (in both wet and dry years). With that said, **it gives me great pleasure to extend our long-term dividend guidance out to 2024.** We are targeting a fully franked final 2023 dividend of 3.6 cents per share to be paid in the first half of 2024. Our long-term fully franked dividend targets can be seen below:

Interim 2022 \$0.033	Final 2022 \$0.034	Interim 2023 \$0.035	Final 2023 \$0.036
DIVIDEND TARGETS ARE EXPECTED TO BE FULLY FRANKED			

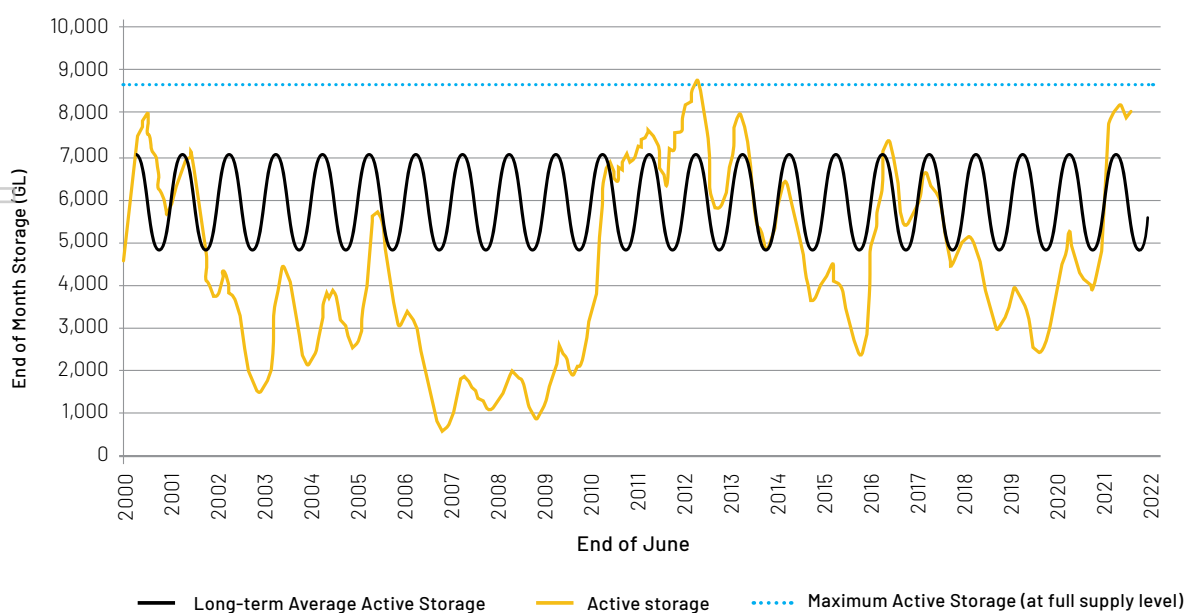

Outlook

Australian agriculture has continued to perform well over the last 12 months even with COVID-19 continuing to cause global disruption to almost all facets of business. The first 4-5 months of 2021 were drier than average with inflows being below the long-term median. Since late May, significantly wetter conditions have been persistent across most of the basin which has led to improved soil moistures, system inflows and resource availability, with dam storages being at their highest levels of the last 10 years.

The wetter conditions are largely due to the persisting La Nina event that was announced by the Bureau of Meteorology ('BOM') in November 2021. A La Nina event typically brings above average spring and summer rainfall to northern and eastern parts of Australia. When combined with the Negative Indian Ocean Dipole ('IOD') indicator that was declared in late July 2021, second half of 2021 saw significant above average rainfall over most of the basin. The current La Nina event is expected to last until early Autumn.

Our business is well equipped to handle prolonged periods of wet conditions as a significant portion of the portfolio is held in general security water entitlements. General security water entitlements are second tier entitlements that typically only receive an allocation in wetter years or when dam storages are sufficient enough to support allocations to general security entitlements. Given these wetter conditions, we have seen some interest from irrigators in relation to leasing general security entitlements. Leasing general security water entitlements provide irrigators with water in wet years and access to carry over capabilities in both wet and dry years.

MDBA Active Storage: June 2000 to early February 2022

MDBA River Murray Weekly Report - <https://www.mdba.gov.au/river-information/weekly-reports>

For personal use only

Across the basin, all major dam storages are now above 90% of capacity. This resetting event provides irrigators with a great opportunity to set themselves up for the coming water years. We help to facilitate our customers execute on their annual water strategies through our long-term water leases, forwards and spot allocation sales, and carry over solutions.

Murray System Daily Inflows (excl. Snowy Darling, inter-valley trade and environmental inflows) - 5 day rolling average

MDBA River Murray Weekly Report - <https://www.mdba.gov.au/river-information/weekly-reports>

The Board and I would like to thank you for your continued support and interest in Duxton Water.

Kind regards
Ed Peter

DIRECTORS' REPORT

FOR THE YEAR ENDED 31 DECEMBER 2021

The Directors of Duxton Water Limited submit here with their Directors' Report, the financial report of Duxton Water Limited ("the Company") for the year ended 31 December 2021, and the Auditors' Report. In order to comply with the provisions of the Corporations Act 2001, the Directors Report as follows:

Directors

The names of the Directors of the Company that held office during and since the end of the financial year are:

Mr Edouard Peter
Mr Stephen Duerden
Mr Dirk Wiedmann
Mr Dennis Mutton
Mr Peter Michell (resigned 28 May 2021)
Dr Vivienne Brand

The above named Directors held office during the whole of the financial year and since the end of the financial year unless otherwise stated.

The office of company secretary is held by Mrs Katelyn Adams.

Remuneration of key management personnel

Information about the remuneration of key management personnel is set out in the remuneration report section of this Directors' Report. The term 'key management personnel' refers to those persons having authority and responsibility for planning, directing and controlling the activities of the Company, directly or indirectly, including any Director (whether executive or otherwise) of the Company.

Principal activities

There has been no change in the principal activities of the Company. The Company has continued to acquire and manage a portfolio of Australian water entitlements primarily focused in the southern Murray Darling Basin. Income was derived through the provision of water supply solutions to predominantly primary producers through a combination of long-term lease arrangements and sale of temporary water allocations, to support Australian agricultural production.

There were no significant changes in the nature of the activities of the Company during the year.

Review of operations

OPERATIONAL PERFORMANCE

The underlying performance of the Duxton Water portfolio remains durable and robust. The Company has been able to consistently deliver operational gross profits and provide Shareholders with capital appreciation against a diversified portfolio of Australian water assets while paying bi-annual dividends in the short-term.

The portfolio delivered a profit before taxes of \$12.19 million for the year ended 31 December 2021 (2020: \$12.42 million). This result is strongly underpinned by the Company's leasing revenue stream which continued to perform well. **This consistent and visible revenue stream provides the Company with foresight to future financial performance and the Board can subsequently continue to provide Shareholders of Duxton Water with long term dividend targets.** Subsequent revenues from the unleased permanent portfolio and the active management and repositioning of these water assets has seen the Company to continue to generate statutory earnings from opportunities that present within the market.

The Board remains confident of the Company's ability to continue to derive strong annual returns and is committed to providing visibility to future dividend targets.

The Company has provided the following dividend announcement and targets:

- | | |
|---|-----------|
| • Final 2021 dividend of 3.2 cents (\$0.032); | Announced |
| • Interim 2022 dividend of 3.3 cents (\$0.033); and | Target |
| • Final 2022 dividend of 3.4 cents (\$0.034). | Target |
| • Interim 2023 dividend of 3.5 cents (\$0.035); and | Target |
| • Final 2023 dividend of 3.6 cents (\$0.036). | Target |

For personal use only

MATURING THE WATER PORTFOLIO

Over the past 12 months, Duxton Water has continued to develop and strategically position its permanent water portfolio. Although no new capital was raised from Shareholders in 2021, the Company actively managed and strategically matured the portfolio while unlocking statutory profit for Shareholders that is otherwise quarantined due to the accounting treatment of permanent water assets. In 2021, repositioning the permanent portfolio resulted in the Company unlocking \$8.74 million (2020: \$7.99 Million) of statutory profits through the sale of permanent water assets. **At 31 December 2021, the Company's long-term water leases represent 72% of the permanent portfolio by value.**

DEBT SUMMARY & INTEREST RATE SWAPS

The board will continue to use sensible debt funding to grow and develop the portfolio of water assets. With the Company approaching its long-term goal of having 70-80% of the portfolio deployed into long-term leases, it was thought prudent to hedge part of the Company's debt to improve long term revenue visibility. Derivative financial instruments (interest rate swaps) have been used to mitigate the Company's exposure to future interest rate movements. **Due to the economic impacts of COVID-19, interest rates have remained low which has resulted in an overall benefit to the Company.**

The Company is required to carry financial instruments (interest rate swap arrangements) at fair value. For the period ended 31 December 2021, non-cash fair value adjustments on the Company's interest rate swaps of \$2.70 million has been recognised as a negative finance expense (income) in the Company's Statement of Profit or Loss. Total fair value recognised on the Company's balance sheet for interest rate swap arrangements at 31 December 2021 is \$0.72 million. **The effective cost of borrowings (including swaps) on an annualised basis is 2.28%.**

For the year ended 31 December 2021:

Cash Finance Costs	=	\$2.319 million
Non-Cash Finance Costs	=	(\$2.709) million
Total Finance Costs/(Income)	=	(\$0.390) million

Average debt drawn during 2021 = \$104.733 million

Key metrics	2021	2020	2019	2018	2017

Dividends per share	\$0.061	\$0.057	\$0.053	\$0.049	\$0.023
Share price (at 31 December)	\$1.53	\$1.41	\$1.44	\$1.51	\$1.12
Return on capital employed	\$0.0468	\$0.067	\$0.054	\$0.067	\$0.038

Financial overview

During the period ended 31 December 2021, the Company:

- Delivered a profit before tax of \$12.19 million (2020: \$12.42 million)
- Increased visible leasing revenue to \$9.2 million (2020: \$9.0 million)
- Paid two fully franked dividends totalling 6.1 cents per share; and
- Provided Shareholders with targets for the next four dividend payments.

Pricing on the Company's permanent water portfolio has continued to stabilise in what has been a challenging time for the global economy, reaffirming that water as an asset class can continue to perform well even in times of uncertainty.

The NAV from a Fair Market Value perspective at 31 December 2021 was \$1.78 per share which has increased from \$1.62 at 31 December 2020. After experiencing a pull pack in NAV in early 2020 due to a pricing correction for permanent water assets, prices have continued to rise with general and high security prices increasing in value especially through the second half of the 2021.

At 31 December 2021, the Company is carrying \$97.35 million (or \$0.81 per share) of unrealised capital gain on the water portfolio. This is excluded from the statutory financial statements due to the application of Australian Accounting Standards.

The NAV of the Company in accordance with Australian Accounting Standards (which excludes unrealised gains) at 31 December 2021 is \$1.22 per share (31 December 2020: \$1.21 per share).

The statutory NAV position of the Company includes accumulated impairment losses of \$0.171 million across the Company's water asset portfolio.

VALUATION EXPERT

The portfolio continues to be valued on a dry equivalent basis by Aither Pty Ltd. Aither employs a market valuation approach to determine a Fair Market Value which draws on publicly available water trade data from the relevant state water registers as well as analysis of trade data obtained from market intermediaries to calculate a dollar per ML volume weighted average price for each entitlement and allocation type. The Fair Market Value is not in accordance with the recognition and measurement requirements of the Australian Accounting Standards in relation to the accounting treatment of water assets (intangible assets). Therefore, increases in the Fair Market Value of water assets are not reported in the statutory accounts.

For financial statement reporting purposes, in accordance with the basis of preparation described in Note 2 of the financial statements, the Company's permanent water entitlements are carried at cost less any accumulated impairment losses. Temporary water allocations related to these entitlements are recognised in the Statement of Financial Position at zero cost initially. Purchased temporary water allocations are recognised at cost when acquired.

Presented below is a summary of the Company's NAV on a Fair Market Value basis compared to the basis of preparation described in Note 2 of the financial statements.

31 December 2021	Per company Statement of Financial Position \$'000	Per Fair Market Value* \$'000	Variance \$'000
Assets			
Permanent water entitlements	241,111	338,366	97,255
Temporary water entitlements	238	1,189	951
Net current and deferred tax asset	242	(29,208)	(29,450)
Net other current assets	9,724	9,724	-
Net non-current liabilities	(106,000)	(106,000)	-
Total net assets	146,035	214,071	68,756
Net asset value per share	\$1.215	\$1.782	\$0.574

31 December 2020	Per company Statement of Financial Position \$'000	Per Fair Market Value* \$'000	Variance \$'000
Assets			
Permanent water entitlements	239,819	308,434	68,615
Temporary water entitlements	10,164	10,829	665
Net current and deferred tax asset	(284)	(21,667)	(21,383)
Net other current assets	(314)	(314)	-
Net non-current liabilities	(105,292)	(103,300)	1,992
Total net assets	144,093	193,982	49,889
Net asset value per share	\$1.205	\$1.622	\$0.417

* Fair Market Value is evaluated on a monthly basis by the Company's independent valuer "Aither Pty Ltd". It is a non IFRS measure that is not reviewed or audited by the Company's auditor.

Further detail by reported segment is disclosed in Note 18 of the financial statements.

Dividends Paid

In respect of the financial year ended 31 December 2021, a final dividend of 3.0 cents per share franked to 100% at 30% corporate income tax rate was paid to the holders of fully paid ordinary shares on 30 April 2021. An interim dividend of 3.1 cents per share franked to 100% at 30% corporate income tax rate was paid to the holders of fully paid ordinary shares on 29 October 2021.

Total dividends paid for the 2021 financial year were \$7.303 million. This consisted of cash distributions of \$6.427 million and shares issued under the DRP to the value of \$0.876 million.

Future developments

Water entitlement prices have continued to perform well in what has been the wettest start to the water year since 2011. This is a testament to the robust nature of water as an asset class. Across the basin, entitlement values have increased on average by 16% last financial year. This was driven by both small and large irrigators looking to improve their long-term water security. In addition, juvenile permanent crops have continued to mature which has added further inelastic demand to the basin's annual water requirement. This has caused a number of large permanent crop producers to be active in the market with the view to increasing their long-term water security.

The BOM's outlook is for the current La Nina event to persist until early Autumn 2022. A La Nina event typically brings above average spring and summer rainfall to northern and eastern parts of Australia. This is the driving force behind the wetter conditions that have been persistent over much of the Basin over summer.

Dam storages are at their highest levels of the last 10 years which provides pro-active irrigators with a great opportunity to prepare for upcoming seasons. Although allocation prices have softened on the back of increased rainfall, demand for long term water leases remains strong. The Company is currently working with a number of existing customers to renew their current leases as well as finalising a number of leases for new customers. Typically, water leases will run for 3-5 years however there has been strong interest from irrigators looking for longer term water security (10 years).

The Duxton Water portfolio is well equipped to handle prolonged periods of wetter conditions as a significant portion of the portfolio is held in general security water entitlements. General security water entitlements are second tier entitlements that typically only receive an allocation in wet years or when dam storages are sufficient to support allocations to general security entitlements. There has been continued interest in general security entitlement leases as most of these entitlements have received a meaningful allocation this year and will act as a useful carry over tool when average to drier conditions return.

Sustainability

Duxton Water is aware of the potential risks that climate change could present to the Company and its customers across Australian Agriculture. The development of the Australian water market, is seen by many as a key tool in assisting Australian agriculture to manage climate variability. With the continued impacts of climate change, it is expected that we will see an increase in weather extremes and resource variability into the future.

The Company has sought not only to manage its own risk through the establishment of a geographically diverse and balanced water entitlement portfolio, but to also assist in the maturity and delivery of water supply products to enable our customers to better risk manage and mitigate the impacts of a changing climatic environment. The historic variable nature of Australia's climate means that Australian farmers have experience dealing with climate variability and therefore are better prepared than many to embrace new technology and evolve to meet the changes ahead.

Australia is a large and diverse landmass and climate change will continue to have mixed impacts across the country. Across the continent, Australian farmers are rising to meet the challenge of sustainably managing their landscape, water and commodity selection to maintain and increase agricultural output. Duxton Water sees itself as playing an important role in assisting Australian agriculture producers to meet these future challenges.

The Company continues to monitor and review future impacts as new information and data becomes available. This informs the Company's approach as it develops its water asset portfolio. We expect the water market to continue to adjust as market participants consider these impacts and position for future change. The Board is conscious of its approach in seeking to build a sustainable business and monitors these evolving risks and challenges through its risk assessment framework.

Environmental regulation

The Company operates in a highly regulated environment and is subject to both Commonwealth and State legislation in relation to its acquisition of water entitlement activities. Based on the results of enquiries made, the Board is not aware of any significant breaches during the period covered by this report.

COVID-19

The Investment Manager and Board of Duxton Water Ltd continue to monitor the on-going Covid-19 pandemic. The Investment Manager has put in place measures to ensure staff are able to continue to operate effectively whilst adhering to Government recommendations. This has enabled the day-to-day operations of the Company to continue with little impact and while the Board will continue to monitor and advise of any change, it does not currently foresee any significant operational impact to the business.

Indemnities and insurance of officers

The Company has agreed to indemnify all of the Directors of the Company against all liabilities to another person that may arise from their position as Directors of the Company except where the liability arises out of conduct involving lack of good faith.

The agreement stipulates that the Company will meet the future amount of any such liabilities, including costs and expenses.

The Company has paid premiums amounting to \$0.118 million to insure against such liabilities. The insurance premiums relate to:

- Costs and expenses incurred by the relevant officers in defending proceedings, whether civil or criminal and whatever their outcome;
- Other liabilities that may arise from their position, with the exception of conduct involving a wilful breach of duty or improper use of information or position to gain a personal advantage.

The Investment Manager is responsible for effecting and maintaining professional indemnity insurance, fraud and other insurance as are reasonable having regard to the nature and extent of the Investment Manager's obligations under the Investment Management Agreement.

Provided that the Investment Manager has complied with the Investment Management Agreement, it will not be liable for any loss incurred by the Company in relation to the investment portfolio. The Investment Manager has agreed to indemnify the Company for all liabilities and losses incurred by the Company by reason of the Investment Manager's wilful default, bad faith, negligence, fraud in performance of its obligations under the Investment Management Agreement or a material breach of the Investment Management Agreement.

Provided that the Investment Manager has complied with the Investment Management Agreement in all material respects, it is entitled to be indemnified by the Company in carrying out its obligations and performing its services under the Investment Management Agreement.

Directors' meetings

The following table sets out the number of Directors' meetings (including meetings of committees of Directors) held during the financial year and the number of meetings attended by each Director (while they were a Director or committee member). During the financial year, 6 board meetings and 5 audit and risk committee meetings were held.

Director	Board Meetings		Audit & Risk Committee Meetings	
	Meetings attended	Meetings held	Meetings attended	Meetings held
Mr Edouard Peter	6	6	-	-
Mr Stephen Duerden	6	6	5	5
Mr Dirk Wiedmann	6	6	-	-
Mr Peter Michell (resigned)	4	6	-	-
Mr Dennis Mutton	6	6	5	5
Dr Vivienne Brand	6	6	4	5

Research and development

The Company did not undertake any research or development during the year.

Corporate Governance

The Company's Corporate Governance Statement and ASX Appendix 4G (Key to Disclosures – Corporate Governance Council Principles and Recommendations) is available in the Corporate Governance section of the Duxton Water website at www.duxtonwater.com.au.

As at the date of the Corporate Governance Statement, the Company complies with the ASX Corporate Governance Council's Corporate Governance Principles and Recommendations 4th Edition from 1 January 2020 (unless otherwise stated).

All Ordinaries Index

The Company was pleased to have been included in the All-Ordinaries Index, as announced by the S&P Dow Jones Indices, effective at the market open on 22 June 2020. On 12 March 2021, the Company was removed from the All-Ordinaries Index during the S&P Dow Jones Indices quarterly rebalancing. This resulted primarily from an above average market growth in the technology sector, rebalancing D20 out of the index. The underlying business operations of Duxton Water remain robust and consistent.

CHAIRMAN OF THE BOARD EDOUARD PETER

Ed Peter is the Group Chairman of Duxton Asset Management (“Duxton”). Prior to forming Duxton in 2009, Ed was Head of Deutsche Asset Management Asia Pacific (“DeAM Asia”), Middle East & North Africa. He was also a member of the Deutsche Bank’s (DB) Group Equity Operating Committee and Asset Management Operating Committee. Ed joined DB in 1999 as Head of Equities and Branch Manager of DB Switzerland.

In March 2001, Ed moved to Hong Kong with Deutsche Bank and was appointed Head of Global Equities for Asia and Australia, becoming responsible for all of Global Emerging Markets Equities in the beginning of 2003. In November 2004, Ed became Head of Asian and Emerging Market Equities for the new Global Markets Division. Ed started his career in 1986 in Swiss equity sales for Credit Suisse in Geneva. In 1989, he moved to S.G. Warburg with responsibility for the sale of Swiss equities worldwide. In 1998, he was appointed Managing Director with responsibility for the International Swiss Equities and Derivatives sales force.

Mr Peter holds a Bachelor’s Degree in English Literature from Carleton College in Northfield, Minnesota. Ed’s first foray into Agricultural investing was in 1999 and he remains passionately interested in Agriculture today. He is on the University of Adelaide’s Agribusiness advisory board and the University of Adelaide’s Wine Advisory board. Ed draws and paints, makes noise on his saxophone, and can often be found flying around Australia in his bush plane when he is not in his veggie patch.

Ed is appointed to the Board of the Company as a representative of the Investment Manager.

REMUNERATION REPORT

Remuneration report (audited) – Investment Manager

The Company has appointed Duxton Capital (Australia) Pty Ltd as its Investment Manager to manage its assets and implement its investment strategy. The Company does not have any employees. The full board have appointed the Investment Manager in line with the terms of the Investment Management Agreement.

The Investment Management Agreement signed on 25 July 2016 is for an initial term of ten (10) years. After this initial term, the Investment Management Agreement will be renewed for further new terms of five (5) years, unless terminated by the Company or the Investment Manager.

Under the Investment Management Agreement, the Investment Manager will be responsible for the day-to-day management of the Company and management of the investment portfolio. Services provided by the Investment Manager include, but are not limited to, the selection, determination, structuring, investment, reinvestment, leasing and management of the Company's assets.

The Management Fee for the first calendar month from the Closing Date and for the final calendar month in which the Company is wound up or the Investment Management Agreement is terminated will be calculated using the following formula:

$$\text{Monthly Management Fee} = \frac{(\text{Days in Operation}) \times 0.85\%}{365} \times \text{Portfolio Net Asset Value on the relevant Valuation Day}$$

"Days in Operation" means the number of days in that calendar month in which the Company incurs liabilities or debts and/ or generates revenue or owns assets.

"Closing Date" means the Listing Date of the Company on the ASX.

"Portfolio Net Asset Value (PNAV)" means the total assets of the Company including water assets which for the purpose of determining the Management Fee, will be valued at fair market value based upon independent valuation, or the weighted average price of the last three applicable trades on or prior to the relevant Valuation Day, received from at least one broker, excluding outliers). Outliers are defined as a trade with greater than 10% variance from the last transacted price and transactions that are less than 10ML. (unless there are no applicable transactions greater than 10ML) less; the total liabilities of the Company excluding provisions for tax payable and Performance Fee.

"Valuation Day" means the last day in each month, unless the Directors resolve otherwise, and such other days as the Directors may determine, each being a day on which the Portfolio Net Asset Value is calculated.

The Management Fee is to be paid to the Investment Manager regardless of the performance of the Company.

Management Fees will increase if the Portfolio value increases, and decrease if the Portfolio value decreases, over the period. The Management Fee payable to the Investment Manager is calculated on the basis of the total value of the Company's assets at the applicable valuation date, including any unrealised capital gains of the Company.

The management fee paid or payable to the Investment manager for the year ended 31 December 2021 amounted to \$1.91 million (year ended 31 December 2020: \$1.88 million).

In addition to the monthly Management Fee, the Investment Manager is entitled to be paid a Performance Fee at the end of each financial year from the Company. The Performance Fee is split over two hurdles and is calculated as:

- 5% of the outperformance of the Investment Return of the Company above a hurdle return of 8% per annum up to 12% per annum; plus
- If the Investment Return is above 12% for the year then the Performance Fee will include 10% of the remaining outperformance of the Investment Return over the hurdle of 12% per annum.

The Performance Fee will be subject to a High Water Mark and will be accrued monthly and paid annually. The terms of the Performance Fee are outlined below:

The Performance Fee will be calculated by reference to the audited accounts of the Company ("Audited Accounts") adjusted to reflect the value of water assets as determined by independent valuation, and the Company will pay the Performance Fee to the Investment Manager in arrears within 30 days from the completion of the Audited Accounts.

The Performance Fee will be payable if the Company outperforms either of the First Benchmark Hurdle or the Second Benchmark Hurdle (as defined below) during any Calculation Period. The formula for calculating the Performance Fee payable to the Investment Manager for any Calculation Period is as follows:

- (a) If the Investment Return of the Company between the Start Date and the Calculation Date is less than the First Benchmark Return Hurdle (8%) then no Performance Fee is payable.
- (b) If the Investment Return of the Company between the Start Date and the Calculation Date is greater than the First Benchmark Hurdle (8%) but less than the Second Benchmark Hurdle (12%) then the Performance Fee will be:
- $$5\% \times ((\text{Adjusted Ending PNAV} - \text{Opening PNAV} - \text{Capital Raisings}) - \text{First Benchmark Return Hurdle})$$
- (c) If the Investment Return of the Company between the Start Date and the Calculation Date is greater than the Second Benchmark Hurdle (12%) then the Performance Fee will consist of two components as follows:

Component A = $5\% \times (\text{Second Benchmark Return Hurdle} - \text{First Benchmark Return Hurdle})$

Plus

Component B = $10\% \times ((\text{Adjusted Ending PNAV} - \text{Opening PNAV} - \text{Capital Raisings}) - \text{Second Benchmark Return Hurdle})$

Where:

"Investment Return" means the percentage by which the Adjusted Ending Portfolio Net Asset Value exceeds the Opening Portfolio Net Asset Value at the Calculation Date; excluding any additions or reductions in the equity of the Company including distributions paid or provided for, dividend reinvestments, new issues, the exercise of share options, share buybacks and the provision or payment of tax made since the previous Calculation Date.

"Adjusted Ending PNAV" means the PNAV at the Calculation Date, adjusted by adding back to the Ending PNAV:

- Any Distributions or reductions in capital paid or provided for during such Calculation Period; and
- Any relevant taxes paid or provided for during such Calculation Period.

"First Benchmark Return Hurdle" means an amount equal to: 8% per annum of the Opening PNAV;

- Plus 8% per annum on Capital Raisings during the Calculation Period, calculated on a time weighted basis;
- Minus 8% per annum on the amount of any Distributions paid during the Calculation Period, calculated on a time weights basis.

"Second Benchmark Return Hurdle" means an amount equal to: 12% per annum of the Opening PNAV;

- Plus 12% per annum on Capital Raisings during the Calculation Period, calculated on a time weighted basis;
- Minus 12% per annum on the amount of any Distributions paid during the Calculation Period, calculated on a time weights basis.

"Ending PNAV" means the Portfolio Net Asset Value of the Company at the end of the relevant Calculation Period.

"Opening PNAV" means the higher of Portfolio Net Asset Value of the Company at the relevant Start Date for the Calculation Period or the highest Ending PNAV since inception of the Company on which a performance fee has been paid.

"High Water Mark" means the highest Adjusted Portfolio Net Asset Value at which a Performance Fee has been paid to the Investment Manager.

"Commencement Date" means the first Business Day immediately following the Listing Date (including such extended period(s) where applicable).

"Calculation Period" commences from a "Start Date" and ends on a "Calculation Date".

"Start Date" means 1st of January of each year except for the first Calculation Period which will start on the first Business Day immediately following the Listing Date (i.e. Commencement Date).

"Calculation Date" means the 31st December of each year, except for the year in which the Company is wound up or the Investment Management Agreement is terminated, in which case the Calculation Date will be the last Business Day before the termination of the Company or the Investment Management Agreement (as applicable).

"Business Day" means a day on which banks are open in South Australia, excluding weekends and public holidays in South Australia.

The performance fee paid or payable to the Investment manager for the year ended 31 December 2021 amounted to \$nil (year ended 31 December 2020: \$nil).

A termination fee is payable by the Company to the Investment Manager if the Investment Management Agreement is terminated within the first ten years of the Agreement, unless the Company has terminated the Investment Management Agreement for default by the Investment Manager. The termination fee is equal to 5% of the PNAV of the Company, reduced by 1/60th for each calendar month elapsed after the first five years since commencement of the Investment Management Agreement up to the date of termination.

Remuneration of non-executive Directors

Details of movements in Directors Shareholdings for the period are set out in the following table:

Movements in Shares	1 Jan 2021	Exercise of Options	Other Changes*	31 Dec 2021
Mr Edouard Peter ⁽¹⁾	11,510,495	-	66,676	11,577,171
Mr Stephen Duerden ⁽¹⁾	134,010	-	101,866	235,876
Mr Dirk Wiedmann	1,402,656	-	64,445	1,467,101
Mr Peter Michell (resigned)	1,482,204	-	-	1,482,204
Mr Dennis Mutton	42,636	-	-	42,636
Dr Vivienne Brand	1,562	-	7,500	9,062
Total	14,573,563	-	222,151	14,795,714

*Other Changes represent shares that were purchased or sold during the year at an arm's length basis on the ASX. Shares held by a Director prior to their appointment date are also included as "Other Changes". There were no equity instruments granted during the period as compensation. Director shares held comprise of both direct and indirect holdings.

The Board policy is to remunerate Independent Non-Executive Directors at market rates for comparable companies for time, commitment and responsibilities. Fees for Non-Executive Directors are not linked to the performance of the Company.

In determining competitive remuneration rates, the Board review local and international trends among comparative companies and industry generally. Typically, the Company will compare Non-Executive Remuneration to companies with similar market capitalisations. These reviews are performed to confirm that non-executive remuneration is in line with market practice and is reasonable in the context of Australian executive reward practices.

Further to ongoing reviews, the maximum aggregate amount of fees that can be paid to Non-Executive Directors is \$0.250 million and is subject to approval by shareholders at the Annual General Meeting.

Details of the remuneration of the Non-Executive Directors of the Company, paid for the reported period, are set out in the following table:

Non-executive Directors (Total Remuneration)	2021 \$	2020 \$
Mr Edouard Peter ⁽¹⁾	-	-
Mr Stephen Duerden ⁽¹⁾	-	-
Mr Dirk Wiedmann	35,000	35,000
Mr Peter Michell (resigned)	14,583	40,000
Mr Dennis Mutton	45,000	45,000
Dr Vivienne Brand	40,585	3,333
Total	135,168⁽²⁾	123,333⁽²⁾

(1) These Non-Executive Directors are employed by the Investment Manager (Duxton Capital (Australia) Pty Ltd) and receive no remuneration from Duxton Water Ltd, however Duxton Capital (Australia) Pty Ltd does receive management fees and performance fees.

(2) Total Director Remuneration Fees received in cash

Options

The Directors have not received any options as remuneration by the Company during the reported period.

Independent Non-Executive Director

Stirling, South Australia
24 February 2022

Lead Auditor's Independence Declaration under Section 307C of the Corporations Act 2001

To the Directors of Duxton Water Limited

I declare that, to the best of my knowledge and belief, in relation to the audit of Duxton Water Limited for the financial year ended 31 December 2021 there have been:

- i. no contraventions of the auditor independence requirements as set out in the *Corporations Act 2001* in relation to the audit; and
- ii. no contraventions of any applicable code of professional conduct in relation to the audit.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2021

For personal use only

1 CORPORATE INFORMATION

Duxton Water Limited is a Company limited by shares, incorporated and domiciled in Australia whose shares are publicly traded on the Australian Securities Exchange under the symbol D20. Its registered office and principal place of business is located at 7 Pomona Road Stirling SA 5152.

The Company is a for-profit entity.

The financial statements were authorised for issue by the Directors on 24 February 2022.

2 BASIS OF PREPARATION

Basis of accounting

The financial statements have been prepared under the historical cost convention except for financial derivative liabilities which are at fair value. All amounts are presented in Australian dollars, unless otherwise noted.

The Company is a company of the kind referred to in ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191, dated 24 March 2016, and in accordance with that Corporations Instrument, amounts in the financial report are rounded off to the nearest thousand dollars, unless otherwise indicated.

The financial statements have been prepared by applying the going concern basis of accounting. They are based on historical costs and do not take into account changing money values or, except for financial derivatives which are measured at Fair Value.

During the period, the Company elected to change the manner in which the statement of profit and loss and other comprehensive income is presented. As per AASB 101 Presentation of Financial Statements, an entity shall present an analysis of expenses recognised in profit or loss using a classification based on either their nature or their function within the entity, whichever provides information that is reliable and more relevant. In recent comparative periods, presenting the expenses by their function through the cost of sales approach was determined to provide the users of the financial statements with the most relevant information regarding the purchase and sale of temporary water allocations. The Company has determined that presenting the expenses by their nature would provide the users with more relevant information in regards to their operation. As such, the Company has reclassified the comparative amounts to reflect this change. As a result, \$39.6 million was reclassified from 'Revenue and other income' to \$31.6 million of 'Revenue', \$8.0 million to 'Gain on entitlement sales' and \$23.3 million was reclassified from 'Cost of sales' to 'Cost of sales and leasing'.

Statement of compliance

The financial report is a general purpose financial report prepared in accordance with the Corporations Act 2001, and Australian Accounting Standards. Compliance with Australian Accounting Standards ensures that the financial statements comply with International Financial Reporting Standards ('IFRS') as issued by the International Accounting Standards Board (IASB).

Critical accounting estimates and judgements

The preparation of financial statements in conformity with Australian Accounting Standards Board (AASBs) requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

In particular, information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amount recognised in the financial statements are:

a) Permanent water entitlements

Permanent water entitlements are treated as intangible assets on the Statement of Financial Position at cost (in accordance with AASB 138 Intangible Assets). It has been determined that there is no foreseeable future limit to the period over which the asset is expected to generate net cash inflows for the entity, therefore the entitlements will not be subject to amortisation, as the permanent water entitlements have an indefinite life. Permanent water entitlements will be tested annually for impairment, unless there are indications present that the asset is impaired or if there are indications present that a previously impaired asset is no longer impaired.

b) Temporary water allocations

Temporary water allocations purchased are treated as items of inventory available for resale in accordance with AASB 102 Inventories. Temporary water allocations are measured at the lower of its individual cost and net realisable value.

3 SIGNIFICANT ACCOUNTING POLICIES

Changes in significant accounting policies

There have been no significant changes in accounting policies applied in 2021.

Leases

The Company (as lessor) generates leasing revenue through the provision of long-term leasing arrangements of permanent water entitlements to various counterparties. As lessor, the process of accounting for these leases under AASB 16 remains unchanged from AASB 117. Under AASB 16 the Company classifies all leases as either operating or finance leases using similar principles as defined in AASB 117 Leases. AASB 16 does not have any impact on the Company's financial statements for leasing arrangements where the company acts as lessor.

The Company can (as lessee) lease permanent water entitlements from various counterparties through the provision of long-term leasing arrangements. AASB 16 would ordinarily require the present value of the future lease payments to be recorded on the Company's Statement of Financial Position, however given the nature of permanent water entitlements (i.e. intangible assets) the Company has elected to not apply AASB 16 to these intangible assets.

Revenue and Other Income

Sale of temporary water allocations

The Company's revenue under AASB 15 is derived from the sale of temporary water allocations.

Revenue derived from the sale of temporary water allocations is measured based on the consideration specified in a contract with a customer. The Company recognises revenue when it transfers control over a good or service to a customer which is when the performance obligations under the contract are completed.

Customers obtain control of temporary water allocations upon settlement of the sales contract. Settlement occurs when all contractual conditions precedent have been met.

Lease of water entitlements

Income from water entitlement lease agreements is recognised on a straight-line basis over the term of the lease.

Interest income

Interest income comprises of income earned on financial assets and interest charged on overdue customer accounts in accordance with customer contracts. Interest is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be reliably measured. Interest is recognised in the Statement of Profit or Loss, using the effective interest method.

Sale of permanent water entitlements

The profit or loss on the disposal of water entitlements (which are a non-current asset) is recognised in the Statement of Profit or Loss on the date in which control of the asset passes to the purchaser, usually when an unconditional contract of sale is achieved. This gain or loss on disposal is calculated as the difference between the carrying amount of the asset at the time of disposal and the net proceeds on disposal (including incidental costs).

Impairment of Financial Assets

The Company has elected to measure loss allowances for trade receivables and contract assets at an amount equal to lifetime ECLs.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward-looking information.

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

The Company considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising security (if any is held); or
- the financial asset is more than 90 days past due.

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive). ECLs are discounted at the effective interest rate of the financial asset.

Credit-impaired financial assets

At each reporting date, the Company assesses whether financial assets carried at amortised cost are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Presentation of impairment

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

Impairment losses related to trade and other receivables, including contract assets, are presented separately in the statement of profit or loss and OCI.

Segment reporting

Operating segments are reported in a manner consistent with the internal reports which are provided to the chief operating decision maker. The chief operating decision maker, who is responsible for resource allocation and assessment of segment performance, has been identified as the board of Directors.

Goods and services tax (GST)

Revenues, expenses and assets are recognised net of the amount of goods and services tax (GST), except where the amount of GST incurred is not recoverable from the taxation authority. In this case, GST is recognised as part of the cost of acquisition of an asset or as part of an item of expense. Receivables and payables are recognised inclusive of GST.

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables. Cash flows are included in the Statement of Cash Flows on a net basis.

Income tax

Income tax expense represents the sum of the tax currently payable and deferred tax amounts.

Current tax payable is based on taxable profit for the year. Taxable profit differs from profit before tax as reported in the Statement of Profit or Loss and Other Comprehensive Income because of items of income or expense that are taxable or deductible in other years or because of items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax assets and liabilities reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

Current and deferred tax is recognised in the Statement of Profit or Loss, except when it relates to items that are recognised in other comprehensive income or directly in equity, in which case the current and deferred tax is also recognised in other comprehensive income or directly in equity, respectively.

Financial instruments

a) Recognition and initial measurement

Trade receivables and debt securities issued are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

b) Classification and subsequent measurement

Financial assets

On initial recognition, a financial asset is classified as measured at: amortised cost; FVOCI – debt investment; FVOCI – equity investment; or FVTPL. Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

c) Subsequent measurement and gains and losses

Financial assets at amortised cost

These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.

d) Financial liabilities – Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

e) Derecognition

Financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Company enters into transactions whereby it transfers assets recognised in its statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognised.

Financial liabilities

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire. The Company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

f) Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

Share-based payments arrangements

Equity-settled share-based payment transactions with parties other than employees are measured at the fair value of the goods or services received, except where that fair value cannot be estimated reliably, in which case they are measured at the fair value of the equity instruments granted, measured at the date the entity obtains the goods or the counterparty renders the service.

Water assets

a) Permanent water entitlements

Intangible assets with finite lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives (permanent water entitlements) that are acquired separately are carried at cost less accumulated impairment losses.

Permanent water entitlements are treated as intangible assets on the Statement of Financial Position at cost (in accordance with AASB 138 Intangible Assets). It has been determined that there is no foreseeable future limit to the period over which the asset is expected to generate net cash inflows for the entity, therefore the entitlements will not be subject to amortisation, as the permanent water entitlements have an indefinite life. Permanent water entitlements will be tested at least annually for impairment, unless there are indications present that the asset is impaired or if there are indications present that a previously impaired asset is no longer impaired.

b) Temporary water allocations

Temporary water allocations purchased are treated as items of inventory available for resale in accordance with AASB 102 Inventories. Temporary water allocations are measured at the lower of its individual cost and net realisable value.

Impairment of tangible and intangible assets other than goodwill

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives (permanent water entitlements) and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Permanent water entitlements

Permanent water entitlements are tested for impairment at the cash generating unit (CGU) level by comparing the CGU's recoverable amount with its carrying amount annually. Whenever there is an indication that an impairment exists, any excess of the carrying amount over the recoverable amount is recognised as an impairment loss in the Statement of Profit or Loss.

The carrying amounts of the Company's non-financial assets, other than deferred tax assets, are reviewed at each reporting date to determine if there is any indication of impairment. If such an indication exists, then the asset's recoverable amount is estimated.

An impairment loss is recognised if the carrying amount of an asset exceeds its estimated recoverable amount. The recoverable amount of an asset is the greater of its value in use and its fair value less costs to sell.

The Company determines the fair value of its permanent water entitlements based upon independent valuations.

Impairment losses are recognised in the Statement of Profit or Loss and are only reversed to the extent of previously recognised impairment.

Cash and cash equivalents

For the purposes of the Statement of Cash Flow, cash and cash equivalents include cash on hand and in banks, net of outstanding bank overdrafts.

Share capital

Incremental costs directly attributable to the issue of ordinary shares, net of any tax effects, are recognised as a deduction from equity. Income tax relating to transaction costs of an equity transaction are accounted for in accordance with AASB 112 Income Taxes.

Provisions

Provisions are recognised when the Company has a present legal or constructive obligation, as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

Earnings per share

a) Basic earnings per share

Basic earnings per share is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the financial year.

b) Diluted earnings per share

Diluted earnings per share is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares for the dilutive effect, if any.

4 REVENUE*

	2021 \$'000	2020 \$'000
Lease income from water entitlements	9,213	8,949
Sale of temporary water allocations	11,224	22,627
Other income	96	35
Total	20,533	31,611

* Refer to 'Review of Operations' on page 9 for further information on changes to Revenue.

5 OTHER EXPENSES

	2021 \$'000	2020 \$'000
Administration and marketing expenses	379	374
ASX Listing fees	53	52
Auditors remuneration - KPMG - Audit of financial statements*	53	58
Bad debt expense	678	-
Brokerage, bank fees and other expenses	4	17
Company secretary	67	65
Directors' and officers' insurance	118	128
Government water charges	241	291
Non-executive Directors' fees	135	123
Share registry costs	44	44
	1,772	1,152

*Auditors remuneration - KPMG - Audit of financial statements = \$52,674

6 IMPAIRMENT OF WATER ENTITLEMENTS

	2021 \$'000	2020 \$'000
Impairment reversal of water entitlements	41	3,622
	41	3,622

The recoverable amount the cash generating unit to which each water entitlement belongs is determined at least annually using a market based approach. Each cash generating unit constitute a discrete zone within a river system, or entitlement type. The key assumption applied to determining the recoverable amount of each cash generating unit is the estimated price per mega litre (ML).

The Company employs an independent expert to determine the fair value of entitlements. The independent expert employs a market valuation approach which draws on publicly available water trade data from the relevant state water registers as well as analysis of trade data obtained from market intermediaries to calculate a dollar per ML volume weighted average price for each entitlement and allocation type.

Water entitlements are classified as Level 3 fair value hierarchy assets (2020: Level 3). The determination of fair value is subject to unobservable judgement applied by the independent expert in selecting transactions sourced from state water registers and intermediary transaction data as input in calculating a dollar per ML volume weighted average price.

For the year ended 31 December 2021 the Company recognised a net impairment reversal of \$0.041 million against the general security portion of the portfolio. Details of information to which reportable segment the impairment reversal relates to is disclosed in Note 18.

The impairment/(impairment reversal) relates to the following entitlement types held:

	2021 \$'000	2020 \$'000
Murrumbidgee Zone 13 GS	(212)	(1,173)
Murray Zone 10 GS	-	(1,431)
Murray Zone 10 HS	171	-
Murray Zone 11 GS	-	(1,018)
	(41)	(3,622)

Price change sensitivity

If the fair market price of the impaired assets listed above changed by 1%, this would result in a change to the statutory impairment expense in the Statement of Profit or Loss of \$0.209 million (2020: \$0.165 million).

7 TAXATION

	2021 \$'000	2020 \$'000
--	----------------	----------------

a) Recognised in the statement of profit or loss and other comprehensive income

Current tax expense	3,026	2,931
Deferred tax expense	632	795
Total income tax expense	3,658	3,726

b) Recognised in the statement of changes in equity

Deferred tax expense (benefit) – share issue expenses	-	(2)
Income tax recognised directly in equity	-	(2)

c) Numerical reconciliation between tax expense through Profit or Loss and pre-tax accounting profit:

Profit before tax	12,199	12,421
Income tax expense at 30% (2020: 30%)	3,658	3,726
Total income tax expense recognised in profit or loss	3,658	3,726

	2021 \$'000	2020 \$'000
d) Current Tax Liability		
Current tax expense recognised through profit or loss	3,027	2,931
Income tax instalments paid	(1,580)	(1,772)
Current tax liability	1,447	1,159

	2021 \$'000	Transactions via P&L Equity		2020 \$'000
e) Deferred Tax Asset				
Deferred tax assets (liabilities) in relation to:				
Share issue and listing costs	127	(87)	-	214
Water entitlements	127	64	-	63
Provision for bad debt	203	203	-	-
Financial derivatives	(215)	(813)	-	598
	242	(633)		875

	2021 \$'000	2020 \$'000
f) Dividend Franking Account		
Total franking account balance at 30%	1,986	2,182

The above amount represents the balance of the franking account as at 31 December, after taking into account adjustments for:

- Franking credits that will arise from the payment of income tax payable for the current year;
- Franking credits that will arise from the receipt of dividends recognised as receivables at the year end; and
- Franking credits that may be prevented from being distributed in subsequent years.

The ability to utilise the franking credits is dependent upon there being sufficient available profits to declare dividends.

8 CASH AND CASH EQUIVALENTS

	2021 \$'000	2020 \$'000
Cash at bank	6,220	2,760
	6,220	2,760

9 TRADE AND OTHER RECEIVABLES

	2021 \$'000	2020 \$'000
Trade receivables	6,725	4,672
Deposits paid	3	101
Other receivables	56	92
	6,784	4,866

Trade receivables are net of impairment of \$678k. (2020 \$nil)

10 LEASES AS LESSOR

Duxton Water leases out some of the water entitlements that it owns. At 31 December 2021 the future minimum lease payments under non-cancellable leases receivable was:

	2021 \$'000	2020 \$'000
Less than one year	8,870	9,149
Between one and five years	8,932	11,739
More than five years	394	-
	18,196	20,888

During 2021, lease income of \$9.213 million was included in revenue (2020: \$8,949 million).

11 WATER ALLOCATIONS

	2021 \$'000	2020 \$'000
Water allocations	238	10,164
	238	10,164

See accounting policy note 2.

In 2021, temporary water allocations of \$11.942 million (2020: \$22.103 million) were recognised as an expense in cost of sales. In addition, temporary water allocations have been reduced by \$0.255 million (2020: nil) as a result of the write-down to net realisable value. This write-down was recognised as an expense during 2021.

12 WATER ENTITLEMENTS

Permanent water entitlements - at cost		\$'000
Balance at 1 January 2020		235,529
Additions		11,016
Disposals		(6,514)
Balance at 31 December 2020		240,031
Balance at 1 January 2021		240,031

Disposals		(8,800)
Balance at 31 December 2021		241,282
Accumulated impairment		\$'000
Balance at 1 January 2020		3,834
Impairment loss recognised in profit or loss		(3,622)
Balance at 31 December 2020		212
Balance at 1 January 2021		212
Reversal of impairment losses recognised in profit or loss		(212)
Impairment loss recognised in profit or loss		171
Balance at 31 December 2021		171
Net book value 2020		239,819
Net book value 2021		241,111

13 TRADE AND OTHER PAYABLES

	2021	2020
	\$'000	\$'000
Trade payables	164	34
Accrued expenses	578	261
Other payables	202	127
	944	422

14 INTEREST-BEARING LIABILITIES

	2021	2020
	\$'000	\$'000
Bank loans - secured	106,000	109,300
	106,000	109,300

The debt is secured by a security interest and charge over all of the present and future rights, property and undertakings of Duxton Water Ltd. As per the debt agreement, the debt facility is secured by mortgages on approximately 69 GL of permanent water entitlements at 31 December 2021.

SUMMARY OF BORROWING ARRANGEMENTS

At 31 December 2021 the Company has an outstanding debt facilities with NAB:

- Limit of \$106 million due for expiry 23 December 2023. (\$106 million drawn)

Terms of borrowing arrangements:

(i) The variable interest payable on this debt facility is calculated as BBSY + Margin Fee of 0.65% p.a + Facility Fee of 0.65% p.a.

(ii) The facility is secured by mortgages on the Company's permanent water rights.

(iii) Interest is charged through a mixture of variable and fixed 5-10 year interest rate swap arrangements. Interest swap rates range from 2.3%-3.3%.

Changes to Covenants since 31 December 2020:

nil

15 EQUITY

a) Ordinary shares

	No. Shares	\$'000
Opening balance at 1 January 2020	119,880,298	137,717
Shares issued during the year (dividend reinvestment plan)	449,752	589
Shares buyback	(732,472)	(1,071)
Share issue costs - net of taxes	-	(5)
Closing balance at 31 December 2020	119,597,578	137,230
Opening balance at 1 January 2021	119,597,578	137,230
Shares issued during the year (dividend reinvestment plan)	629,648	876
Share buyback	(114,757)	(167)
Closing balance at 31 December 2021	120,112,469	137,939

Ordinary shares participate in dividends and the proceeds on winding up of the Company in proportion to the number of shares held and in proportion to the amount paid up on the shares held.

b) Dividends

Total dividends paid for the 2021 financial year were \$7.303 million. This consisted of cash distributions of \$6.427 million and shares issued under the DRP to the value of \$0.876 million.

16 EARNINGS PER SHARE

	2021	2020

Non-cash transaction

During the year, the Company entered into the following non-cash activities which are not reflected in the statement of cash flows:

- 629,648 shares (\$0.876 million) were issued under the Company's Dividend Reinvestment Plan during 2021.

18 SEGMENT INFORMATION

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker to make strategic decisions. The chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of Directors.

The amounts provided to the Board of Directors with respect to profit or loss, liabilities and assets other than water entitlement assets is measured in a manner consistent with that of the financial statements, while permanent water entitlement assets and temporary water allocations are allocated to a segment based on the geographical region of the water entitlement assets and measured on a "Fair Market Value" basis.

"Fair Market Value" for purposes of valuing the Company's water entitlement and allocation portfolio that is reported to the Board of Directors, is based on the independent monthly valuation that is undertaken by an independent expert. As a result of the change in presentation of the statement of profit or loss and other comprehensive income, the segment report for the period and comparative period have been presented to reflect the changes disclosed in Note 2.

For the year ended 31 December 2021

	Permanent Water \$'000	Temporary Water \$'000	Unallocated \$'000	Total \$'000

1. "Other" comprises of the Lachlan and Parilla regions, which individually account for less than 10% of the Company's revenue, loss before taxation, total liabilities and total assets.

2. In accordance with the Australian Accounting Standards requirements on measuring permanent water entitlements subsequent to initial recognition, fair market value increments are not included in the amounts recognised in the financial statements.

3. In accordance with the requirements of the Australian Accounting Standards, temporary water allocations obtained through owned permanent water entitlements are not recognised as assets in the Statement of Financial Position. Only those allocations separately acquired are recognised.

4. "Total segment assets" is a measure used by the Company for internal reporting purposes. For purposes of determining this measure, all assets excluding water entitlements are measured consistent with the financial statements and water entitlements is measured at fair value. The measure of water entitlements does not comply with the recognition and measurement requirements of the Australian Accounting Standards.

19 KEY MANAGEMENT PERSONNEL

The Company has appointed Duxton Capital (Australia) Pty Ltd as its Investment Manager to manage its assets and implement its investment strategy. Details of the basis of remuneration paid or payable to the Investment Manager is fully disclosed in the Remuneration Report of the Directors' Report. During the year the Company recognised management fees paid or payable to its Investment Manager amounting to \$1.914 million (2020: \$1.877 million) and performance fees paid or payable to its Investment Manager amounting to \$nil (2020: \$nil).

Key management personnel of the Company are:

- Mr Edouard Peter
- Mr Stephen Duerden
- Mr Dirk Wiedmann
- Mr Dennis Mutton
- Dr Vivienne Brand
- Mr Peter Michell (resigned 28th May 2021)

Mr Edouard Peter, Chairman of the Company, controls the Investment Manager and is a shareholder and Director of the Investment Manager's parent Company Duxton Capital Pte Ltd and as such, may receive remuneration from the Investment Manager for services provided to the Investment Manager.

Company Director, Mr Stephen Duerden, is also a shareholder and Director of the Investment Manager's parent Company and as such, may receive remuneration from the Investment Manager for Services provided to the Investment Manager.

Mr Edouard Peter has a direct interest of 433,072 shares in the Company and an indirect interest in 11,144,099 shares in the Company.

Mr Stephen Duerden has a direct interest of 41,353 shares in the Company and an indirect interest in 194,523 shares in the Company.

As shareholders of the Investment Manager, Mr Peter and Mr Duerden may receive a financial benefit from the Company as a result of payment of fees by the Company to the Investment Manager.

The Investment Management Agreement is on arms-length commercial terms and was approved by the Non-Executive Directors of the Company.

Neither Mr Edouard Peter nor Mr Stephen Duerden have received Directors' fees from the Company.

20 RELATED PARTY TRANSACTIONS

The following transactions occurred with related parties during the year ended 31 December 2021 (and the year ended 31 December 2020):

	2021 \$'000	2020 \$'000
Management fee – Duxton Capital (Australia) Pty Ltd	1,914	1,877

Financial derivative liabilities*		-	1,992
Total financial liabilities measured at fair value		106,000	111,292

* In 2021, financial derivatives on interest rate swaps appreciated in value from a liability of \$1.992 million to an asset of \$0.718 million

Financial risk management framework

The Company's board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. Risk management policies are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company, through its management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Board oversees how management monitors compliance with the Company's risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Company.

Specific financial risk exposures and management

The main risks the Company is exposed to through its financial instruments are credit risk, liquidity risk and market risk relating to interest rate risk and other price risk. This note presents information about the Company's exposure to each of the above risks, the Company's objective, policies and processes for measuring and managing risk, and the Company's management of capital.

Credit risk

Exposure to credit risk relating to financial assets arises from the potential non-performance by counterparties of contract obligations that could lead to a financial loss to the Company.

Credit risk is managed through maintaining procedures ensuring, to the extent possible, that customers and counterparties to transactions are of sound credit worthiness and the regular monitoring of exposures and the financial stability of significant customers and counterparties.

Risk is also minimised through investing surplus funds with financial institutions that maintain a high credit rating or in entities that the board of Directors have otherwise assessed as being financially sound.

Credit risk exposures

The maximum exposure to credit risk by class of recognised financial assets at the end of the reporting period is equivalent to the carrying amount and classification of those financial assets (net of any provisions) as presented in the Statement of Financial Position.

The fair values of financial assets and liabilities held by the Company at the reporting date are considered to be approximate to their carrying amounts.

There is no significant concentration of credit risk as the Company transacts with a large number of customers.

Past due and impaired assets

No financial assets carried at amortised cost were past due or impaired at 31 December 2021 (2020: \$nil).

Derivatives

The Company's derivatives are entered into with bank and financial institution counterparties, which are rated AA-, based on Standard and Poor's ratings.

Liquidity risk

Liquidity risk arises from the possibility that the Company might encounter difficulty in settling its debts or otherwise meeting its obligations related to financial liabilities that are settled by delivering cash or another financial asset. The Company manages this risk through the following mechanisms:

- preparing forward-looking cash flow analysis in relation to its operational, investing and financing activities;
- monitoring undrawn credit facilities; and
- obtaining funding from a variety of sources.

The following are the contractual maturities of financial liabilities, including estimated interest payments and excluding the impact of netting agreements.

Financial Liabilities	Note	Carrying Value \$'000	Contractual Cash Flows \$'000	6 Months or Less \$'000	Over 6 Months \$'000
Trade and other payables	13	944	944	944	-
Interest-bearing liabilities	14	106,000	108,466	622	107,844
Interest rate swaps		-	2,322	586	1,736
		106,944	111,732	2,152	109,580

Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates and interest rates, will affect the Company's income or its value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters while optimising returns.

The Company has exposure to interest rate risk through its interest-bearing loan from NAB. Movements in interest rates are not expected to have a material impact on the Company's profit or equity.

Lessor risk

The company acknowledges there are risks associated with being a lessor. Risks can include situations where the Company does not receive its lease payments, or damage is incurred to the respected asset.

To ensure corrective measures have been taken to reduce or minimise these risks, the Company utilises mechanisms to reduce the risk associated with acting as lessor in asset leasing arrangements. The Company undertakes due diligence procedures which include:

- Utilising a third-party assessor to perform background and credit checks of all lessees. This level of verification gives the Company confidence in the lessees ability to satisfy its lease payment obligations in a timely manner.
- Leasing arrangements require payment in advance. The Company does not transfer useable water associated with the lease until payment has been made in full.
- The Company maintains control of the underlying permanent water entitlement attributable to leasing arrangements.

Interest rate risk

The Company utilises a combination of floating-to-fixed interest swaps in conjunction with variable interest rates to ensure the Company can adequately risk manage the interest rate risk. Under these arrangements, the company agrees to exchange the floating rate interest amounts for fixed contract rates at negotiated principal amounts. The Company does not apply hedge accounting when accounting for the fair value movements of financial derivatives.

Fair value assessment of financial derivatives

The fair value of the Company's interest rate swaps are calculated as the present value of the estimated future cash flows. Estimates of future floating-rate cash flows are based on quoted swap rates, future prices and interbank borrowing rates. Estimated cash flows are discounted using a yield curve constructed from similar sources and which reflects the relevant benchmark interbank rate used by market participants for this purpose when pricing interest rate swaps. The fair value estimate is subject to a credit risk adjustment that reflects the credit risk of the Company and of the counterparty; this is calculated based on credit spreads derived from current credit default swap or bond prices. Interest rate swaps are classified as Level 2 fair value financial instruments.

Fair values are not based on any significant unobservable inputs. During the year, fair value changes of \$2.709 million was recognised as interest expense in the Statement of Profit or Loss and Other Comprehensive Income. There were no transfer between fair value levels during the year.

At 31 December 2021, it is estimated that a general increase/(decrease) of 1% in interest rates would increase/(decrease) the Company's profit before tax by approximately \$0.510 million (2020: \$0.593 million).

Interest bearing liabilities (carrying value)	2021 \$'000	2020 \$'000
Fixed debt (IRS arrangements)	55,000	50,000
Variable debt	51,000	59,300
Total interest bearing liabilities	106,000	109,300

Interest expenses	2021 \$'000	2020 \$'000
Cash interest expense	2,319	2,571
IRS non-cash interest expense	(2,709)	1,653
Total interest expenses	(390)	4,224

Capital management risk

For the purpose of the Company's capital management profile, capital includes issued capital and all other equity reserves attributable to the equity holders of the Company. The primary objective of the Company's capital management assessment is to maximise shareholder value.

The Company's policy is to uphold a strong capital base to maintain investor interest, creditor and market confidence and to sustain future development of the business. Management monitors the return on capital, as well as the level of dividends paid to ordinary shareholders.

The Board seeks to maintain a balance between the higher returns that might be possible with higher levels of borrowing and the advantages and security afforded by a sound capital position. The weighted average interest expense on interest-bearing borrowings (excluding liabilities with imputed interest) for 2021 was 2.3% (2020: 2.3%).

From time to time, the Company purchases its own shares on the market; the timing of these purchases depends on market prices. The objective of the Company's share buyback program is to provide value to existing shareholders by taking advantage of the gap between the Company's share price and the NAV per share all while providing market liquidity to existing shareholders.

22 CAPITAL COMMITMENT

At 31 December 2021, the Company had entered into contracts to acquire permanent water entitlements to the value of \$0.129 million (2020: \$0.263 million), and settled deposits relating to these contracts amounting to \$0.014 million (2020: \$0.029 million).

23 SUBSEQUENT EVENTS

There have been no events subsequent to reporting date which would have a material impact on the Company's 31 December 2021 financial statements.

For personal use only

DIRECTORS' DECLARATION

FOR THE YEAR ENDED 31 DECEMBER 2021

The directors declare that:

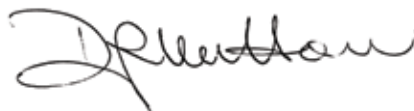

- a) in the directors' opinion, there are reasonable grounds to believe that Duxton Water Limited will be able to pay its debts as and when they become due and payable; and
- b) in the directors' opinion, the attached financial statements and notes thereto are in accordance with the Corporations Act 2001, including that:
- i. the financial report complies with Australian Accounting Standards, the Corporations Regulations 2001 and other mandatory professional reporting requirements; and
 - ii. the financial statements and notes give a true and fair view of Duxton Water Limited's financial position and performance for the year ended 31 December 2021.
- c) the audited remuneration disclosures set out on pages 37 to 40 of the Directors' report comply with section 300A of the Corporations Act 2001; and
- d) the financial statements and notes thereto are in accordance with International Financial Reporting Standards issued by the International Accounting Standards Board.

Signed in accordance with a resolution of the directors made pursuant to s.295A of the Corporations Act 2001.

Chairman

Stirling, South Australia

Independent Auditor's Report

To the shareholders of Duxton Water Limited

Report on the audit of the Financial Report

Opinion

We have audited the **Financial Report** of Duxton Water Limited (the Company).

In our opinion, the accompanying Financial Report of the Company is in accordance with the *Corporations Act 2001*, including:

- giving a true and fair view of the Company's financial position as at 31 December 2021 and of its financial performance for the year ended on that date; and
- complying with *Australian Accounting Standards* and the *Corporations Regulations 2001*.

The **Financial Report** comprises:

- Statement of Financial Position as at 31 December 2021;
- Statement of Profit or Loss and Other Comprehensive Income, Statement of Changes in Equity, and Statement of Cash Flows for the year then ended;
- Notes including a summary of significant accounting policies; and
- Directors' Declaration.

Basis for opinion

We conducted our audit in accordance with *Australian Auditing Standards*. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the Financial Report* section of our report.

We are independent of the Company in accordance with the *Corporations Act 2001* and the ethical requirements of the *Accounting Professional and Ethical Standards Board's APES 110 Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the Financial Report in Australia. We have fulfilled our other ethical responsibilities in accordance with these requirements.

We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the Directors of Duxton Water Limited, would be in the same terms if given to the Directors as at the time of this Auditor's Report.

Key Audit Matters

Key Audit Matters are those matters that, in our professional judgement, were of most significance in our audit of the Financial Report of the current period.

This matter was addressed in the context of our audit of the Financial Report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on this matter.

Carrying value of Permanent Water Entitlements (\$241.111m)

Refer to Notes 6 and 12 to the Financial Report

The key audit matter

Permanent water entitlements are recognised by the Company as indefinite useful life intangible assets, measured at acquisition cost less any impairment in value since acquisition.

The carrying value of permanent water entitlements is a key audit matter as:

- they are the most significant value assets on the Company's Statement of Financial Position and form the basis of the Company's future long term revenue and cash-flow; and
- the Company engaged an external expert to assist with the fair value less costs of disposal impairment assessment of permanent water entitlements. The fair value less costs of disposal impairment assessment applied a market approach fair value valuation technique to assess permanent water entitlements for impairment. This valuation technique used prices observed in the market for identical or comparable transactions to determine an adjusted observable selling price. We focussed our audit effort on evaluating the selection of comparable transaction data to determine an adjusted observable selling price.

How the matter was addressed in our audit

Our procedures included:

- we assessed the Company's external expert's methodology of a market approach as a fair value valuation technique and the adjustment of observable selling prices, against the criteria in the accounting standards;
- we assessed the scope, competence and objectivity of the external expert engaged by the Company; and
- with involvement of our valuation specialists:
 - we assessed the Company's market approach fair value valuation technique of using prices of recent identical and comparable transactions to calculate an adjusted observable selling price to determine the recoverable amount of the permanent water entitlements, against industry practice;
 - we independently developed adjusted observable selling prices and compared these to the Company's adjusted observable selling price and investigated differences to challenge the external expert's assumptions used in calculating the Company's recoverable amount of permanent water entitlements. This process involved obtaining transactions, by water entitlement type, from brokers and state government water trades register websites and assessing the attributes of the transactions (date, water volumes and water zone) for comparability to the entitlements held by the Company;
 - we compared the results of our independently developed adjusted observable selling prices to the recoverable amount applied in the Company's assessment of impairment and determination of impairment charge by entitlement type. We considered this impairment against our knowledge and understanding of the economic factors impacting the price of permanent water entitlements, such as expected rainfall, demand for water, expected usage and government regulation and allocation;
- we considered the sensitivity of the recoverable amount, by permanent water entitlement and in aggregate, to a reasonably possible range of dollar price per mega litre, to identify those permanent water entitlements at higher risk of impairment; and
- we assessed the disclosures made in the financial statements using our understanding obtained from our testing and against the requirements of the accounting standards.

Other Information

Other Information is financial and non-financial information in Duxton Water Limited's annual reporting which is provided in addition to the Financial Report and the Auditor's Report. The Directors are responsible for the Other Information.

Our opinion on the Financial Report does not cover the Other Information and, accordingly, we do not express an audit opinion or any form of assurance conclusion thereon, with the exception of the Remuneration Report and our related assurance opinion.

In connection with our audit of the Financial Report, our responsibility is to read the Other Information. In doing so, we consider whether the Other Information is materially inconsistent with the Financial Report or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

We are required to report if we conclude that there is a material misstatement of this Other Information and based on the work we have performed on the Other Information that we obtained prior to the date of this Auditor's Report we have nothing to report.

Responsibilities of the Directors for the Financial Report

The Directors are responsible for:

- preparing the Financial Report that gives a true and fair view in accordance with *Australian Accounting Standards* and the *Corporations Act 2001*;
- implementing necessary internal control to enable the preparation of a Financial Report that gives a true and fair view and is free from material misstatement, whether due to fraud or error; and
- assessing the Company's ability to continue as a going concern and whether the use of the going concern basis of accounting is appropriate. This includes disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the Financial Report

Our objective is:

- to obtain reasonable assurance about whether the Financial Report as a whole is free from material misstatement, whether due to fraud or error; and
- to issue an Auditor's Report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with *Australian Auditing Standards* will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error. They are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the Financial Report.

A further description of our responsibilities for the audit of the Financial Report is located at the *Auditing and Assurance Standards Board* website at: https://www.auasb.gov.au/admin/file/content102/c3/ar2_2020.pdf. This description forms part of our Auditor's Report.

Report on the Remuneration Report

Opinion

In our opinion, the Remuneration Report of Duxton Water Limited for the year ended 31 December 2021, complies with *Section 300A* of the *Corporations Act 2001*.

Directors' responsibilities

The Directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with *Section 300A* of the *Corporations Act 2001*.

Our responsibilities

We have audited the Remuneration Report included in pages 37 to 39 of the Directors' report for the year ended 31 December 2021.

Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with *Australian Auditing Standards*.
