FOR THE HALF YEAR ENDED 31 DECEMBER 2021

The Directors of Alice Queen Limited present their Report together with the financial report of the consolidated entity (referred to hereafter as the "Group") consisting of Alice Queen Limited (Alice Queen and/or the "Company") and the entities it controlled at the end of, or during, the half-year ended 31 December 2021.

Directors

The following persons held office as Directors of Alice Queen Limited during or since the end of the reporting period and up to the date of this report:

Andrew Buxton Managing Director

Dale McCabe Executive Director

Anthony McIntosh Non-Executive Director

Principal Activities

The principal activity of the Company during the reporting period was mineral exploration focused on the development of its projects at Horn Island, Queensland and in New South Wales.

Review of Operations and Financial Results

Financial Results

The Group incurred a loss after tax for the reporting period of \$7,226,997 (2020: \$930,370 loss) which includes an impairment expense of exploration and evaluation assets of \$6,318,404.

Corporate activities

 On 3 September 2021, 133,636,365 ordinary shares were issued of which 24,076,844 were issued under Listing Rule 7.1 and 109,559,521 were issued under Listing Rule 7.1A raising \$1,470,000 before costs.

Funds raised from the Placement have been applied to:

- · Complete the Horn Island Scoping Study;
- · Accelerate further exploration at Horn Island via an IP Survey; and
- Provide working capital.
- On 1 December 2021, Alice Queen announced the appointment of Mr. Nicholas Mather to the role of Strategic Advisor to the Board of Alice Queen. Mr. Mather graduated in 1979 from the University of Queensland with a B.Sc. (Hons, Geology). He is an accomplished industry professional with a track record of success in turning small companies in to big ones. Mr. Mather has laid the foundation for some AUD\$5.7 billion in returns to the shareholders of those companies. His depth of experience in contributing to the long-term growth of resources companies, from the ground up, over the past 35 years, will be invaluable to the Group and the Board looks forward to working more closely with Mr Mather.

FOR THE HALF YEAR ENDED 31 DECEMBER 2021

Review of Operations and Financial Results (continued)

Exploration activities

Queensland

Horn Island (Ngurupai) EPM 25520

On 16 August 2021, Alice Queen announced the commencement of a 49-hole close-spaced RC drilling program within the area that was the focus of the Scoping Study and also informed this study. The 1960m of angled RC drilling was on a nominal 5mx5m grid pattern, to a depth of 40m, designed to test the ability to define gold distribution from grade control spaced data.

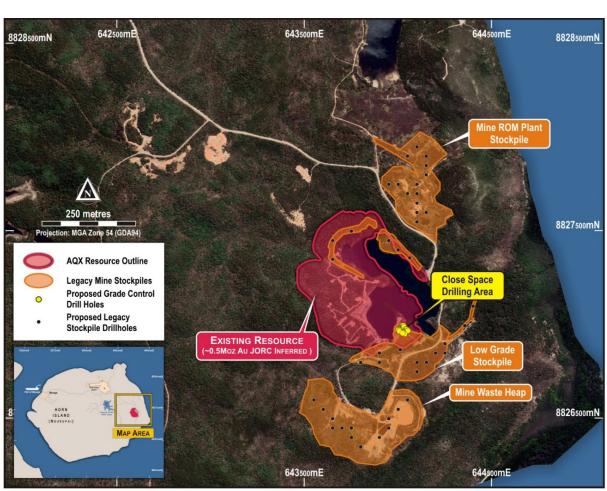

Figure 1. Planned Close Space Drilling and Legacy Stockpile drilling areas

Review of Operations and Financial Results (continued)

Horn Island (Ngurupai) EPM 25520 (continued)

Horn Island, Close Spaced Drilling Program.

FOR THE HALF YEAR ENDED 31 DECEMBER 2021

Review of Operations and Financial Results (continued)

Horn Island (Ngurupai) EPM 25520 (continued)

On 11 November 2021, Alice Queen announced its Scoping Study and MRE. The outcomes from the Horn Island Scoping Study, focusing on the immediate area of the historical open pit, present a strong economic case for ongoing studies to support the recommencing of mining. All the Mineral Resources included in this study are within the granted tenement EPM25520, which covers the entire Horn Island 35sqkm mineral filed.

A number of independent parties were engaged by The Company to complete test work, studies and reports that inform this Scoping Study. The Company engaged Peter Fairfield of Miner Insight Pty Ltd as our Study Manager, in addition we engaged Dale Sims of Sims Consulting Pty Ltd (Mineral Resource Estimate), John Wyche of AMDAD (Mine planning), Scantech and OrePortal (Bulk Ore Sorting), Tomra (Particle Ore Sorting), GR Engineering (GRES – Process and Metallurgy) and Mincore (alternate Capital Expenditure).

Highlights from the Scoping Study

- Life of Mine (LOM) 8.5 years
- Average production rate of 37koz Au per annum
- Mill feed to Waste Ratio 2.5:1
- Initial Capital Cost A\$75M
- Capital payback period of 27 months (2.25 years)
- Net Cashflow (EBITDA) of ~A\$200M
- Net Present Value (NPV) @ 5% discount of ~\$140M
- Internal Rate of Return (IRR) of 44.3%
- All-in Sustaining Costs (AISC) of A\$1,388/oz

Due to the nature of the deposit, the study found that there is opportunity to remove large amounts of waste rock through preconcentration. This reduces the scale of the mill that is required which enhances the overall economics of the project. The study found that pre-concentration by Bulk Ore Sorting (BOS) and/or Particle Ore Sorting (POS) worked well and thus the preconcentrating features are central to the scoping study results.

The Mineral Resource Estimate was completed by Dale Sims of Sims Consulting Pty Ltd. The deposit consists of thin stockwork veins, gold is associated with sulphide veins with no gold occurring in the alteration zone or host rock. The nature of the deposit is such that a lower cut-off grade can be mined, whilst this results in an overall lower grade being reported, more tonnes and more ounces can be achieved economically. By mining at a lower cut-off grade of 0.4g/t Au cut off (as opposed to 0.6g/t Au) the reported Mineral Resource is 16.7Mt @ 0.98g/t Au containing 524k ounces of gold.

For more detailed information please refer to ASX release, 11 November 2021, "Horn Island Scoping Study and MRE".

FOR THE HALF YEAR ENDED 31 DECEMBER 2021

Review of Operations and Financial Results (continued)

Horn Island (Ngurupai) EPM 25520 (continued)

On 11 November 2021 the Company commenced a ground dipole-dipole induced polarisation survey (DDIP) totaling 55-line kms and covering an extensive 11km2 prospective area from south of the Horn Island historic pit area to the Southern Silicified Ridge (SSR) (see Figure 2).

The survey was designed to identify near surface to deeply occurring chargeability anomalies which may be caused by sulphide minerals that are often associated with gold mineralisation at Horn Island.

The DDIP survey was based on the success of previously completed historic ground array induced polarisation (GAIP) surveys and the recently completed DDIP survey, which recognised a new gold zone across the Tatooine target area and may possibly represent extensions to the known resource area (see ASX release 30 June 2021, "Drilling Confirms New Broad Gold Zone at Horn Island").

Importantly, the survey will cover areas of interpretive structurally complex zones and mapped surface veining. These zones also display coincidental gold and pathfinder surface geochemistry anomalism, which collectively forms an extensive prospective hydrothermal IRG footprint (see Figure 3). This footprint is similar in scale to the Ravenwood 7M oz Au deposit (see ASX release 29 May 2019, "Dr Morrison Horn Island Metal Zonation").

Furthermore, a limited and shallow 9-hole diamond drill program previously completed by Alice Queen at the SSR prospect revealed vertical & strike extensive veined mineralisation. The best intercepts returned were 11m @ 2.9g/t Au from 70m (18NGD052) and 2m @ 5.6g/t Au from 160m incl. 1m @ 8.2g/t Au (see ASX release 21 March 2018, "SSR Results Confirm New Gold System" and 30 April 2018, Further Significant Gold Intersected at SSR).

Surface gold indicates a 3km strike which is coincident with historic GAIP chargeability anomalies located SE and outside of the Company's previously completed drilling. This adds further encouragement of a potentially large scale Intrusive Related Gold System (IRGS) that may host multiple gold deposits across Horn Island.

FOR THE HALF YEAR ENDED 31 DECEMBER 2021

Review of Operations and Financial Results (continued

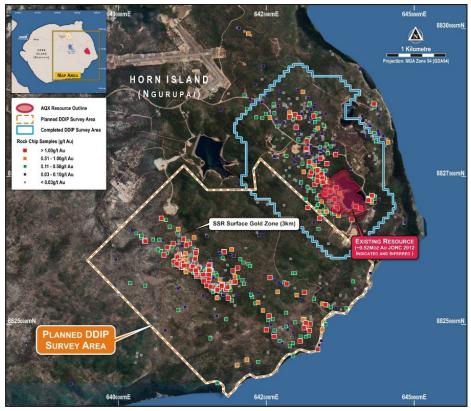

Figure 2. Planned DDIP survey area (11km2) totaling 55-line kilometres and located SW of the Horn Island Resource including the 3km SSR surface gold zone. The Horn Island Resource is 16.7Mt at 0.98g/t Au for 524k oz Au (JORC 2012, 53% Indicated and 47% Inferred, see ASX release 11 November 2021, "Horn Island Scoping Study and MRE").

Review of Operations and Financial Results (continued)

Kaiwalagal (EPM 25418) (100% owned)

On 27 July 2021, the Company announced, "Multiple Gold Targets Identified a Kaiwalagal" from its completed airborne fixed wing geophysical (magnetic and radiometric) and satellite hyperspectral surveys across the Kaiwalagal project area in the Torres Strait islands. These exploration results represent a significant opportunity for the Company beyond its adjacent flagship Horn Island project.

The aim of the Kaiwalagal exploration surveys was to recognise the occurrence of regional hydrothermal systems across the project area and their potential for hosting large scale gold mineralisation. Based on the initial positive results, Alice Queen has elevated the prospectively ranking for the Kaiwalagal project.

The Company engaged Thomson Aviation to complete a fixed wing airborne magnetic and radiometric survey using similar instrumentation and flight parameters to the previous survey completed across Horn Island (see ASX release 17 October 2018). To facilitate data levelling and merging with the existing Horn Island survey, approximately 1km of overlapping data with the recent Kaiwalagal survey was collected (see Figure 4).

The survey comprised low altitude (35m) closely spaced (50m) survey lines bearing NW-SE for a total of 6,829 survey line kilometers, which covered Muralug, Zuna and Gialug Islands. Survey specifications are presented in Table 1.

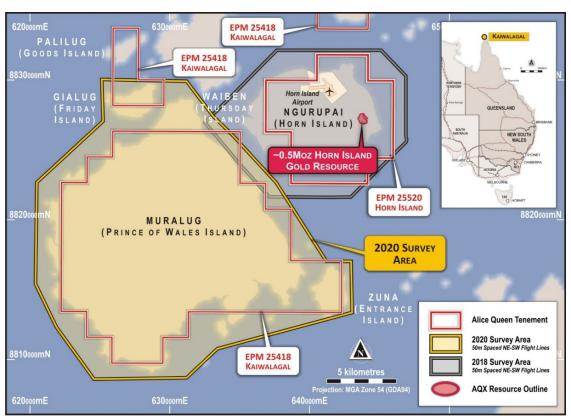

Figure 4. Extent of the Kaiwalagal aeromagnetic survey covering 3 islands to the SW of Horn Island.

Table1. Aeromagnetic survey specifications for historic Horn Island and recently completed Kaiwalagal surveys

| Survey | Date Flown | Total (km) | Spacing (m) | AZI (°N) | MTC (m) |
|-------------|------------|------------|-------------|----------|---------|
| Horn Island | Aug. 2018 | 2,269 | 50 | 45 | 35 |
| Muralug | Oct. 2020 | 6,829 | 50 | 45 | 35 |

FOR THE HALF YEAR ENDED 31 DECEMBER 2021

Review of Operations and Financial Results (continued)

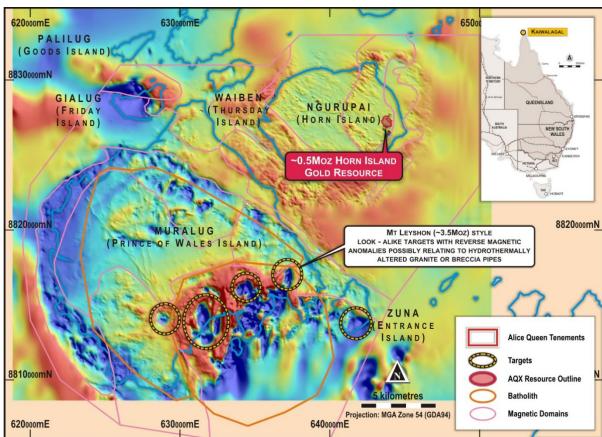

Kaiwalagal (EPM 25418) (continued)

Magnetic and Radiometric Survey Results and Preliminary Interpretation

The Thompson survey produced exceptional quality high resolution magnetic and radiometric data, which was reprocessed and interpreted by independent geophysical consultants Resource Potentials.

Two broad granitic batholiths have been identified extending from Horn Island across Muralug. These oval-shaped batholith complexes have multiphase intrusive centres that have either positive or negative magnetisation, and likely formed the deep magma chambers below a caldera system in the Carboniferous to Permian periods in geological time. The caldera system has since been eroded to expose granite bodies surrounding by volcanic ignimbrite deposits on the sides (see Figure 5).

The SE side of Muralug and the south side of Zuna Island are intruded by a younger intrusive phase, with distinctive reverse magnetisation. Several discrete and circular reverse magnetic anomalies have been identified and are interpreted to represent

younger porphyry plugs or potential breccia pipes. The remanent magnetisation may be associated with hydrothermal alteration halos, similar to the biotite-magnetite alteration and related magnetic anomaly low surrounding the ~3.5M oz Au Mt Leyshon gold breccia pipe (for example see Figure 6). The circular magnetic lows in the SE part of the project area are considered areas of immediate interest for field checking.

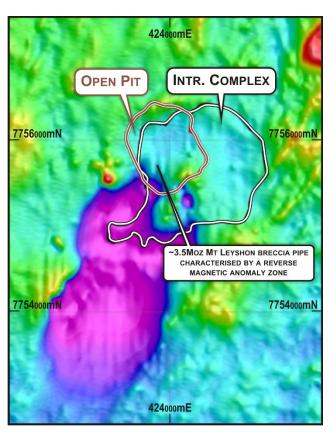

Figure 5. Magnetic anomaly image generated from merged detailed and regional airborne survey data sets, highlighting granitic intrusion centres with positive and reversed magnetic anomaly expressions. The reversely magnetised anomalies are interpreted as late-stage porphyry plugs or breccia pipes, which may have similarities to the 3.5Moz Au Mt Leyshon breccia pipe gold deposit in Nth QLD to the south.

FOR THE HALF YEAR ENDED 31 DECEMBER 2021

Review of Operations and Financial Results (continued)

Kaiwalagal (EPM 25418) (continued)

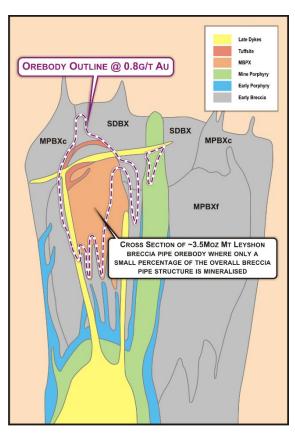

Figure 6. Reverse magnetic anomaly pattern from hydrothermal magnetite in the contact aureole of the intrusion defining the ~3.5Moz Mt Leyshon breccia pipe gold deposit (both diagrams reproduced from Morrison, G. 2017. Ore Controls in the Mt Leyshon Breccia Pipe. Presentation at Intrusion-Related Gold Systems in north Queensland GSQ project meeting December 2017).

Furthermore, the magnetic anomaly pattern across Muralug outlines a number of discrete domains within the larger oval shaped batholith complex, and these domains likely represent different fractionated zones of granitic stocks from an evolving parental magma. Recognising this characteristic early in the exploration history is very positive, as these magmatic zoning conditions are important for the formation of gold prospects, such as the~0.5Moz gold deposit at Horn Island.

WorldView-3 Satellite Hyperspectral Survey Results and Interpretation

Acquisition of WorldView-3 imagery (WV3) covering Visible Near Infrared (VNIR) and Shortwave Infrared (SWIR) wavelength bands (8 in both VNIR and SWIR) was commissioned from Geoimage. The mineral maps were further processed by independent expert Dr Mike Hussey to produce threshold mineral probability maps covering both the Muralug and Zuna Islands.

These mineral maps reveal the mineral associations typically indicative of hydrothermal alteration associated with ore deposits.

FOR THE HALF YEAR ENDED 31 DECEMBER 2021

Review of Operations and Financial Results (continued)

Kaiwalagal (EPM 25418) (continued)

Encouraging results are observed from the WV3 multimineral map outlining a very extensive, hydrothermal footprint of approximately 218km2 with clear patterns in the distribution of alteration minerals across Muralug and Zuna Islands (Figure 7). This includes a core area of advanced argillic alteration which is surrounded by sericite which then grades into calc-sericites (calcitic and dolomitic). There is also a N-S zone of chlorite crossing the western third of the island.

In other regions of North Queensland, these alteration assemblages are often associated with multi-million ounce economic mineralisation.

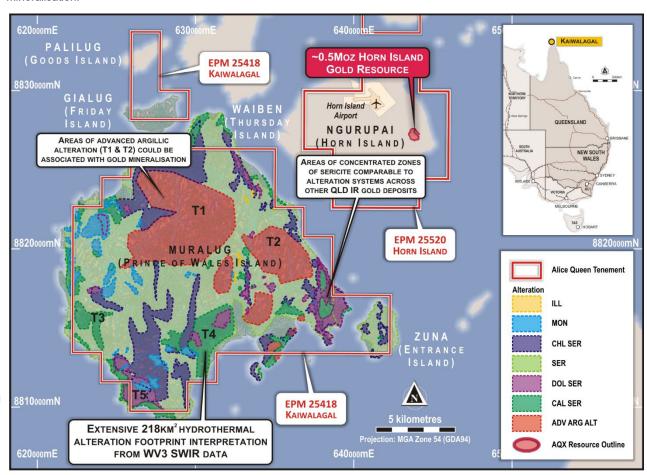

Figure 7. Multimineral map interpretation highlights clear pattern of a large-scale hydrothermal alteration footprint across Muralug and Zuna Islands. Areas of argillic alteration likely represent the core of a zoning pattern grading out to sericite alteration.

Mendooran Tenements EL 8646, EL 8469, EL 8563, EL8985 and EL 8565 (continued)

Background

The Macquarie Arc rocks of the LFB and specifically the MVB are Australia's porphyry copper-gold exploration hot-spot, as exemplified by Alkane Resources recent Kaiser-Boda discovery, which lies only 11km south of the Mendooran Project area along the MVB. Alice Queen's target concept is a large MVB-type porphyry copper-gold complex, such as at Newcrest's Cadia Valley, and Alkane's Kaiser-Boda. A notable prospective indicator for these deposits on the MVB, and, also elsewhere on the Macquarie Arc at Evolution's Cowal-Marsden, is that they all lie close to significant north-west to south-east cross-arc structural lineaments (Figure 9).

The Company's exploration strategy in this project area is led by John Holliday. John is a former Chief Geoscientist at Newcrest and was a principal discoverer of its giant (circa 50m Oz Au and 9m tons Cu) Cadia Valley Cu/Au deposit situated near Orange in NSW.

Exploration Rationale

In the Mendooran Project area, the MVB rocks are covered by younger basin sediments and have only been explored to date by five Alice Queen drill holes along a >40km extent (see Figure 10). These holes have confirmed the northwards continuation of the MVB for this distance (ASX release 3 June 2021). Within the north-south coverage by these five holes there is a 22.5km undrilled gap indicated to have cover of a thickness that is in the 350-700m range (quite permissive for underground bulk mining as employed by Newcrest Mining at Cadia).

Notably this undrilled gap is cut by a north-west to south-east cross-arc structure (see Figure 10) like those on which the major Macquarie Arc mines and prospects lie. This cross-structure area is clearly a prime target for porphyry copper-gold mineralisation and accordingly is the primary focus area of this drill program.

The Company has plans to test this high priority area by drilling in the vicinity of this cross-arc structure at two sites (Figure 10) which are already permitted. This drilling will be co-funded by the NSW New Frontiers Co-Operative Drilling grant.

Chronology

In 2017, Alice Queen entered into an Option and Earn in joint venture with Newcrest Operations Limited a subsidiary of Newcrest Limited (ASX:NCM). The Option component was triggered at the point at which a minimum of \$1m dollars was spent by NCM on exploration. This money was spent on an extensive ground gravity and airborne magnetic intensity geophysical survey with the aim of generating large scale, Newcrest style Cu/Au porphyry drill targets. A total of 8 targets, that met these specific criteria, were generated by this program.

In 2018, three preliminary diamond core holes were drilled by the JV (outside of the high priority area due to access limitations at the time) which established depth to basement parameters (see Figure 10 for hole locations).

The ability to drill the four highest ranking of the targets was subject to gaining access into the Goonoo Goonoo State Conservation Area. NCM determined that the requisite approvals to gain this access to this area were prohibitive.

After a considerable effort by Alice Queen in preparing the requisite Review of Environmental Factors (REF), access was granted by the NSW Government in late 2020 and exploration of the project area began in early 2021.

The maiden drill program of two holes into this previously inaccessible area in early 2021 (see ASX release 03/06/2021) importantly confirmed permissive depth to basement, established the extension of the MVB and reported elevated background copper levels.

These key indicators have provided the Company with a strong case to test these high-ranking targets, in the end the same holes that Newcrest identified as their highest-ranking targets all those years ago.

Other Activities

In relation to the Horn Island gold project, the Company has also had a number of discussions with;

- The office of the Queensland Cooordinator-General in relation to "Prescribed Project" status
- The Major Projects Facilitation Agency (MPFA) within the Federal Government in relation to "Major Project" status
- The Northern Australia Infrastructure Facility (NAIF) in relation to project development funding

The Company believes that, given its significance as Australia's northern most outpost and its ability to transform local employment and economic development activity in the Torres Strait, the Horn Island gold project is seen as something that government agencies, both state and federal are likely to support.

The Company confirms that the form and context of the respective competent persons' findings in relation to that report have not been materially modified from the original market announcement.

FOR THE HALF YEAR ENDED 31 DECEMBER 2021

Events Subsequent to Reporting Date

On 28 January 2022, 162,625,000 ordinary shares were issued under Listing Rule 7.1 raising \$1,301,000 before costs.

Funds raised from the Placement are intended to be applied to:

- · Exploration Drilling at Horn Island; and
- · Provide general working capital

The COVID-19 pandemic has created unprecedented uncertainty of the economic environment. Actual economic events and conditions in future may be materially different from those estimated by the group at the reporting date. In the event the COVID-19 pandemic impacts are more severe or prolonged than anticipated, this may effect the financial position of the Group and field operations if access is restricted or made subject to increased regulation. At the date of this report an estimate of the future effects of the COVID-19 pandemic on the group cannot be made, as the impact will depend on the magnitude and duration of the economic downturn, with the full range of possible effects unknown.

Other than as stated elsewhere in this report, the Directors are not aware of any other matters or circumstances at the date of this report that have significantly affected or may significantly affect the operations, the results of the operations or the state of affairs of the Group in subsequent financial years.

Auditor's Declaration

A copy of the auditor's independence declaration as required under s307C of the *Corporations Act 2001* is included on page 23 of this financial report and forms part of this Directors' report.

Signed in accordance with a resolution of the Directors.

AUDITOR'S INDEPENDENCE DECLARATION UNDER S 307C OF THE CORPORATIONS ACT 2001 TO THE DIRECTORS OF ALICE QUEEN LIMITED

I declare that, to the best of my knowledge and belief, during the half-year ended 31 December 2021, there have been:

- i. no contraventions of the auditor independence requirements as set out in the *Corporations Act* 2001 in relation to the review; and
- ii. no contraventions of any applicable code of professional conduct in relation to the review.

The accompanying notes form part of these financial statements.

FOR THE HALF-YEAR ENDED 31 DECEMBER 2021

1. Nature of operations

Alice Queen Limited is a public company, limited by shares, domiciled and incorporated in Australia and listed on the Australian Securities Exchange. The consolidated entity (the "Group") consists of Alice Queen Limited (the "Company") and the entities it controlled at the end of, or during, the half-year ended 31 December 2021. The principal activity of the Group during the financial period was mineral exploration in Queensland and New South Wales.

2. General information and basis of preparation

Statement of Compliance

The condensed interim consolidated financial statements ('the interim financial statements') of the Group are for the six (6) months ended 31 December 2021 and are presented in Australian Dollars which is the functional currency of the Company. These general purpose interim financial statements have been prepared in accordance with the requirements of the *Corporations Act 2001* and AASB 134 Interim Financial Reporting. They do not include all of the information required in annual financial statements in accordance with Australian Accounting Standards and should be read in conjunction with the consolidated financial statements of the Group for the year ended 30 June 2021 and any public announcements made by the Group during the half-year in accordance with continuous disclosure requirements arising under the Australian Securities Exchange Listing Rules and the *Corporations Act 2001*.

The interim financial statements have been approved and authorised for issue by the Board of Directors on 16 March 2022.

3. Significant accounting policies

The interim financial statements have been prepared in accordance with the same accounting policies adopted in the Group's last annual financial statements for the year ended 30 June 2021, except for the adoption of new standards effective as of 1 January 2021. The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective. Several other amendments and interpretation apply for the first time in 2022, but do not have an impact in the interim financial statements of the Group.

The accounting policies have been applied consistently throughout the Group for the purposes of preparation of these interim financial statements.

New Accounting Standards and Interpretations not yet mandatory or early adopted

The new and amended standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Group's financial statements are disclosed below. The Group intends to adopt these new and amended standards and interpretations, if applicable, when they become effective.

| STANDARD /INTERPRETATION | EFFECTIVE |
|--------------------------------------------------------------------------------------------------------------------------|----------------|
| AASB 2020-3 Amendments to AASs -Annual Improvements 2018-2020 and Other Amendments | 1 January 2022 |
| - Amendment to AAS BI, subsidiary as a First-Time Adopter | |
| - Amendments to AASB3, Reference to the Conceptual Framework | |
| - Amendments to AASB9, Fees in the '10 per cent' Test for Derecognition of Financial Liabilities | |
| - Amendments to AASB116, Property, Plant and Equipment: Proceeds before Intended Use | |
| - Amendments to AASB137, Onerous Contracts - Cost of Fulfilling a Contract | |
| - Amendments to AASB141, Taxation in Fair Value Measurements | |
| AASB 2014-10 Amendments to AASs - Sale or Contribution of Assets between an Investor and its Associates or Joint Venture | 1 January 2022 |
| AASB 2020-1 Amendments to AASs - Classification of Liabilities as Current or Non-current | 1 January 2023 |

FOR THE HALF-YEAR ENDED 31 DECEMBER 2021

4. Basis of consolidation

The consolidated financial statements incorporate all of the assets and liabilities of the parent (Alice Queen Limited) and all of the subsidiaries (including any structured entities). Subsidiaries are entities the parent controls. The parent controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

The assets, liabilities and results of all subsidiaries are fully consolidated into the financial statements of the Group from the date on which control is obtained by the Group. The consolidation of a subsidiary is discontinued from the date that control ceases. All controlled entities have a 30 June financial year-end.

All intra-group balances, transactions, income and expenses and profit and losses between entities in the consolidated group have been eliminated in full on consolidation.

The non-controlling interest in the results and equity of subsidiaries is shown separately in the consolidated statement of profit or loss and other comprehensive income, consolidated statement of financial position and consolidated statement of changes in equity respectively.

Non-controlling interests, presented as part of equity, represent the portion of the subsidiary companies profit or loss and net assets that is not held by the Group. The Group attributes total comprehensive income or loss of subsidiaries between the owners of the parent and the non-controlling interest based on their respective ownerships.

5. Going concern basis

The Group recorded a loss of \$6,590,134 for the half year ended 31 December 2021 (31 December 2020: \$933,210 loss) after an impairment charge of exploration and evaluation assets of \$6,318,404. The Group had net operating cash outflows of \$534,712 (2020: \$1,132,302) for the reporting period. The Group had \$564,085 available cash at the end of the reporting period and current liabilities of \$1,108,950 on 31 December 2021.

The recoverability of the Group's exploration assets is dependent upon the continued exploration of each area of interest. The Directors have determined that future capital raisings will be required beyond the current year in order to develop the Group's mineral tenements to achieve a position where the Group can be cash flow positive, the outcome of which is uncertain.

The financial report has been prepared on a going concern basis as the directors believe the Group has cash levels to meet its operating and investing activities for at least 12 months from the signing of the financial report and/or the ability to secure additional funding though future capital raisings.

However, should directors not have sufficient exiting funding or achieve their plan, there is significant uncertainty whether the Company would continue as a going concern and realise its assets in the normal course of business and at amounts stated in the financial report.

6. Estimates

When preparing the interim financial statements, management undertakes a number of judgements, estimates and assumptions about recognition and measurement of assets, liabilities, income and expenses. The actual results may differ from the judgements, estimates and assumptions made by management, and will seldom equal the estimated results.

7. Dividends

There have been no dividends paid or declared in the period or in the previous reporting period.

FOR THE HALF-YEAR ENDED 31 DECEMBER 2021

8. Segment reporting

During the reporting period, the Company operated predominantly in one operating segment, being mineral exploration. The revenues and profit generated by each of the Group's operating segments and segment assets are summarised as follows:

| 24 DECEMBED 2024 | MINERAL EXPLORATION | UNALLOCATED | TOTAL |
|-----------------------------------------------------------------|------------------------------|-------------------|-------------|
| 31 DECEMBER 2021 REVENUE | \$ | \$ | \$ |
| Profit on sale of investment | - | 55,652 | 55,652 |

| Included within segment results: | 1,403 | | |

FOR THE HALF-YEAR ENDED 31 DECEMBER 2021

9. Exploration and evaluation expenditure

| | 31 DEC 2021 \$ | 30 JUNE 2021 \$ |
|--------------------------------------------------|-------------------|--------------------|
| Non-producing properties | | |
| Balance at the beginning of the reporting period | 20,121,698 | 11,833,705 |
| Additions | 1,976,635 | 10,278,537 |
| Impairment of exploration and evaluation assets* | (6,318,404) | - |
| Less: costs reimbursed by joint venture partner | - | (1,990,543) |
| Balance at the end of the reporting period | 15,779,929 | 20,121,698 |

The ultimate recoupment of balances carried forward in relation to areas of interest still in the exploration or valuation phase is dependent on successful development, and commercial exploitation, or alternatively sale of the respective areas. The Group conducts impairment testing on an annual basis unless indicators of impairment are present at the reporting date.

*In accordance with the Company's accounting policy and after careful consideration by the Company's Board of Directors, a decision was made to impair all non-core exploration and evaluation assets held by the Group in New South Wales as there is no substantive expenditure on further exploration planned on these tenements and not enough data to indicate that the costs will be recovered via development or sale. Accordingly, as at 31 December 2021, the Group assessed the carrying value of its tenements in New South Wales to be \$Nil, resulting in an impairment charge of \$6,318,404.

FOR THE HALF-YEAR ENDED 31 DECEMBER 2021

Each ordinary share carries the right to one vote at shareholders' meetings and is entitled to participate in any dividends or other distributions of the Group.

FOR THE HALF-YEAR ENDED 31 DECEMBER 2021

11. Earnings per share

| | 31 DEC 2021 \$ | 31 DEC 2020 \$ |
|-------------------------------------------------------------------------------------------|-------------------|-------------------|
| Earnings from continuing operations (basic and diluted) | (6,590,134) | (933,210) |
| Weighted average number of ordinary shares used in calculating basic earnings per share | 1,323,014,511 | 1,040,825,723 |
| Weighted average number of ordinary shares used in calculating diluted earnings per share | 1,323,014,511 | 1,040,825,723 |
| Basic earnings per shares (cents per share) | (0.50) | (0.09) |
| Diluted earnings per shares (cents per share) | (0.50) | (0.09) |

12. Contingent assets and liabilities

Site restoration, mine rehabilitation costs would be incurred by the Group at the Horn Island site upon a decision to abandon the project. In this event, management's best estimate of the present value of the future rehabilitation costs that would be required is \$114,000 (2020: \$150,000).

No other contingent assets or liabilities are noted by the Group as at 31 December 2021.

13. Commitments for expenditure

The Company has minimum expenditure commitments to meet the conditions under which the properties are granted. These minimum expenditure commitments total \$2,645,833 and are comprised of \$1,312,500 in total over the term of the Exploration Licences held in Queensland and \$1,333,333 in total for the term of the agreed work plan for the Exploration Licences held in New South Wales. The aggregation of expenditure commitments over the full length of the terms of the licences is permitted in both Queensland and New South Wales (for further information refer to the Tenement Summary included in the Directors' Report). These minimum commitments may vary from time to time, subject to approval by the grantor of titles or by variation of contractual agreements. The expenditure represents potential expenditure which may be reduced by entering into sale, joint venture or relinquishment of the interests and may vary depending upon the results of exploration. Should expenditure not reach the required level in respect of each area of interest, the Company's interest could be either reduced or forfeited.

14. Events subsequent to reporting date

On 28 January 2022, 162,625,000 ordinary shares were issued under Listing Rule 7.1 raising \$1,301,000 before costs.

Funds raised from the Placement are intended to be applied to:

- Exploration Drilling at Horn Island; and
- Provide general working capital

The COVID-19 pandemic has created unprecedented uncertainty of the economic environment. Actual economic events and conditions in future may be materially different from those estimated by the group at the reporting date. In the event the COVID-19 pandemic impacts are more severe or prolonged than anticipated, this may effect the financial position of the Group and field operations if access is restricted or made subject to increased regulation. At the date of this report an estimate of the future effects of the COVID-19 pandemic on the group cannot be made, as the impact will depend on the magnitude and duration of the economic downturn, with the full range of possible effects unknown.

Other than as stated elsewhere in this report, the Directors are not aware of any other matters or circumstances at the date of this report that have significantly affected or may significantly affect the operations, the results of the operations or the state of affairs of the Group in subsequent financial years.

DIRECTORS' DECLARATION

In the opinion of the directors of Alice Queen Limited:

- a The consolidated financial statements and notes of Alice Queen Limited are in accordance with the *Corporations Act 2001*, including
 - i. Giving a true and fair view of its financial position as at 31 December 2021 and of its performance for the half year ended on that date; and
 - ii. Complying with Australian Accounting Standard AASB 134 Interim Financial Reporting; and
- b There are reasonable grounds to believe that Alice Queen Limited will be able to pay its debts as and when they become due and payable.

Signed in accordance with a resolution of the directors:

Andrew Buxton

INDEPENDENT AUDITOR'S REVIEW REPORT TO THE MEMBERS OF ALICE QUEEN LIMITED

Report on the Half-Year Financial Report

Conclusion

MUO BSM IBUOSIBO

We have reviewed the accompanying half-year financial report of Alice Queen Limited and controlled entities (**the Group**), which comprises the condensed statement of financial position as at 31 December 2021, the condensed statement of profit or loss and other comprehensive income, condensed statement of changes in equity, the condensed statement of cash flows for the half-year ended on that date, notes comprising a summary of significant accounting policies and other explanatory information and the Directors' declaration.

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of the Group does not comply with the *Corporations Act* 2001, including:

- a. giving a true and fair view of the Group's financial position as at 31 December 2021 and of its performance for the half-year ended on that date; and
- b. complying with Accounting Standard AASB 134: *Interim Financial Reporting* and the *Corporations Regulations 2001*.

Material Uncertainty Related to Going Concern

We draw attention to Note 5 in the financial statements, which identifies that during the period ended 31 December 2021, the Group incurred a net loss of \$6,590,134 and that the Group had net operating cash outflows of \$534,712 for the reporting period. As stated in Note 5, the ability of the Group to continue as a going concern is dependent upon the Group raising additional capital sufficient to meet the Group's exploration commitments. The Directors' reasoning for preparing the financial report on a going concern basis is included within the Note. Our opinion is not modified in respect of this matter.

Basis of Conclusion

We conducted our review in accordance with ASRE 2410 Review of a Financial Report Performed by the Independent Auditor of the Entity. Our responsibilities are further described in the Auditor's Responsibilities for the Review of the Financial Report section of our report.

We are independent of the Group in accordance with the auditor independence requirements of the Corporations Act 2001 and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 Code of Ethics for Professional Accountants (including Independence Standards) (the Code) that are relevant to our audit of the annual financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

Responsibility of the Directors for the Financial Report

The Directors of the Group are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the Corporations Act 2001 and for such internal control as the Directors determine is necessary to enable the preparation of the half-year financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

Auditor's Responsibility for the Review of the Financial Report

Our responsibility is to express a conclusion on the half-year financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the Corporations Act 2001 including giving a true and fair view of the Group's financial position as at 31 December 2021 and its performance for the half-year ended on that date, and complying with Accounting Standard AASB 134 Interim Financial Reporting and the Corporations Regulations 2001. A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures.

A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
