EP127 Exploration Program 2021

Global Oil & Gas Limited announced in November 2021, the completion of the in-field gas sampling survey testing helium and hydrogen concentrations over areas of interest identified by the previously completed remote spectroscopy analysis. Initial readings from the field have identified sample sites with levels of helium detected at double background level. This study will look to correlate the elevated helium levels from field data with the geological model of the Southern Georgina Basin and the remote spectroscopy data. This study will enable the company to build a hydrogen and helium geological model which can be used to understand the hydrogen and helium generation and trapping mechanisms in the basin. This can then be used to high-grade and plan future exploration activities.

Remote spectroscopy analysis was conducted by Dirt Exploration of South Africa, survey planning, field sampling, data analysis and reporting conducted by H2He Services of Perth, WA.

Results of the survey were provided to shareholders in February 2022. Refer to ASX announcement dated 21 Feb 2022.

Goshawk Energy

The Company announced in December 2021 that Goshawk Energy Corporation Pty Ltd ("GEC") and Goshawk Energy (Canning Basin) Pty Ltd ("Goshawk") executed a Sales Agreement with Squadron Energy Pty Ltd ("Squadron") on the Helvetica Oil Prospect EP499. GLV is a 20% shareholder in GEC and is not incurring any further costs or liabilities (or paying any further consideration) under the Sale agreement. By way of Squadron exiting the JV arrangement with Goshawk (previously owned 80% Squadron & 20% Goshawk) the net interest for GLV on the EP499 Helvetica Oil Prospect increases from 4% to 20%.

GEC is already in discussions with several interested groups to advance the Helvetica Oil Prospect by way of Farm-In or ASX IPO listing.

About Helvetica EP 499

Helvetica Prospect was defined from existing 2D seismic data and a shallow test well, drilled in 1985 (Pandorea-1) encountered oil shows above the Helvetica Prospect. The Helvetica Prospect will test the deeper salt sealed structure.

Please also refer to previous ASX announcements dated 12th and 24th August 2020.

Helvetica Sub-Salt Oil Prospective Resource*			
	Low Estimate (P90)	Best Estimate (P50)	High Estimate (P10)
Oil MMBBL Gross	33	194	355
Oil MMBBL Net GLV (20% previously 4%)	6.6	38.8	71

* **Cautionary Statement:** The estimated quantities of petroleum that may potentially be recovered by the application of a future development project(s) relate to undiscovered accumulations. These estimates have both an associated risk of discovery and a risk of development. Further exploration appraisal and evaluation is required to determine the existence of a significant quantity of potentially moveable hydrocarbons.

DIRECTORS' REPORT cont.**Sale Agreement Summary**

GEC has paid Squadron the first instalment, being \$700,000, on execution of the Agreement. Funding of the first instalment was by way of cancellation of existing outstanding amounts owed by Squadron to GEC under the JV agreement and existing cash reserves held by GEC. The second instalment, being a further payment of \$2,800,000, is payable on the earlier of: 1st January 2023; or if GEC raises new capital in excess of \$5,000,000 or by way of a farm-in agreement being executed by a third party in respect the Helvetica Prospect. The payment of the second instalment is also subject to permit approval and registration.

Western Gas (519P) Pty Ltd Acquisition

The Company announced in November 2021 that following satisfaction of the remaining conditions precedent, including all necessary shareholder and regulatory approvals, the completion of the 25% acquisition of Western Gas (519P) Pty Ltd. The proposed Sasanof-1 exploration well is in exploration permit WA-519-P in Commonwealth water, approximately 207 km northwest of Onslow, Western Australia, and is scheduled to drill in early Q2 2022.

The HOA will see GLV fund 50% of the cost of drilling the Sasanof-1 exploration well through a 25% acquisition of the fully paid ordinary shares in Western Gas (519 P) Pty Ltd, the licence holder for WA-519-P as well as a 25% economic interest in portions of the Sasanof Prospect in adjoining Western Gas explorations permits.

The Sasanof Prospect is on trend and updip of the Mentorc Gas and Condensate Field and nearby the Giant Gas Fields of Scarborough and Io-Jansz gas fields in the prolific Carnarvon Basin. The liquids rich, low CO₂ Mentorc Field is the eastern fault block and is "filled to spill" into the updip Sasanof Prospect to the west.

Western Gas has secured the Valaris MS-1 semi-submersible rig to drill the well and also contracted specialist well engineering and drilling management company AGR Australia (AGR) to manage the Sasanof drilling campaign.

Sasanof-1 will be a vertical well and drilled to a total depth of approximately 2,500 m in 1,070 m of water, providing a low cost, high impact exploration activity in a known and proven hydrocarbon province. Drilling costs are estimated at US\$20 million. Western Gas and Valaris formally executed the drilling contract for the MS-1 semi-submersible rig to drill the multi TCF Sasanof-1 exploration well.

Further to this Western Gas has received acceptance by NOPSEMA for the Sasanof-1 Exploration Drilling Environment Plan. The Safety Case Revision for the Sasanof-1 well and the Well Operations Management Plan (WOMP) were submitted to NOPSEMA in early December 2021 for assessment, with an expected outcome by early January 2022

WA-519-P & Sasanof-1 Well Location

The Sasanof Prospect is located in permit WA-519-P, approximately 207 km northwest of Onslow, Western Australia. The permit WA-519-P was awarded in September 2015 and no exploration drilling has been undertaken in the licence to date.

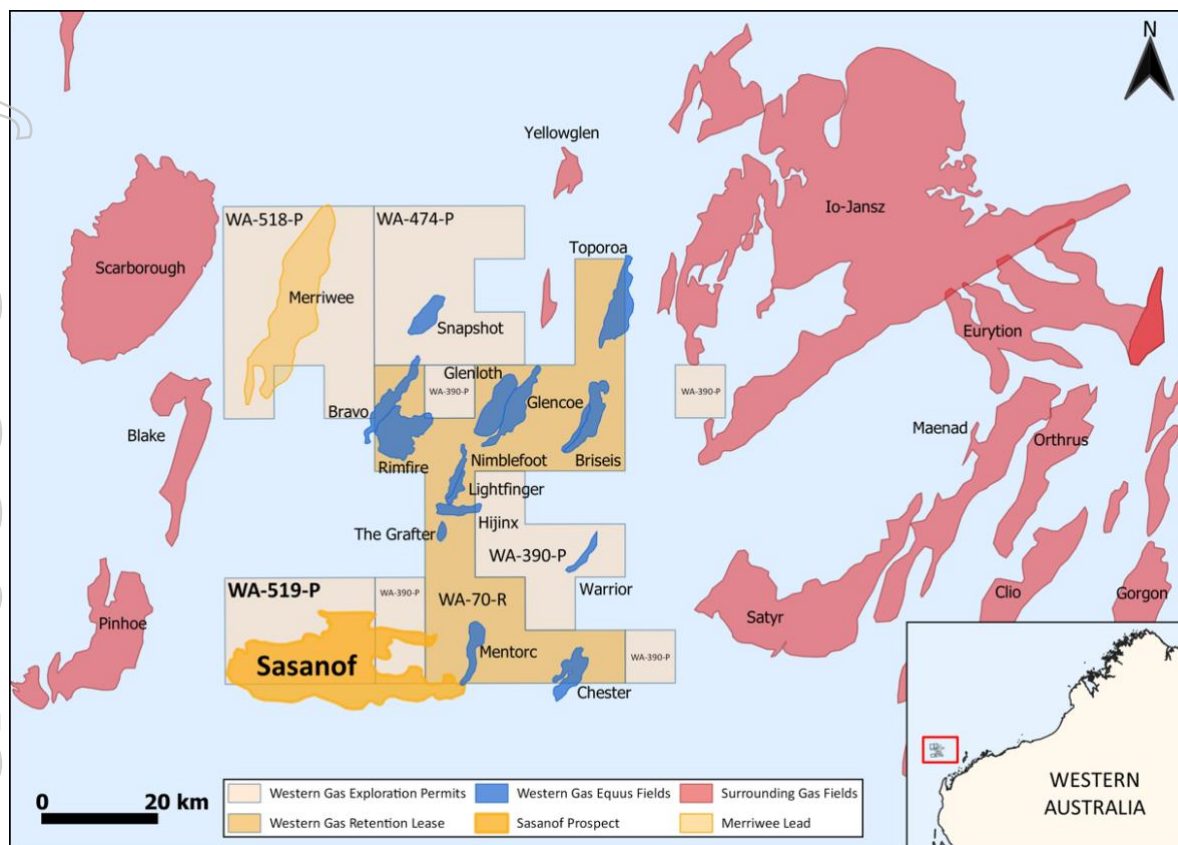

Western Gas has licenced and reprocessed multiple 3D seismic surveys over the area to define the exploration potential, including the Sasanof Prospect. These enhancements to the seismic data include reprocessing and inversion projects, together with comprehensive Rock Physics and Quantitative Interpretation (QI) studies by DownUnder Geosolutions.

The Sasanof-1 well will be a vertical well and will be drilled to a total depth of approximately 2,500 metres in 1,070 m of water.

The well location is positioned updip and 20 km west of the Mentorc Gas Field, 74 km southeast of the Scarborough Gas Field and 102 km southwest of the Io-Jansz Gas Field, on the Exmouth Plateau in the Northern Carnarvon Basin.

The Sasanof Prospect covers an area of 400 km² across three exploration permits and one retention lease, three of which, WA-519-P, WA-390-P & WA-70-R, are operated and owned by Western Gas.

7. ASSET ACQUISITION

On the 22 November 2021, Global Oil and Gas Ltd completed the acquisition of a 25% interest in Western Gas (WA 519) Pty Ltd . As the acquisition is not deemed a business acquisition, the transaction must be accounted for as a share-based payment for the net assets acquired.

When an asset acquisition does not constitute a business combination, the assets and liabilities are assigned a carrying amount based on their relative fair values in an asset purchase acquisition and no deferred tax will arise in relation to the acquired assets and assumed liabilities as the initial recognition exemption for deferred tax under AASB 112 applies. No goodwill will arise on the acquisition and transaction costs of the acquisition will be included in the capitalised cost of the asset.

INDEPENDENT AUDITOR'S REVIEW REPORT

To the members of Global Oil & Gas Limited

Report on the Half-Year Financial Report

Conclusion

We have reviewed the half-year financial report of Global Oil & Gas Limited (the Company) and its subsidiaries (the Group), which comprises the consolidated statement of financial position as at 31 December 2021, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the half-year ended on that date, a summary of statement of accounting policies and other explanatory information, and the directors' declaration.

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the accompanying half-year financial report of the Group does not comply with the *Corporations Act 2001* including:

- (i) Giving a true and fair view of the Group's financial position as at 31 December 2021 and of its financial performance for the half-year ended on that date; and
- (ii) Complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

Basis for conclusion

We conducted our review in accordance with ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*. Our responsibilities are further described in the *Auditor's Responsibilities for the Review of the Financial Report* section of our report. We are independent of the Company in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to the audit of the annual financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the *Corporations Act 2001* which has been given to the directors of the Company, would be the same terms if given to the directors as at the time of this auditor's review report.

Responsibility of the directors for the financial report

The directors of the Company are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the half-year financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

For personal use only

Auditor's responsibility for the review of the financial report

Our responsibility is to express a conclusion on the half-year financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including giving a true and fair view of the Group's financial position as at 31 December 2021 and its financial performance for the half-year ended on that date and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
