Dear Shareholders,

It is with great pleasure that I provide this Chairman's Report for Los Cerros for the 2021 calendar and financial year.

Los Cerros has an exciting story to tell with the prospects of the Quinchia and Andes projects and the Company's exploration program providing a steady growth platform for the future. We are committed to growing the business, and maximising returns for our shareholders through aggressive exploration programs, a continued focus on development studies and advancing our project portfolio towards operational status.

As we continue to explore in Colombia we are exposing more of the Australian market to the prospects in this jurisdiction and educating them on the value proposition. The Company will continue to act as a leader in this space and attract additional interest from Australian and international markets.

Los Cerros has a dedicated focus on bolstering our ESG (Environmental, Social and Governance) practices and operating a safe and sustainable business that engages with our shareholders, employees, the communities within which we operate, and the environment.

We remain committed to developing Los Cerros into a world class exploration and mining company with a dedication to, and respect for, the environment and a strong commitment to safety for all our employees. We will continue to promote sustainable development of those communities within which we operate, exercise labour practices that respect the culture and diversity of our employees, and commit to act with utmost integrity, honesty and in good faith.

As we all continue to navigate COVID-19, I look back on 2021 feeling proud at how the Company has performed over the last twelve months. I thank Managing Director Jason Stirbinskis and the entire Colombian workforce for their focus and dedication over the past year, during such a difficult time and look forward to an exciting year ahead.

Yours sincerely,

Ross Ashton
Non-Executive Chairman

Dear Shareholders,

I am delighted to provide the following review of Los Cerros' operations for the 2021 calendar and financial year.

It was another transformational year for Los Cerros, adding considerable investigative rigour to our compelling Tesorito porphyry discovery compared to the year prior and in doing so, illuminating the structures and circumstances that are conducive to gold mineralisation in the region. That new and continually developing regional knowledge was a catalyst for ramping up our target generation programs which in turn led to the discovery of the neighbouring Ceibal porphyry and multiple other targets at our Quinchia Project.

Our efforts in 2021 did not go unnoticed outside of the Company, with the successful completion of a A\$20M capital raise in June that welcomed two of the world's largest and most respected precious metal funds to our register. That endorsement gave us licence to be bold with a dramatically expanded drilling and field program.

Our Tesorito drilling results were well reported in the media and on many occasions individual drill intercepts ranked in the top 10 drill results in the months they were released. Impressively, at Tesorito, exploration success has delivered 16 drill hole intercepts of over 200m grading ~1g/t gold at or near surface.

In the ESG space, the Company continues to focus on sustainable development and operating in a safe and responsible manner. In December our efforts were acknowledged in Colombia when the Company was named as a finalist in the Mining Industry ESG awards and my appointment as one of the Ambassadors for 'Women in Mining Colombia' acknowledging the Company's efforts to encourage women into mining. I am proud to announce that Los Cerros' workforce is now made up of 1/3 women.

Our successes of the year are more impressive given the backdrop and disruption of COVID-19 and flow-on challenges from the pandemic. We as a company are fortunate that our success at the drill bit, the subsequent flow of funding and our exemplary management and containment of COVID-19 has allowed us to expand our workforce to over 128 employees. We have been able to employ 100 people from local towns in a time when job loss is a threat to many families in the Quinchia district.

The approaching year is expected to be another transformational year for the Company, as we are well funded to build on the Quinchia story by advancing Tesorito through resource estimation, metallurgy and Quinchia-wide engineering studies, whilst our target generation team focus on discovering our next 'Tesorito'.

To conclude, I would like to acknowledge and thank the Board as well as my Executive Team for their commitment and support over the past 12 months. Learning from and being part of such an inspirational team is humbling and I am grateful for the guidance and backing I receive from my colleagues.

Stay safe and best wishes for 2022.

Sincerely,

Jason Stirbinskis
Managing Director

About Los Cerros

Los Cerros Limited is a gold/copper explorer with a dominant position within the Andes and Quinchia regions of the mid-Cauca Gold Belt of Colombia which hosts many major discoveries (Figure 1). The 100% owned Quinchia Gold Project (Figure 2) hosts the Miraflores Gold Deposit with a **Resource of 877,000 Au ounces at 2.80g/t Au** and **Reserve of 457,000 Au ounces at 3.29g/t Au**¹. Within 3km of Miraflores is the Tesorito Gold Porphyry plus the Chuscal and Ceibal porphyry prospects. Other targets within the Quinchia Gold Project (Figure 3) include the Dosquebradas deposit which has an Inferred Resource of **459,000 ounces at 0.71g/t Au**².

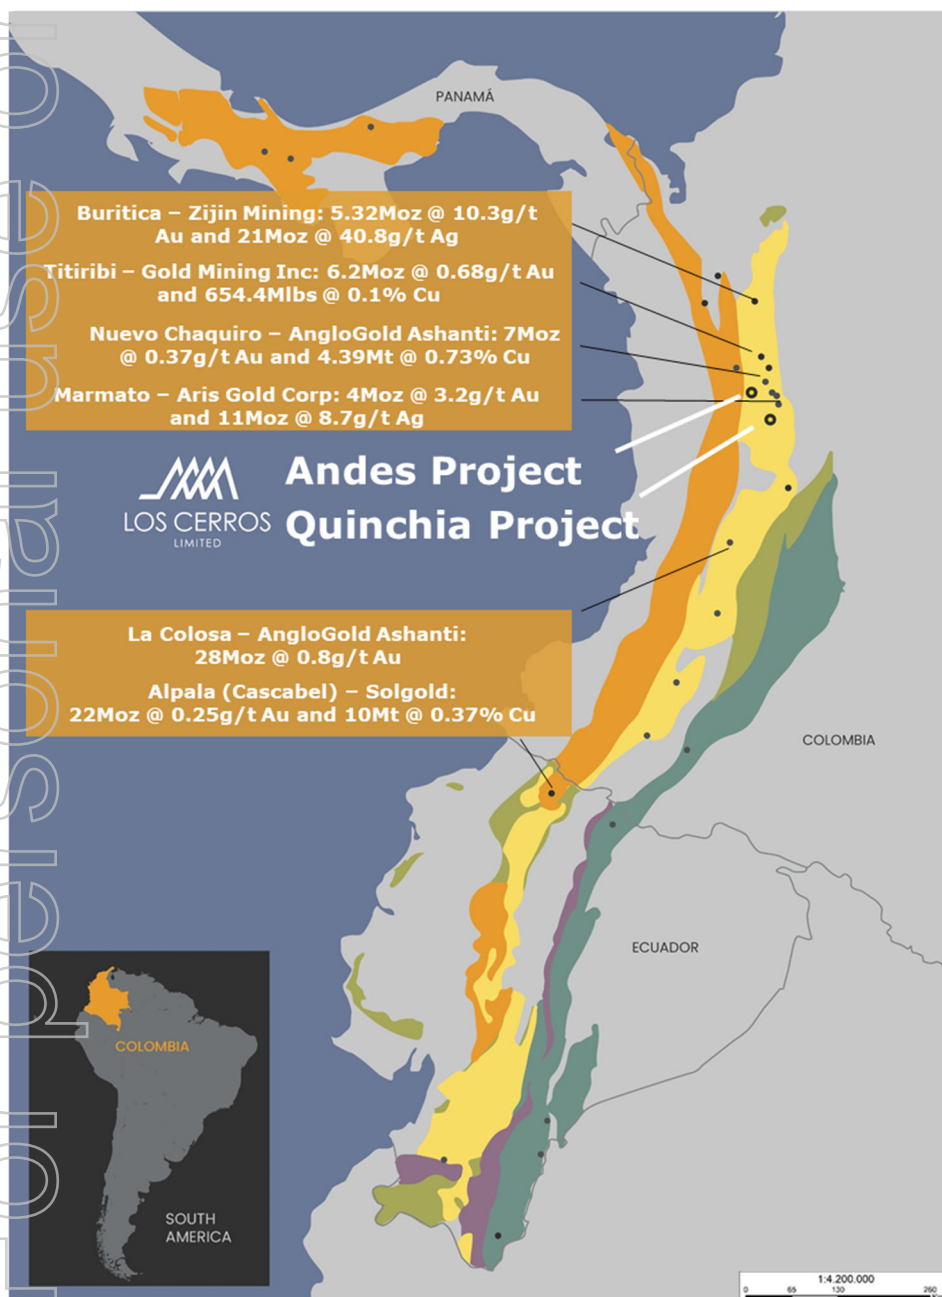

Figure 1: The Company's Andes and Quinchia Gold Projects sit on the Miocene aged, mid-Cauca Gold Belt in a sub-section of the belt that hosts many major copper-gold porphyry discoveries.

Metal volume estimates are taken from various company websites and may or may not include Inferred Resources and have not been independently verified.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the market announcements, and that all material assumptions and technical parameters underpinning the estimates continue to apply

The Company confirms that it is not aware of any new information or data that materially affects the information included in the market announcement and that all material assumptions and technical parameters underpinning the estimate continue to apply

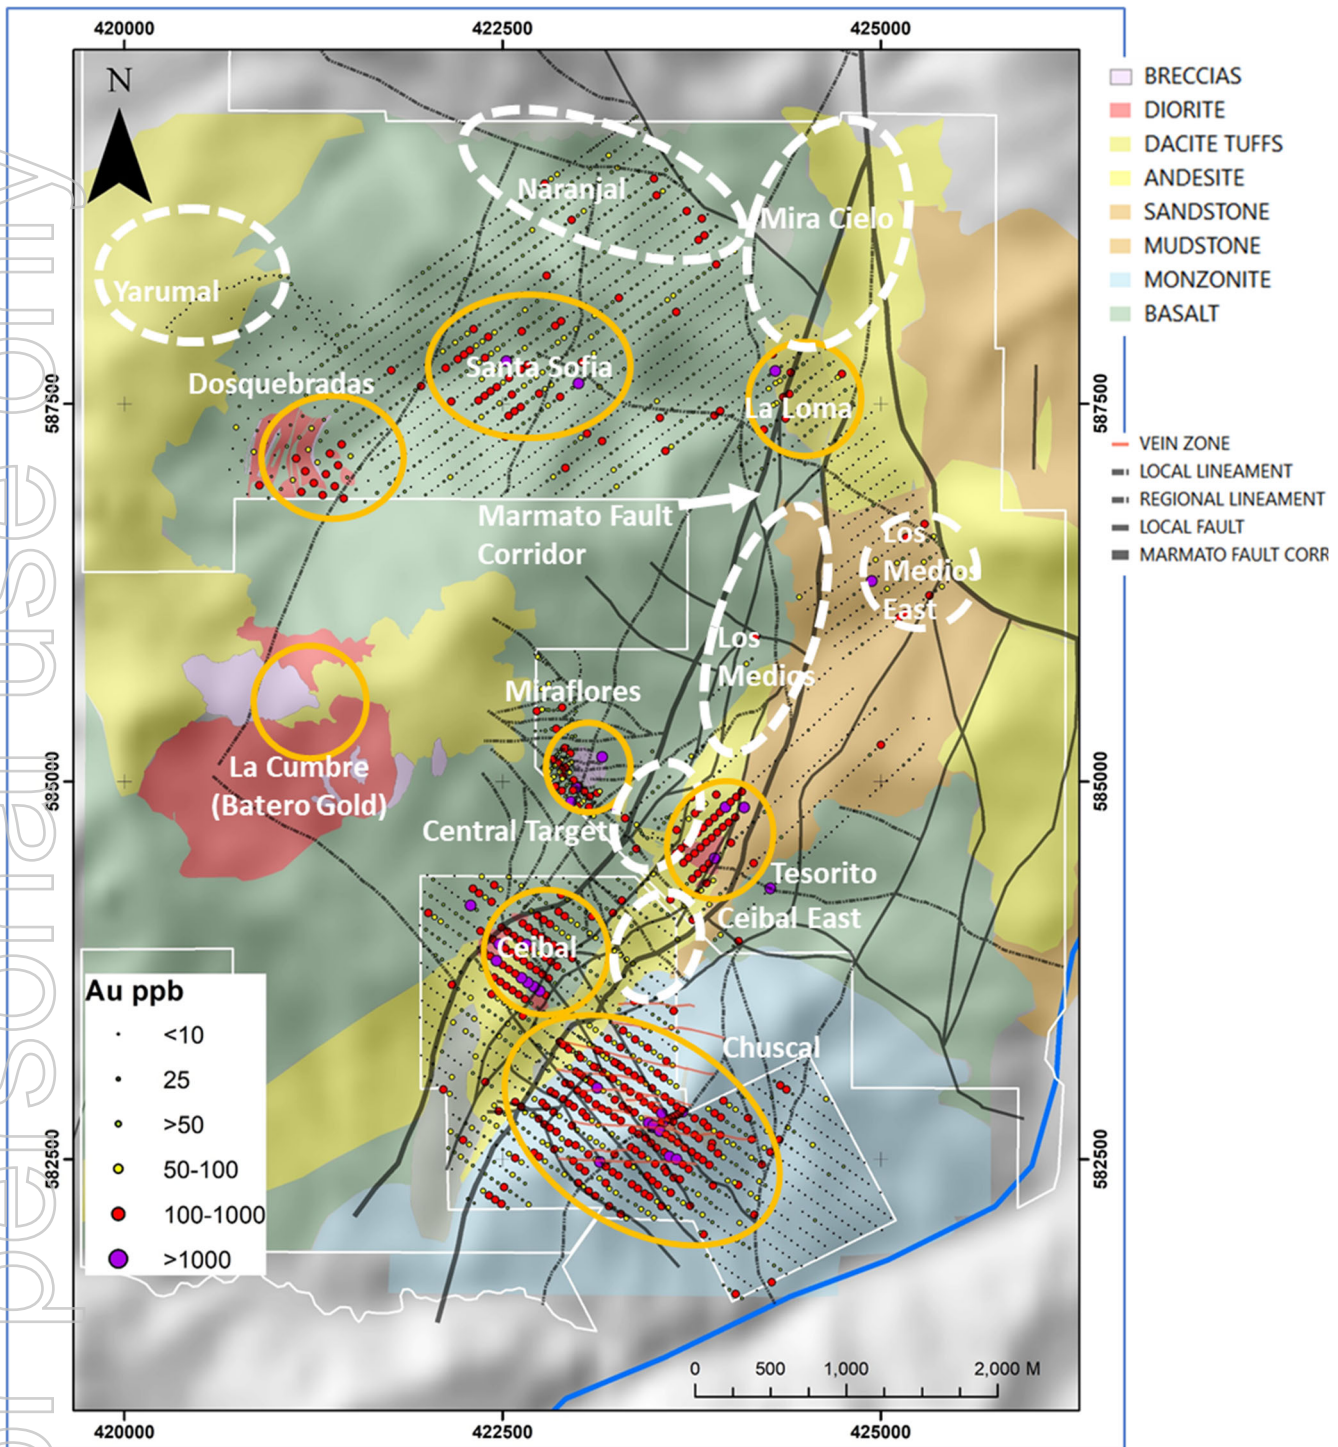

Figure 2: The Quinchia Gold Project contains multiple targets at various levels of investigation within a ~3km radius. This image reveals the major known target areas (orange circles) and earlier stage targets (white circles) over gold in soils anomalism and major structures. La Cumbre is a gold project within the area owned by TSX listed Batero Gold.

The Andes Gold Project (Los Cerros 90%, BHC 10% free carry to FS) is a larger area of early stage exploration in the state of Antioquia ~70km north of Quinchia. The Company has previously completed extensive preliminary surface work at many sites within the expansive footprint, including ~14,000 surface samples, to identify multiple early stage epithermal gold and porphyry gold/copper targets.

Quinchia Project

A total of 58 drill holes (all but seven drilled since September 2020) at the Tesorito porphyry has demonstrated continuity of modelled low grade surface envelopes resulting in the merger of targets previously described as Tesorito South and

Tesorito North to form one larger system now recognised as the Tesorito Porphyry. Low grade envelopes now describe an oval shape of ~1100m in a North-South direction and ~675m in an East-West direction with the emergence of a significant surface high grade central zone, which bodes well for potential project economics (Figure 3).

Throughout the year Tesorito continued to deliver spectacular drill intercepts over a wide area and has now delivered 16 drill hole intercepts of over 200m grading ~1g/t starting on or near surface, including globally significant intercepts of 320m @ 1.5g/t Au from surface and 629m @ 0.88g/t Au from surface (see Figure 3 for detail).

The Tesorito high grade core 'daylights' (reaches surface) east of early program drilling providing a very exciting boost the potential of Tesorito. The area described by the following intercepts radiating from a common drill pad bodes well for potential project economics, raising the possibility of a high-grade starter pit³:

- 222m @ 1.51g/t Au from surface including 59.5m @ 2.6g/t Au from surface within 378m @ 1.03g/t Au in TS-DH24;
- 56.0m @ 1.95g/t Au from surface, including 24.3m @ 2.69g/t Au from surface within 330m @ 0.99g/t Au in TS-DH25;
- 10.0m @ 2.13g/t Au from 2m and 30.0m @ 2.6g/t Au from 80m within 158.0m @ 1.42g/t Au from surface in TS-DH26;
- 107.6m @ 1.1g/t Au from surface, including 33.4m @ 2.51g/t Au from 2.6m in TS-DH29; and
- 144m @ 1.2g/t Au from 6m including 27.7m @ 1.94g/t Au from 6m in TS-DH30.

The Company confirms that it is not aware of any new information that affects the information contained in the announcement.

On the back of the intensive 2021/22 drill campaign, the Company commissioned a Maiden Mineral Resource Estimate (MRE) for Tesorito in Q1, 2022 generating 1.3Moz @ 0.81g/t Au and taking the total Quinchia Resource to ~2.6Moz (Table 1). A pit shell capturing the above-mentioned high-grade core added strength to the potential of a high grade starter pit with an MRE of 540koz @ 1.23g/t Au (Table 2).

Quinchia subzone	Resource Category	CUT-OFF (g/t Au)	TONNES (Mt)	Au (g/t)	Au (koz)
Tesorito	Inferred	0.50	50.0	0.81	1,298
Dosquebradas	Inferred	0.50	20.2	0.71	459
Miraflores - U.Ground	Measured + Indicated	1.20	9.3	2.82	840
Miraflores - U.Ground	Inferred	1.20	0.5	2.36	37
QUINCHIA RESOURCE			80.0	1.02	2,634

Table 1: Quinchia Mineral Resource Estimate⁵

CUT-OFF	TONNES (Mt)	Au (g/t)	Ag (g/t)	Au (koz)	Ag (koz)
0.8g/t Au	13.69	1.23	0.89	540	391

Table 2: Tesorito In Situ Inferred MRE as at 22 March 2022, of a pit shell capturing the central high grade porphyry core which starts from surface. The MRE is a subset of the larger optimized Tesorito MRE⁵

Evidence built up through the year also suggests Tesorito is part of a larger system extending to the northwest to potentially incorporate the Miraflores breccia pipe ore body ~1km Northwest. In particular, drill holes TS-DH16, '24 and '36 were intentionally extended beyond the accepted western boundary of the Tesorito porphyry and intercepted more mineralised porphyry lithology and alteration not directly attributable to Tesorito but consistent with the northwest trending larger central mineralised system hypothesis.

Buoyed by the above-mentioned drill results adding weight to the exciting prospect that Tesorito, as significant as it is, is an end member of a larger system, the Company employed deep penetrating Induced Polarisation (IP) geophysics over the area. An IP conductivity and chargeability high was revealed in the location and depths prescribed by the regional geology model with a magnetic high occurring below, which is a signature consistent with intrusive bodies such as porphyry systems (Figure 4).

A program of deep drilling targeting the central porphyry target forms part of the Q1 2022 drill program.

⁵ Contains a mix of Inferred, Indicated and Measured Resources. The Miraflores Reserve is included in the Miraflores Resource. Refer ASX announcement dated 14 March 2017 (Miraflores Resource) and 27 November 2017 (Miraflores Reserve), 25 February 2020 (Dosquebradas Resource) and 22 March 2022 (Tesorito Resource). The Company confirms that it is not aware of any new information or data that materially affects the information included in the market announcements, and that all material assumptions and technical parameters underpinning the estimates continue to apply.

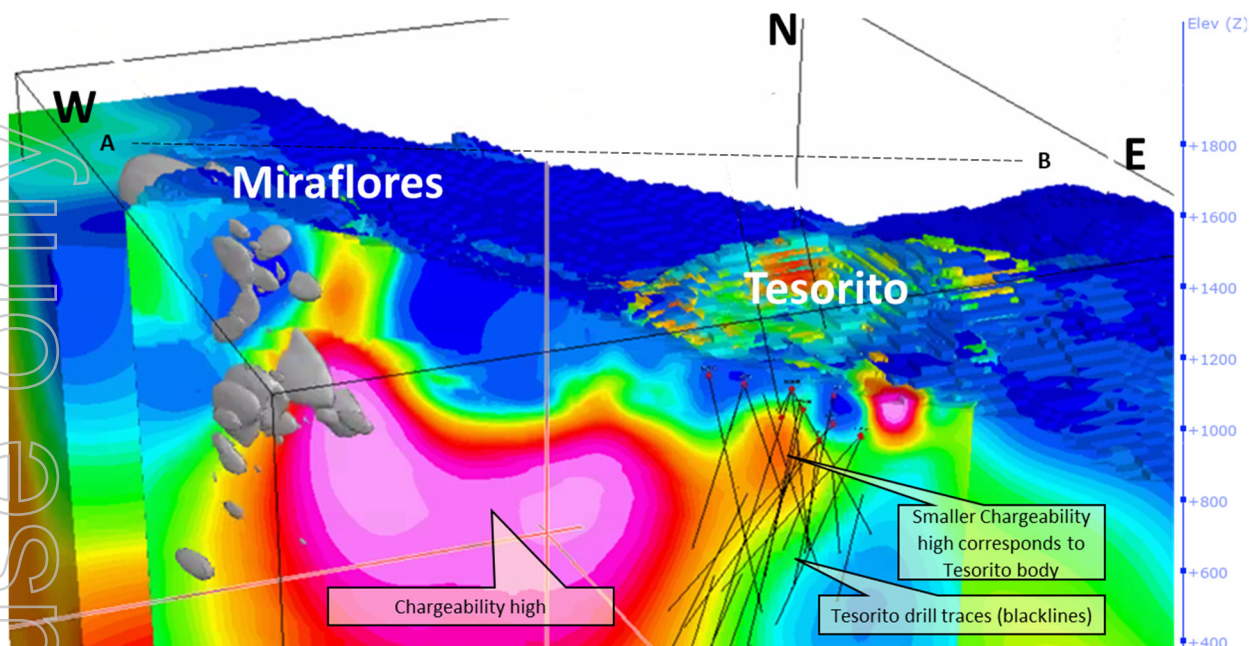

Figure 4: 3-D section looking north-northwest. A large IP chargeability high has been described between the Miraflores deposit (grey masses describing zones of >1.0g/t Au within the larger Miraflores Mineral Resource) and Tesorito prospect. **NOTE:** strong drill core gold assay results from across much of Tesorito south drilling correlate to a local chargeability high extending from the major chargeability high.

Quinchía Project – Ceibal porphyry discovery

On the back of encouraging soil assay results in January 2021, an initial six-hole scout diamond drilling program at Ceibal has provided an encouraging start to the investigation of this new porphyry discovery less than 1km from the Tesorito Gold Porphyry. Ceibal displays structural characteristics consistent with the Tesorito Gold Porphyry structural model – in particular, its location within the Marmato Fault Corridor and at the intersection of northwest trending faults.

All six drill holes of the Ceibal campaign generated extensive intersections (between 88m and 586m) of porphyry gold mineralisation bearing strong resemblance to the extensive low-grade intercepts at the Tesorito Gold Porphyry. Intersections of the initial campaign include⁶:

- 500m @ 0.52g/t Au from surface in CEDDH01
- 586m @ 0.51g/t Au from surface in CEDDH02
- 243.1m @ 0.49g/t Au from 87.20m in CEDDH03
- 120.00m @ 0.71g/t Au from 4m in CEDDH04
- 88.00m @ 0.51g/t Au from 314m in CEDDH05
- 252.00m @ 0.41g/t Au from 530m in CEDDH06

The causative intrusive porphyry or related wide intervals of intrusive breccia have not yet been intersected at Ceibal. However extensive sheeted type veining and trends in element, mineral and vein density, suggest the causative porphyry intrusion (porphyry core) is north of the drilled area. Magnetic susceptibility results also generated during the year revealed two northern magnetic highs, potentially representing the location of the porphyry core (Figure 2) and conforming to the regional northwest/north-northwest orientation associated with gold bearing systems throughout the Quinchia Project.

⁶ See announcement 8 July 2021 for results from drillholes CEDDH01 and '02 and 22 November 2021 for CEDDH03 to '06. The Company confirms that it is not aware of any new information that affects the information contained in the announcement

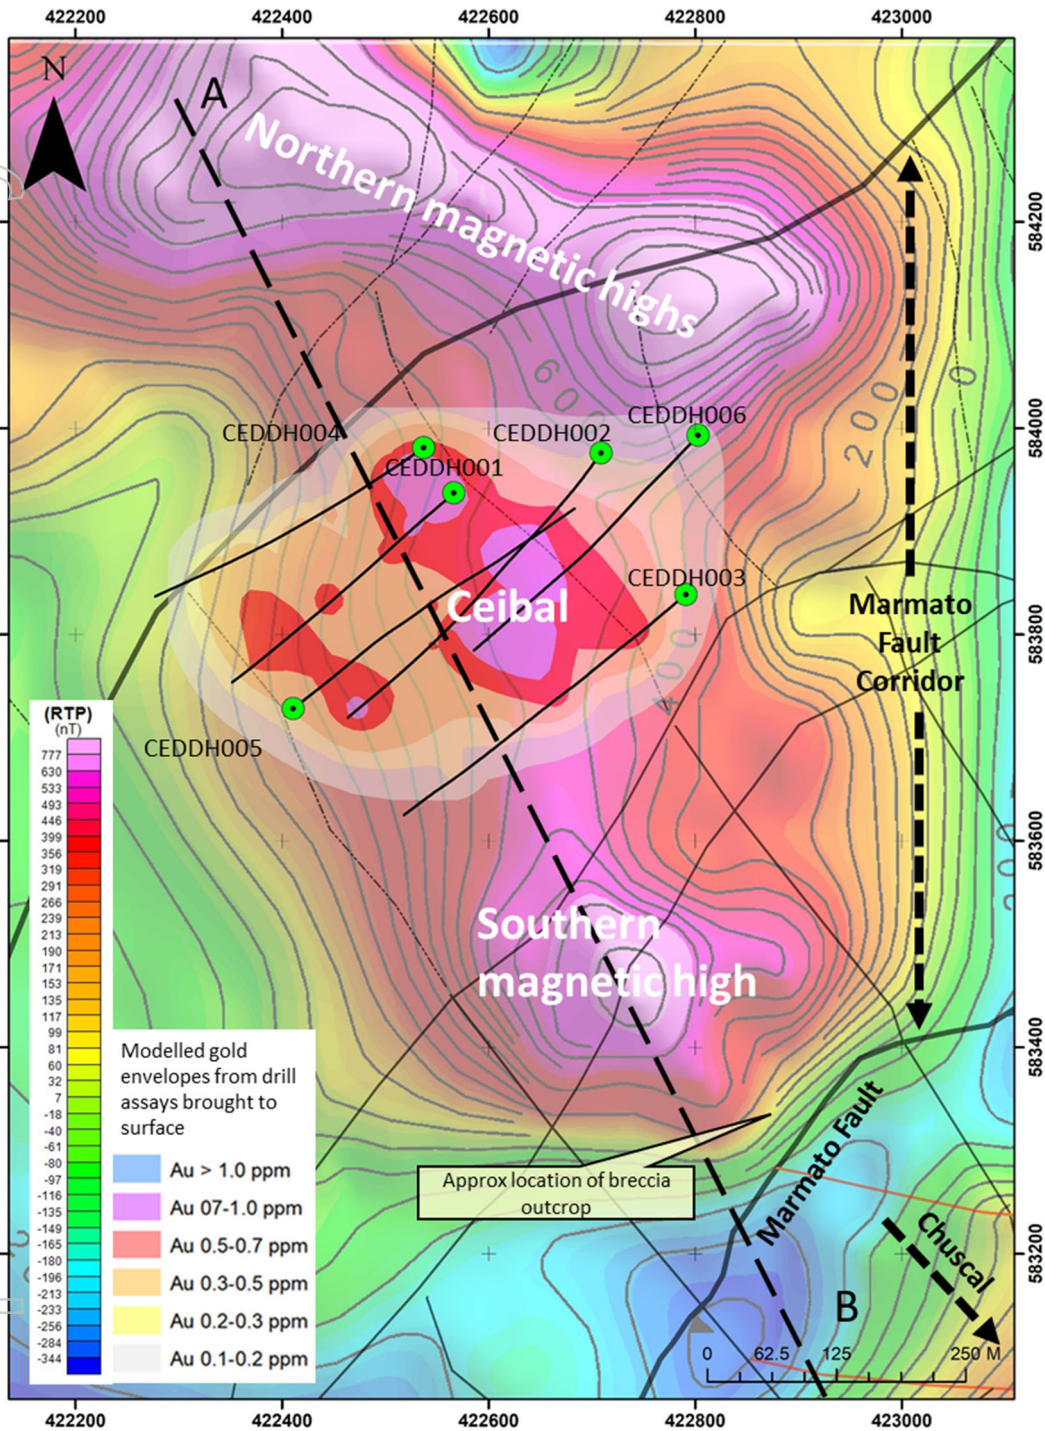

Figure 5: Drill traces and modelled gold envelopes from drill assays projected to surface at Ceibal, over regional magnetic susceptibility. The three magnetic highs are targets for follow up drilling. Note then northwest/north-northwest orientation of higher grade gold envelopes and higher magnetic susceptibility, a characteristic of mineralised systems throughout Quinchia and the broader Mid Cauca porphyry belt.

2021 target generation and geophysics provides an exciting exploration pipeline for 2022

Interpretation and assimilation of region-wide drone aero-magnetic and targeted deep penetrating IP geophysical survey programs during 2021, in conjunction with extensive field programs, have identified significant gold targets spatially associated with established Quinchia gold discoveries (Figure 2). The resulting robust project pipeline (Figure 5) will form the basis of further target generation and drilling scheduled throughout 2022 which is also likely to see a return to established targets such as Chuscal and testing for mineralised extensions to the Miraflores Resource/Reserve.

Project Pipeline and targets

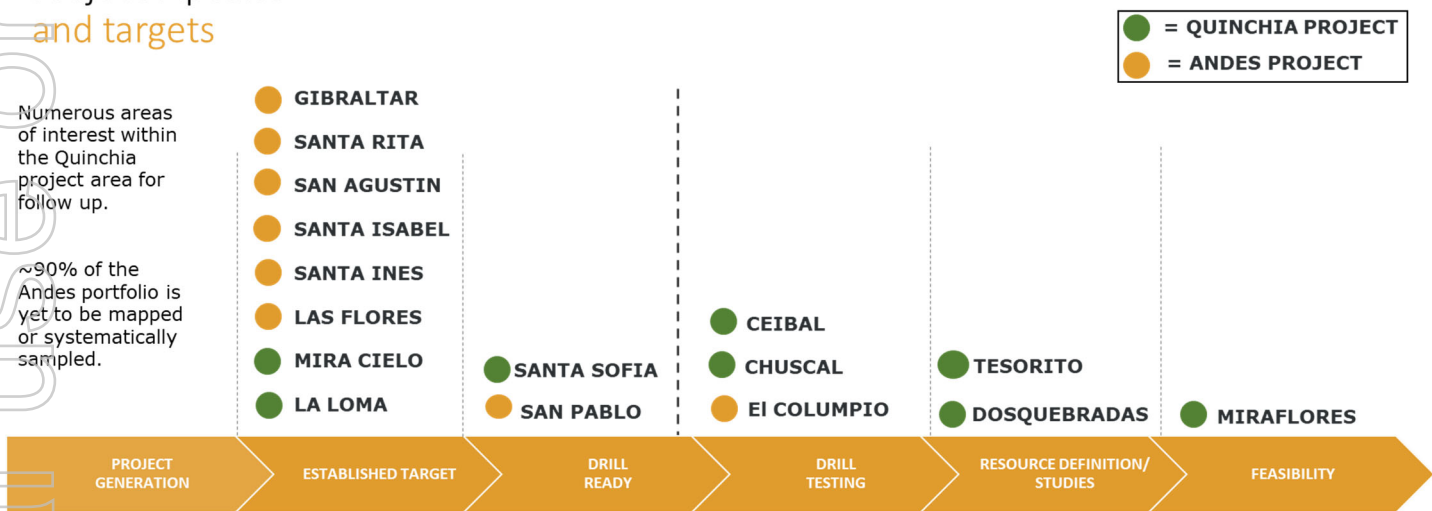

Figure 5: Los Cerros has a robust project pipeline ranging from advanced feasibility studies to expanses of greenfield areas at Andes and Quinchia

Andes Project

With significant momentum at the Company’s Quinchia project, activity at the Andes project was limited to small field programs and desk top targeting/planning throughout 2021. It is anticipated that there will be similar activity within the Andes Project in 2022 plus potentially including drilling.

Our role in the Colombian community and economy

The Company’s success at the drill bit, the subsequent flow of funding and our exemplary management/containment of COVID-19 has allowed us to expand our workforce to over 128 employees (250 including contractors/drillers etc). Consistent with the Company’s mantra to ‘Hire, Buy, Train, Invest Local’ the team includes 100 people from local towns in a time when job loss is a threat to many families in the Quinchia district.

The following summarises some of the Company’s 2021 activity and achievements with respect to the Company’s ESG framework. Our efforts were also acknowledged in Colombia in being chosen as a finalist in the Colombian Mining Industry ESG awards and the appointment of Los Cerros’ CEO as an Ambassador for ‘Women In Mining Colombia’ acknowledging the Company’s efforts to encourage women into mining.

Objectives were set for a 25% female workforce and 25% of senior management reporting to the CEO being female in 2021 and these were met and in the case of the workforce exceeded.

EMPLOY LOCAL ENGAGE LOCAL

- 98% Colombian team (128 people)
- 86% local community
- 33% female. 11% minorities

BE OPEN AND TRANSPARENT

- 56 Community briefings, 1427 attendees

FORWARD LOOKING STATEMENTS

This document contains forward looking statements concerning Los Cerros. Forward-looking statements are not statements of historical fact and actual events and results may differ materially from those described in the forward-looking statements as a result of a variety of risks, uncertainties and other factors. Forward-looking statements are inherently subject to business, economic, competitive, political and social uncertainties and contingencies. Many factors could cause the Company's actual results to differ materially from those expressed or implied in any forward-looking information provided by the Company, or on behalf of the Company. Such factors include, among other things, risks relating to additional funding requirements, metal prices, exploration, development and operating risks, competition, production risks, regulatory restrictions, including environmental regulation and liability and potential title disputes. Forward looking statements in this document are based on Los Cerros' beliefs, opinions and estimates of Los Cerros as of the dates the forward-looking statements are made, and no obligation is assumed to update forward looking statements if these beliefs, opinions and estimates should change or to reflect other future developments. Although management believes that the assumptions made by the Company and the expectations represented by such information are reasonable, there can be no assurance that the forward-looking information will prove to be accurate. Forward-looking information involves known and unknown risks, uncertainties, and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any anticipated future results, performance or achievements expressed or implied by such forward-looking information. Such factors include, among others, the actual market price of gold, the actual results of future exploration, changes in project parameters as plans continue to be evaluated, as well as those factors disclosed in the Company's publicly filed documents. Readers should not place undue reliance on forward-looking information. The Company does not undertake to update any forward-looking information, except in accordance with applicable securities laws. No representation, warranty or undertaking, express or implied, is given or made by the Company that the occurrence of the events expressed or implied in any forward-looking statements in this presentation will actually occur.

The Directors present their report, together with the financial statements, on the consolidated entity (referred to hereafter as the 'consolidated entity', 'Consolidated Group' or the 'Group') consisting of Los Cerros Limited (referred to hereafter as 'Los Cerros' or the 'Company' or 'parent entity') and the entities it controlled at the end of, or during, the year ended 31 December 2021.

Directors

The following persons were Directors of Los Cerros Limited during the whole of the financial year and up to the date of this report:

Principal Activities and Significant Changes in the Nature of Events

Los Cerros Limited (ASX: LCL) (Los Cerros or the Company) is a gold/copper explorer with a dominant position within the Andes and Quinchia regions of the mid-Cauca Gold Belt of Colombia which hosts many major discoveries.

The Company's focus is the mineral exploration on the assets held in the Andes and the Quinchía Gold Projects. A review of the operations of the Group during the financial year and the results of those operations are set out in the Review of Operations on pages 5 to 12 of this report. There were no significant changes in the nature of events of the Company during the year.

During the year, work continued on an Environmental Impact Statement for potential gold mining operations at Miraflores and exploration drilling of gold epithermal and porphyry targets at Chuscal, Ceibal and Tesorito.

On 16 July 2021, the Company announced the outcome of its capital raising via a private share placement to professional and sophisticated investors raising in excess of \$20 million before capital raising costs to advance the Quinchía and Andes Gold Projects in Colombia. The placement shares were issued in two tranches, the first in July 2021, raising \$19,138,000 via the issue of 119,612,500 shares at \$0.16 per share. The second tranche of the placement shares was issued in September 2021, raising \$1,052,000 via the issue of 6,575,000 at \$0.16 per share.

During the year, the Company also raised an additional \$4,218,458 as a result of the substantial conversion of 14,349,733 listed options and 20,875,000 unlisted options. The Company also issued a total of 2,163,731 fully paid ordinary shares as payment for services rendered. The value of the shares totalled \$353,697. Further details are included in note 15 in the notes to the consolidated financial statements.

The COVID-19 pandemic was ongoing during the year and up to the date of this report. Los Cerros continues to monitor the situation closely, with a primary focus on the health, wellbeing and safety of all employees of the Group. The Group implemented extensive business continuity procedures to ensure ongoing operations with minimal disruptions. As in the prior financial year, there has been minimal impact to the Group to date.

Dividends

There were no dividends paid, recommended, or declared, during the current or previous financial years.

Review of Financial Results

The loss for the consolidated entity, after providing for income tax, amounted to \$5,306,345 (2020: \$3,717,752). Cash and cash equivalents at the end of the year were \$19,252,206 (2020: \$7,814,764). Net assets for the Company increased from \$27,346,330 at 31 December 2020 to \$44,832,156 at 31 December 2021.

Significant Changes in the State of Affairs

There were no significant changes in the state of affairs of the consolidated entity during the financial year.

Matters Subsequent to the End of the Financial Year

After year-end and up to the date of this report, the Company issued and allotted a total of 1,950,000 fully paid ordinary shares upon the exercise of 1,950,000 unlisted options, raising a total of \$71,500 after year-end.

No other matter or circumstance has arisen since 31 December 2021 that has significantly affected, or may significantly affect the consolidated entity's operations, the results of those operations, or the consolidated entity's state of affairs in future financial years.

Likely Developments and Expected Results of Operations

The Group's objective is to continue to explore for gold and develop its gold assets in Colombia.

Environmental Regulation

The consolidated entity is not subject to any significant environmental regulation under Australian Commonwealth or State law. The Group is subject to environmental regulations in Colombia where it operates. The Directors are not aware of any material breaches of the legislation during the year.

Remuneration Report (Audited)

The remuneration report details the key management personnel remuneration arrangements for the consolidated entity, in accordance with the requirements of the *Corporations Act 2001* and its Regulations.

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the entity, directly or indirectly, including all directors.

The remuneration report is set out under the following main headings:

- Principles used to determine the nature and amount of remuneration;
- Details of remuneration;
- Service agreements;
- Share-based compensation; and
- Additional disclosures relating to key management personnel.

Principles Used to Determine the Nature and Amount of Remuneration

The objective of the consolidated entity's executive reward framework is to ensure reward for performance is competitive and appropriate for the results delivered. The framework aligns executive reward with the achievement of strategic objectives and the creation of value for shareholders, and it is considered to conform to market best practice for the delivery of reward. The Board ensures that executive reward satisfies the following key criteria for good reward governance practices:

- competitiveness and reasonableness;
- acceptability to shareholders;
- performance linkage / alignment of executive compensation; and
- transparency.

The Board, in the absence of a Nomination and Remuneration Committee, is responsible for determining and reviewing remuneration arrangements for its directors and executives. The performance of the consolidated entity depends on the quality of its directors and executives. The remuneration philosophy is to attract, motivate and retain high performance and high quality personnel.

The Board has structured an executive remuneration framework that is market competitive and complementary to the reward strategy of the consolidated entity.

The reward framework is designed to align executive reward to shareholders' interests. The Board have considered that it should seek to enhance shareholders' interests by:

- having economic profit as a core component of plan design;
- focusing on sustained growth in shareholder wealth, consisting of dividends and growth in share price, and delivering constant or increasing return on assets as well as focusing the executive on key non-financial drivers of value; and
- attracting and retaining high calibre executives.

Additionally, the reward framework should seek to enhance executives' interests by:

- rewarding capability and experience;
- reflecting competitive reward for contribution to growth in shareholder wealth; and
- providing a clear structure for earning rewards.

In accordance with best practice corporate governance, the structure of non-executive director and executive director remuneration is separate.

Non-Executive Directors Remuneration

Fees and payments to non-executive directors reflect the demands and responsibilities of their role. Non-executive directors' fees and payments are reviewed annually by the Board. The Board may, from time to time, receive advice from independent remuneration consultants to ensure non-executive directors' fees and payments are appropriate and in line with the market. The chairman's fees are determined independently to the fees of other non-executive directors based on comparative roles in the external market. The chairman is not present at any discussions relating to the determination of his own remuneration.

Principles Used to Determine the Nature and Amount of Remuneration (Cont.)

Non-Executive Directors Remuneration (Cont.)

Remuneration Report (Audited) (Cont.)

ASX listing rules require the aggregate non-executive directors' remuneration be determined periodically by a general meeting. The most recent determination was at the Annual General Meeting held on 31 May 2012, where the shareholders approved a maximum annual aggregate remuneration of \$600,000.

Executive Remuneration

The consolidated entity aims to reward executives based on their position and responsibility, with a level and mix of remuneration which has both fixed and variable components.

The executive remuneration and reward framework has four components:

- base pay and non-monetary benefits;
- short-term performance incentives;
- share-based payments; and
- other remuneration such as superannuation and long service leave.

The combination of these comprises the executive's total remuneration.

Fixed remuneration, consisting of base salary, superannuation and non-monetary benefits, are reviewed annually by the Board based on individual and business unit performance, the overall performance of the consolidated entity and comparable market remunerations.

Executives may receive their fixed remuneration in the form of cash or other fringe benefits (for example motor vehicle benefits) where it does not create any additional costs to the consolidated entity and provides additional value to the executive.

The short-term incentives ('STI') program is designed to align the targets of the business units with the performance hurdles of executives. STI payments are granted to executives based on specific annual targets and key performance indicators ('KPIs') being achieved. KPIs may include profit contribution, leadership contribution and project milestones.

Jason Stirbinskis earned \$75,000 for meeting performance hurdles during 2021.

The long-term incentives ('LTI') include long service leave and share-based payments. Shares are awarded to executives over a period of four years based on long-term incentive measures. These include increase in shareholders' value and project milestones. The Board reviewed the long-term equity-linked performance incentives specifically for executives during the year ended 31 December 2021.

Consolidated Entity Performance and Link to Remuneration

Remuneration for certain individuals is directly linked to the performance of the consolidated entity. A portion of cash bonus and incentive payments are dependent on defined exploration or corporate objectives being met. The remaining portion of the cash bonus and incentive payments are at the discretion of the Board.

The Board is of the opinion that improved results can be attributed in part to the adoption of performance-based compensation and is satisfied that performance based compensation can increase shareholder wealth if maintained over the coming years.

Voting and Comments Made at the Company's 27 May 2021 Annual General Meeting ('AGM')

At the AGM held on 27 May 2021, the shareholders of the Company approved the adoption of the remuneration report for the year ended 31 December 2020. The Company did not receive any specific feedback at the AGM regarding its remuneration practices.

Note 1. Significant Accounting Policies

The principal accounting policies adopted in the preparation of the financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

(a) New or Amended Accounting Standards and Interpretations Adopted

The consolidated entity has adopted all of the new or amended Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') that are mandatory for the current reporting period.

The adoption of these Accounting Standards and Interpretations did not have any significant impact on the financial performance or position of the consolidated entity.

(b) New Accounting Standards and Interpretations Not Yet Mandatory or Early Adopted

Australian Accounting Standards and Interpretations that have recently been issued or amended but are not yet mandatory, have not been early adopted by the consolidated entity for the annual reporting period ended 31 December 2021. The consolidated entity has not yet assessed the impact of these new or amended Accounting Standards and Interpretations.

(c) Going Concern

The Consolidated Group incurred a net loss after tax of \$5,306,345 (2020: \$3,717,752). The Consolidated Group's net cash used in operations was \$3,571,769 during year ended 31 December 2021 (2020: \$4,715,956); its net cash used in investing activities was \$8,036,187 (2020: \$3,229,994).

The Company has a cash balance of \$19,252,206 at 31 December 2021 (2020: \$7,814,764). The Group is in the process of an extensive exploration program in Colombia and the Directors intend to raise further capital to provide additional funds.

If additional capital is not obtained, then the going concern basis may not be appropriate, with the result that the Group may have to realise its assets and extinguish its liabilities, other than in the ordinary course of business and at amounts different from those stated in the financial report. No allowance for such circumstances has been made in the financial report.

(d) Basis of Preparation

These general-purpose financial statements have been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') and the *Corporations Act 2001*, as appropriate for for-profit oriented entities. These financial statements also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board ('IASB').

Historical Cost Convention

The financial statements have been prepared under the historical cost convention, except for assets and liabilities that are required to be recorded at fair value.

Critical Accounting Estimates

The preparation of the financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the consolidated entity's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in Note 2.

In accordance with the *Corporations Act 2001*, these financial statements present the results of the consolidated entity only. Supplementary information about the parent entity is disclosed in Note 29.

(e) Principles of Consolidation

The consolidated financial statements incorporate the assets and liabilities of all subsidiaries of Los Cerros Limited ('Company' or 'parent entity') as at 31 December 2021 and the results of all subsidiaries for the year then ended. Los Cerros Limited and its subsidiaries together are referred to in these financial statements as the 'consolidated entity', 'Consolidated Group' or the 'Group'.

Note 1. Significant Accounting Policies (Cont.)

(d) Principles of Consolidation (Cont.)

Subsidiaries are all those entities over which the consolidated entity has control. The consolidated entity controls an entity when the consolidated entity is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the consolidated entity. They are de-consolidated from the date that control ceases.

Intercompany transactions, balances and unrealised gains on transactions between entities in the consolidated entity are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of the impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the consolidated entity.

The acquisition of subsidiaries is accounted for using the acquisition method of accounting. A change in ownership interest, without the loss of control, is accounted for as an equity transaction, where the difference between the consideration transferred and the book value of the share of the non-controlling interest acquired is recognised directly in equity attributable to the parent.

Where the consolidated entity loses control over a subsidiary, it derecognises the assets including goodwill, liabilities and non-controlling interest in the subsidiary together with any cumulative translation differences recognised in equity. The consolidated entity recognises the fair value of the consideration received and the fair value of any investment retained together with any gain or loss in profit or loss.

(f) Operating Segments

Operating segments are presented using the 'management approach', where the information presented is on the same basis as the internal reports provided to the Chief Operating Decision Makers ('CODM'). The CODM is responsible for the allocation of resources to operating segments and assessing their performance.

(g) Foreign Currency Translation

The financial statements are presented in Australian dollars, which is Los Cerros Limited's functional and presentation currency.

Foreign Currency Transactions

Foreign currency transactions are translated into Australian dollars using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at financial year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

Foreign Operations

The assets and liabilities of foreign operations are translated into Australian dollars using the exchange rates at the reporting date. The revenues and expenses of foreign operations are translated into Australian dollars using the average exchange rates, which approximate the rates at the dates of the transactions, for the period. All resulting foreign exchange differences are recognised in other comprehensive income through the foreign currency reserve in equity.

The foreign currency reserve is recognised in profit or loss when the foreign operation or net investment is disposed of.

(h) Revenue Recognition

The consolidated entity recognises revenue as follows:

Interest

Interest revenue is recognised as interest accrues using the effective interest method. This is a method of calculating the amortised cost of a financial asset and allocating the interest income over the relevant period using the effective interest rate, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial asset.

(i) Income Tax

Note 1. Significant Accounting Policies (Cont.)

The income tax expense or benefit for the period is the tax payable on that period's taxable income based on the applicable income tax rate for each jurisdiction, adjusted by the changes in deferred tax assets and liabilities attributable to temporary differences, unused tax losses and the adjustment recognised for prior periods, where applicable.

Deferred tax assets and liabilities are recognised for temporary differences at the tax rates expected to be applied when the assets are recovered or liabilities are settled, based on those tax rates that are enacted or substantively enacted, except for:

- When the deferred income tax asset or liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and that, at the time of the transaction, affects neither the accounting nor taxable profits; or
- When the taxable temporary difference is associated with interests in subsidiaries, associates or joint ventures, and the timing of the reversal can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

The carrying amount of recognised and unrecognised deferred tax assets are reviewed at each reporting date. Deferred tax assets recognised are reduced to the extent that it is no longer probable that future taxable profits will be available for the carrying amount to be recovered. Previously unrecognised deferred tax assets are recognised to the extent that it is probable that there are future taxable profits available to recover the asset.

Deferred tax assets and liabilities are offset only where there is a legally enforceable right to offset current tax assets against current tax liabilities and deferred tax assets against deferred tax liabilities; and they relate to the same taxable authority on either the same taxable entity or different taxable entities which intend to settle simultaneously.

(j) Current and Non-Current Classification

Assets and liabilities are presented in the statement of financial position based on current and non-current classification.

An asset is classified as current when: it is either expected to be realised or intended to be sold or consumed in the consolidated entity's normal operating cycle; it is held primarily for the purpose of trading; it is expected to be realised within 12 months after the reporting period; or the asset is cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period. All other assets are classified as non-current.

A liability is classified as current when: it is either expected to be settled in the consolidated entity's normal operating cycle; it is held primarily for the purpose of trading; it is due to be settled within 12 months after the reporting period; or there is no unconditional right to defer the settlement of the liability for at least 12 months after the reporting period. All other liabilities are classified as non-current.

Deferred tax assets and liabilities are always classified as non-current.

(k) Cash and Cash Equivalents

Cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

(i) Trade and Other Receivables

Other receivables are recognised at amortised cost, less any allowance for expected credit losses.

(m) Non-Current Assets or Disposal Groups Classified as Held for Sale

Non-current assets and assets of disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continued use. They are measured at the lower of their carrying amount and fair value less costs of disposal. For non-current assets or assets of disposal groups to be classified as held for sale, they must be available for immediate sale in their present condition and their sale must be highly probable.

Note 1. Significant Accounting Policies (Cont.)

An impairment loss is recognised for any initial or subsequent write down of the non-current assets and assets of disposal groups to fair value less costs of disposal. A gain is recognised for any subsequent increases in fair value less costs of disposal of a non-current assets and assets of disposal groups, but not in excess of any cumulative impairment loss previously recognised.

Non-current assets are not depreciated or amortised while they are classified as held for sale. Interest and other expenses attributable to the liabilities of assets held for sale continue to be recognised.

Non-current assets classified as held for sale and the assets of disposal groups classified as held for sale are presented separately on the face of the statement of financial position, in current assets. The liabilities of disposal groups classified as held for sale are presented separately on the face of the statement of financial position, in current liabilities.

(n) Joint Ventures

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement. Investments in joint ventures are accounted for using the equity method. Under the equity method, the share of the profits or losses of the joint venture is recognised in profit or loss and the share of the movements in equity is recognised in other comprehensive income. Investments in joint ventures are carried in the statement of financial position at cost plus post-acquisition changes in the consolidated entity's share of net assets of the joint venture. Goodwill relating to the joint venture is included in the carrying amount of the investment and is neither amortised nor individually tested for impairment. Income earned from joint venture entities reduce the carrying amount of the investment.

(o) Property, Plant and Equipment

Plant and equipment is stated at historical cost less accumulated depreciation and impairment. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Depreciation is calculated on a straight-line basis to write off the net cost of each item of property, plant and equipment (excluding land) over their expected useful lives as follows:

Buildings	40 years
Leasehold improvements	3-10 years
Plant and equipment	3-7 years

The residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each reporting date.

Leasehold improvements are depreciated over the unexpired period of the lease or the estimated useful life of the assets, whichever is shorter.

An item of property, plant and equipment is derecognised upon disposal or when there is no future economic benefit to the consolidated entity. Gains and losses between the carrying amount and the disposal proceeds are taken to profit or loss.

(p) Exploration and Evaluation Assets

Exploration and evaluation expenditures in relation to each separate area of interest are recognised as an exploration and evaluation asset in the year in which they are incurred where the following conditions are satisfied:

- i. the rights to tenure of the area of interest are current; and
- ii. at least one of the following conditions is also met:
 - a. the exploration and evaluation expenditures are expected to be recouped through successful development and exploration of the area of interest, or alternatively, by its sale; or
 - b. exploration and evaluation activities in the area of interest have not at the reporting date reached a stage which permits a reasonable assessment of the existence or otherwise of economically recoverable reserves, and active and significant operations in, or in relation to, the area of interest is continuing.

Exploration and evaluation assets are initially measured at cost and include acquisition of rights to explore, studies, exploratory drilling, trenching and sampling and associated activities and an allocation of depreciation and amortised of assets used in exploration and evaluation activities. General and administrative costs are only included in the measurement of exploration and evaluation costs where they are related directly to operational activities in a particular area of interest.

Note 1. Significant Accounting Policies (Cont.)

Exploration and evaluation assets are assessed for impairment when facts and circumstances suggest that the carrying amount of an exploration and evaluation asset may exceed its recoverable amount. The recoverable amount of the exploration and evaluation asset (for the cash generating unit(s) to which it has been allocated being no larger than the relevant area of interest) is estimated to determine the extent of the impairment loss (if any). Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but only to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in previous years.

Where a decision has been made to proceed with development in respect of a particular area of interest, the relevant exploration and evaluation asset is tested for impairment and the balance is then reclassified to development.

(q) Impairment of Non-Financial Assets

At each reporting date, the Group reviews the carrying amounts of its non-financial assets to determine whether there is any indication that those assets have suffered an impairment loss. This includes considering the requirements set out in AASB 6 *Exploration for and Evaluation of Mineral Resources* ('AASB 6') in respect of the capitalised exploration and development expenditure. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where the asset does not generate cash flows that are independent from other assets, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Plant and equipment, and capitalised exploration and development expenditure, are assessed for impairment on a cash generating unit ('CGU') basis. A cash generating unit is the smallest grouping of assets that generates independent cash flows, and generally represents an individual project. Impairment losses recognised in respect of cash generating units are allocated to reduce the carrying amount of the assets in the unit on a pro-rata basis. If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised in profit or loss immediately, unless the relevant asset is carried at fair value, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset (cash-generating unit) is increased to the revised estimate of its recoverable amount, but only to the extent that would have been determined had no impairment loss been recognised for the asset (cash-generating unit) in prior year. A reversal of an impairment loss is recognised in profit or loss immediately.

Impairment testing is performed annually for goodwill and intangible assets with indefinite lives.

(r) Trade and Other Payables

These amounts represent liabilities for goods and services provided to the consolidated entity prior to the end of the financial year and which are unpaid. Due to their short-term nature they are measured at amortised cost and are not discounted. The amounts are unsecured and are usually paid within 30 days of recognition.

(s) Borrowings

Loans and borrowings are initially recognised at the fair value of the consideration received, net of transaction costs. They are subsequently measured at amortised cost using the effective interest method.

(t) Finance Costs

Finance costs attributable to qualifying assets are capitalised as part of the asset. All other finance costs are expensed in the period in which they are incurred.

(u) Employee Benefits

Short-Term Employee Benefits

Liabilities for wages and salaries, including non-monetary benefits, annual leave and long service leave expected to be settled wholly within 12 months of the reporting date are measured at the amounts expected to be paid when the liabilities are settled.

Note 1. Significant Accounting Policies (Cont.)

(u) Employee Benefits (Cont.)

Share-Based Payments (Cont.)

Share-Based Payments

Equity-settled and cash-settled share-based compensation benefits are provided to employees.

Equity-settled transactions are awards of shares, or options over shares that are provided to employees in exchange for the rendering of services. Cash-settled transactions are awards of cash for the exchange of services, where the amount of cash is determined by reference to the share price.

The cost of equity-settled transactions are measured at fair value on grant date. Fair value is independently determined using the American Trinomial Tree or American Trinomial Barrier Option method of valuing securities that takes into account the exercise price, the term of the option, the impact of dilution, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk free interest rate for the term of the option, together with non-vesting conditions that do not determine whether the consolidated entity receives the services that entitle the employees to receive payment. No account is taken of any other vesting conditions.

The cost of equity-settled transactions are recognised as an expense with a corresponding increase in equity over the vesting period. The cumulative charge to profit or loss is calculated based on the grant date fair value of the award, the best estimate of the number of awards that are likely to vest and the expired portion of the vesting period. The amount recognised in profit or loss for the period is the cumulative amount calculated at each reporting date less amounts already recognised in previous periods.

All changes in the liability are recognised in profit or loss. The ultimate cost of cash-settled transactions is the cash paid to settle the liability.

Market conditions are taken into consideration in determining fair value. Therefore, any awards subject to market conditions are considered to vest irrespective of whether or not that market condition has been met, provided all other conditions are satisfied.

If equity-settled awards are modified, as a minimum an expense is recognised as if the modification has not been made. An additional expense is recognised, over the remaining vesting period, for any modification that increases the total fair value of the share-based compensation benefit as at the date of modification.

If the non-vesting condition is within the control of the consolidated entity or employee, the failure to satisfy the condition is treated as a cancellation. If the condition is not within the control of the consolidated entity or employee and is not satisfied during the vesting period, any remaining expense for the award is recognised over the remaining vesting period, unless the award is forfeited.

If equity-settled awards are cancelled, it is treated as if it has vested on the date of cancellation, and any remaining expense is recognised immediately. If a new replacement award is substituted for the cancelled award, the cancelled and new award is treated as if they were a modification.

(v) Fair Value Measurement

When an asset or liability, financial or non-financial, is measured at fair value for recognition or disclosure purposes, the fair value is based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date; and assumes that the transaction will take place either: in the principal market; or in the absence of a principal market, in the most advantageous market.

Fair value is measured using the assumptions that market participants would use when pricing the asset or liability, assuming they act in their economic best interests. For non-financial assets, the fair value measurement is based on its highest and best use. Valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, are used, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

(w) Issued Capital

Ordinary shares are classified as equity.

Note 1. Significant Accounting Policies (Cont.)

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

(x) Business Combinations

The acquisition method of accounting is used to account for business combinations regardless of whether equity instruments or other assets are acquired.

The consideration transferred is the sum of the acquisition-date fair values of the assets transferred, equity instruments issued or liabilities incurred by the acquirer to former owners of the acquiree and the amount of any non-controlling interest in the acquiree. For each business combination, the non-controlling interest in the acquiree is measured at either fair value or at the proportionate share of the acquiree's identifiable net assets. All acquisition costs are expensed as incurred to profit or loss.

On the acquisition of a business, the consolidated entity assesses the financial assets acquired and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic conditions, the consolidated entity's operating or accounting policies and other pertinent conditions in existence at the acquisition-date.

Where the business combination is achieved in stages, the consolidated entity remeasures its previously held equity interest in the acquiree at the acquisition-date fair value and the difference between the fair value and the previous carrying amount is recognised in profit or loss.

Contingent consideration to be transferred by the acquirer is recognised at the acquisition-date fair value. Subsequent changes in the fair value of the contingent consideration classified as an asset or liability is recognised in profit or loss. Contingent consideration classified as equity is not remeasured and its subsequent settlement is accounted for within equity.

The difference between the acquisition-date fair value of assets acquired, liabilities assumed and any non-controlling interest in the acquiree and the fair value of the consideration transferred and the fair value of any pre-existing investment in the acquiree is recognised as capitalised exploration costs. If the consideration transferred and the pre-existing fair value is less than the fair value of the identifiable net assets acquired, being a bargain purchase to the acquirer, the difference is recognised as a gain directly in profit or loss by the acquirer on the acquisition-date, but only after a reassessment of the identification and measurement of the net assets acquired, the non-controlling interest in the acquiree, if any, the consideration transferred and the acquirer's previously held equity interest in the acquirer.

Business combinations are initially accounted for on a provisional basis. The acquirer retrospectively adjusts the provisional amounts recognised and also recognises additional assets or liabilities during the measurement period, based on new information obtained about the facts and circumstances that existed at the acquisition-date. The measurement period ends on either the earlier of (i) 12 months from the date of the acquisition or (ii) when the acquirer receives all the information possible to determine fair value.

(y) Earnings per Share

Basic Earnings per Share

Basic earnings per share is calculated by dividing the profit attributable to the owners of Los Cerros Limited, excluding any costs of servicing equity other than ordinary shares, by the weighted average number of ordinary shares outstanding during the financial year, adjusted for bonus elements in ordinary shares issued during the financial year.

Diluted Earnings per Share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account the after-income tax effect of interest and other financing costs associated with dilutive potential ordinary shares and the weighted average number of shares assumed to have been issued for no consideration in relation to dilutive potential ordinary shares.

(z) Goods and Services Tax ('GST') and Other Similar Taxes

Revenues, expenses and assets are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the tax authority. In this case it is recognised as part of the cost of the acquisition of the asset or as part of the expense.

Note 1. Significant Accounting Policies (Cont.)

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the tax authority is included in other receivables or other payables in the statement of financial position.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to the tax authority, are presented as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the tax authority.

For personal use only

Note 2. Critical Accounting Judgements, Estimates and Assumptions

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgements and estimates in relation to assets, liabilities, contingent liabilities, revenue and expenses. Management bases its judgements, estimates and assumptions on historical experience and on other various factors, including expectations of future events, management believes to be reasonable under the circumstances. The resulting accounting judgements and estimates will seldom equal the related actual results. The judgements, estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities (refer to the respective notes) within the next financial year are discussed below.

(a) Share-Based Payment Transactions

The consolidated entity measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined by using either the American Trinomial Tree or American Trinomial Barrier Option method taking into account the terms and conditions upon which the instruments were granted. The accounting estimates and assumptions relating to equity-settled share-based payments would have no impact on the carrying amounts of assets and liabilities within the next annual reporting period but may impact profit or loss and equity.

(b) Fair Value Measurement Hierarchy

The consolidated entity is required to classify all assets and liabilities, measured at fair value, using a three level hierarchy, based on the lowest level of input that is significant to the entire fair value measurement, being: Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date; Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and Level 3: Unobservable inputs for the asset or liability. Considerable judgement is required to determine what is significant to fair value and therefore which category the asset or liability is placed in can be subjective.

The fair value of assets and liabilities classified as Level 3 is determined by the use of valuation models. These include discounted cash flow analysis or the use of observable inputs that require significant adjustments based on unobservable inputs.

(c) Deferred Consideration

The deferred consideration liability is the difference between the total purchase consideration, usually on an acquisition of a business combination, and the amounts paid or settled up to the reporting date, discounted to net present value. The consolidated entity applies provisional accounting for any business combination. Any reassessment of the liability during the earlier of the finalisation of the provisional accounting or 12 months from acquisition-date is adjusted for retrospectively as part of the provisional accounting rules in accordance with AASB 3 *Business Combinations*. Thereafter, at each reporting date, the deferred consideration liability is reassessed against revised estimates and any increase or decrease in the net present value of the liability will result in a corresponding gain or loss to profit or loss. The increase in the liability resulting from the passage of time is recognised as a finance cost.

(d) Exploration and Evaluation Costs

Key judgements are applied in considering costs to be capitalised which includes determining expenditures directly related to these activities and allocating overheads between those that are expensed and capitalised. In addition, costs are only capitalised that are expected to be recovered either through successful development or sale of the relevant mining interest. Factors that could impact the future commercial production at the mine include the level of reserves and resources, future technology changes, which could impact the cost of mining, future legal changes and changes in commodity prices. To the extent that capitalised costs are determined not to be recoverable in the future, they will be written off in the period in which this determination is made.

Note 3. Operating Segments

(a) Identification of Reportable Operating Segments

Note 3. Operating Segments (Cont.)

The Company's primary activity is mineral exploration in the geographic area of Colombia. This focus is consistent with the internal reports that are reviewed and used by the Board of Directors, who are the Chief Operating Decision Makers (or 'CODM'), in assessing performance and determining the allocation of resources.

The Group is managed primarily for the sole purpose of mineral exploration.

The information reported to the CODM is on a monthly basis.

(b) Accounting Policies Adopted

Unless stated otherwise, all amounts reported to the Board of Directors, being the CODM with respect to operating segments, are determined in accordance with accounting policies that are consistent to those adopted in the annual and half yearly financial statements of the Group.

(c) Intersegment Transactions

There are no intersegment transactions.

(d) Segment Assets

Where an asset is used across multiple segments, the asset is allocated to that segment that receives majority economic value from that asset. In the majority of instances, segment assets are clearly identifiable on the basis of their nature and physical location.

(e) Segment Liabilities

Liabilities are allocated to segments where there is a direct nexus between the incurrence of the liability and the operations of the segment. Borrowings and tax liabilities are generally considered to relate to the Group as a whole and are not allocated. Segment liabilities include trade and other payables and certain direct borrowings.

The following items of revenue, expenses, assets and liabilities are not allocated to operating segments as they are not considered part of the core operations of any segment:

- Income tax expense;
- Deferred tax assets and liabilities;
- Current tax liabilities; and
- Head office income / expenses and related assets / liabilities.

(a) On 26 February 2020, Mr Simon Brown, a former director of one of the Company's subsidiaries, Andes Resources Pty Ltd (previously Andes Resources Ltd), commenced civil proceedings in the District Court of Western Australia for redundancy and unpaid annual leave. Mr Brown's claims were fully settled on 21 August 2020 under the terms and conditions of the deed of settlement, via a cash payment of \$202,684 and the issue of 3,000,000 unquoted options to Mr Brown. The unquoted options have an exercise price of \$0.07 per option and expire on 1 July 2025 and were valued at \$198,847.

The input used in the measurement of the fair value at grant date of the unquoted options rights were as follows:

Issue date share price	\$0.087
Expected volatility	100%
Rights life	4.88 years
Grant date fair value	\$0.0663

Since the grant of the unquoted options in 2020, Mr Brown has exercised 2,400,000 of the options during the current year (2020: nil), with the remaining 600,000 exercisable at 31 December 2021. Since year-end Mr Brown has exercised a further 450,000 options.

Note 15. Equity – Issued Capital (Cont.)

Share Buy-Back

There is no current on-market share buy-back.

Capital Risk Management

The consolidated entity's objectives when managing capital is to safeguard its ability to continue as a going concern, so that it can provide returns for shareholders and benefits for other stakeholders and to maintain an optimum capital structure to reduce the cost of capital.

Capital is regarded as total equity, as recognised in the statement of financial position, plus net debt. Net debt is calculated as total borrowings less cash and cash equivalents.

In order to maintain or adjust the capital structure, the consolidated entity may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

The consolidated entity would look to raise capital when an opportunity to invest in a business or company was seen as value adding relative to the current Company's share price at the time of the investment.

The consolidated entity is subject to certain financing arrangements covenants and meeting these is given priority in all capital risk management decisions. There have been no events of default on the financing arrangements during the financial year.

The capital risk management policy remains unchanged from the 2020 Annual Report.

Note 16. Equity – Options and Performance Rights

As at the reporting date, the Company has a series of options and performance rights currently under issue, which entitle holders to one ordinary share in the Parent Company at a fixed exercise price, or the achievement of certain performance targets. (a) Long Term Incentive Plan

Performance rights and performance options issued to related parties under the Company's Long-Term Incentive Plan was approved at AGM held on 28 May 2018. During the previous financial year the shareholders approved a new Performance Rights and Options Plan at the 23 October 2020 General Meeting. The Performance Rights and Options Plan was slightly amended at the 31 August 2021 General Meeting to update the definition of 'change of control'.

The Group has determined the fair value of its performance options and performance rights issued using the American Trinomial Tree Option and the American Trinomial Barrier Option methods of valuing securities.

Further details of the performance options and performance rights granted during the current and prior years are in notes (b) and (c).

		10,000,000	470,000	149,009	263,979

The above performance options are exercisable at \$0.135 and expire on 30 September 2024.

(i) Director Performance Options Issued to Ross Ashton and Kevin Wilson

These options were granted to Ross Ashton and Kevin Wilson in a single tranche of 2,000,000 options each, in lieu of cash remuneration for their board duties for a future period of 24 months from the date of issue. The options were valued at \$0.0736 each at grant date and were exercisable from 31 December 2020.

(ii) Director Performance Options Issued to Jason Stirbinskis

These options were granted to Jason Stirbinskis in three tranches with the following performance conditions:

- Tranche 1: 2,000,000 performance options vesting upon the 12-month anniversary of Mr Stirbinskis's appointment;
- Tranche 2: 2,000,000 performance options vesting upon 24 months of Mr Stirbinskis's appointment; and
- Tranche 3: 2,000,000 performance options vesting upon the announcement of an additional inferred mineral resource of at least 0.5Moz gold equivalent@ > 1.75g/t, or at least 1Moz gold equivalent@ > 0.9g/t.

The options were valued at \$0.0730 each at grant date, with 4,000,000 options immediately exercisable at 31 December 2021 (at 31 December 2020: 2,000,000 options immediately exercisable) upon the vesting of Tranche 1 and Tranche 2 options. The Tranche 1 and Tranche 2 options vested on 16 August 2020 and on 16 August 2021 respectively, on the anniversaries of Mr Stirbinskis's appointment.

The Directors have assessed that the conditions for the Tranche 3 performance options are more than probable to be achieved by the expiry date of 30 September 2024 and therefore the total value of the performance options incorporates all performance options granted. Tranche 3 performance options vested on 22 March 2022 with the release of the Tesorito maiden Inferred Mineral Resource Estimate of 1Moz @ 0.94g/t Au.

Total value of performance rights	\$35,486	\$86,489	\$83,443

Note 17. Equity – Share-Based Payment Expenses (Cont.)

None of the performance rights milestones were achieved during the year, and as such none of the performance rights were exercisable at year end. The Directors have assessed that the conditions for these performance rights are more than probable to be achieved by the expiry date of 31 December 2024 and therefore the total value of the performance rights incorporates all performance rights granted.

(vii) Performance Rights Issued to Michael Allen

The following performance conditions are applicable to the performance rights granted to Mr Allen on 22 October 2021:

- Tranche 1: 770,000 performance rights vesting upon the achievement of the Company's shares trading on ASX at a 20-day VWAP of not less than \$0.20 on or before 31 December 2024.
- Tranche 2: 770,000 performance rights vesting upon the achievement of the Company's shares trading on ASX at a 20-day VWAP of not less than \$0.25 on or before 31 December 2024.

The principal assumptions used in the valuation of the fair value at grant date of the performance rights were as follows:

	Tranche 1	Tranche 2
Grant date	22 October 2021	22 October 2021
Vesting period ends	31 December 2024	31 December 2024
Share price at grant date	\$0.1350	\$0.1350
Expected volatility	100%	100%
Rights life	3.28 years	3.28 years
Risk-free borrowing rate	0.65%	0.65%
Provision for employee exit	40%	40%
Fair value per performance right at grant date	\$0.0718	\$0.0685
Total value of performance rights	\$55,301	\$52,760

None of the performance rights milestones were achieved during the year, and as such none of the performance rights were exercisable at year end. The Directors have assessed that the conditions for these performance rights are more than probable to be achieved by the expiry date of 31 December 2024 and therefore the total value of the performance rights incorporates all performance rights granted.

Note 18. Equity – Reserves

Share-based payments reserve	1,116,837	2,093,637
	(1,076,707)	3,046,625

As at 31 December 2021, \$1,248,488 of historical realised foreign currency transactions related to years prior to 2020 were transferred from the foreign currency translation reserve to accumulated losses.

Note 19. Financial Risk Management

(a) Financial Risk Management Objectives

The consolidated entity's activities expose it to a variety of financial risks: market risk (including foreign currency risk, price risk and interest rate risk), credit risk and liquidity risk. The consolidated entity's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the consolidated entity. The consolidated entity may use derivative financial instruments such as forward foreign exchange contracts to hedge certain risk exposures. Derivatives are exclusively used for hedging purposes, i.e. not as trading or other speculative instruments. The consolidated entity uses different methods to measure different types of risk to which it is exposed. These methods include sensitivity analysis in the case of interest rate, foreign exchange and other price risks, ageing analysis for credit risk and beta analysis in respect of investment portfolios to determine market risk.

Note 19. Financial Risk Management (Cont.)

(a) Financial Risk Management Objectives (Cont.)

Risk management is carried out by senior finance executives ('Finance') under policies approved by the Board. These policies include identification and analysis of the risk exposure of the consolidated entity and appropriate procedures, controls and risk limits. Finance identifies, evaluates and, if appropriate, hedges financial risks within the consolidated entity's operating units. Finance reports to the Board on a monthly basis.

The Group's financial instruments consist mainly of deposits with banks, trade and other receivables and trade and other payables.

The totals for each category of financial instruments, measured in accordance with AASB 9 *Financial Instruments* as detailed in the accounting policies to these financial statements, are as follows:

	Consolidated	
	2021	2020
	\$	\$
Cash and Receivables		
Cash and cash equivalents	19,252,206	7,814,764
Trade and other receivables	49,028	64,610
Total Cash and Receivables	<u>19,301,234</u>	<u>7,879,374</u>
Financial Liabilities (at Amortised Cost)		
Trade and other payables	579,533	492,480
Borrowings	-	50,000
Total Financial Liabilities	<u>579,533</u>	<u>542,480</u>

(b) Market Risk

Foreign Currency Risk

The consolidated entity undertakes certain transactions denominated in foreign currency and is exposed to foreign currency risk through foreign exchange rate fluctuations.

Foreign exchange risk arises from future commercial transactions and recognised financial assets and financial liabilities denominated in a currency that is not the entity's functional currency. The risk is measured using sensitivity analysis and cash flow forecasting.

Price Risk

Exposure to other price risk arises on derivative asset may result in the fair value of cash flows from the equity swap receipts due to movement in the Company's share price. The future receipts are calculated as the difference between the benchmark share price and the 5-day VWAP of the Company's share price as quoted on the ASX. The movement in the Company's share price cannot be reliably determined.

Note 19. Financial Risk Management (Cont.)

(b) Market Risk (Cont.)

Interest Rate Risk

Exposure to interest rate risk arises on financial assets and financial liabilities recognised at the end of the reporting period whereby a future change in interest rates will affect future cash flows or the fair value of fixed rate financial instruments. The Group is also exposed to earnings volatility on floating rate instruments.

The Consolidated Group is exposed to interest rate and foreign exchange risk through cash assets held and financial liabilities owed as at the reporting date:

	Consolidated	
	2021	2020
	\$	\$
Cash assets held in Australian dollars and subject to floating interest rate	10,778,669	7,003,009
Cash assets held in Australian dollars and subject to fixed interest rate	8,000,849	-
Australian currency equivalent of cash assets held in US dollars and subject to floating interest rate	166,327	578,321
Australian currency equivalent of cash assets held in other currencies and subject to floating interest rate	306,361	233,434
Total Cash Assets	19,252,206	7,814,764

Sensitivity Analyses

The following table illustrates sensitivities to the Group's exposures to changes in interest rates and exchange rates. The table indicates how profit and equity values reported at reporting date would have been affected by changes in the relevant risk variable that management considers to be reasonably possible. These sensitivities assume that the movement in a particular variable is independent of other variables.

Interest Rate Sensitivity Analysis

At 31 December 2021 and at 31 December 2020, the effect on profit and equity as a result of changes in the interest rate, with all other variables remaining constant would be as follows:

	Consolidated	
	2021	2020
	\$	\$
Change in Profit		
Increase in interest rate by 2%	225,027	156,295

(c) Credit Risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the consolidated entity. The consolidated entity has a strict code of credit, including obtaining agency credit information, confirming references and setting appropriate credit limits. The consolidated entity obtains guarantees where appropriate to mitigate credit risk. The maximum exposure to credit risk at the reporting date to recognised financial assets is the carrying amount, net of any provisions for impairment of those assets, as disclosed in the statement of financial position and notes to the financial statements. The consolidated entity does not hold any collateral.

The consolidated entity has adopted a lifetime expected loss allowance in estimating expected credit losses to trade receivables through the use of a provisions matrix using fixed rates of credit loss provisioning. These provisions are considered representative across all customers of the consolidated entity based on recent sales experience, historical collection rates and forward-looking information that is available.

Generally, trade receivables are written off when there is no reasonable expectation of recovery. Indicators of this include the failure of a debtor to engage in a repayment plan, no active enforcement activity and a failure to make contractual payments for a period greater than 1 year.

(d) Liquidity Risk

Vigilant liquidity risk management requires the consolidated entity to maintain sufficient liquid assets (mainly cash and cash equivalents) and available borrowing facilities to be able to pay debts as and when they become due and payable.

The consolidated entity manages liquidity risk by maintaining adequate cash reserves and available borrowing facilities by continuously monitoring actual and forecast cash flows and matching the maturity profiles of financial assets and liabilities. The tables below reflect an undiscounted contractual maturity analysis for financial liabilities.

Cash flows realised from financial assets reflect management's expectation as to the timing of realisation. Actual timing may therefore differ from that disclosed. The timing of cash flows presented in the table to settle financial liabilities reflects the earliest contractual settlement dates.

(e) Fair Value of Financial Instruments

Fair Value Estimation

Financial assets and financial liabilities are presented at fair value or at amortised cost in the statement of financial position. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Fair values derived may be based on information that is estimated or subject to judgment, where changes in assumptions may have a material impact on the amounts estimated. Where possible, valuation information used to calculate fair value is extracted from the market, with more reliable information available from markets that are actively traded. In this regard, fair values for listed securities are obtained from quoted market bid prices. Where securities are unlisted and no market quotes are available, fair value is obtained using discounted cash flow analysis and other valuation techniques commonly used by market participants.

The fair values of financial assets and liabilities, together with their carrying amounts in the statement of financial position, for the consolidated entity are as follows:

Consolidated	2021		2020	
	Carrying Amount \$	Fair Value \$	Carrying Amount \$	Fair Value \$
Assets				
Cash and cash equivalents	19,252,206	19,252,206	7,814,764	7,814,764
Trade receivables	49,028	49,028	64,610	64,610
	<u>19,301,234</u>	<u>19,301,234</u>	<u>7,879,374</u>	<u>7,879,374</u>
Liabilities				
Trade payables	100,543	100,543	74,609	74,609
Other payables	478,990	478,990	417,871	417,871
Borrowings	-	-	50,000	50,000
Deferred consideration	-	-	-	-
	<u>579,533</u>	<u>579,533</u>	<u>542,480</u>	<u>542,480</u>

The fair values disclosed in the above table have been determined based on the following methodologies:

Note 19. Financial Risk Management (Cont.)

(e) Fair Value of Financial Instruments (Cont.)

Cash and cash equivalents, trade and other receivables and trade and other payables are short-term instruments in nature whose carrying value approximates to fair value. Deferred consideration represents short-term and long-term financial instruments which are valued at amortised cost which also approximates fair value. Trade and other payables exclude amounts provided for annual leave, which is not considered a financial instrument.

The Company is aware that a former director and chief executive officer of one of the Company's subsidiaries (Miraflores Compania Minera SAS (previously Minera Seafield SAS)) previously lodged a claim with the Labour Court in Medellin, Colombia (Juzgado Laboral del Circuito de Medellin) seeking termination payments, unpaid bonus payments and damages in the amount of approximately US\$2 million. The Directors are of the opinion that the claim can be successfully defended and believe that the risk of the Company facing an unfavourable judgement is unlikely. The Company continues to defend the proceeding.

Otherwise, the Group is not aware of any other contingent liabilities.

Independent Auditor's Report

To the Members of Los Cerros Limited

Report on the audit of the financial report

Opinion

We have audited the financial report of Los Cerros Limited (the Company) and its subsidiaries (the Group), which comprises the consolidated statement of financial position as at 31 December 2021, the consolidated statement of profit or loss and other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies, and the Directors' declaration.

In our opinion, the accompanying financial report of the Group is in accordance with the *Corporations Act 2001*, including:

- a giving a true and fair view of the Group's financial position as at 31 December 2021 and of its performance for the year ended on that date; and
- b complying with Australian Accounting Standards and the *Corporations Regulations 2001*.

Basis for opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material uncertainty related to going concern

We draw attention to Note 1(c) in the financial statements, which indicates that the Group incurred a net loss of \$5,306,345 during the year ended 31 December 2021, and as of that date, the Group's net cash used in operations was \$3,571,769. As stated in Note 1(c), these events or conditions, along with other matters as set forth in Note 1(c), indicate that a material uncertainty exists that may cast doubt on the Group's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report of the current period. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

In addition to the matter described in the *Material uncertainty related to going concern* section, we have determined the matters described below to be the key audit matters to be communicated in our report.

Key audit matter	How our audit addressed the key audit matter

Information other than the financial report and auditor's report thereon

The Directors are responsible for the other information. The other information comprises the information included in the Group's annual report for the year ended 31 December 2021, but does not include the financial report and our auditor's report thereon.

Our opinion on the financial report does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors' for the financial report

The Directors of the Company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the Directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the Directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website at: http://www.auasb.gov.au/auditors_responsibilities/ar1_2020.pdf. This description forms part of our auditor's report.

Report on the remuneration report

Opinion on the remuneration report

We have audited the Remuneration Report included in pages 17 to 23 of the Directors' report for the year ended 31 December 2021.

In our opinion, the Remuneration Report of Los Cerros Limited, for the year ended 31 December 2021 complies with section 300A of the *Corporations Act 2001*.

Responsibilities

The Directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.

Mineral Tenements held as at 31 December 2021 (Cont.)

- (1) All titles are part of the Andes Gold Project, located in Antioquia, Risaralda and Choco, Departments of Colombia. Pursuant to the Interest Transfer Agreement with Bullet Holding Corporation (Bullet), Andes has a 90% beneficial interest, and Bullet has a 10% interest. All tenements have been crossed checked against the National Mining Authority Registry (ANNA) and reflect the status reported in ANNA. The Colombian Mining Authority's migration to a new tenement management and cadastre system (ANNA) has generated inconsistencies and issues concerning certain mineral tenement boundaries. In addition, there is uncertainty regarding the application and constitutionality of Presidential Decree 1955/19, the purpose of which was to re-instate certain land rights over free land to qualifying informal miners. The issues are not unique to Los Cerros and have the potential to reduce the footprint of a subset of exploration licence applications within the Company's Andes Gold Project. The Company is monitoring the situation and will keep the market informed of developments.
- (2) The Titleholders of the tenements are:
- (2.1) Tenements in process of acquisition by Andes Resources EP S.A.S (Andes).
 - (2.2) The titleholders of the applications are various companies associated with Bullet and covered under the Interest Transfer Agreement – see note (1).
 - (2.3) Andes is a subsidiary company of Los Cerros.
- (3) Concessions at Exploration Stage have 3 year life extendable for 2 years to a maximum of 11 years.
- (4) 10 year life extendable for 10 years and the tenement is in process of transformation to Concession contract.
- (5) 5 year life extendable for 5 years and the tenement is in process of transformation to Concession contract.
- (6) Applications have neither legal liabilities nor certainty that they will be granted in whole or in part. If the ground was open ground at the time of lodging, a contract for exploration and potential exploitation will be offered to the applicant. Andes has a beneficial interest in the tenement when the application is granted.

The difference between the position as at 31 December 2021 and the table above is the Tesorito Mineral Resource Estimate announced on 22 March 2022. No changes to the Company's Resource and Reserve position occurred during the year to 31 December 2021.

COMPETENT PERSON'S STATEMENT

The information in this Annual Report that relates to Exploration Targets, Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Mr. Cesar Garcia, who is a Member of The Australasian Institute of Mining and Metallurgy and who is a geologist who is employed by Los Cerros. Mr. Garcia has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration, and to the activity which he is undertaking, to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr. Garcia consents to the inclusion in the release of the matters based on his information in the form and context in which it appears. The information in this announcement that relates to Los Cerros' Exploration Results have been extracted from various Los Cerros ASX announcements and are available to view on the Company's website at www.loscerros.com.au/site/content/ or through the ASX website at www.asx.com.au (using ticker code "LCL"). The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.
