No dividend has been declared.

Comments

The loss for the company after providing for income tax amounted to \$4,090,752 (30 June 2021: \$1,029,501).

Revenue during the period included a \$259,098 (30 June 2021: \$151,075) R&D tax incentive rebate and interest income of \$2,504 (30 June 2021: \$202). The prior year also included \$145,000 in contributions toward the company's research activities from the University of Western Australia (UWA) and the Perron Institute for Neurological and Translational Science Ltd (Perron Institute) pursuant to Assignment of Intellectual Property Agreement under which the Intellectual Property associated with a neuroprotective therapeutic drug was assigned to the company.

Operating expenses during the period principally related to research and developments costs of a neuroprotective therapeutic drug, employee and corporate and administration expenses and non-cash share-based payments. Operating expenses have increased compared to the prior year following the successful completion of an initial public offering (IPO) in June 2021 raising \$7 million (before costs) allowing pre-clinical studies and planning for a Phase 1 trial to be undertaken. Share based payments consist of the expensing of options issued to employees and contractors. The company was admitted to the Official List of the ASX on Wednesday 9 June 2021.

Net operating cash outflows for the period increased to \$3,361,673 (30 June 2021: \$1,046,408) as the company's activities increased following the IPO capital raising in June 2021. Net financing cash inflows for the period were \$5,131,935 following a placement to professional and sophisticated investors in June 2022 of 13,750,000 shares at an issue price of \$0.40 per share raising \$5,500,000 (before transaction costs). Net financing cash inflows for the prior period were \$7,848,619 and included funds raised from the ASX IPO in June 2021 which resulted in the issue of 35,000,000 shares at an issue price of \$0.20 per share raising \$7,000,000 (before transaction costs).

The company had a net asset position at 30 June 2022 of \$8,307,491 (30 June 2021: \$6,846,747). The net asset position included \$8,914,457 of cash and cash equivalents (30 June 2021: \$7,144,195) following completion of the June 2022 placement and June 2021 IPO capital raisings and a \$1,000 intangible asset (30 June 2021: \$1,000) being intellectual property associated with a neuroprotective therapeutic drug. On 14 February 2020, 10,000,000 ordinary shares were issued to the Intellectual Property vendors pursuant to an Assignment of Intellectual Property Agreement with the University of Western Australia and the Perron Institute for Neurological and Translational Science Ltd to assign the Intellectual Property associated with a neuroprotective therapeutic drug to the company, at an issue price of \$0.0001 per share and a total transaction value of \$1,000.

Argenica Therapeutics Limited
Appendix 4E
Final report

The company has used the cash and assets in a form readily convertible to cash that it had at the time of admission to the ASX in a way consistent with its business objectives up to 30 June 2022.

The impact of the Coronavirus (COVID-19) pandemic is ongoing. It had limited impact on the company during the year. The company experienced minor delays to pre-clinical activities being conducted in China as a result of Covid related shutdowns.

As an early-stage company, the company's business model is highly dependent on the achievement of continued pre-clinical and clinical development success, future funding, regulatory approvals, customer engagement and general financial and economic factors.

Argenica Therapeutics Limited
Chairman and Managing Director's Letter
30 June 2022

On behalf of the Board, we are pleased to present the 2022 Annual Report to shareholders.

Argenica Therapeutics Limited (ASX: AGN) ("Argenica" or the "company") is a biotechnology company developing novel therapeutics to reduce brain tissue death after stroke. In June 2021, the company successfully completed an initial public offering (IPO) raising \$7 million (before costs) and listed on the Australia Securities Exchange (ASX). The listing allowed the company to advance development of its novel neuroprotective therapeutics during the year. These therapeutics provide protection for brain cells that would otherwise potentially be irreparably damaged by stroke, and other types of brain injury.

Globally, stroke is one of the leading causes of mortality and disability and there are substantial economic costs for post-stroke care. However, despite considerable and ongoing research, there are currently no universally marketed treatments capable of protecting the brain from damage following stroke.

Ischemic strokes, caused by a disruption in blood supply to the brain from a clot, make up more than 85% of all strokes in Western countries. Current therapeutic treatments for ischaemic strokes are administered after imaging diagnosis and are time sensitive, needing to be administered within 4.5 hours post stroke onset. Treatment interventions only focus on dissolving or surgically removing clots and do not prevent or reverse further neuronal damage and cell death caused by a stroke.

Argenica's lead candidate, ARG-007, is being developed as a potential therapeutic to be administered in the field by paramedics to provide neuroprotective treatment to brain cells prior to a patient's arrival at the hospital. This approach could potentially reduce brain tissue death during the period before formal diagnosis and treatment of the underlying stroke condition, greatly enhancing clinical recovery outcomes.

The search for widely applicable and effective neuroprotective agents for diverse patient populations remains an urgent, unmet need. Argenica sees a large commercial opportunity responding to this clinical unmet need to reduce brain tissue death in stroke patients, many of whom currently suffer significant disability after a stroke.

Since the IPO, the company is pleased to have completed preparatory pre-clinical activities for its planned first-in-human Phase 1 clinical trial of the company's lead candidate ARG-007 focused on testing the safety and tolerability of the drug in healthy volunteers. Through Linear Clinical Research (Linear), Argenica has submitted its ethics application to Bellberry's Human Research Ethics Committee (HREC) seeking approval for the Phase 1 clinical trial. Initiation of clinical trial site management setup has commenced with Linear Clinical Research, enabling the Phase 1 clinical trial to begin the process of recruiting participants immediately following ethics approval.

During the year, the company also continued to progress pre-clinical work focused on the potential application of ARG-007 for other types of brain injury. ARG-007 has shown very promising neuroprotective effects on brain cells following different types of brain injuries in animal models in indications other than stroke (i.e. Hypoxic-Ischaemic Encephalopathy ("HIE"), Traumatic Brain Injury ("TBI") and global cerebral ischaemia following cardiac arrest).

In June 2022, the company was pleased to raise an additional \$5.5 million (before costs) via a placement. The placement was strongly supported by many existing shareholders and a number of new family office, institutional and sophisticated high-net-worth investors. This funding will enable the company to accelerate preclinical activities in additional applications and advance preliminary work required for a Phase 2 trial in stroke patients.

Having additional funds to accelerate our research program across HIE, TBI and global ischaemia will allow the company to establish a comprehensive preclinical data set for these indications. By advancing this preclinical research for these indications now, we will have the required data to commence Phase 2 trials more quickly for these indications following successful completion of the upcoming Phase 1 trial. We are extremely excited about this opportunity to advance our program of preclinical work on these additional indications.

We appreciate the ongoing support of all our shareholders, employees and research and clinical collaborators, and look forward to updating you on our future developments.

Yours faithfully

Geoff Pocock
Chairman

Liz Dallimore
Managing Director and Chief Executive Officer
Argenica Therapeutics Limited

Argenica Therapeutics Limited
Directors' Report
30 June 2022

The directors present their report, together with the financial statements, of Argenica Therapeutics Limited (referred to hereafter as the 'company') for the year ended 30 June 2022. The company was formerly named Argenica Therapeutics Pty Ltd and changed its name to Argenica Therapeutics Limited on 17 December 2020.

Directors

The following persons were directors of Argenica Therapeutics Limited during the whole of the financial year and up to the date of this report, unless otherwise stated:

Mr Geoff Pocock
Dr Liz Dallimore (appointed 4 April 2022)
Dr Sam South
Ms Liddy McCall
Mr Terry Budge

Principal activities

During the period the principal continuing activities of the company consisted of research and development of a neuroprotective therapeutic drug.

Dividends

There were no dividends paid during the financial year ended 30 June 2022 (30 June 2021: nil).

Review of operations

The loss for the company after providing for income tax amounted to \$4,090,752 (30 June 2021: \$1,029,501).

Revenue during the period included a \$259,098 (30 June 2021: \$151,075) R&D tax incentive rebate and interest income of \$2,504 (30 June 2021: \$202). The prior year also included \$145,000 in contributions toward the company's research activities from the University of Western Australia (UWA) and the Perron Institute for Neurological and Translational Science Ltd (Perron Institute) pursuant to Assignment of Intellectual Property Agreement under which the Intellectual Property associated with a neuroprotective therapeutic drug was assigned to the company.

Operating expenses during the period principally related to research and developments costs of a neuroprotective therapeutic drug, employee and corporate and administration expenses and non-cash share-based payments. Operating expenses have increased compared to the prior year following the successful completion of an initial public offering (IPO) in June 2021 raising \$7 million (before costs) allowing pre-clinical studies and planning for a Phase 1 trial to be undertaken. Share based payments consist of the expensing of options issued to employees and contractors. The company was admitted to the Official List of the ASX on Wednesday 9 June 2021.

Net operating cash outflows for the period increased to \$3,361,673 (30 June 2021: \$1,046,408) as the company's activities increased following the IPO capital raising in June 2021. Net financing cash inflows for the period were \$5,131,935 following a placement to professional and sophisticated investors in June 2022 of 13,750,000 shares at an issue price of \$0.40 per share raising \$5,500,000 (before transaction costs). Net financing cash inflows for the prior period were \$7,848,619 and included funds raised from the ASX IPO in June 2021 which resulted in the issue of 35,000,000 shares at an issue price of \$0.20 per share raising \$7,000,000 (before transaction costs).

The company had a net asset position at 30 June 2022 of \$8,307,491 (30 June 2021: \$6,846,747). The net asset position included \$8,914,457 of cash and cash equivalents (30 June 2021: \$7,144,195) following completion of the June 2022 placement and June 2021 IPO capital raisings and a \$1,000 intangible asset (30 June 2021: \$1,000) being intellectual property associated with a neuroprotective therapeutic drug. On 14 February 2020, 10,000,000 ordinary shares were issued to the Intellectual Property vendors pursuant to an Assignment of Intellectual Property Agreement with the University of Western Australia and the Perron Institute for Neurological and Translational Science Ltd to assign the Intellectual Property associated with a neuroprotective therapeutic drug to the company, at an issue price of \$0.0001 per share and a total transaction value of \$1,000.

The company has used the cash and assets in a form readily convertible to cash that it had at the time of admission to the ASX in a way consistent with its business objectives up to 30 June 2022.

Argenica Therapeutics Limited
Directors' report
30 June 2022

The impact of the Coronavirus (COVID-19) pandemic is ongoing. It had limited impact on the company during the year. The company experienced minor delays to pre-clinical activities being conducted in China as a result of Covid related shutdowns.

As an early-stage company, the company's business model is highly dependent on the achievement of continued pre-clinical and clinical development success, future funding, regulatory approvals, customer engagement and general financial and economic factors.

Significant changes in the state of affairs

There were no other significant changes in the state of affairs of the company during the financial year.

Matters subsequent to the end of the financial year

On 6 July 2022, the company issued 125,000 options over ordinary shares to a contractor of the company with an exercise price of \$0.65 and an expiry date of 6 July 2025.

The impact of the Coronavirus (COVID-19) pandemic is ongoing and while it has had limited impact on the company up to 30 June 2022, it is not practicable to estimate the potential impact, positive or negative, after the reporting date. The situation is rapidly developing and is dependent on the potential impact on manufacturing, supply chain and measures imposed by the Australian Government and other countries, such as maintaining social distancing requirements, quarantine, travel restrictions and any economic stimulus that may be provided.

No other matter or circumstance has arisen since 30 June 2022 that has significantly affected, or may significantly affect the company's operations, the results of those operations, or the company's state of affairs in future financial years.

Likely developments and expected results of operations

Information on likely developments in the operations of the company and the expected results of operations have not been included in this report because the directors believe it would be likely to result in unreasonable prejudice to the company.

Environmental regulation

The company is not subject to any significant environmental regulation under Australian Commonwealth or State law.

Information on directors

Name:	Mr Geoff Pocock
Title:	Non-Executive Chairman
Qualifications:	B.Sc., LLB
Experience and expertise:	Geoff is an experienced strategy consultant and commercialisation professional, with over 20 years' experience across the commercialisation process. Liz Dallimore*	7	7	-	-	-	-

*Attendance as Managing Director from 4 April 2022. Attendance prior to 4 April 2022 as Other Key Management Personnel (Chief Executive Officer).

Held: represents the number of meetings held during the time the director held office or was a member of the relevant committee.

Remuneration report (audited)

The remuneration report details the key management personnel remuneration arrangements for the company, in accordance with the requirements of the Corporations Act 2001 and its Regulations.

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the entity, directly or indirectly, including all directors.

The remuneration report is set out under the following main headings:

- Principles used to determine the nature and amount of remuneration
- Details of remuneration
- Service agreements
- Share-based compensation
- Additional information
- Additional disclosures relating to key management personnel

Principles used to determine the nature and amount of remuneration

The objective of the company's executive reward framework is to ensure reward for performance is competitive and appropriate for the results delivered. The framework aligns executive reward with the achievement of strategic objectives and the creation of value for shareholders, and it is considered to conform to the market best practice for the delivery of reward. The Board of Directors ('the Board') ensures that executive reward satisfies the following key criteria for good reward governance practices:

- competitiveness and reasonableness
- acceptability to shareholders
- performance linkage / alignment of executive compensation
- transparency

Argenica Therapeutics Limited
Directors' report
30 June 2022

The Nomination and Remuneration Committee is responsible for determining and reviewing remuneration arrangements for its directors and executives. The performance of the company depends on the quality of its directors and executives. The remuneration philosophy is to attract, motivate and retain high performance and high quality personnel.

The company has structured an executive remuneration framework that is market competitive and complementary to the reward strategy of the company.

The reward framework is designed to align executive reward to shareholders' interests. The Board have considered that it should seek to enhance shareholders' interests by:

- having value creation and capital growth in advance of economic profit as a core component of plan design;
- focusing on sustained growth in shareholder wealth, consisting of growth in share price and eventually dividends, and delivering constant or increasing return on assets as well as focusing on key non-financial drivers of value; and
- attracting and retaining high calibre executives

Additionally, the reward framework should seek to enhance executives' interests by:

- rewarding capability and experience;
- reflecting competitive reward for contribution to growth in shareholder wealth; and
- providing a clear structure for earning rewards

In accordance with best practice corporate governance, the structure of non-executive director and executive director remuneration is separate.

Non-executive directors remuneration

Fees and payments to non-executive directors reflect the demands and responsibilities of their role. Non-executive directors' fees and payments are reviewed annually by the Nomination and Remuneration Committee. The Nomination and Remuneration Committee may, from time to time, receive advice from independent remuneration consultants to ensure non-executive directors' fees and payments are appropriate and in line with the market. Non-executive directors do not receive any retirement benefits, other than statutory superannuation.

ASX listing rules require the aggregate non-executive directors' remuneration be determined periodically by a general meeting. The most recent determination was via a resolution of all shareholders at a meeting held on 16 November 2021, where shareholders approved that the aggregate fixed remuneration for all non-executive directors as determined by the Board is not to exceed \$500,000 per annum. Directors' fees cover all main board and committee activities.

The level of non-executive director fixed fees as at the reporting date are as follows:

Geoff Pocock	\$72,000 plus statutory superannuation per annum
Liddy McCall	\$30,000 plus statutory superannuation per annum
Terry Budge	\$30,000 plus statutory superannuation per annum

Non-executive directors may also receive performance related compensation via options following receipt of shareholder approval. The issue of share-based payments as part of non-executive director remuneration ensures that director remuneration is competitive with market standards as well as providing an incentive to pursue longer term success for the company. It also reduces the demand on the cash resources of the company and assists in ensuring the continuity of service of directors who have extensive knowledge of the company, its business activities and assets and the industry in which it operates. Details of share-based compensation are contained in this report.

Executive remuneration

The company aims to reward executives based on their position and responsibility, with a level and mix of remuneration which has both fixed and variable components.

The executive remuneration and reward framework has four components:

- base pay and non-monetary benefits
- short-term performance incentives
- share-based payments
- other remuneration such as superannuation and long service leave

The combination of these comprises the executive's total remuneration.

Argenica Therapeutics Limited
Directors' report
30 June 2022

Fixed remuneration, consisting of base salary, superannuation and non-monetary benefits, are reviewed at least annually based on individual performance, the overall performance of the company and comparable market remunerations.

Executives may receive their fixed remuneration in the form of cash or other fringe benefits (for example motor vehicle benefits) where it does not create any additional costs to the company and provides additional value to the executive.

Performance based short-term incentives ('STI') may be provided to executives to align the targets of the business with the targets of those executives responsible for meeting those targets.

The long-term incentives ('LTI') include long service leave and share-based payments. Shares and options may be awarded to executives based on long-term incentive measures including increasing shareholder value. Share-based LTIs issued to Directors are subject to shareholder approval. The Nomination and Remuneration Committee will review the long-term equity-linked performance incentives specifically for executives during the year ended 30 June 2023. Details of share-based compensation are contained in this report.

Use of remuneration consultants

The company did not engage the services of any remuneration consultants during the financial year.

Voting and comments made at the company's Annual General Meeting ('AGM')

The company received 98.27% "for" votes on its Remuneration Report for the year ended 30 June 2021.

Details of remuneration

Amounts of remuneration

Details of the remuneration of key management personnel of the company are set out in the following tables.

The key management personnel of the company consisted of the following directors and management of Argenica Therapeutics Limited:

- Geoff Pocock – Non-Executive Chairman
- Sam South - Executive Director
- Liddy McCall – Non-Executive Director
- Terry Budge - Non-Executive Director
- Liz Dallimore – Managing Director (appointed 4 April 2022) and Chief Executive Officer

Service agreements

Remuneration and other terms of employment for key management personnel are formalised in service agreements. Details of these agreements are as follows:

Name: Liz Dallimore
Title: Managing Director and Chief Executive Officer
Agreement commenced: 21 March 2021
Term of agreement: Open
Details: Under the agreement, Liz Dallimore is entitled to receive an annual base salary of \$250,000 (excluding superannuation) from appointment as Managing Director on 4 April 2022, in addition to existing role as Chief Executive Officer. Prior to appointment as Managing Director, the base salary was \$220,000 (excluding superannuation) from Admission of the Company to the ASX. From Commencement Date until Admission of the Company to the ASX the base salary was \$200,000 (excluding superannuation) with engagement at 40% of a full-time equivalent (FTE) employee. The agreement is for an indefinite term, continuing until terminated by either the Company or Liz Dallimore giving not less than 3 months' written notice of termination (or shorter periods in limited circumstances).

Name: Sam South
Title: Executive Director
Agreement commenced: 22 October 2020
Term of agreement: Open
Details: Under the agreement, Sam South is entitled to receive a base salary of \$180,000 (excluding superannuation) from Admission of the Company to the ASX until termination. From Commencement Date until Admission of the Company to the ASX the base salary was \$160,000 (excluding superannuation) with engagement at 40% of a full-time equivalent (FTE) employee. The agreement is for an indefinite term, continuing until terminated by either the Company or Sam South giving not less than 3 months' written notice of termination (or shorter periods in limited circumstances).

Key management personnel have no entitlement to termination payments in the event of removal for misconduct.

Share-based compensation

Issue of shares

There were no shares issued to directors and other key management personnel as part of compensation during the year ended 30 June 2022.

			<hr/> 10,125,000

No person entitled to exercise the options had or has any right by virtue of the option to participate in any share issue of the company or of any other body corporate.

Shares issued on the exercise of options

No ordinary shares were issued during the year ended 30 June 2022 and up to the date of this report on the exercise of options granted.

Indemnity and insurance of officers

The company has indemnified the directors and executives of the company for costs incurred, in their capacity as a director or executive, for which they may be held personally liable, except where there is a lack of good faith.

During the financial year, the company paid a premium in respect of a contract to insure the directors and executives of the company against a liability to the extent permitted by the Corporations Act 2001. The contract of insurance prohibits disclosure of the nature of the liability and the amount of the premium.

Indemnity and insurance of auditor

The company has not, during or since the end of the financial year, indemnified or agreed to indemnify the auditor of the company or any related entity against a liability incurred by the auditor.

During the financial year, the company has not paid a premium in respect of a contract to insure the auditor of the company or any related entity.

Proceedings on behalf of the company

No person has applied to the Court under section 237 of the Corporations Act 2001 for leave to bring proceedings on behalf of the company, or to intervene in any proceedings to which the company is a party for the purpose of taking responsibility on behalf of the company for all or part of those proceedings.

Non-audit services

Details of the amounts paid or payable to the auditor for non-audit services provided during the financial year by the auditor are outlined in note 18 to the financial statements.

The directors are satisfied that the provision of non-audit services during the financial year, by the auditor (or by another person or firm on the auditor's behalf), is compatible with the general standard of independence for auditors imposed by the Corporations Act 2001.

The directors are of the opinion that the services as disclosed in note 18 to the financial statements do not compromise the external auditor's independence requirements of the Corporations Act 2001 for the following reasons:

- all non-audit services have been reviewed and approved to ensure that they do not impact the integrity and objectivity of the auditor; and
- none of the services undermine the general principles relating to auditor independence as set out in APES 110 Code of Ethics for Professional Accountants issued by the Accounting Professional and Ethical Standards Board, including reviewing or auditing the auditor's own work, acting in a management or decision-making capacity for the company, acting as advocate for the company or jointly sharing economic risks and rewards.

Officers of the company who are former partners of RSM Australia Partners

There are no officers of the company who are former partners RSM Australia Partners.

Argenica Therapeutics Limited
Directors' report
30 June 2022

Rounding of amounts

The company is of a kind referred to in Corporations Instrument 2016/191, issued by the Australian Securities and Investments Commission, relating to 'rounding-off'. Amounts in this report have been rounded off in accordance with that Corporations Instrument to the nearest dollar.

Auditor's independence declaration

A copy of the auditor's independence declaration as required under section 307C of the Corporations Act 2001 is set out immediately after this directors' report.

Auditor

RSM Australia Partners continues in office in accordance with section 327 of the Corporations Act 2001.

This report is made in accordance with a resolution of directors, pursuant to section 298(2)(a) of the Corporations Act 2001.

AUDITOR'S INDEPENDENCE DECLARATION

As lead auditor for the audit of the financial report of Argenica Therapeutics Limited for the year ended 30 June 2022, I declare that, to the best of my knowledge and belief, there have been no contraventions of:

- (i) the auditor independence requirements of the *Corporations Act 2001* in relation to the audit; and
- (ii) any applicable code of professional conduct in relation to the audit.

Note 1. Significant accounting policies

The principal accounting policies adopted in the preparation of the financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

New or amended Accounting Standards and Interpretations adopted

The company has adopted all of the new or amended Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') that are mandatory for the current reporting period.

Any new or amended Accounting Standards or Interpretations that are not yet mandatory have not been early adopted.

Basis of preparation

These general purpose financial statements have been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') and the Corporations Act 2001, as appropriate for for-profit oriented entities. These financial statements also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board ('IASB').

Historical cost convention

The financial statements have been prepared under the historical cost convention, except for, where applicable, the revaluation of financial assets and liabilities at fair value through profit or loss, financial assets at fair value through other comprehensive income, investment properties, certain classes of property, plant and equipment and derivative financial instruments.

Critical accounting estimates

The preparation of the financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the company's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in note 2.

Operating segments

Operating segments are presented using the 'management approach', where the information presented is on the same basis as the internal reports provided to the Chief Operating Decision Makers ('CODM'). The CODM is responsible for the allocation of resources to operating segments and assessing their performance.

Foreign currency translation

The financial statements are presented in Australian dollars, which is Argenica Therapeutics Limited's functional and presentation currency.

Foreign currency transactions

Foreign currency transactions are translated into Australian dollars using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at financial year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

Revenue recognition

The company recognises revenue as follows:

Revenue from contracts with customers

Revenue is recognised at an amount that reflects the consideration to which the Company is expected to be entitled in exchange for transferring goods or services to a customer. For each contract with a customer, the Company: identifies the contract with a customer; identifies the performance obligations in the contract; determines the transaction price which takes into account estimates of variable consideration and the time value of money; allocates the transaction price to the separate performance obligations on the basis of the relative stand-alone selling price of each distinct good or service to be delivered; and recognises revenue when or as each performance obligation is satisfied in a manner that depicts the transfer to the customer of the goods or services promised.

Note 1. Significant accounting policies (continued)

Interest income

Interest income is recognised as interest accrues using the effective interest method. This is a method of calculating the amortised cost of a financial asset and allocating the interest income over the relevant period using the effective interest rate, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial asset.

Other income

Other income is recognised when it is received or when the right to receive payment is established.

Impairment of other tangible and intangible assets

At each reporting date, the company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where the asset does not generate cash flows that are independent from other assets, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment annually and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted. If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (cash generating unit) is reduced to its recoverable amount.

An impairment loss is recognised in profit or loss immediately, unless the relevant asset is carried at fair value, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset (cash-generating unit) is increased to the revised estimate of its recoverable amount, but only to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (cash-generating unit) in prior years. A reversal of an impairment loss is recognised in profit or loss immediately, unless the relevant asset is carried at fair value, in which case the reversal of the impairment loss is treated as a revaluation increase.

Income tax

The income tax expense or benefit for the period is the tax payable on that period's taxable income based on the applicable income tax rate for each jurisdiction, adjusted by the changes in deferred tax assets and liabilities attributable to temporary differences, unused tax losses and the adjustment recognised for prior periods, where applicable.

Deferred tax assets and liabilities are recognised for temporary differences at the tax rates expected to be applied when the assets are recovered or liabilities are settled, based on those tax rates that are enacted or substantively enacted, except for:

- When the deferred income tax asset or liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and that, at the time of the transaction, affects neither the accounting nor taxable profits; or
- When the taxable temporary difference is associated with interests in subsidiaries, associates or joint ventures, and the timing of the reversal can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

The carrying amount of recognised and unrecognised deferred tax assets are reviewed at each reporting date. Deferred tax assets recognised are reduced to the extent that it is no longer probable that future taxable profits will be available for the carrying amount to be recovered. Previously unrecognised deferred tax assets are recognised to the extent that it is probable that there are future taxable profits available to recover the asset.

Note 1. Significant accounting policies (continued)

Deferred tax assets and liabilities are offset only where there is a legally enforceable right to offset current tax assets against current tax liabilities and deferred tax assets against deferred tax liabilities; and they relate to the same taxable authority on either the same taxable entity or different taxable entities which intend to settle simultaneously.

Current and non-current classification

Assets and liabilities are presented in the statement of financial position based on current and non-current classification.

An asset is classified as current when: it is either expected to be realised or intended to be sold or consumed in the company's normal operating cycle; it is held primarily for the purpose of trading; it is expected to be realised within 12 months after the reporting period; or the asset is cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period. All other assets are classified as non-current.

A liability is classified as current when: it is either expected to be settled in the company's normal operating cycle; it is held primarily for the purpose of trading; it is due to be settled within 12 months after the reporting period; or there is no unconditional right to defer the settlement of the liability for at least 12 months after the reporting period. All other liabilities are classified as non-current.

Deferred tax assets and liabilities are always classified as non-current.

Cash and cash equivalents

Cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. For the statement of cash flows presentation purposes, cash and cash equivalents also includes bank overdrafts, which are shown within borrowings in current liabilities on the statement of financial position.

Trade and other receivables

Trade receivables are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method, less any allowance for expected credit losses. Trade receivables are generally due for settlement within 30 days.

The company has applied the simplified approach to measuring expected credit losses, which uses a lifetime expected loss allowance. To measure the expected credit losses, trade receivables have been grouped based on days overdue.

Other receivables are recognised at amortised cost, less any allowance for expected credit losses.

Trade and other payables

These amounts represent liabilities for goods and services provided to the company prior to the end of the financial year and which are unpaid. Due to their short-term nature they are measured at amortised cost and are not discounted. The amounts are unsecured and are usually paid within 30 days of recognition.

Finance costs

Finance costs attributable to qualifying assets are capitalised as part of the asset. All other finance costs are expensed in the period in which they are incurred.

Note 1. Significant accounting policies (continued)

Employee benefits

Short-term employee benefits

Liabilities for wages and salaries, including non-monetary benefits, annual leave and long service leave expected to be settled wholly within 12 months of the reporting date are measured at the amounts expected to be paid when the liabilities are settled.

Other long-term employee benefits

The liability for annual leave and long service leave not expected to be settled within 12 months of the reporting date are measured at the present value of expected future payments to be made in respect of services provided by employees up to the reporting date using the projected unit credit method. Consideration is given to expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments are discounted using market yields at the reporting date on corporate bonds with terms to maturity and currency that match, as closely as possible, the estimated future cash outflows.

Defined contribution superannuation expense

Contributions to defined contribution superannuation plans are expensed in the period in which they are incurred.

Share-based payments

Equity-settled share-based compensation benefits are provided to employees.

Equity-settled transactions are awards of shares, or options over shares, that are provided to employees in exchange for the rendering of services. Cash-settled transactions are awards of cash for the exchange of services, where the amount of cash is determined by reference to the share price.

The cost of equity-settled transactions are measured at fair value on grant date. Fair value is independently determined using either the Binomial or Black-Scholes option pricing model that takes into account the exercise price, the term of the option, the impact of dilution, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk free interest rate for the term of the option, together with non-vesting conditions that do not determine whether the company receives the services that entitle the employees to receive payment. No account is taken of any other vesting conditions.

The cost of equity-settled transactions are recognised as an expense with a corresponding increase in equity over the vesting period. The cumulative charge to profit or loss is calculated based on the grant date fair value of the award, the best estimate of the number of awards that are likely to vest and the expired portion of the vesting period. The amount recognised in profit or loss for the period is the cumulative amount calculated at each reporting date less amounts already recognised in previous periods.

The cost of cash-settled transactions is initially, and at each reporting date until vested, determined by applying either the Binomial or Black-Scholes option pricing model, taking into consideration the terms and conditions on which the award was granted. The cumulative charge to profit or loss until settlement of the liability is calculated as follows:

- during the vesting period, the liability at each reporting date is the fair value of the award at that date multiplied by the expired portion of the vesting period.
- from the end of the vesting period until settlement of the award, the liability is the full fair value of the liability at the reporting date.

All changes in the liability are recognised in profit or loss. The ultimate cost of cash-settled transactions is the cash paid to settle the liability.

Market conditions are taken into consideration in determining fair value. Therefore any awards subject to market conditions are considered to vest irrespective of whether or not that market condition has been met, provided all other conditions are satisfied.

If equity-settled awards are modified, as a minimum an expense is recognised as if the modification has not been made. An additional expense is recognised, over the remaining vesting period, for any modification that increases the total fair value of the share-based compensation benefit as at the date of modification.

Note 1. Significant accounting policies (continued)

If the non-vesting condition is within the control of the company or employee, the failure to satisfy the condition is treated as a cancellation. If the condition is not within the control of the company or employee and is not satisfied during the vesting period, any remaining expense for the award is recognised over the remaining vesting period, unless the award is forfeited.

If equity-settled awards are cancelled, it is treated as if it has vested on the date of cancellation, and any remaining expense is recognised immediately. If a new replacement award is substituted for the cancelled award, the cancelled and new award is treated as if they were a modification.

Fair value measurement

When an asset or liability, financial or non-financial, is measured at fair value for recognition or disclosure purposes, the fair value is based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date; and assumes that the transaction will take place either: in the principal market; or in the absence of a principal market, in the most advantageous market.

Fair value is measured using the assumptions that market participants would use when pricing the asset or liability, assuming they act in their economic best interests. For non-financial assets, the fair value measurement is based on its highest and best use. Valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, are used, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

Assets and liabilities measured at fair value are classified into three levels, using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. Classifications are reviewed at each reporting date and transfers between levels are determined based on a reassessment of the lowest level of input that is significant to the fair value measurement.

For recurring and non-recurring fair value measurements, external valuers may be used when internal expertise is either not available or when the valuation is deemed to be significant. External valuers are selected based on market knowledge and reputation. Where there is a significant change in fair value of an asset or liability from one period to another, an analysis is undertaken, which includes a verification of the major inputs applied in the latest valuation and a comparison, where applicable, with external sources of data.

Earnings per share

Basic earnings per share

Basic earnings per share is calculated by dividing the profit attributable to the owners of the company, excluding any costs of servicing equity other than ordinary shares, by the weighted average number of ordinary shares outstanding during the financial year, adjusted for bonus elements in ordinary shares issued during the financial year.

Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account the after income tax effect of interest and other financing costs associated with dilutive potential ordinary shares and the weighted average number of shares assumed to have been issued for no consideration in relation to dilutive potential ordinary shares.

Goods and Services Tax ('GST') and other similar taxes

Revenues, expenses and assets are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the tax authority. In this case it is recognised as part of the cost of the acquisition of the asset or as part of the expense.

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the tax authority is included in other receivables or other payables in the statement of financial position.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to the tax authority, are presented as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the tax authority.

Note 1. Significant accounting policies (continued)

Intangible assets

Intangible assets acquired as part of a business combination, other than goodwill, are initially measured at their fair value at the date of the acquisition. Intangible assets acquired separately are initially recognised at cost. Indefinite life intangible assets are not amortised and are subsequently measured at cost less any impairment. Finite life intangible assets are subsequently measured at cost less amortisation and any impairment. The gains or losses recognised in profit or loss arising from the derecognition of intangible assets are measured as the difference between net disposal proceeds and the carrying amount of the intangible asset. The method and useful lives of finite life intangible assets are reviewed annually. Changes in the expected pattern of consumption or useful life are accounted for prospectively by changing the amortisation method or period.

Research and development

Research costs are expensed in the period in which they are incurred.

Development costs are capitalised when it is probable that the project will be successful considering its commercial and technical feasibility; the company is able to use or sell the asset; the company has sufficient resources; and intent to complete the development and its costs can be measured reliably. Capitalised development costs are amortised on a straight-line basis over the period of their expected benefit.

New Accounting Standards and Interpretations not yet mandatory or early adopted

Australian Accounting Standards and Interpretations that have recently been issued or amended but are not yet mandatory, have not been early adopted by the company for the annual reporting period ended 30 June 2022. The company has not yet assessed the impact of these new or amended Accounting Standards and Interpretations.

Note 2. Critical accounting judgements, estimates and assumptions

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgements and estimates in relation to assets, liabilities, contingent liabilities, revenue and expenses. Management bases its judgements, estimates and assumptions on historical experience and on other various factors, including expectations of future events, management believes to be reasonable under the circumstances. The resulting accounting judgements and estimates will seldom equal the related actual results. The judgements, estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities (refer to the respective notes) within the next financial year are discussed below.

Share-based payment transactions

The company measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined by using either the Binomial or Black-Scholes model taking into account the terms and conditions upon which the instruments were granted. The accounting estimates and assumptions relating to equity-settled share-based payments would have no impact on the carrying amounts of assets and liabilities within the next annual reporting period but may impact profit or loss and equity.

Coronavirus (COVID-19) pandemic

Judgement has been exercised in considering the impacts that the Coronavirus (COVID-19) pandemic has had, or may have, on the Company based on known information. This consideration extends to the nature of the products and services offered, customers, supply chain, staffing and geographic regions in which the Company operates. Other than as addressed in specific notes, there does not currently appear to be either any significant impact upon the financial statements or any significant uncertainties with respect to events or conditions which may impact the Company unfavourably as at the reporting date or subsequently as a result of the Coronavirus (COVID-19) pandemic.

Argenica Therapeutics Limited
Notes to the financial statements
30 June 2022

Note 3. Operating segments

The company has considered the requirements of AASB 8 – Operating Segments and has identified its operating segments based on the internal reports that are reviewed and used by the board of directors (chief operating decision makers) in assessing performance and determining the allocation of resources.

The company operates as a single segment being research and development of medical device technology. The board of directors review the earnings before tax and net assets of the company. There is no difference between the audited financial report and the internal reports generated for review. The company is domiciled in Australia and is currently in the development phase and hence has not begun to generate revenue from operations. All the assets are located in Australia.

Note 4. Other income

	2022	2021
	\$	\$
Other income		
Research and development tax rebate	259,098	151,075
Research and development contributions received	-	145,000
	<u>259,098</u>	<u>296,075</u>

Note 5. Expenses - administration and corporate expenses

	2022	2021
	\$	\$
IPO expenses	3,939	238,016
Listing and compliance costs	64,751	6,160
Accounting, audit and tax fees	37,038	38,980
Legal fees and patent costs	70,375	81,017
Investor relations and marketing	134,048	15,869
Insurance	60,335	10,685
General administration costs	179,078	86,669
	<u>549,564</u>	<u>477,396</u>

Note 6. Expenses – employee and contractor expenses

	2022	2021
	\$	\$
Wages & salaries	596,573	103,921
Superannuation	65,007	9,189
Contractors	219,000	50,933
	<u>880,580</u>	<u>164,043</u>

Note 7. Income tax expense

The prima facie tax receivable on loss before income tax is reconciled to the income tax expense as follows

	2022	2021
	\$	\$
Prima facie benefit on operating loss at 25.0% (2021: 27.5%)	1,022,688	283,113
Tax effect amounts which are not deductible in calculating taxable income	(750,168)	
Adjustment for unrecognised tax losses relating to prior periods	(222,238)	
Tax losses not brought to account	<u>(50,282)</u>	<u>(283,113)</u>
Income tax benefit attributable to operating loss	<u><u>-</u></u>	<u><u>-</u></u>

A potential deferred tax asset, attributable to tax losses carried forward, amounts to approximately \$333,395 (30 June 2021: \$283,113) and has not been brought to account at reporting date because the directors do not believe it is appropriate to regard realisation of the deferred tax asset as probable at this point in time. This benefit will only be obtained if:

- the company derives future assessable income of a nature and of an amount sufficient to enable the benefit from the deductions for the loss and research and development expenditure to be realised;
- the company continues to comply with the conditions for deductibility imposed by law; and no changes in tax legislation adversely affect the Company in realising the benefit from the deductions for the loss and research and development expenditure.

Ordinary shares

Ordinary shares entitle the holder to participate in dividends and the proceeds on the winding up of the company in proportion to the number of and amounts paid on the shares held. The fully paid ordinary shares have no par value and the company does not have a limited amount of authorised capital.

On a show of hands every member present at a meeting in person or by proxy shall have one vote and upon a poll each share shall have one vote.

Argenica Therapeutics Limited
Notes to the financial statements
30 June 2022

Share buy-back

There is no current on-market share buy-back.

Capital risk management

The company's objectives when managing capital is to safeguard its ability to continue as a going concern, so that it can provide returns for shareholders and benefits for other stakeholders and to maintain an optimum capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

The company would look to raise capital when an opportunity to invest in a business or company was seen as value adding relative to the current company's share price at the time of the investment. The company is not actively pursuing additional investments in the short term as it continues to integrate and grow its existing businesses in order to maximise synergies.

Note 14. Equity – reserves

Accumulated losses at the end of the financial year	<u>(5,503,656)</u>	<u>(1,412,904)</u>

Note 16. Financial risk management objectives and policies

The company's principal financial instruments comprise cash and short-term deposits.

The company manages its exposure to a variety of financial risks: market risk (including foreign currency risk, price risk and interest rate risk), credit risk and liquidity risk, in accordance with its financial risk management policy. The objective of the policy is to support the delivery of its financial targets whilst protecting future financial security.

The company uses different methods to measure and manage different types of risks to which it is exposed. These include monitoring levels of exposure to interest rate risk and assessments of market forecast for interest rates. Liquidity risk is monitored through the development of future rolling cash flow forecasts.

Primary responsibility for identification and control of financial risks rests with the Board. The Board reviews and agrees policies for managing each of the risks identified below.

Market risk

Foreign currency risk

The Company is not exposed to significant foreign currency risk as its operations are based in Australia, with no major suppliers subject to foreign exchange rates.

Price risk

The Company is not exposed to any significant price risk.

Interest rate risk

The Company has a policy of minimising its exposure to interest payable on debt. The Company has no debt that requires the payment of interest. The Company has exposure to interest rate risk through its cash balances, however, this exposure is not considered to be significant.

Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Company. The maximum exposure to credit risk at the reporting date to recognised financial assets is the carrying amount, net of any provisions for impairment of those assets, as disclosed in the statement of financial position and notes to the financial statements. The Company does not hold any collateral.

Liquidity risk

Liquidity risk is managed through the company's objective to maintain adequate funding to meet its needs, currently represented by cash and short-term deposits sufficient to meet the current cash requirements.

Capital management

The primary objective of the company's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximise shareholder value.

The company manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the company may return capital to shareholders or issue new shares. No changes were made in the objectives, policies or processes during the years ended 30 June 2022 and 30 June 2021.

The company monitors capital with reference to the net debt position. The company's current policy is to keep the net debt position negative, such that cash and cash equivalents exceed debt.

Argenica Therapeutics Limited
Notes to the financial statements
30 June 2022

Remaining contractual maturities

The following tables detail the Company's remaining contractual maturity for its financial instrument liabilities. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the financial liabilities are required to be paid. The tables include both interest and principal cash flows disclosed as remaining contractual maturities and therefore these totals may differ from their carrying amount in the statement of financial position.

2022	Weighted average interest rate %	1 year or less \$	Between 1 and 2 years \$	Between 2 and 5 years \$	Over 5 years \$	Remaining contractual maturities \$
<i>Non-interest bearing</i>						
Trade payables	-	671,825	-	-	-	671,825
Other payables	-	39,184	-	-	-	39,184
Total		711,009	-	-	-	711,009

	\$	\$
<i>Corporate advisory services commitments</i>		
Committed at the reporting date but not recognised as liabilities, payable:		
Within one year	30,000	-
<i>Research services commitments</i>		
Committed at the reporting date but not recognised as liabilities, payable:		
Within one year	-	110,131
	<u>30,000</u>	<u>110,131</u>

Note 21. Related party transactions

Key management personnel

Disclosures relating to key management personnel are set out in note 17 and the remuneration report included in the directors' report.

Argenica Therapeutics Limited
Notes to the financial statements
30 June 2022

Transactions with related parties

The following transactions occurred with related parties:

	2022 \$	2021 \$
Payment for goods and services:		
<i>Provided by Polaris Consulting (WA) Pty Ltd (a director-related entity of Geoff Pocock):</i>		
Analyst support services	17,000	-
Corporate services (including office space, utilities and administrative support)	-	61,500
A transaction success fee payable on admission of the company to the ASX	-	30,000
	<u>17,000</u>	<u>91,500</u>

Receivable from and payable to related parties

	2022 \$	2021 \$
Current payables:		
Trade payables to Polaris Consulting (WA) Pty Ltd (director-related entity of Geoff Pocock)	-	36,300

There were no other receivables from or payables to related parties at the current reporting date.

Loans to/from related parties

There were no loans to or from related parties at the current and previous reporting date.

All transactions were made on normal commercial terms and conditions and at market rates.

Note 22. Events after the reporting period

On 6 July 2022, the company issued 125,000 options over ordinary shares to a contractor of the company with an exercise price of \$0.65 and an expiry date of 6 July 2025.

The impact of the Coronavirus (COVID-19) pandemic is ongoing and while it has had limited impact on the company up to 30 June 2022, it is not practicable to estimate the potential impact, positive or negative, after the reporting date. The situation is rapidly developing and is dependent on the potential impact on manufacturing, supply chain and measures imposed by the Australian Government and other countries, such as maintaining social distancing requirements, quarantine, travel restrictions and any economic stimulus that may be provided.

No other matter or circumstance has arisen since 30 June 2022 that has significantly affected, or may significantly affect the company's operations, the results of those operations, or the company's state of affairs in future financial years.

Note 23. Reconciliation of profit after income tax to net cash from operating activities

	2022 \$	2021 \$
Loss after income tax expense for the year	(4,090,752)	(1,029,501)
Adjustments for:		
Share based payments (note 24)	425,336	268,218
Change in operating assets and liabilities:

			8,300,000	-	-	-	8,300,000

* Options issued to KMP, employees and consultants with vesting periods as follows:

- 3,425,000 options vested on 9 December 2021;
- 3,425,000 options vest on 9 December 2022;
- 250,000 options vested immediately; and
- 300,000 options vested on 4 April 2022.

** Options issued to Alto Capital, lead manager of the IPO with vesting periods as follows:

- 1,200,000 options vested immediately.

Argenica Therapeutics Limited
Notes to the financial statements
30 June 2022

*** Options issued to Euroz Hartleys Limited, for corporate advisory services, and lead manager of the June 2022 placement, with vesting periods as follows:

- 800,000 options vested immediately; and
- 600,000 options vested immediately.

For the options granted during the current financial year, the fair value was determined by using the Black-Scholes model. The valuation model inputs used to determine the fair value at the grant date, are as follows:

Number Granted	Grant Date	Exercise price	Share price at grant date	Expected volatility	Dividend yield	Risk-free interest rate	Fair value per option at grant date
800,000	03-Aug-2021	\$0.30	\$0.200	100%	0%	0.02%	\$0.0813
300,000	02-Jan-2022	\$1.10	\$0.835	85%	0%	1.01%	\$0.4107
600,000	03-Jun-2022	\$0.65	\$0.485	90%	0%	2.65%	\$0.1869

For the options granted during the previous financial year, the fair value was determined by using the Black-Scholes model. The valuation model inputs used to determine the fair value at the grant date, are as follows:

Number Granted	Grant Date	Exercise price	Share price at grant date	Expected volatility	Dividend yield	Risk-free interest rate	Fair value per option at grant date
3,425,000	14-Apr-2021	\$0.30	\$0.125	100%	0%	0.11%	\$0.0523
3,425,000	14-Apr-2021	\$0.30	\$0.125	100%	0%	0.11%	\$0.0559
250,000	14-Apr-2021	\$0.30	\$0.125	100%	0%	0.11%	\$0.0520
1,200,000	9-Jun-2021	\$0.30	\$0.200	100%	0%	0.11%	\$0.0945

6,575,000 options were exercisable at the end of the financial year (30 June 2021:1,450,000 options).

The weighted average exercise price of options outstanding at the end of the financial year was \$0.35 (30 June 2021: \$0.30).

The weighted average remaining contractual life of options outstanding at the end of the financial year was 2.2 years (30 June 2021: 3.25 years).

Note 25. Earnings per share

Argenica Therapeutics Limited
Directors' declaration
30 June 2022

In the directors' opinion:

- the attached financial statements and notes comply with the Corporations Act 2001, the Accounting Standards, the Corporations Regulations 2001 and other mandatory professional reporting requirements;
- the attached financial statements and notes comply with International Financial Reporting Standards as issued by the international Accounting Standards Board as described in note 1 to the financial statements;
- the attached financial statements and notes give a true and fair view of the company's financial position as at 30 June 2022 and of its performance for the financial year ended on that date;
- there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable; and

The directors have been given the declarations required by section 295A of the Corporations Act 2001.

Signed in accordance with a resolution of directors made pursuant to section 295(5)(a) of the Corporations Act 2001.

On behalf of the directors

**INDEPENDENT AUDITOR'S REPORT
TO THE MEMBERS OF
ARGENICA THERAPEUTICS LIMITED**

Opinion

We have audited the financial report of Argenica Therapeutics Limited (the Company), which comprises the statement of financial position as at 30 June 2022, the statement of profit or loss and other comprehensive income, the statement of changes in equity and the statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, and the directors' declaration.

In our opinion, the accompanying financial report of the Company is in accordance with the Corporations Act 2001, including:

- (i) Giving a true and fair view of the Company's financial position as at 30 June 2022 and of its financial performance for the year then ended; and
- (ii) Complying with Australian Accounting Standards and the Corporations Regulations 2001.

Basis for Opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Company in accordance with the auditor independence requirements of the Corporations Act 2001 and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 Code of Ethics for Professional Accountants (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the Corporations Act 2001, which has been given to the directors of the Company, would be in the same terms if given to the directors as at the time of this auditor's report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

THE POWER OF BEING UNDERSTOOD
AUDIT | TAX | CONSULTING

RSM Australia Partners is a member of the RSM network and trades as RSM. RSM is the trading name used by the members of the RSM network. Each member of the RSM network is an independent accounting and consulting firm which practices in its own right. The RSM network is not itself a separate legal entity in any jurisdiction.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report of the current period. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key Audit Matter	How our audit addressed this matter
<p>Share-based payments Refer to Note 24 in the financial statements</p>	
<p>During the year, the Company issued options, which have been brought to account in accordance with AASB 2 <i>Share-based Payment</i>.</p> <p>We have considered this to be a key audit matter because:</p> <ul style="list-style-type: none"> • Management judgement is required to determine the inputs used in the valuation model to value the options; and • The recognition of the expense is complex due to the variety of vesting conditions attached to the options. 	<p>Our audit procedures included:</p> <ul style="list-style-type: none"> • Obtaining an understanding of the terms and conditions of the options issued; • Reviewing management's valuation methodology; • Reviewing the key inputs used in the valuation model; • Recalculating the value of the share-based payment expense to be recognised in profit or loss in accordance with AASB 2; and • Reviewing the appropriateness of disclosures in the financial statements.

Other Information

The directors are responsible for the other information. The other information comprises the information included in the Company's annual report for the year ended 30 June 2022, but does not include the financial report and the auditor's report thereon.

Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Report

The directors of the Company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the Corporations Act 2001 and for such internal control as the directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the ability of the Company to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

For personal use only

Auditor's Responsibilities for the Audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website at: https://www.auasb.gov.au/auditors_responsibilities/ar2.pdf. This description forms part of our auditor's report.

Report on the Remuneration Report

Opinion on the Remuneration Report

We have audited the Remuneration Report included within the directors' report for the year ended 30 June 2022.

In our opinion, the Remuneration Report of Argenica Therapeutics Limited, for the year ended 30 June 2022, complies with section 300A of the Corporations Act 2001.

Responsibilities

The directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the Corporations Act 2001. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.
