

1. Company details

Name of entity:	Oliver's Real Food Limited
ABN:	33 166 495 441
Reporting period:	For the year ended 30 June 2022
Previous period:	For the year ended 30 June 2021

2. Results for announcement to the market

			\$
Revenues from ordinary activities	down	30.9% to	19,486,471
Earnings before interest, taxes, depreciation and amortisation ('EBITDA')*	down	211.0% to	(6,072,106)
Earnings before interest, taxes, depreciation and amortisation and impairments ('EBITDAI')*	up	550.0% to	1,782,676
Loss from ordinary activities after tax attributable to the owners of Oliver's Real Food Limited	up	12.4% to	(10,438,118)
Loss for the year attributable to the owners of Oliver's Real Food Limited	up	12.4% to	(10,438,118)

* EBITDA and EBITDAI are financial measures which are not prescribed by the Australian Accounting Standards ('AAS') and represent the profit/loss under AAS adjusted for specific non-cash and significant items not expected to recur between periods. The directors consider EBITDAI to reflect the core earnings of the consolidated entity. A reconciliation between loss after income tax, EBITDA and EBITDAI is set out below:

	Consolidated 2022 \$	2021 \$
Net loss after tax	(10,438,118)	(9,284,867)
Add: Depreciation and amortisation expenses	2,781,412	5,034,145
Add: Finance costs	1,587,007	2,300,527
Less: interest revenue	(2,407)	(2,353)
EBITDA	(6,072,106)	(1,952,548)
Add: Impairment of assets	7,854,782	2,226,805
EBITDAI	1,782,676	274,257

	Consolidated 2022 \$	2021 \$
One-off items:		
Government concessions - JobSaver/JobKeeper	1,626,940	4,433,773

	2022 Cents	2021 Cents
Basic earnings per share	(2.89)	(3.23)
Diluted earnings per share	(2.89)	(3.23)

Dividends

There were no dividends paid, recommended or declared during the current financial period.

Commentary on the results

The financial year ended 30 June 2022 ('FY2022'), just like the previous financial year, was a challenging one for the Company. The significant impact of COVID-19 and the various ever-changing State border closures had direct and substantial effect on the consolidated entity's performance.

In June 2021 New South Wales went into lockdown. This was followed shortly thereafter by Victoria with both lockdowns lasting four months. The impact of these lockdowns and border closures saw all Corporate Stores cease trading for various and differing periods in each of the States during the first half of FY2022.

Following the lifting of both domestic and international border restrictions, the consolidated entity carefully monitored the individual performance of each store, with a view to establishing what, if anything, had changed during the disruptive COVID-19 period. The main focus was the Victorian store network, which experienced the heaviest sales decline since the beginning of the pandemic. After five months (December 2021 to April 2022) of monitoring, the Board resolved to approach the Victorian landlords with a view to exiting several stores, all of which were significantly under-performing compared to previous years and none of which presented any real prospects of recovering to pre-covid sales levels. This was a necessary step as, at the time, these stores combined were losing close to \$750,000 per annum.

The Board believes that with the cumulative positive impact of the operational restructuring completed in FY2022, together with the recent closures of these poor performing stores, the consolidated entity is now well placed to capitalise on its unique market position, its significant brand, and the market opportunities.

From an operational perspective, the consolidated entity has continued to invest in its menu. The current expansion of that menu into a suite of exciting and wholesome menu items is the result of many months of planning, experimenting and analysing. Initial feedback to these menu changes has been extremely positive, and management remains focused on continued innovation of the menu.

As a final point, readers and followers of Oliver's may have noticed renewed marketing initiatives. The basic core of the marketing strategy is to promote Oliver's to the consuming market that want to make healthier food choices in the Quick Service Restaurant space. Having refreshed the positioning and brand, the consolidated entity is focused on increasing awareness and consideration of Oliver's in these target segments through product-led marketing, communications and partnerships, while driving store visitation through a billboard strategy and targeted digital advertising. Management have also brought the business from significantly behind the industry in digital up to parity. This has been achieved by building a new search engine optimisation and mobile-friendly website, ongoing social media activity, the launch of the Oliver's app, loyalty program and online ordering.

Impairment of assets

In the Interim Report for the half-year ended 31 December 2021, the consolidated entity impaired assets totalling \$9,992,880, including \$7,243,474 for the full impairment of the Victorian store network. When the Interim Report were issued, the Board believed that all Victorian stores, except Euroa, would be closed. Following an extensive operational review in June 2022, a decision was made to continue to operate four of the Victorian stores, Officer Inbound and Outbound and Wallan Northbound and Southbound. This turnaround was on the basis that there are strong prospects for these stores (including current trading conditions, turnaround factors etc). As a result, under AASB 136 'Impairment of Assets', this has led to a "significant favourable change" that has occurred in the extent to which an asset is used. Therefore, \$2,138,098 of impairments relating to those four stores has now been reversed.

The consolidated entity continues to assess the entire store network to determine if any further impairments and/or writebacks are required as of 30 June 2022, which may impact the final result. Management are working with the auditors to finalise this position, and the final result will be reported in the audited financial statements.

Warrants

The consolidated entity has yet to receive the final valuation on the warrants. Therefore, the Unaudited Preliminary Final Report does not reflect any change in the value of the warrants. An adjustment to fair value, and its impact (positively or negatively) will be reflected in profit or loss in the audited financial statements.

Lease liability writeback

The figure of \$2,487,407 relates to the assignment of the Queensland kitchen lease and the termination of the Chinderah store lease.

FY2023 outlook

The consolidated entity starts the new financial year with 16 Company owned stores:

Bulahdelah	Wallan Northbound
Euroa	Gundagai
Maryborough	Wallan Southbound
Coffs Harbour	Hexham
Officer Inbound	Lithgow
Ferry Park	Port Macquarie
Officer Outbound	Wyong Northbound
Goulburn	Wyong Southbound

The outlook for FY2023 must be conservative. The challenges being faced in the global economy, well publicised labour shortages and pressure on freight and logistics are certain to have an impact. The consolidated entity will take whatever action is necessary to meet these potential challenges and consequently, the consolidated entity's financial projections and growth plans are conservative.

The Board and Management have been researching the potential expansion of store footprint into the high foot-traffic city environment, the so called 'high street' opportunity. Whilst no decisions have been made, the Company is currently modelling several alternatives, of which franchising, a process that was previously established for the Oliver's network, may form part. The 2023 financial projections have made certain assumptions in relation to the expansion opportunity, with a few such stores modelled for opening in the later part of FY2023 subject to feasibility outcomes.

Funding requirements

The Board is aware of the need for any expansion of the network to be fully funded, and given only preliminary research has commenced, no firm decision regarding the expansion and its funding requirements have been made.

In terms of the existing operation and the funding requirements in that regard, the Board is confident that with the closure of seven Victorian stores plus Chinderah in New South Wales and the combination of the new menu and the marketing initiatives, the consolidated entity will reduce its cash burn to a breakeven or slightly positive cash flow within months. That then reduces and ultimately eliminates any further on-going funding for current operations.

Events after the reporting period

After negotiations, the Company can announce that it has reached an in principle agreement with a major Victorian landlord to exit six identified stores on terms and conditions agreeable to both parties, with effect from 1 August 2022. As a result, the consolidated entity will have a write-back of the lease liabilities in the first half of FY2023, as these assets were fully impaired in December 2021. This will be announced when final details are complete.

3. Net tangible assets

The above statement of cash flows should be read in conjunction with the accompanying notes

Note 1. Restatement of comparatives

Correct of material error in Intellectual property

During the review of impairments for the financial year ended 30 June 2022, it was discovered that in 2016-17 intellectual property relating to the Oliver's brand of \$500,000 was purchased from a related party. This should have been classified as goodwill and been fully impaired. This had resulted in an overstatement of intangible assets. Management have restated the comparatives and following adjustments have been recorded:

- an decrease to accumulated losses at 1 July 2020 representing the impairment of goodwill of \$500,000; and
- a decrease to the intangible assets at 1 July 2020, representing the impairment of goodwill of \$500,000

Correction of a material error in accounting treatment of share warrants

During the financial year ended 30 June 2022, management discovered that the borrowings with Pure Asset Management was incorrectly recognised and measured as at 30 June 2021.

The consolidated entity entered into the facility agreement with Pure Asset Management on 29 September 2020, which included the issue of warrants.

The key terms of the loan facility were:

- Facility amount: \$5,000,000
- Interest is calculated on a daily basis at 10.5% p.a. and is payable quarterly in arrears
- Term of three years

The key terms of the warrants were:

- Tranche A warrants can be exercised at any time during the term of the loan for 37,500,000 shares
- Tranche B warrants can be exercised during the term of the loan once shareholder approval has been obtained, for 10,000,000 shares

In the consolidated entity's financial statements for the year ended 30 June 2021, the loan facility was measured at amortised cost. Instead, the liability should comprise two components being the host debt liability and a derivative liability component for the conversion feature of the warrants. The derivative liability should be fair valued on initial inception (being 29 September 2020) and at each subsequent reporting date, with any movement in fair value charged/credited directly to profit or loss.

Applying the correct accounting treatment, at inception, the host debt liability should initially be carried at \$4,225,611 and interest should subsequently be charged using an effective interest rate of 14.74%. At inception date, a derivative liability with a fair value of \$774,389 should be recognised and subsequently fair valued at each reporting date.

As a result, Management have restated the comparatives and the following adjustments have been recorded:

- the recognition of an gain of \$122,562 in profit or loss representing the fair value movement in the derivative liability from the date of inception to 30 June 2021;
- the recognition of an expense of \$491,312 in profit or loss representing the additional interest expense on borrowings for the year ended 30 June 2021;
- the recognition of a derivative liability of \$651,827 representing the fair value of the derivative liability as at 30 June 2021; and
- a reduction in the carrying value of borrowings from \$5,057,329 to \$4,777,252 at 30 June 2021, representing the remeasurement of borrowings at inception plus interest.

Correction of a material error in accounting treatment of right-of-use assets and fixed assets

The consolidated entity received an information request from ASIC regarding 'reversals of impairments' at 30 June 2021 and their interpretation of AASB136 'Impairment of Assets', which stated specifically:

- Under paragraph 110 of AASB136, an entity only estimates the recoverable amount of an asset when there are indications that an impairment loss recognised in prior periods may no longer exist or may have decreased.
- Paragraph 111 of AASB136 also contains the minimum external and internal sources of information that entities should consider when determining whether any of these indications are present.
- In ASIC's view, the impairment loss reversal should not have been recognised because there is no indication that the impairment loss(es) recognised in prior periods no longer exists.

Note 1. Restatement of comparatives (continued)

Therefore, the Board has decided to reinstate the impairment that was previously reversed during the year ended 30 June 2021. As a result, comparatives have been restated, as follows:

- increase accumulated losses by \$4,500,875 as at 1 July 2020 to reinstate the impairment previously recognised on right-of-use assets and property, plant and equipment;
- reduce the carrying value of right-of-use assets by \$3,658,589 at 30 June 2021, representing the reinstatement of previously recognised impairment; and
- reduce the carrying property, plant and equipment by \$842,286 at 30 June 2021, representing the reinstatement of previously recognised impairment.

These errors have been rectified by restating each of the affected financial statement line items for prior periods as follows:

Statement of profit or loss and other comprehensive income
