The following table reconciles underlying earnings measures to statutory results.

Fee and Trading Income was up 49.5% with APAC up 15.0%, North America up 117.2% and EMEA up 26.9%. Revenue growth was driven by continued elevation of ATV's across the portfolio and improved margins across all segments in addition to the acquisition of Firma from 1 May 2022 (Firma UK from 2 September 2022).

Underlying operating expenses were up 50.8% on the previous corresponding period with the acquisition of Firma and targeted investment in people, technology, and promotional expense. There was an increase in bad and doubtful debts of \$1.2m for the period, up from historical lows in FY22. The increase in bad debts was driven by a number of smaller transactions in North America.

Corporate revenue grew 98.2% with continued strength in ATV's and margin accretion, alongside the Firma acquisition, driving growth across all regions. The momentum in the Consumer segment continued with revenue up 11.3%. Margins were up 6bps and currency volatility also drove additional activity within the segment. Online Sellers revenue grew by 0.6% (6.9% ex Asia) with eCommerce market growth continuing to be soft. The Group continues to focus on building a strong pipeline of Enterprise opportunities however activation of recent clients is slower than expected. As a result, Enterprise revenue was down 1.6% in 1H23.

The Firma integration remains on track and the business is producing exceptional results. Revenue from Firma was up 27% over the previous 12 months and the business contributed \$27.2m in revenue to the OFX group result in 1H23.

Accordingly, this report is to be read in conjunction with the annual report for the year ended 31 March 2022 and any public announcements made by OFX Group Limited during the interim reporting period in accordance with the continuous disclosure requirements of the *Corporations Act 2001*.

Except as described in this note below the accounting policies adopted are consistent with those of the previous financial year.

Significant accounting policies

Except as described in this note, the accounting policies applied in these interim financial statements are consistent with those applied as at 31 March 2022 and have been consistently applied by each entity in the Group.

Note 5. Fair values of assets and liabilities

A financial instrument's categorisation within the valuation hierarchy is based on the lowest level input that is significant to the fair value measurement:

Level	Instruments	Valuation process
Level 1 – Traded in active markets and fair value is based on recent unadjusted quoted prices.	Cash and cash equivalents, amounts due from financial institutions, client liabilities, creditors and receivables.	These instruments are held at amortised cost. Fair values are considered to approximate to their carrying amounts as they are short term in nature.
Level 2 – Not actively traded and fair value is based on valuation techniques which maximise the use of observable market prices.	Over the counter derivatives.	Foreign currency forward contract valuations are based on observable spot exchange rates and the yield curves of the respective currencies.
Level 3 – Not actively traded and fair value is based on at least one input which is not observable in the market due to illiquidity or complexity.	None – the Group does not hold any of these instruments.	Not applicable.

All derivative financial instruments held by the Group at fair value are categorised within Level 2.

Note 6. Equity-accounted investees

	As at 30 September 2022 \$'000	As at 31 March 2022 \$'000
Investment in joint venture	4,226	4,474
Closing balance	4,226	4,474

Investment in joint venture

Acquired on 11 June 2021, TreasurUp B.V. (TreasurUp) is a joint venture in which the Group has joint control and a 44.98% ownership interest. TreasurUp is a treasury management software company, incorporated in the Netherlands, which will allow the Group to provide automated hedging and risk management solutions for small and medium size corporates to manage their foreign exchange risk. TreasurUp is not publicly listed. TreasurUp is structured as a separate vehicle and the Group has a residual interest in the net assets of TreasurUp. Accordingly, the Group has classified its interest in TreasurUp as a joint venture.

In accordance with the agreement under which the Group's investment in TreasurUp was established, The Group provided a loan to the Company in an amount of €0.75m with an annual interest rate of 8%. The balance of this as at 30 September 2022 is A\$1.265m and is included in 'Other receivables' on the Consolidated Statement of Financial Position.

Accounting policy

The Group's interest in equity accounted investees includes a joint venture. A joint venture is an arrangement in which the Group has joint control over the key financial and operating policies and has rights to the net assets of the arrangement, rather than rights to its assets and obligations for its liabilities. Interests in the joint venture are accounted for using the equity method.

Under the equity method, the investment is initially recognised at cost, which includes transactions costs. The investment is subsequently adjusted to recognise the Group's share of the joint venture's profit or loss and other comprehensive income until the date on which joint control ceases. The Group's share of the joint venture's profit or loss and other comprehensive income is included in the Group's profit and loss.

Unrealised gains arising from transactions with equity accounted investments are eliminated against the investment to the extent of the Group's interest in the investment. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

At each reporting date, the Group determines whether there is objective evidence that an investment in joint venture is impaired. If there is such evidence, an impairment loss, measured by comparing the recoverable amount of the investment with its carrying value, is recognised in the profit or loss.

Basis for Conclusion

We conducted our review in accordance with ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*. Our responsibilities are further described in the *Auditor's Responsibilities for the Review of the Financial Report* section of our report.

We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the *Accounting Professional and Ethical Standards Board's APES 110 Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the annual financial report in Australia. Auditor’s Responsibilities for the Review of the Interim Financial Report

Our responsibility is to express a conclusion on the Interim Financial Report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the Interim Financial Report does not comply with the *Corporations Act 2001* including:

- giving a true and fair view of the Group’s financial position as at 30 September 2022 and its performance for the Half-Year ended on that date, and
- complying with *Australian Accounting Standard AASB 134 Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of an Interim Financial Report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with *Australian Auditing Standards* and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
