Corporate overview

Wrkr Ltd (Wrkr) is an Australian RegTech company assisting workers, employers, members, and their superannuation funds in meeting their regulatory compliance across the hire to retire lifecycle. The Group resolves these compliance moments in real time by facilitating the transfer of data and payments between regulated authorities and participants in the ecosystem (HR/payrolls, Accountants, Banks, Australian Prudential Regulation Authority ('APRA') and self-managed super fund ('SMSF') and federal departments like the Australian Taxation Office ('ATO').

In H1 FY23, the business released new features in its Wrkr SMSF Hub, Wrkr READY and Wrkr PLATFORM products as follows:

- Wrkr READY saw an upgrade of the employee onboarding capability to include a contracting module to enable an employer to confirm, sign and accept a contract from an employee or contractor, new workflows for contractors, and integration to STP2 data feeds;
- Wrkr SMSF Hub developed a streamlined subscription renewal process and implemented customer payment options, enhancements to Trustee sign-on and multi-factor security, contributions reporting and notification of release authorities; and
- Wrkr PLATFORM received numerous enhancements to the Your Future Your Super capability enabling an employee to select their existing or chosen Superfund when changing companies, multi-factor authentication and full integration to our STP2 functionality.

The business also updated its Cyber Security and Compliance program and maintained its ISO27001 Accreditation.

The Wrkr SMSF Hub SaaS product enables SMSFs and Advisors/Accountants to view and manage SMSFs superstream compliance in one place and is compliant with the introduction of Rollovers 3.0 on 1 October 2021. It has been a great success with over 20,000 SMSFs subscribing to the service either directly or through an advisor since launching in October 2021.

Having fundamentally transformed the business in FY22, the business continues to move from strength to strength in FY23 with a goal of long term growth and financial stability. The strategy ahead follows:

- Grow the base of Australian workers;
- Increase the compliance relevance with higher value moments; and
- Innovate and partner for future value.

The business has seen considerable revenue growth (50% H1 YoY). The revenue diversity continues to be a strength and Wrkr PAY and Wrkr READY are expected to underpin future growth during this 2023 financial year.

Significant changes in the state of affairs

On 27 September 2022, the Company announced \$3,800,000 capital raise to accelerate the Group's growth strategy through the following:

(a) Convertible notes

The convertible notes have a two-year term, 10% pa coupon rate paid quarterly in cash and a conversion price based on 20% discount to the Company's 30-day Volume-Weighted Average Price ('VWAP') subject to a ceiling price of \$0.039 per share and a floor price of \$0.018 per share. The convertible notes were issued in 2 tranches as follows:

- Tranche 1 - comprising of 2,800,000 convertible notes raising a total of \$2,800,000 which were issued on 29 September 2022; and
- Tranche 2 - comprising of 500,000 convertible notes raising a total of \$500,000 which were issued on 28 November 2022 following the shareholder approval for the purpose of ASX Listing Rule 10.11 at the Company's AGM on 24 November 2022.

(b) Share Purchase Plan ('SPP')

The share purchase plan aimed to raise \$500,000 and provided eligible shareholders with the opportunity to subscribe for a minimum of \$2,500 and up to maximum of \$30,000 of new fully paid ordinary shares at \$0.018 per share. Due to high demand, the Board accepted a total of \$942,000 from the SPP by issuing 52,333,355 ordinary shares at \$0.018 per share on 27 October 2022.

The additional subscription in the SPP resulted into raising a total of \$4,242,000.

There were no other significant changes in the state of affairs of the Group during the financial half-year.

Note 2. Significant accounting policies

These general purpose financial statements for the interim half-year reporting period ended 31 December 2022 have been prepared in accordance with Australian Accounting Standard AASB 134 'Interim Financial Reporting' and the Corporations Act 2001, as appropriate for for-profit oriented entities. New or amended Accounting Standards and Interpretations adopted

The Group has adopted all of the new or amended Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') that are mandatory for the current reporting period. The adoption of these Accounting Standards and Interpretations did not have any significant impact on the financial performance or position of the Group during the financial half-year ended 31 December 2022 and are not expected to have a significant impact for the full financial year ending 30 June 2023.

- continued delivery of our long-term platform licence and support & maintenance contracts with our 3 major customers;

- continued focus on the operating performance of the business;
- proactively and efficiently manage working capital.

Borrowings

Loans and borrowings are initially recognised at the fair value of the consideration received, net of transaction costs. They are subsequently measured at amortised cost using the effective interest method.

Convertible notes issued by the Group include embedded derivatives that gives the holder the option to convert into a variable number of shares. The derivative liability embedded in the host contract is accounted for separately at fair value through profit or loss. On initial recognition, the difference between the fair value of the embedded derivative and the proceeds is recognised as a financial liability and is subsequently measured at amortised cost. The corresponding interest on convertible notes is expensed to profit and loss.

Note 3. Operating segments

Identification of reportable operating segments

The Group is organised into one operating segment relating to the provision of services that enable its customers to meet their regulatory compliance across the hire to retire life cycle. It does that by facilitating the transfer of data and payments between regulated authorities and participants of the ecosystem (HR/payrolls, Accountants, Banks, APRA, and SMSF Funds and federal departments like the ATO).

The information reported to the Board of Directors (being the Chief Operating Decision Makers ('CODM')) consists of the results as shown in the statement of profit or loss and other comprehensive income and statement of financial position in this Interim Report and has therefore not been replicated as segment disclosure.

The directors have determined that there are no operating segments identified for the year which are considered separately reportable.

Short-term loan

The short-term loan was repaid during the half-year period.

Convertible notes

The convertible notes have a two-year term maturing on 4 October 2024, 10% pa coupon rate paid quarterly in cash and a conversion price based on 20% discount to the Company's 30-day Volume-Weighted Average Price ('VWAP') subject to a ceiling price of \$0.039 per share and a floor price of \$0.018 per share. The convertible notes were issued in 2 tranches as follows:

- (a) Tranche 1 - comprising of 2,800,000 convertible notes at an issue price of \$1 per note raising a total of \$2,800,000 which were issued on 29 September 2022; and
- (b) Tranche 2 - comprising of 500,000 convertible notes at an issue price of \$1 per note raising a total of \$500,000 which were issued on 28 November 2022 following the shareholder approval for the purpose of ASX Listing Rule 10.11 at the Company's AGM on 24 November 2022. These notes were issued to a related party, Parmms Enterprises Pty Ltd as trustee for the Parmms Investment Trust. Paul Collins is a Director of Parmms Enterprises Pty Ltd and is also a director and key management personnel of Wrkr Ltd.

The convertible notes, together with any accrued unpaid interest, will automatically convert into fully paid ordinary shares on the maturity date.

The Company, may at any time prior to maturity date, elect to redeem all or some of the convertible notes held by the noteholder. The Company must also redeem all convertible notes upon the occurrence of an insolvency event. Where a convertible note is redeemed, the Company will pay to the relevant noteholder an additional interest payment so that the total interest received by the noteholder in respect to the convertible notes is equivalent to the amount they would have received had the relevant convertible notes been held until maturity.

The debt host contract (convertible note payable) has been measured at amortised cost and the derivative component has been measured at fair value through the profit and loss with such gains or losses presented in profit or loss as fair value movements on embedded derivatives (see note 8). As the conversion price is variable, the derivative component has been classified as a financial liability.

On initial recognition of the convertible notes payable, a derivative financial instrument of \$2,760,904 has been recognised. The derivative financial instrument has been subsequently measured at the reporting period date, with changes in fair value gain of \$71,184 being recognised in profit and loss and such gains or losses have been presented as fair value movement on embedded derivatives.

Note 11. Fair value measurement

Fair value hierarchy

The following tables detail the Group's assets and liabilities, measured or disclosed at fair value, using a three level hierarchy, based on the lowest level of input that is significant to the entire fair value measurement, being:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly

Level 3: Unobservable inputs for the asset or liability

Consolidated - 31 Dec 2022	Level 1	Level 2	Level 3
	\$	\$	\$
<i>Liabilities</i>			
Derivative financial instruments	-	2,689,720	-
Total liabilities	-	2,689,720	-

Note 11. Fair value measurement (continued)

There were no transfers between levels during the financial half-year.

Valuation techniques for fair value measurements categorised within level 2 and level 3

Derivative financial instruments have been valued using quoted market rates. This valuation technique maximises the use of observable market data where it is available and relies as little as possible on entity specific estimates.

Note 12. Contingent liabilities

The Group had no material contingent liabilities at 31 December 2022 or 30 June 2022.

Note 13. Earnings per share

	Consolidated 31 Dec 2022 \$	31 Dec 2021 \$

57,850,000 share options and 3,300,000 convertible notes have been excluded from the above calculation for diluted earnings per share at 31 December 2022 (31 December 2021: 59,700,000 share options) as their inclusion would be anti-dilutive due to the loss for the half-year.

Note 14. Share-based payments

Employee Share Option Plan

On 7 September 2022, the Group issued 5,000,000 new options under the Employee Share Option Plan Scheme.

On 27 September 2022, the Group issued additional 45,000,000 new options under the Employee Share Option Plan Scheme.

Total expense arising from share-based payment transactions recognised as of 31 December 2022 was \$35,520 (31 December 2021: \$115,324).

For the options granted during the current financial half-year, the valuation model inputs used to determine the fair value at the grant date, are as follows:

Grant date	Expiry date	Share price at grant date	Exercise price	Expected volatility	Dividend yield	Risk-free interest rate	Fair value at grant date
07/09/2022	07/09/2026	\$0.020	\$0.027	89.00%	-	3.48%	\$0.0114
