CHAIRMAN'S LETTER

Dear Shareholders,

It is my pleasure to provide the Yojee half yearly report for the period ending 31 December 2022.

The Ukraine/Russia war and its associated economic impacts have changed the investor appetite for growth stocks and increased interest rates and inflation around the world. An obvious casualty in this shift is cheap capital replenishment.

Instead of capital searching for a story around scalability and global growth the investment mantra has become profitability first at the expense of growth.

Accordingly those stocks not yet cashflow positive have been heavily discounted. Yojee is no exception to this rule.

Our current share price reflects this issue and also the change in strategy to address this issue and set the foundations to deliver long term commercially valuable growth. I am pleased to report that this strategy to grow our enterprise customer base is well on track in its early stages.

The board asked management in late 2022 for a strategy to prioritise cash generation and reduce expenditure and have been given a sensible and achievable plan which extends our cash runway to a point where we believe we will be net cashflow positive in late 2024/early 2025.

Discretionary, longer-term projects have been mothballed in favour of near term known opportunities with larger clients who value the business benefits we bring to the table.

We have streamlined headcount and focused on systems and processes to improve productivity internally and are seeing good results. This strategic realignment to enterprise grade customers has already been implemented with a commensurate reduction in cash burn and rapidly advancing pipeline that is the largest we have ever had.

What is clear from these results above is that we have a platform that already fulfills vital needs of our customers without significant additional new features or module builds. Indeed it adds significant value to several global ERP/transport management systems and can do so at a price point that is highly valuable to us but is aligned with how our customers bill their customers for little friction.

The healthy pipeline of larger opportunities that require what Yojee offers is slower to convert, however it is stickier and has more upside. Although the decision process in these larger customers is slower, compensation comes from larger orders, payments on time and slowly but surely a larger work in progress portfolio.

Our team has never been of better quality and has been steadily improving productivity. We expect the balance of calendar 2023 to be a significant improvement.

Sincerely, David Morton Non-Executive Chairman

CO-FOUNDER AND MANAGING DIRECTOR'S REPORT

Highlights for the first half of FY2023 include:

- Revenue & Other Income increase of 68% and a Trade Revenue increase of 33% to AU\$1.157m (1H FY2023 v 1H FY2022)
- Refined strategic focus and go-to-market strategy on top global forwarders and partner market.
- Initiatives implemented to reduce Net Cash Outflow during 1H FY2023 resulting in an outflow of AU\$0.485m for the month of Dec 2022 (43% improvement from Sep 2022).

We have seen a strong increase in trade revenue of 33% in 1H FY2023 in comparison to 1H F2022.

Following a review in the September quarter, our refined focus on the top global forwarders has resulted in a solid sales pipeline. Solid growth prospects for existing enterprise customers and an improving sales pipeline signals a progressive year in calendar 2023 for the Company. Anticipating challenging capital market conditions the review also focused on increasing the funding runway.

Our go-to-market strategy has been fine-tuned to better serve our existing enterprise customers and we are now moving through the pipeline much faster.

In the short period since launching this refined plan, we have approached and moved at least half a dozen top forwarders through multiple sales stages with some now in advanced stages. This represents a rate much faster than we could achieve before.

Digitising the forwarder-transport partner ecosystem is a top priority for major freight forwarders and the Company is strongly positioned to capitalise on this opportunity. An example of this is a Tier-1 enterprise shipping company client of Yojee who is showing stronger operational adoption across all freight movements in Indonesia and other APAC countries.

While this review did result in the removal of some revenue in non-core business, it enabled us to flex faster and towards profitability through higher gross margin operations. By honing in on higher margin areas like large enterprises, we are able to improve our bottom line and position ourselves for long-term success. The 43% reduction in operating costs will pay off in the future creating runway as we continue to execute on our plans and drive growth.

From a macro perspective, the logistics industry is increasingly digitizing in an effort to provide highquality services to all clients, not just those seeking premium services. Due to a slowing global demand, capacity utilization is lower, which means end customers have the bargaining power back in their hands to select their preferred logistics provider based on differences in service levels, such as best customer experience and lowest cost to serve. This trend is driving more customers towards our platform, as they are looking for ways to win amongst the competition in the logistics industry.

Yojee's foresight into these trends along with the broader market conditions means we can take our platform which is now plug and play for most use cases to market cheaper, faster and with more impact than we could before, across Asia Pacific.

Sincerely, Ed Clarke Co-founder and Managing Director

Yojee's platform is fully integrated across land, sea and air logistics providers and with subcontractors and for multi-leg journeys. Yojee is seeing a growing preference of shippers utilising trucking over other transport types within SE Asia, which plays into the strength of Yojee offering an end to end, multi-leg and cross border solution.

11 CONTINGENT LIABILITIES

The Group does not have any contingent liabilities as at 31 December 2022.

12 EVENTS SUBSEQUENT TO REPORTING DATE

No subsequent events were recorded by the Company as of the date of this report.

13 OPERATING SEGMENTS

All revenues and costs are handled centrally and management reviews financial information on a consolidated basis. The group is currently developing a sharing-economy based logistics technology platform targeting the Asia-Pacific region. On this basis it is considered that there is only one operating segment, the details of which are disclosed within this financial report.

14 GOING CONCERN

The financial report has been prepared on the going concern basis which contemplates continuity of normal business activities and realisation of assets and settlement of liabilities in the ordinary course of business. The going concern of the Group is dependent upon it generating increased cash receipts from sales growth, managing its costs and raising additional funds through future capital raisings.

For the six month period ended 31 December 2022 the Group recorded a loss before income tax expense of \$3,883,660 (2021: \$3,956,692), a net cash outflow of \$5,067,420 (2021: \$2,999,129), cash and cash equivalents of \$6,378,407 (30 June 2022: \$11,441,938), a net assets position of \$9,781,340 (30 June 2022: \$14,971,138) and a market capitalisation of approximately \$42 million.

The Directors have noted that, while the Group continues to operate at a loss, there has been meaningful year on year growth in revenue and there is a reasonable expectation of this growth trend continuing. The Directors continue to monitor the ongoing funding requirements of the Group on a monthly basis including the monitoring of costs. During calendar Q3, the Group conducted a thorough assessment of its cash outflows with the aim of extending its funding runway. This resulted in a 43% decrease in net cash outflows from September to December 2022, providing a stable foundation for future expansion.

The Directors believe that the Group can meet its financial obligations when they fall due enabling it to continue as a going concern and as such are of the opinion that the financial report has been appropriately prepared on a going concern basis. The Group continues to be engaged with its investors and capital markets advisors.

Should the Group be unable to obtain the funding, there is a material uncertainty as to whether the Group will be able to continue as a going concern, and therefore, whether it will be required to realise its assets and extinguish its liabilities other than in the normal course of business and at amounts different from those stated in the financial report. The financial report does not include any adjustment relating to recoverability and classification of recorded asset amounts nor to the amounts and classification of liabilities that may be necessary should the Group be unable to continue as a going concern.

DIRECTOR'S DECLARATION In the Director's opinion:

- a. there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable;
- b. the attached financial statements and notes thereto, are in accordance with the Corporations Act 2001, including compliance with AASB134 and the Corporations Regulations 2001; and give a true and fair view of the financial position and performance of the Group.

Signed in accordance with a resolution of the Directors made pursuant to s.303(5) of the Corporations Act 2001.

On behalf of the Directors

Material uncertainty related to going concern

We draw attention to Note 14 in the financial report, which indicates that the Group incurred a loss before income tax expense of \$3,883,660 during the half year ended 31 December 2022 and a net cash outflow of \$5,067,420. The Directors of the Company are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the Directors determine is necessary to enable the preparation of the half-year financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express a conclusion on the half-year financial report based on our review. We conducted our review in accordance with Auditing Standard on Review Engagements ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the half year financial report is not in accordance with the *Corporations Act 2001* including giving a true and fair view of the Group's financial position as at 31 December 2022 and its performance for the half-year ended on that date, and complying with Accounting Standard AASB 134 *Interim Financial Reporting and the Corporations Regulations 2001*.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
