### 3. REVIEW OF OPERATIONS

#### (a) GROUP OVERVIEW

The Group is an ASX-listed exploration and development company focussing on acquiring and exploring high-quality projects within the state of Western Australia. The Company's strategy is to discover major deposits on these projects either by itself or in joint venture with major mining companies.

#### (b) HIGHLIGHTS & SIGNIFICANT CHANGES IN STATE OF AFFAIRS

The highlights and significant changes in state of affairs during and subsequent to the end of the period include:

##### Project Highlights:

##### Mangaroon Rare Earths and Critical Minerals (100%)

- A total of 258 RC holes (26,862m) and 21 diamond drill holes (2,145m) have been completed since June 2022.
- Discovered the Yin, Sabre and Y8 REE ironstones, part of the ~43km Yin REE Ironstone Complex. The Yin Ironstone Complex is comprised of:
  - 3kms containing an independent initial JORC 2012 Mineral Resource ("Resource") of 14.36Mt @ 1.13% TREO with a Resource intensity of 4.8Mt/km; and
  - 40kms containing a JORC 2012 Exploration Target ("Exploration Target") of 50-100Mt at 0.9-1.3% TREO with a Resource intensity of 1.25-2.5Mt/km and a grade range of 1.13% TREO +/- 20%.
- The Initial Resource of 14.36Mt @ 1.13% TREO is based on 2.5 months of RC drilling (117 holes for 11,907m) between June-August 2022.
- Discovered six coherent zones of REE, niobium ("Nb"), titanium ("Ti") and/or phosphorus ("P") mineralisation within the ~9km x 1km C1-C5 carbonatites which remain open along strike and at depth.
- Drilled 19 diamond holes for detailed metallurgical test work across the Yin Resource with results expected to be received by April 2023.
- RC drilling recommenced at Yin in early 2023 to continue growing the existing Resource. This will be followed by first pass drilling along the Yin Exploration Target.

## Directors' Report

### **Mangaroon Ni-Cu-PGE (FQM Earn-In)**

- During the period, First Quantum Minerals Ltd (TSE:FM "FQM"), a ~A\$20B TSX listed Company, exercised an earn-in option over the Mangaroon Ni-Cu-PGE Project. FQM has funded the option period and can now earn an initial 51% interest by funding \$12M of expenditure by 1 March 2026. FQM may withdraw at any time during the earn-in phase with 0% interest. FQM also paid Dreadnought \$150,000 upon exercise of the option.
- The initial drill program along the Money Intrusion successfully confirmed the Money Intrusion as bladed/funnel shaped and fertile for magmatic Ni-Cu-PGE mineralisation with sulphides accumulating in trap sites within the intrusion.
- Work programs recommenced during the period along the Money Intrusion with FQM undertaking an additional ~12km of fixed loop electromagnetic ("FLEM") surveys. The FLEM surveys were completed in December 2022 with results expected in March 2023. The program is funded by FQM and is expected to deliver additional drill targets.

### **Mangaroon Au (100%)**

- In September 2022, Dreadnought acquired 100% of five tenements (~77 sq kms) covering major regional structures. The tenements host at least ten historic gold mines including the high-grade Star of Mangaroon, Pritchard Well and Twin Peaks gold mines.
- The tenements are strategically located between Dreadnought's 100% owned REE project to the south-east and the FQM Ni-Cu-PGE Earn-in to the north-west. The tenements are highly prospective for gold, base metals and REE.
- Dreadnought also agreed to acquire seven tenements (926 sq kms) in two separate transactions prospective for a range of minerals including REE.
- Dreadnought now controls ~5,300 sq kms in the Gascoyne region centred around the Star of Mangaroon gold mine.

### **Tarraj-Yampi Cu-Ag-Au-Co ("Tarraj-Yampi")**

- Nine high-quality Orion look-a-likes were identified from a highly successful auger program during the period, including six new gossanous and mineralised outcrops.
- Following this success, an expanded low-impact auger program, designed to identify additional Orion look-a-likes commenced in October 2022. Assays from the ~3,000 sample program are expected in the March 2023 quarter.

### **Central Yilgarn Gold, Base Metals, Critical Minerals and Iron Ore Project ("Central Yilgarn")**

- Dreadnought exercised its option securing 100% ownership over tenements E29/965 and E30/485 on 7 July 2022, providing 100% ownership over the highly prospective, 75km long, Illaara greenstone belt.
- On 9 July 2022, the Group executed a tenement sale and purchase agreement with Arrow Minerals Limited (ASX:AMD) to acquire a 100% interest in seven tenements covering ~100 strike kilometres over the Evanston and Yerilgee greenstone belts (~740 sq kms) west of and adjacent to the Illaara greenstone belt.
- In addition, Dreadnought acquired 100% of seven tenements covering ~100km of strike over the Evanston, South Elvire and Yerilgee greenstone belts (~740 sq kms) west of and adjacent to the Illaara greenstone belt. Dreadnought also agreed to an option to acquire three tenements (100 sq kms) prospective for a range of minerals including iron ore, nickel and gold.
- Successful drill results were received during the period confirming:
  - A fertile VMS base metals system at the Nelson Cu-Pb-Zn-Ag target.
  - Thick, high-grade, goethite-hematite iron ore at Spitfire.

## Directors' Report

- o Further high-grade gold at Metzke's Find that extends the mineralised structure >150m north and remains open to the north and at depth.
- o a fertile setting with the most fractionated pegmatites likely to the east under shallow cover at the Peggy Sue LCT Pegmatite Swarm.

### **Bresnahan HREE and Au Project ("Bresnahan")**

- Dreadnought controls >3,700 sq kms of prospective ground at Bresnahan.
- Reconnaissance "proof-of-concept" surface sampling along major basement structures and unconformities has produced significant light and heavy rare earth ("HREE") results including:
  - o BBRK0046: 1.33% TREO (31% NdPr:TREO and 25% HREE:TREO) comprised of:
    - 3.25 kg/t Nd<sub>2</sub>O<sub>3</sub>, 0.84 kg/t Pr<sub>6</sub>O<sub>11</sub>, 0.34 kg/t Dy<sub>2</sub>O<sub>3</sub>, 0.06 kg/t Tb<sub>2</sub>O<sub>3</sub>
  - o BBRK0050: 1.21% TREO (30% NdPr:TREO and 19% HREE:TREO) comprised of:
    - 2.80 kg/t Nd<sub>2</sub>O<sub>3</sub>, 0.77 kg/t Pr<sub>6</sub>O<sub>11</sub>, 0.25 kg/t Dy<sub>2</sub>O<sub>3</sub>, 0.05 kg/t Tb<sub>2</sub>O<sub>3</sub>
- The HREE results and associated P, Sr and Ba pathfinders are similar to those seen at the unconformity HREE Browns Range deposits owned by Northern Minerals Ltd (ASX:NTU).
- HREE attract a significant price premium to light REE.
- Bresnahan is believed to be the first application of the unconformity HREE model outside the Athabasca Basin in Canada and the North Australia Craton (including Browns Range) where the model was developed.
- Target generation and definition work will early in 2023 to develop drill targets.

### **Corporate Highlights:**

#### **A. The following are the corporate highlights during the half-year ended 31 December 2022:**

- On 14 July 2022, Dreadnought issued 8,500,000 unlisted options to its employees and company secretary vesting on 14 July 2023 via the Company's Incentive Security Plan. These options have an exercise price of \$0.065 and expire on 14 July 2025.
- In August 2022, the Group completed a placement at \$0.06 per share to institutional and sophisticated investors raising \$12,000,000 (before costs). On 5 August 2022, Dreadnought issued 200,000,000 shares relating to the placement. In addition, the Directors contributed a further \$350,000 to the placement, which was approved by shareholders at the AGM held on 30 November 2022. On 16 December 2022, 5,833,334 shares were issued to the Directors.
- On 17 August 2022, the Board created a Long-Term Incentive ("LTI") scheme to ensure employee/director alignment and retention while creating long term shareholder value. The scheme sets significant targets that when met, are expected to have a material, beneficial impact on Dreadnought's enterprise value and Dreadnought's preferred employer status.

The LTIs, issued on 16 December 2022, were divided into three equal tranches. Each tranche vests upon the Company announcing, during the vesting period, a Resource of TREO as follows:

- o Tranche 1: A Resource of at least the Inferred category of 10Mt @ >1% TREO by 31/12/2022 (these rights vested on 28 December 2022 and 10,183,335 ordinary fully paid shares were issued to eligible Directors and employees on 13 January 2023).
- o Tranche 2: A Resource of at least the Inferred category of 20Mt @ >1% TREO by 31/12/2023.

Accordingly, this Interim Financial Report is to be read in conjunction with the Annual Financial Report for the year ended 30 June 2022 and considered together with any public announcements made by the Company during the period and up to the date of this report in accordance with the continuous disclosure obligations of the ASX Listing Rules.

### 2. BASIS OF PREPARATION (CONT'D)

#### (b) Key estimates

The preparation of the Interim Financial Report requires management to make estimates and judgments. These estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Group and that are believed to be reasonable under the circumstances.

Please refer to the Group's 30 June 2022 Annual Financial Report for information on the Group's judgements, estimates and assumptions.

#### (c) Going Concern

The Interim Financial Report has been prepared on a going concern basis which assumes the Company and Group will have sufficient funds to pay its debts, as and when they become payable, for a period of at least 12 months from the date the Interim Financial Report is authorised for issue.

As at 31 December 2022, the Group had net assets of \$32,317,209 (30 June 2022: \$19,050,734 (restated)). During the half-year, the Group had cash outflows from operating activities of \$575,846 (31 December 2021: \$765,785 (restated)) and cash outflows from investing activities (including payments for exploration and evaluation activities) of \$10,737,965 (31 December 2021: \$3,953,323 (restated)). The details of the prior period restatement are disclosed in Note 2(d).

Based on a cash flow forecast prepared by management, with the Company's working capital surplus at 31 December 2022 and the Company's ability to raise funds and to reduce costs if necessary, the Directors consider the going concern basis of preparation to be appropriate.

#### (d) Prior period adjustments

In prior years, the Group has recorded the reimbursement of capitalised exploration costs by the earn-in party at the Mangaroon Ni-Cu-PGE Project as revenue in the consolidated statement of profit or loss. In substance, this is the portion of exploration costs required as part of the Earn-in Agreement and should have been recognised as such. The reimbursement of capitalised exploration costs for the financial year ended 30 June 2022 amounted to \$306,362 and for the financial year ended 30 June 2021 amounted to \$158,116 totalling \$464,478. For the half-year ended 31 December 2021, the net amount credited to capitalised exploration costs is \$56,939 which relates to the total amounts received from the earn-in party of \$73,930 previously offset to administration expense less \$16,991 which is now considered as actual revenue item in the consolidated statement of profit or loss.

The following table summarises the impact of the prior period adjustment on the consolidated financial statements of the Group:

The Directors of the company are responsible for the preparation of the interim financial report that gives a true and fair view in accordance with the Australian Accounting Standards and the Corporations Act 2001 and for such internal controls as the directors determine is necessary to enable the preparation of the interim financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

## Auditor's Responsibility

Our responsibility is to express a conclusion on the half-year financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the Corporations Act 2001 including: giving a true and fair view of the consolidated entity's financial position as at 31 December 2022 and its performance for the half year ended on that date; and complying with Accounting Standard AASB 134 Interim Financial Reporting and the Corporation Regulations 2001.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
