

DroneShield releases DroneGun Mk4™

DroneShield Ltd (ASX:DRO) ("DroneShield" or the "Company") is pleased to release a breakthrough new product, DroneGun Mk4™, following extensive development in response to end-user feedback. The product is available for purchase from today to qualified end-users, where lawful¹.

Product summary is available at: <https://www.droneshield.com/products/dronegun-mk4>.

DroneGun Mk4™ is a portable pistol-shape drone jammer, weighting 3.2kg. The Company believes this product is peerless globally, for its combination of size and effectiveness.

DroneGun Mk4™ is designed as an addition to the DroneGun product line, rather than replacing the highly successful long range DroneGun Tactical™, and the ultra-lightweight DroneGun MK3™, providing an optimal balance between size and capability.

DroneGun Mk4™ can also be used in combination with other DroneShield products, including the RfPatrol™ body-worn detection device and the DroneSentry™ stationary multi-sensor detection system.

¹ DroneGun Mk4™ has not been authorized as required by the federal communications commission ("FCC"). This device is not, and may not be, offered for sale or lease, or sold or leased, in the United States, other than to the United States government and its agencies, until such authorization is obtained. The use of DroneGun Mk4™ in the United States by other persons or entities, including state or local government agencies, is prohibited by federal law. Laws limiting the availability of DroneGun Mk4™ to certain types of users may apply in other jurisdictions, and any sales will be conducted only in compliance with the applicable laws.

Angus Bean, DroneShield Chief technology Officer, commented: “DroneGun is an iconic DroneShield brand of products, from the original first-generation unit released in late 2016, to this latest offering. The product line has a deep heritage globally including U.S. DoD and all main western militaries, intelligence community globally and law enforcement customers. This product features break-through technologies such as advanced waveforms to offer unparalleled performance for its size and weight.”

This announcement has been approved for release to the ASX by the Board.
