Type: ETF = Exchange Traded Fund, SP = Structured Product, Share = Redeemable Preference Share

* Average % Spread = provides the time weighted average of all bid/ask spreads as a percentage of the mid price. The bid/ask points used for the computation correspond to the quotes received for the period for the first business day of the month until the last business day of the month. Bid/ask spread points are only considered during the continuous trading period, and only when the spread is defined and non-negative.

^ Identifies an ETF that invests in whole or in part into another ETF admitted to ASX.

** Funds Inflow / Outflow represents the value of the units that were issued and redeemed during the reporting month, as disclosed by the issuer.

*** CHESS Funds Inflow / Outflow represents the number of CHESS units changed times by the end of the month close.

† The FUM for each ETP is based off the last reported number of units multiplied by the closing price on the last Transaction day of the month. This figure does not take into account fund-of-fund structures that invest into other ASX-quoted ETPs (i.e., these figures may appear to double-count the figure).

†† MER (management expense ratio) figures have been extracted from the relevant PSD or as updated by the issuer of the product. Under the Corporations Regulations, management costs do not include transactional or operational costs or certain other fees and costs which may also apply. Such costs may be significant. When considering a product or comparing between products you should refer to the relevant PSD(s) for more information on any additional costs associated with each product.

All values are as at Apr-25. Month Total return, 1/3 & 5 year return data and spread % data is provided by Bloomberg. Dividends are reinvested. Gross dividends are used in the calculation for returns. Price is used to calculate total returns.

Spreads in international ETFs and some ETCs can vary throughout the day due to opening hours of the underlying markets. Please contact the product issuers for further information.

Past Performance is not a reliable indicator of future performance.

Past Performance is not a reliable indicator of future performance.

*** Funds Inflow / Outflow represent the number of units changed times the end of month closing redemption price.

The FUM for each mFund is based off the last reported number of units recorded in CHESS multiplied by the closing price on the last Transaction day of the month. MER (management expense ratio figures have been extracted from the relevant PDS or as updated by the issuer of the product. Under the Corporations Regulations, management costs do not include transactional or operational costs or certain other fees and costs which may also apply. Such costs may be significant. When considering a product or comparing between products you should refer to the relevant PDS(s) for more information on any additional costs associated with each product.

All values are as at Dec-24. Month Total return, 1/3&5 year annualised return data provided by Financial Express.

The Market Value for each product is based off the last reported number of units recorded in CHESS multiplied by the closing price on the last Transaction day of the month. Any updates to the number of units on issue received post the last Transaction day of the month are not picked up until the following month.

All values are as at Apr-25. Month Total return, 1/3&5 year annualised return data provided by Bloomberg. Dividends are reinvested. Gross dividends are used in the calculation for returns. Price is used to calculate total returns.

Past Performance is not a reliable indicator of future performance.

Spotlight: Infrastructure
